

This publication seeks to, as much as possible, capture the achievements of the government in the years from May 29, 2003 to May 29, 2009.

Prince Olagunsoye Oyinlola came on board on May 29, 2003 to recreate Osun State from the chaos and near anarchy he inherited from the Alliance for Democracy government of Chief Adebisi Akande. And on 29 May, 2007, he was sworn in again for another four years after winning decisively the April 14, Governorship election of that year.

With the new mandate, the administration launched out to continue the good work it started in 2003. Six years on the saddle, the Oyinlola government has constructed/rehabilitated cumulatively, about 1,000 kilometers of roads. It has built 34 mini water schemes, over 4,000 classrooms. The pledge to replace all dilapidated classrooms built by the Awolowo government in 1955 has been largely fulfilled. The newly established six-campus Osun State University successfully took off from the permanent sites in September, 2007: - Permanent befitting structures have been put up in all the campuses. The institution is steadily moving towards its destiny as a world class, technology driven University in Nigeria.

Free education and free health care delivery remain cardinal programmes of the government. Some cynics thought it was mere political talk. The government has shown the whole world that it is possible to make tuition free in schools, supply students with free textbooks and writing books, give bursary to students, and make teachers comfortable even with a very lean government purse. The Oyinlola government has not only made health free, it has made sure that all essential drugs and equipment like X-Ray machines and dental equipment are in government hospitals. There is also a drug manufacturing factory in Osogbo.

As stated last year, traditional rulers have continued to be held in high esteem. Religious leaders, market men and women, artisans, youth groups and other stakeholders remain partners with the government in the running of the affairs of the state. The result of this collective movement of the people has been unbroken development in all sectors of the state in an atmosphere of peace.

Agriculture and commerce in the last five years were pursued in a way that emphasized their symbiotic relationship. With 336 tractors, the government has continued to pursue agricultural mechanization believing rightly that it could be used to propel the engine of industrial development of Osun State. An example of the success in this direction is the establishment of 15 cassava processing factories across the state.

Development of man was made the focus of all policies of government. Artisans and other low income economic groups received interest free loans from government just as thousands of new jobs were created in the teaching and civil service in the last six years.

Courtesy of Governor Oyinlola's government, Osun state which as at May 29, 2003 had no Government House in Osogbo, the state capital within the first one year, a Government House was in place in Osogbo. A Presidential Lodge as well as six guest chalets named after former governors of the state were subsequently added to it. The Government has also built a one-in-town Governor's Lodge in Abuja while a multi-storey building to host the state's Liaison Office is also being constructed in Abuja. The formerly decrepit Osun House at Ikoyi, Lagos is now one of the newest buildings along Cooper Road. No sector has been left unattended to.

From the Federal government, Prince Oyinlola has been able to attract a Free Trade Zone, an Airport, a branch of the Central Bank of Nigeria and an NNPC mega Station to Osogbo from which several people have been benefiting. Ilesa, Iwo and Ile-Ife Water schemes also got the attention of the Federal Government. Apart from UNESCO listing Osun Osogbo grove as a World Heritage site, it has also established the Centre for Black Culture and International Understanding in Osogbo which will contain the Archives of Professor Ulli Beier and his wife, Georgina while people in the opposition may decide to close their eyes to all the great things happening around them in Osun State, what will be difficult for them to deny is the air of security and peace blowing for all to enjoy. This necessity was regarded by those immediately before Prince Oyinlola as a luxury which they tampered with, at will.

## ROAD CONSTRUCTION

As at May 29, 2003 when the Oyinlola administration came to power, Osogbo, the Osun State capital was nothing but a glorified local government headquarters when compared with other state capitals across the country. The state's road network was in a bad shape. The Oyinlola administration corrected these anomalies by initiating and sustaining efforts in the construction and rehabilitation of major roads in virtually all the zones in the state. The government in 2004 dualised the Oke-fia West Bye-Pass Junction Road. Work is almost completed on the dualisation of the Osogbo-Gbongan road (Akoda Junction). Many other roads across the state have been built and completed. In summary, about 1000km of roads have either been constructed or rehabilitated by the present administration. Many other new road projects have been awarded in recent time.

Some of the roads constructed/rehabilitated are:

S/NO	PROJECT	LENGTH	CONTRACT DURATION (MONTHS)	REMARKS
1.	Dualisation of Oke-fia Osogbo West Bye Pass Junction Road	4.35km	9	Completed
2.	Gbongan-Ile Ogbo Road	23.60km	12	Completed

Since 2003, the education sector under the present administration has witnessed tremendous development. The government has made the provision of quality structures and instructional materials to all primary and secondary schools in the state a priority. It set a clear record with the establishment of the Osun State University; a multi campus citadel of learning which commenced academic activities in September, 2007 in all its six permanent campuses.

## PRIMARY AND SECONDARY EDUCATION

Primary and secondary education in Osun State is tuition-free. Students in these public schools also receive free textbooks and exercise books from the Oyinola administration. The government also feeds, free of charge, 125,000 pupils in kindergarten and primary one in all public primary schools in Osun State. In the area of provision of physical structures, the governor promised to replace dilapidated public school buildings and in the last six years, over 3,000 new classrooms were built. Adequate furniture for the new classrooms was also provided.

The welfare of teachers and others in the education sector has been accorded a priority. This has shown especially in the regular promotion of the over 20,000 teachers in the state. Car and housing loans have also been given to the teachers to better their lot.

## PRIMARY EDUCATION

The administration of His Excellency, the governor of Osun State, Prince Olagunsoye Oyinola, has always given priority attention to the development of Education, by way of provision of conducive environment for teaching and learning in the state public primary and junior secondary schools. Education at these levels is considered as very basic to the development of other sectors of the system. Emphasis is being placed on infrastructural development, provision of instructional materials and teachers' professional development, through workshops and seminars.

Major achievements recorded are in the area of provision of infrastructural facilities through construction of blocks of classrooms, VIP/Squatting Toilets, deep wells and provision of furniture items for students and teachers in the Public primary and junior secondary schools that cut across the geographic zones of the state.

Furthermore, teachers were trained on

pedagogical skills in core-subject areas of English Language, Mathematics, Social Studies, Introductory Technology and Integrated Science.

The provision of instructional materials covered all the core-subject areas, with particular emphasis on Textbooks, Educational Charts, School Records, Dictionaries and other teaching aids.

Over 3,000 classrooms have been constructed with the supply of about 44,419 pupils/students' furniture and 547 teachers furniture to public primary and junior secondary schools in the state. However, 44 classrooms were renovated to accommodate more pupils in the schools. In addition, 199 VIP toilets with 43 squatting toilets were constructed to improve on the sanitation problems in schools.

