Gentlemen of the Press,
Distinguished Ladies and Gentlemen.

I feel highly honoured and privileged to deliver a good will message on behalf of all the Chairmen of Local Governments in Ekiti State.

This is a moment of joy in the State as transformation is taking place in the facet of human endeavour. The Government of ACN under the leadership of His Excellency, Dr. Kayode Fayemi has started a new era of creating wealth through its Eight Point Agenda.

The collaborative effort of the State Government with the DFID will further strengthen the good work of the State Government.

The role of the DFID to the socio-economic emancipation of the people can not be overemphasized. Indeed, the roles if thoroughly harnessed in the State again will assist in achieving the objectives Millennium Development Goal strategy (MDGs). The deliberate effort of this Government to develop the State within one year was felt in the grass root, I mean across the Sixteen Local Government of the State.

I thank the management of DFID, the co-ordinator of NGF, the consultants and all the participants for painstakingly participating in the stakeholder's forum and I hope all the agreed objectives will be worked towards.

Thanks.