On Teachers Professional Development Programmes, 2,441 teachers from public Early Child Care Development Education (ECCDE) Classes, 22,340 teachers from public primary classes, 10,770 teachers from the junior secondary classes were trained on improved pedagogic skills in the various core-subject areas.

The instructional materials purchased include 625,001 textbooks on core-subject areas for both public primary and junior secondary schools. In addition, 40710 Charts/Aids were also supplied with 40,385 schools records and 600 schools curriculum.

It is pertinent to state that the State Government has provided the counterpart fund of N1,668,743,241.73 to implement the Universal Basic Education Programmes to date.

## FEDERAL INSTITUTIONS

Two Federal Government-owned institutions of higher learning in Osun State Obafemi Awolowo University, Ile-Ife and the Federal Polytechnic, Ede have also benefited from the Oyinola government. The Federal Polytechnic, Ede, for instance has had sixty million naira (N60million) released to it by the state government for the construction of an auditorium which has been completed and inaugurated.

## TERTIARY INSTITUTION

The government increased the funding of its four tertiary institutions the State Polytechnic, Iree, College of Technology, Esa-Oke and the Colleges of Education at Ila Orangun and Ilesa. In the last six years of the Oyinola administration, there have been tremendous improvement in physical infrastructure and academic programmes in the schools.

# OSUN STATE UNIVERSITY

**O**sun State University was set up as a conventional, multi-campus university charged with the production of high quality, well-rounded, globally competitive and entrepreneurial graduates who will be catalysts for the rapid and sustainable socio-economic development of Osun State and Nigeria. Although, the university is a conventional one, it optimizes the application of Information and Communication Technology (ICT) in its teaching, learning and research activities.

The university runs conventional academic programmes with slants that are relevant to the socio-economic development of Osun State and Nigeria that will lead to the production of globally competitive graduates. Its main campus is located in Osogbo and branch campuses in each of the geo-political zones of the state to ensure that quality university education is decentralized and taken as close to all parts of Osun State as possible. The university places high premium on the provision of entrepreneurial education with high ethical and moral standards for all its students.

In order to achieve its academic objectives, the university operates a collegiate system comprising the following colleges: College of Health Sciences: College of Science, Engineering and Technology: College of Humanities and Culture; College of Management and Social Sciences: College of Law, College of Agriculture and College of Education. The colleges took off simultaneously in September, 2007. Projects executed are as follows:

Main Gate of the Osun State University, Main Campus, Osogbo

## THE HOME GROWN SCHOOL FEEDING AND HEALTH PROGRAMME

The Home-Grown School Feeding and Health Programme was introduced by the Oyinlola administration in May, 2006. It was originally designed by the Federal Government to improve nutritional values of school-age children with a view to promoting healthy living and boost school enrolment. Osun State was one of the twelve pilot states picked by the Federal Government to kick-start the programme in Nigeria. It is, however, instructive to note that out of the twelve pilot states, Osun State is the only state, as of today, still implementing the programme. All other states have abandoned the programme due to one reason or the other. Even the Federal Government is no longer interested in the programme.

The Osun State Government has committed over N2billion to the programme since its inception. Governor Olagunsoye Oyinlola has, however, vowed to continue with the implementation of the programme despite its financial burden because of its positive effects on the children, their parents and the larger society. The governor deserves kudos for his dogged commitment to the cause of the educational and social development of the state, particularly the down trodden and the children, the class of people this programme focuses on. In spite of all odds, Osun State has been serving free highly nutritious meals to its primary school pupils every school day for about four years now.

### Osun State Story:

Sharing the national vision of this programme, which is to have a nation of well-nourished and healthy children who are happy and eager to attend and complete their basic education, Osun State enthusiastically embarked on the programme and effective feeding took off on 1st

May, 2006 with the following menu:

Monday: Rice + stew + fish  
 Tuesday: Porridge + Vegetable + Egg (with 1 whole egg per child)  
 Wednesday: Rice + Beans + Egusi + Vegetable + Fish + Cocoa drink  
 Thursday: Beans + Stew + Fish  
 Friday: Rice + Vegetable + Fish

Prior to the commencement of the programme, a befitting secretariat was provided for the programme. The secretariat was well equipped and also vehicle and materials such as aluminum eating bowls, cups and spoons to cater for 130,000 pupils, were provided by the state government for the take-off of the programme. 1,600 cooks were employed, trained and supplied with aprons and head scarves.

Sensitization was done for all stakeholders. Therefore, the programme took off smoothly and has continued uninterrupted for pupils in all the 1,320 public primary schools in Osun State till today. Over 130,000 pupils drawn from kindergarten (KG) to Primary Two are currently being fed with nutritious menu daily in Osun State.

Each primary school pupil from KG to Primary Six is served a sachet of cocoa drink once in a week. Deworming is done regularly. Deworming is to ensure that the government is not feeding the worms instead of the children.

### Mode of Operation:

The programme does not make use of food contractors. Disbursement of funds is direct to individual each cook's bank account. The cooks are paid N28.00 per child per day but N38.00 per child on Tuesday, the day that a whole egg is served along side the meal of each child. Cooks buy the needed food items directly on their own and do the cooking in each school's kitchen, which was constructed by the local government in which such a school is located or the Parent Teachers Association of the school. Monitoring is done by the school Based Monitoring Committee, the Inspectorate Division of the State Ministry of Education and the State Programme Office. Records of monitoring are kept using the carefully constructed monitoring instrument (made in triplicate and into booklets).

### Funding:

The programme is supposed to be jointly funded by federal, state, local governments and private donors. However, in spite of the fact that the Federal Government has paid just one installment of N88,788,460.00 out of thirteen installments since the commencement of the programme, the Osun

# EDUCATION

State Government and all the local governments in the state have continued to carry on with the implementation of this programme. Between 3rd May, 2006 and 31st August, 2009, over N2.5 billion has been spent on the programme in the state. It is hoped that philanthropists, NGOs and donor-agencies will come to the aid of the state government in funding this laudable programme.

### Advantages:

It is gratifying to note that the programme has recorded a lot of achievements and benefits, some of which are:

- \* Restoration of confidence in public schools (private schools are steadily losing children to public schools and closing down);
- \* Unprecedented upsurge in school pupils' enrolment;
- \* Improvement in the health status of pupils. This results from improved nutrition and deworming;
- \* Pupils' interest in schooling has been rekindled and sustained by the feeding programme. With the availability of free feeding in schools, pupils do not want to miss school for any reason. The joyous look on their faces at meal time is a thing that gladdens the heart which is better seen than imagined;
- \* Improved school attendance together with good nutrition have led to the present apparent better academic performance of children;
- \* Financial empowerment of cooks is another benefit. Over 2,500 cooks are now employed for this programme;
- \* Increased food production and increase in agricultural produce sales e.g. egg production and sales have greatly improved.

Two state committees oversee the programme with the Special Adviser to the Governor on Education serving as the State Programme Officer. The Osun State HG/SF/HP has come to be regarded as

the best in the implementation of the programme. It has received accolades from all over the country and even from abroad. The following comments from various visitors have confirmed this:

### **"It is the best in the country"**

- Akinmagbe Ayodele (UBEC Officer)

### **"The state is a pace-setter"**

Iro Godwin (Monitoring Officer from the National Bureau of Statistics)

### **"Very impressive"**

Jim Edgerton (World Bank Consultant, NAPEP, Abuja)

### **"Osun State is leading"**

Mrs. E. B. Omojowo (Federal Ministry of Education).

### **"The management of the programme in Osun State unequal compared with other states."**

- Dr. S. Uhiane (The Presidency, NEPAD, Abuja).

### **"Scale of implementation fantastic"**

Dr. Jacob Kolo (DG NEPAD, Niger State).

### **"Excellent Programme with good practices and Management, very impressive"**

Arlene Mitchell (Bill and Melinda Gates Foundation, USA).

In recognition of the success of Osun State in this programme, the State Programme Officer was invited to the Global Child Nutrition Forum (GCNF) and Joint Aid Management (JAM) School Feeding Round Table in Stelebosch, Cape Town, South Africa in May, 2009. A paper presented by the State Programme Officer, entitled: "Spotlighting Osun Case," was well received by the international body.

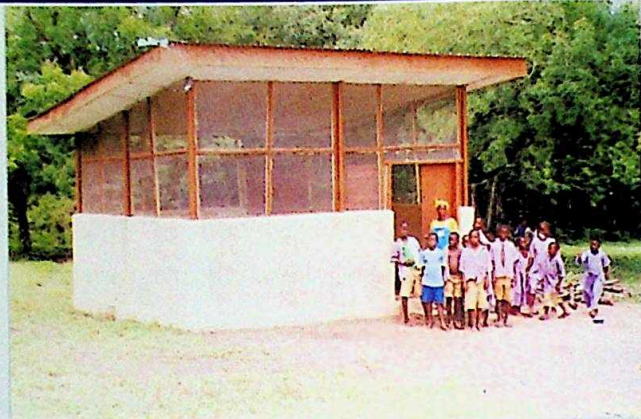

The governor and the government of Osun State, through this programme, are impacting very positively on public primary school children who are tomorrow's leaders, thus making good investment in the future.

## **SOME OF THE PROJECTS AT THE OSUN STATE COLLEGE OF TECHNOLOGY, ESA-OKE**

1. Preliminary Village Hall II
2. A 1000-seater capacity lecture theatres
3. A cross section of the institution cybercafé
4. A 1000 capacity lecture theatre
5. One of the three (3) 408-seater capacity lecture Hall
6. Metal seats for one of the 1000 capacity lecture theatres
7. Construction of 2 blocks of 36 rooms complex with Conference rooms (Housing Administrative Complex II and the Faculty of Environmental Studies)
8. Construction of 2 blocks of 5 lecture rooms for the Faculty of Environmental Science
9. Construction of a banking hall for the Community Bank of the Institution

## **SOME OF THE PROJECTS AT THE OSUN STATE**

**COLLEGE OF EDUCATION, ILESA**

1. Construction of a borehole at School of Vocational Technology
2. Provision of furniture for students
3. Supply of office furniture, rug and window blind
4. Supply of Laboratory equipment
5. Supply of Educational Technology Equipment
6. Supply of Medical Equipment
7. Supply of Computer Sets
8. Procurement of Rotary Slashes
9. Installation of 800-seater Lecture theatre seats
10. Supply of Computers through Oodua
11. Restoration of power supply to library, Health Centre and Lecture Theatre
12. Restoration of power supply to library, Health Centre and Lecture Theatre
13. Construction of 3 sub-stations
14. Purchase of Lawn Mowers
15. Teaching, Research, Medial and Office equipment supplies provided regularly to enhance the work output of members of Staff for improved student learning
16. Computerisation and massive procurement of books and periodicals for the College Library
17. Provision of Internet facility as part of computerisation efforts
18. Installation of Telecommunication mast for better network reception
19. Procurement of lawn mowers, rotary slasher and tractor implements
20. Beautification of the College Gate
21. Provision of Infrastructural facilities
  - (i) Business Education studio at the School of VOTECH
  - (ii) 1 Lecture Theatre in the College
  - (iii) Two functioning boreholes in the college at the Mini-mart and VOTECH
  - (iv) 1 Parking Lot
  - (v) Two medium sized lecture halls Alumni and Ilesa West
  - (vi) Improved water supply-sinking of deep wells
  - (vii) 500KVA Generating set
  - (viii) Administrative block phase II for the Registry Department
  - (ix) Computer of roads and drainages

- (x) Two computer laboratories with 27 computers courtesy of Odua Investment Company Ltd.
- (xi) Computers for all Schools, Directorates and major administrative units of the College
- (xii) Rehabilitation of boreholes and deep wells (The State Government recently utilized the College Dam for mini-water scheme for the college and environs)
- (xiii) Procurement of lecture chairs every year.

Set of computer at a Osun State College of Education, Ilesa

Over 100 Computer sets purchased for the OSCOTECH, Esa-Oke

College Cyber Café, Osun State Polytechnic, Iree.

**T**he Ministry of Health is the policy formulating organ of the state government on health matters. Since May 29, 2003 when the present administration of Prince Oyinlola came on board, the Ministry has recorded remarkable achievements in the provision of infrastructural facilities in health institutions. The availability of these facilities is enhancing the provision of free qualitative health care services to the citizens of the state.

Health care policies and health care delivery services of the state government are formulated and executed largely through two main government agencies viz the Ministry of Health and the State Hospitals Management Board. The former has the overall responsibility for formulating and executing government policies on health care and health care delivery services while the latter oversees the management and maintenance of the hospital/health care outlets as well as human resources.

The State Ministry of Health also coordinates the local government health activities and renders necessary advisory and technical assistance to them in the provision of Primary Health Care Services to the citizens at the primary level.

The government also provides tertiary health care services to the citizens of the state through various assistance provided to LAUTECH Teaching Hospital, Osogbo, which is jointly owned and financed by Oyo and Osun State Governments.

### THE STATE HEALTH POLICY

On taking over the administration of the state, the present administration met a free health programme policy. Despite the health policy of the ruling Peoples Democratic Party at the national level, the state government continues with its Qualitative Free Health Programme in order to fulfill its election campaign promises

### COMPONENTS/STRATEGIES OF FREE HEALTH PROGRAM

The two major components of the free qualitative health programme are free Primary Health Care and free Secondary Health Care.

*Under the Primary Health Care, the strategies, which have been embarked upon since 2003, are:*

- Free immunization for children 0-5 years against the six childhood killer diseases.
- Free immunization for women of reproductive age against tetanus.
- Free distribution of micronutrient to children 0-5 years and pregnant women.
- Free mass immunization against the deadly diseases of yellow fever, hepatitis B and cerebrospinal meningitis.
- Free treatment of citizens against onchocerciasis.
- Free treatment for confirmed cases of tuberculosis and leprosy and
- Provision of health information, education and communication materials for effective prevention, control and management of communicable diseases.

*The Free Secondary Health Care consists of:*

- i. Free registration of patients
- ii. Free consultation
- iii. Free minor investigations like P.C.V, malaria parasite and urinalysis
- iv. Free medication with essential drugs.
- v. Free minor surgeries like incision and drainage
- vi. Care of pregnant women that include:
  - (a) Free pre natal care
  - (b) Free normal deliveries
  - (c) Free suturing of episiotomies
  - (d) Free medication with essential drugs during labour and delivery
  - (e) Free emergency caesarian section
  - (f) Free assisted delivery (forceps/vacuum) and
  - (g) Free post natal care.

### DRUG SUPPLY POLICY

With the operation of qualitative free health programme, drugs are dispensed free of charge to patients in all the state and local government-owned health facilities.

The supply and stock of drugs are of paramount importance to the government. There is a multi-purpose built State Central Medical Stores for proper storage. There are qualified

Hostel for Students of School of Nursing, Asubiaro, Osogbo

and experienced pharmacists and support staff to take care of the drugs, including in the thirty (30) Local Government Councils and one area office where a pharmacist each is employed. In addition, the government is constructing a drug manufacturing company in Osogbo, the state capital, to enhance the production of drugs in large quantity as a way of ensuring constant supply of drugs in all the state-owned facilities.

The state under the administration of Prince Olagunsoye Oyinlola procured essential drugs and medical consumables worth N800 Million to boost its free health service scheme. The drugs were and are still being distributed to all public health institution at both the state and local government levels.

**HEALTH CARE DELIVERY SERVICE PROFILE**

There are about 1,020 health care facilities located throughout the state. Two of these are tertiary teaching hospitals, 55 are secondary health care facilities owned and managed by the Osun State Government, 532 are primary health care facilities owned and managed by the 30 local government councils and about 430 are owned and managed by private practitioners.

**OSUN STATE GOVERNMENT HOSPITALS DATA**

YEAR	OUT PATIENTS ATTENDANCE	HOSPITALS ADMISSION	AMBULANCE CARE CLIENTS	DELIVERIES
2003	607100	6290	31785	2919
2004	600246	8176	42533	4447
2005	585,359	8556	38626	4245
2006	549,496	8517	32934	4053
2007	410,144	5801	30892	3194
2008	495988	8133	35817	3795

**QUALITY CONTROL IN HEALTH DELIVERY SYSTEM**

The Oyinlola administration is concerned with the quality and level of services rendered to the people at its healthcare facilities. To ensure safety at all the health care facilities, there are institutional standards and regulations to be complied with by all health care centres. Private health care centres are subjected to quality checks on inspection before they are registered. Routine and periodic inspections are carried out before the certification is renewed annually. A three-day workshop was organised by the Ministry for Association of General and Private Medical Practitioners, Association of Private Nurses and Midwives, Association of Private Medical Laboratory Scientists, and Proprietors and Proprietresses of Private Health Establishments. The theme of the workshop was: "Improving Health Care Delivery in the Private Health Sector." Drug

vendors are licensed and regularly subjected to quality checks. Public-owned hospitals are subjected to several tiers of monitoring.

The State Hospitals Management Board institutionalizes a monitoring system at both the zonal and head office levels.

### THE FREE HEALTH PROGRAMME FEEDBACK

The number of patients that are attending the state-owned hospitals is very significant in determining the utilization of the qualitative free health programme. The figures compare favourably with what obtained in the recent past and this shows that the programme is very popular among the people of Osun State. The figures below reflect the hospital attendance during the period under review.

The increment in the number of patients who attended government hospitals is largely due to prompt attention given to patients, an effective drug stock control system, drug procurement policy, adequate funding and easy accessibility of the hospitals to the people. The spate of 'out of stock syndrome' and other systemic problems have given way to abundant supply of drugs and dressings at the hospitals.

### HEALTH FINANCING

The Ministry of Health, since the inception of the Oyinlola administration, is always receiving financial and logistic supports from the government. Salaries and allowances of workers are paid as at when due and the allocated running cost is disbursed appropriately. More than 6% of yearly budget estimate is allocated to the health sector.

### QUALITATIVE FREE HEALTH SERVICES

The state operates qualitative free health services with the provision of essential drugs and medical consumables free of charge to all patients in state-owned health facilities, including those in the 30 Local Government Areas and the one area office, located at Modakeke. This is to reach every citizen irrespective of their place of abode within the state. To this end, drugs and medical consumables worth almost N800 million were procured and distributed to all health facilities. The total worth of drugs

procured for the Central Medical Stores annually for the last four years is as follows:

2003	-	N185,817,845.75
2004	-	161,831,925.05
2005	-	170,347,271.10
2006	-	178,561,072.30
2007	-	87,131,288.40
2008	-	106,456,436.00
Jan June (2009)	-	106,875,656.20

Some of the essential drugs were customized to reduce pilferage. With the current free health policy more than 95% of the pharmaceutical needs of patients in Osun State are being met.

### OSUN STATE DRUG MANUFACTURING COMPANY:

In order to enhance availability of drugs in all government hospitals at all times, the state government built the Osun State Drug Manufacturing Company at Osogbo. This is to assist the government in providing good quality and customized drugs and medical consumables at a reasonable cost to the patients. The construction of the factory, which gulped over N100m has been completed. Moreover, the delivery and installation of manufacturing equipment (production and quality control machines worth \$1.998 USD) are in progress. Arrangement has reached an advanced stage for the procurement of furniture and office equipment for the company. This will cost about N19,671,769.00. The ultra modern drug manufacturing company is to be inaugurated soonest.

### STRENGTHENING OF PHARMACEUTICAL INSPECTORATE

The present administration has strengthened the Pharmaceutical Inspectorate through:

Employment of Pharmacists: The government approved the employment of two (2) additional pharmacists into the Pharmaceutical Department of the Ministry.

Patent and Proprietary Medicine Vendors (PPMVL):- Control and monitoring are to ensure that Patent and Proprietary Medicine Vendors comply with regulatory standards in ensuring that only good quality drugs are being

circulated in Osun State through privately-owned drug outlets. Moreover, the drug distribution outlets in the state are sanitized through regular effective pharmaceutical inspectorate activities.

**UPGRADING OF PHARMACY UNIT** of State Hospital, Asubiaro Osogbo to allow pharmacy internees to be trained.

**DRUG ABUSE CONTROL ACTIVITIES**

The above-named committee was resuscitated by the present administration. Maximum support was received from the governor to curb the menace of drug abuse and illicit drug use in Osun State. Enlightenment and educational activities were carried out so as to improve the awareness of the public on responsible drug use and dangers inherent in abuse and misuse of drugs.

The Ministry of Health marked the 2009 UN Anti-Drug Abuse Campaign on the 26<sup>th</sup> June. The campaign, which was tagged “Drug Trafficking and Crime Control”, was taken to the Spare part Dealers Association, Osogbo. Drama and debate on the theme were presented to secondary school students in the state.

**PROCUREMENT OF 31 AMBULANCES**

The government purchased 31 ambulances for the 30 Local Government Councils and Ife East Area Office for easy referral process to higher hospital level. Another six special ambulances were

purchased and distributed to the six zones of the state. The EU Prime also donated 31 vehicles to all the LGAs for immunization.

The State Ministry of Health has also taken delivery of a large vaccine cold room donated to the state by the EU Prime.

The Federal Ministry of Health also donated 22,000 Long Lasting Insecticide Nets (LLIN) worth N30,800,000 to the state for distribution to all the local government areas of the state.

**REGULATORY AND MONITORING SERVICES**

Effective regulatory and monitoring services for private health establishments in the state were

Pharmacy Building at the State Hospital, Asubiaro, Osogbo

carried out to ensure that quality health services were delivered by private health establishments.

The private health establishments, which include hospitals/medical centres, maternity/ convalescent centres, medical diagnostic centres and mortuary/embalment centres, were being regularly inspected and monitored to ensure strict compliance with the laws guiding their establishments and to eradicate quackery. The tables below show the data for the regulatory activities of the department.

**SEMINAR/WORKSHOPS:**

Seminar/workshops have been organized in the last six years for the continuous education of owners and staff of private health establishments in the state. The exercise affords the department the opportunity to establish rapport with stakeholders in the private health sector.

**MEDICAL ASSISTANCE:**

The department processed refund of medical expenses and medical assistance to public officers, civil servants and members of the public to the tune of N13,000,000 since the inception of the Oyinlola administration.

**PREVENTION OF COMMUNICABLE DISEASES:**

Progress has been made towards a better disease surveillance and notification system. Disease trends are easily monitored and impending epidemics are detected early, followed by prompt intervention activities. Some of the successes recorded in prevention of diseases are:

- (a) Launching of state and local government working groups for Integrated Management of Childhood Illness (IMCI).
- (b) Provision of high quality laboratory materials for diagnosis of tuberculosis and leprosy as well as provision of drugs for treatment of the diseases. Thirteen new LGAs were covered between May 2003 and May 2008.
- (c) Reduction of HIV/AIDS prevalence rate from 4.3% in 2002 to 2% in 2006.
- (d) Formulation of Anti-AIDS Club in some

- (e) secondary schools.
- (e) Training of peer educators in some Osun State tertiary institutions.
- (f) Facilitation of inauguration of State Action Committee on AIDS and formation of Local Action Committee on AIDS in 17 LGAs.
- (g) Training of 82 health personnel on counseling.
- (h) Training and retraining of health workers on HIV/AIDS prevention, care and support for PLWHA.
- (i) Training of hospital-based health care providers on syndromic management of HIV/AIDS.
- (j) Awareness creation among youths (secondary and tertiary institutions).
- (k) Strengthening the laboratory and capacity building of the laboratory staff.
- (l) Establishment of youth-friendly voluntary counselling and testing center.
- (m) Carrying out survey on HIV/Syphilis zero prevalence rates, to determine the prevalence rate of HIV/syphilis in the state.
- (n) Networking with NGOs on HIV/AIDS control. The state Ministry of Health in collaboration with Family Health International (FHI), Global HIV/AIDs Initiative Nigeria (GHAIN) established Anti-Retroviral Therapy (ART) Prevention of Mother to Child transmission (PMTCT) and HIV counselling and Testing (HCT) at the State Hospital, Asubiaro, Osogbo. The Ministry has also commenced TB/HIV collaboration of ART and DOT sites through partnership with the Federal Ministry of Health (FMOH) and World Health Organization. The Ministry distributed HCT MIS tools to LGA HIV programme Officers for proper HCT-MIS 2009.
- (o) Collection, collation and analysis of data on HIV/AIDS
- (p) Provision of HIV free blood
- (q) Provision of IEC materials and distribution
- (r) Immunization of all public and civil servants as well as teachers against hepatitis B
- (s) Establishment of Survival and Early Child Care (SECC) projects

- (t) A total of 7,146,754 Mectizan tablets were used to treat 2,767,883 people in all the 30 LGAS during the reporting period. The Ministry facilitated the inauguration community self monitors in 587 communities for the purpose of overseeing the activities of community directed distributors (CDDs). The Ministry secured the assistance/ support from UNICEF. Monthly review meetings were sustained.
- (u) The government procured 30,000 retreatment kits of insecticide treated nets worth millions of Naira between 2003 and 2007. The Ministry distributed 29,488 insecticide treated nets and retreatment kits to all tertiary, state and local government health centres. The Ministry collected 97,763 doses of new anti-malaria drugs (ACTS) from the Federal Medical Stores, Lagos and distributed same to all state and local governments health facilities for the treatment of malaria in children under 5 years. Similarly, the Ministry distributed 56,561 doses of Sulphadoxine Pyrimethanime (SP) drugs to state and local government health facilities for the prevention of malaria in pregnant women.
- (v) The WHO donated three motorcycles, 60 bicycles to Ife Central Local Government for the implementation of IMCI. UNICEF donated nine motorcycles to four LGAs for the implementation of nutrition activities.
- (w) The Ministry recorded no case of Wild Polio Virus (WPV) in Osun State due to aggressive health education activities. The state Ministry of Health carried out Immunization Plus Days (IPD) in all the local government councils in August, 2008 with 118.66% coverage, October, 2008 with 134% coverage, January, 2009 124% and in May, 2009 122% coverage.
- development associations lend to the Federal Ministry of Health and all states of the federation. Osun State is one of the beneficiaries of the credit, which became effective on October 19, 2003. The general objective of this project is to assist the state in its effort to redress the deterioration in the health care system by providing funds which are then allocated to health sector. HSDP II has been tailored to increase access to health care facilities as a way to reduce general morbidity in the state. To this end, renovation/upgrading of one primary health care centre per local government area was completed through the National Competitive Bidding (NCB) procurement procedure of the World Bank. Through the project, vehicles, furniture, computers have been procured. Special maternity centres were constructed in each senatorial district in the state. Also, training of some top government officials, project management unit members and different categories of health workers from the State Ministry of Health and the State Hospitals Management Board was carried out. Medical equipment worth \$1million was also purchased for various health facilities in the state, including the newly constructed, upgraded/renovated ones in all the LGAs on the basis of one PHC per LGA. The following projects have been executed:
1. Construction of Maternity Complex at Asubiaro:
    - (i) Infant Welfare and Antenatal Clinic Complexes at State Hospitals, Osogbo, Ilesa and Iwo.
    - (ii) State Central Blood Bank at Asubiaro with two other mini-blood banks at Iwo and Ilesa State Hospitals respectively.
  - Renovation/ upgrading of Maternity Ward, X-Ray and Theatre Block at State Hospitals, Ilesa and Iwo.
  - (iv) Renovation/upgrading, fencing and provision of Borehole at Comprehensive Health Centre Iragberi, Iree, and Otan Aiyegbaju.
  - (v) Mortuary equipment purchased has been installed in the recently

#### HEALTH SYSTEMS DEVELOPMENT PROJECT II (HSDP II)

The Health Systems Development Project (HSDP) is a credit scheme whereby international

constructed/renovated mortuary buildings at Asubiaro, Ilesa, Iwo and Okuku hospitals.

2. The state has also taken delivery of about 95% of the procured medical equipment, which has been distributed to various hospitals. The equipment include:

- (i) Critical care equipment for hospitals in the State.
- (ii) X-Ray equipment for State Hospitals at Asubiaro, Ilesa, Iwo
- (iii) Electro medical equipment for State Hospitals and General Hospitals.
- (iv) Consulting Room equipment for Hospitals and Health Centres.
- (v) Laboratory equipment for major hospitals in the State.
- (vi) Theatre equipment.
- (vii) Furniture and wards equipment.

Computers were also procured and distributed to the offices in the Ministry of Health, State Hospitals Management Board as well as the Health Training Institutions.

**PROMPT PAYMENT OF COUNTERPART FUNDS** for World Bank and International Organizations assisted projects such as Health Systems Development Project II, UNFPA, Damien Foundation, and UNICEF.

### HEALTH TRAINING INSTITUTIONS

The state government strongly believes in human resources development and this is the reason why it is supporting training and retraining of staff. The three state health training institutions i.e. Schools of Nursing and Midwifery, Osogbo and School of Health Technology, Ilesa, are being supported to enhance training programmes of the students.

A bill on the establishment of the State School of Health Technology was passed by the State House of Assembly. The state government purchased and donated one luxurious bus each to the Schools of Health Technology, Ilesa and Nursing and Midwifery, Osogbo.

Listed below are the percentage of the results of final year students of the Schools of Nursing and

Midwifery, Osogbo from 2003 to date:

#### **Nursing:**

2003	-	70%
2004	-	71%
2005	-	88%
2006	-	92%
2007	-	65%
2008	-	89%

#### **Midwifery:**

2003	-	100%
2004	-	86%
2005	-	80%
2006	-	83%
2007	-	-
2008	-	71%

### PROMOTION OF STAFF

A total of 144 senior and 36 junior members of staff of the Ministry were promoted to the next higher grade from 2003 - 2006. January 2007 promotion is still on. A total of 40 senior and 15 junior members of staff have been slated for the impending promotion interview.

### RECRUITMENT OF STAFF

The Ministry employed six (6) Senior and Eleven (11) junior qualified staff into the service.

**CAR REFURBISHING LOAN:** Yearly disbursement of car refurbishing loan to members of staff of the Ministry is sustained.

### PROMPT PAYMENT OF SALARIES AND ALLOWANCES OF WORKERS

Salaries of workers and allowances are being paid regularly and workers enjoying leave bonus as at when due.

### CO-FUNDING OF LAUTECH TEACHING HOSPITAL

The development and achievements in health sector are extended to Ladoké Akintola University of Technology Teaching Hospital Complex (LAUTECH), Osogbo. The state government, in conjunction with its Oyo State counterpart, is spending a lot of money on the provision of infrastructure and facilities for the hospital.

Maternity Complex at State Hospital, Asubiaro, Osogbo

### Other Projects

- (1) Laboratory, pharmacy and male surgical units at the State Hospital, Asubiaro, Osogbo.
- (2) 20-Bed comprehensive health centres at Ibokun, Ogbaagbaa, Ifewara.
- (3) Purchase of equipment and materials for public health laboratory of the State Ministry of Health.

### School of Nursing, Osogbo

To ensure the continued accreditation of the Schools of Nursing and Midwifery by the Nursing and Midwifery Council of Nigeria, the government has provided the following:

- (1) Hostel accommodation for male and female students.
- (2) Adequate and qualified teaching staff;
- (3) Befitting library and Laboratory facilities.

### OT & NGI:

Adequate execution of government policies regarding private medical practice in the State. This is done via regular inspection and monitoring of private health institutions. The practitioners were invited for a seminar/workshop. The Ministry was able to generate N1,400,000 during the exercise.

### PHC

The state now has a structure on ground to carry out case surveillance, investigation, treatment, rapid response and there is also a stock of drugs and materials.

There is increased number of Insecticide Treated Bed Nets in the state health facilities.

The Nutritional status of children and pregnant women has increased through exclusive breastfeeding practices and the distribution of iron folate.

Childhood mortality and morbidity have now reduced. Thirty health officers, including doctors and nurses, have been trained on the use of manual vacuum aspiration kit.

Over 250 youths and 420 adults had their HIV status assessed. Awareness on HIV/AIDS has now increased due to regular sensitization programmes. More health workers, including doctors and nurses, were trained on HIV/AIDS in the last six years of the Oyinlola administration.

### PHARMACY:-

The total amount of drugs purchased and distributed by the end of 2007 was N87,131,288.40. Total cost of manufacturing equipment (Production and Quality Control machines) was \$1,998 (USD). Test running of the equipment is almost completed. The inauguration of the drug manufacturing company is expected soonest. The revenue generated by the inspectorate unit is N1,115,700.00. This is apart from the state government share from the PPMVL fees expected from the Pharmacists Council of Nigeria.

**NURSING:** Installation of cyber café courtesy of HSDP II Project.

6.	Nigerian Agriculture Insurance Scheme.	10e	856,494.19	To pay subsidy on Osun State Farmers who participated in NAIS.	Subsidy for three years was paid out of six years.
7.	Forest Plantation Development.	2,000,000	1,190,000	-	6.5ha of plantation was planted
8.	Forest Resources Study and Forest Extension.	1,000,000	675,000	To distribute 30,100 seedlings.	10,000 seedlings distributed.
9.	Reserve, Inspection, Control and Forest Utilization.	3,000,000	1,600,000	Purchase two patrol vehicles.	Two patrol vehicles purchased.
10.	Special Task Force on Forest	-	462,840	-	Logistic support for the Task Force members for patrolling the State's forest Estates.
11.	General Management of Fishpond	3,100,000	1,500,000	Produce 250,000 fingerlings and 1,250kg table fish.	120,000 fingerlings and 800kg table fish produced.

## LIST OF PROJECTS EXECUTED IN 2005 contd.

S/NO	PROJECTS	BUDGET PROVISION	BUDGET RELEASE	TARGET	ACHIEVEMENT
12.	General Administration	4,000,000	2,014,440	Purchase of vehicles	Three Tokunbo vehicles purchased.
13.	National Special Programme for Food Security (NSPFS)	24,000,000	12,844,630	To implement 353 agricultural modules by farmers in the three NSPFS sites.	309 modules were implemented.
14.	Root and Tuber Expansion Project (RTEP)	17,372,000	5,281,498	Establish one model processing centre, three agro-processing groups towards value addition link farmers to agro processing centers.	Oluponna model processing centre established 21ha cassava planted under outgrower scheme while cassava growers were linked to EKHA Agro for bulk purchase to reduce glut.

## LIST OF PROJECTS EXECUTED IN 2006

S/NO	PROJECTS	BUDGET PROVISION	BUDGET RELEASE	TARGET	ACHIEVEMENT
1.	Farm Settlement Programme	100,000,000	-	To allocate 9,362.75ha of land to settlers.	6,188.16ha was allocated.
2.	Tree Crops and Horticultural Seeds Production	7,500,000	3,240,000	To produce 590,000 cocoa seedlings.	445,480 cocoa seedlings raised.
3.	Agricultural Youth Empowerment Programme (OSSAYEP)	125,000,000	20,000,000	To provide micro credit for participants.	Micro credit provided.
4.	Inspection and Grading of Produce	7,000,000	-	To grade 37,050 metric tonnes of cocoa, palm kernel and cashew.	17,610 metric tonnes graded.
5.	Capital Grant to Agriculture Development Board.	2,000,000	1,620,000	Purchase of a bus.	One bus purchased.
6.	Forest Plantation Development	10,000,000	5,920,000	To plant 14ha of plantation.	14ha planted.
7.	Forest Resources Study and Forest Extension.	10e	-	Raise 25,000 seedlings.	15,000 seedlings raised.
8.	Reserve, Inspection, Control and Forest Utilization.	1,000,000	188,580	-	For logistic support for Task Force on Forestry.
9.	General Management of Fishpond	-	-	Produce 250,000 fingerlings and 1,250kg table fish.	150,000 fingerlings and 1000kg table fish produced.
10.	Root and Tuber Expansion Project (RTEP)	19,372,000	5,770,403.37	Take inventory update of Processing Centre. Market linkage. To establish medium scale processing equipment	Inventory update taken. 21 RTEP farmer group linked with EKHA Agro processor. One multipurpose cassava processing equipment at Oluponna model HQCF centre was established.

# LIST OF PROJECTS EXECUTED IN 2007

S/NO	PROJECTS	BUDGET PROVISION	BUDGET RELEASE	TARGET	ACHIEVEMENT
1.	Farm Settlement Programme	100,000,000	347,000	To allocate 12,887ha to settlers.	6,793ha allocated.
2.	Agricultural Youth Empowerment Programme (OSSAYEP)	20,000,000	2,500,000	To recruit 765 participants.	731 participants were trained.
	Inspection and Grading of Produce	3,000,000	2,862,334.80	To grade 27,100 metric tonnes of cocoa, palm kernel, cashew and coffee.	17,744 metric tonnes graded.
3.	Tree Crops and Horticultural Seeds Production.	1,000,000	1,000,000	100,000 cocoa & 2,315 oil palm.	89,732 cocoa and 7,953 oil palm seedlings produced.
4.	African Swine Fever	10e	85,000	To prevent outbreak of Swine Fever.	Sensitization programme for farmers in all Local Govts in the State.
5.	Purchase of Motor Vehicle	1,500,000	480,000	To purchase a motor vehicle.	One motor vehicle was purchased.
6.	Clinics, Subclinics/Veterinary Treatment.	1,000,000	-	To treat animals of various diseases.	8,581 animals treated.
7.	Table Fish Production (Promotion of Fish Marketing and Storage)	180,000	-	To purchase and resell 1,500kg fish.	1,307kg of fish resold.
8.	Livestock Feeds.	10e	-	To produce 10,000 metric tonnes of feeds.	4,337 metric tonnes produced.
9.	Log Control	10e	3,350,000	Production of essential papers.	Essential papers were produced.
10.	Root and Tuber Expansion Project (RTEP)	31,000,000	3,233,888	Establish eight Processing Centers and two multiplication farms.	Three processing centres and two multiplication farms were established.

**LIST OF PROJECTS EXECUTED IN 2008**

S/NO	PROJECTS	BUDGET PROVISION	BUDGET RELEASE	TARGET	ACHIEVEMENT
1.	Farm Settlement Programme Agricultural Youth Empowerment Programme (OSSAYEP)	90,000,000 13,500,000	32,491,242.94 -	To allocate 13,017ha of land to settlers.	7,994.30ha was allocated. 724 participants recruited and trained.
2.	Inspection and Grading of Produce	3,150,000	3,149,997.90	To purchase coding seal.	17,742.5 metric tonnes of cocoa, palm kernel, cashew and coffee graded. Seals purchased.
3.	Purchase of Grains	10e	23,366,700		Purchase of 608 metric tonnes of grain allocated by FGN.
4.	Tree Crops and Horticultural Seed Production.	900,000	1,011,600	To raise 360,000 and 15,000 seedlings of cocoa and oil palm respectively.	327,044 cocoa and 14,047 oil palm seedlings were raised.
5.	Production of Day Old Chicks.	900,000	852,721.25	To produce 6,000 cockerels.	3,000 cockerels produced.
6.	Purchase of Furniture	1,350,000	187,500	To purchase Rug for the office of the Permanent Secretary.	Rug and other furniture items were purchased.
7.	Purchase of Motor Vehicle	1,350,000	1,051,800	To purchase two vehicles.	Two vehicles were purchased.
8.	Clinics, Subclinics/Veterinary Treatment.	900,000	96,760	To treat animals.	7,768 animals were treated.
9.	Table Fish Production (Promotion of Fish Marketing and Storage)	-	50,000	Purchase and resell 1000kg fish.	800kg of fish was purchased and resold.
10.	Livestock Feeds.	10e	-	To produce 10,000 metric tonnes of feeds.	6,030 metric tonnes produced.
11.	National Special Programme for Food Security (NPFS)	104,800,000	58,367,600	To implement 248 agricultural modules on rain-fed crops, irrigated crops, livestock, aquaculture by 248 beneficiaries in nine NPFS sites.	152 modules were implemented in the nine sites.
12.	Root and Tuber Expansion Project (RTEP)	20,865,000	7,644,794	Provide fund to support seven Processing Centers and one farmer group.	Payment of Osun State counterpart fund to six out of seven groups identified in 2007.

## LIST OF OTHER PROJECTS SINCE 2003

- 1) Agriculture in Schools' Programme
- 2) Cooperative Farming Programme
- 3) Farm Settlement Programme (Songhai Experiment) and Agricultural Youth Empowerment Programme
- 4) Agricultural Engineering Services
  - (i) Hand Tools Technology
  - (ii) Workshop Development/Tractor Shed
  - (iii) Drawing Office/ Station Management
  - (iv) Spare Parts for Tractors and Implements
- 5) Irrigation/Water Resources Development
- 6) UNICEF Assisted Nutrition Programme
- 7) Special Pineapple Project
- 8) Cassava Production/Maize Doubling Project
- 9) Data Collection and Farm Advisory Services
- 10) Library Development
- 11) Inspection and Grading of Produce
- 12) Grains Purchase and Marketing
- 13) Pest Control
- 14) Completion of Storage Facilities at Oyan and Construction of three others at Osogbo, Ilesa and Ogbaagbaa
- 15) Purchase of Fertilizers
- 16) Nigerian Agric. Insurance Scheme (OSSG Subsidy)
- 17) Agricultural Show/Trade Fair
- 18) Tree Crops Development and Horticultural Seeds Production
  - (i) Cocoa and Oil Palm Seedlings
  - (ii) Cashew Seedlings and Plantain Suckers
- 19) Counterpart Funding UNDP Assisted Programme
- 20) Insurance of Government Property
- 21) State Farm Project (OSSG/Heliogjiang)
- 22) Centre for International Trade Development (CITD)
- 23) FCI Commodities Cassava Processing Project
- 24) Agricultural Development Fund
- 25) Production of Day-Old-Chicks (P.I.C. Oloba)
- 26) Beef Multiplication and Demonstration Centre
- 27) Pig Multiplication and Demonstration Centre
- 28) Livestock Feed Production
- 29) Promotion of Turkey / Broiler Production
- 30) Small Ruminants/Micro Animal Multiplication and Demonstration Centre
- 31) Establishment of Control Post
- 32) Construction of Cattle Market and Slaughter House
- 33) Grazing Reserve/Stock Route
- 34) Anti Rabies Vaccination
- 35) Rinderpest Control
- 36) African Swine Fever Control
- 37) Kata (PPR) Control
- 38) Contagious Bovine Pleuropneumonia
- 39) Foot and Mouth Disease Control
- 40) New Castle Disease Control
- 41) Veterinary Clinics and Subclinics
- 42) Veterinary Public Health/Meat Inspection
- 43) Diagnostic Laboratories
- 44) Veterinary Epidemiology
- 45) Avian Influenza (Bird Flu) Control
- 46) Animal Tuberculosis Control
- 47) Emerging Animal Disease Control
- 48) Forest Plantation Development
- 49) Forest Resources Study and Forest Extension Services
- 50) Wildlife and Apiculture Management
- 51) Reserve, Inspection, Control and Forest Utilization
- 52) Fish Seed Multiplication /Aquaculture
  - i) Establishment and Maintenance of Fishponds/Fish Breeding Centre
  - ii) Establishment and Maintenance of Fish Farm Estates
  - iii) Rehabilitation of New Government House Ornamental Pond
  - iv) Rehabilitation of New Secretariat Pond
  - v) Aquaculture/Fisheries Extension Training Programme/Workshops and Seminars
  - vi) Israel Osun State Government Collaboration on Aquaculture Development
- 53) Table Fish Production
  - i) Man-Made Lakes and Fisheries Cooperatives
  - ii) Promotion of Fish Processing, Storage and Marketing
  - iii) Acquisition / Purchase of New Refrigerated Pick-up Van
  - iv) Acquisition / Purchase of New Coldroom

A Cassava Plantation initiated by the State Government

Participants at Agric Youth Empowerment Programme by Oyinlola Govt

**W**ater is essential to human living and this has been one of the focuses of this administration since inception. Governor Oyinlola on many occasions stressed that diseases could be prevented if the people have unlimited access to potable water.

In realization of government policy in this sector, at least one mini water scheme was built in each of the 30 local government areas in the state. Almost all these mini water schemes have been completed. These mini schemes compliment the existing main water works at Ede which provides about 16 local government areas with pipe-borne water. Boreholes are also sunk across the state to alleviate the problems of water shortage being faced by the people.

Details of the mini-water schemes:

**PALACE BOREHOLES PROJECT**

The state government has provided three (3) semi-industrial motorized boreholes in each of the following palaces in the state:

- (1) Ooni's Palace 3 motorised boreholes with 20,001 overhead tank
- (2) Owa Obokun's Palace
- (3) Ataoja's Palace
- (4) Olokuku's Palace
- (5) Orangun's Palace
- (6) Oluwo's Palace

**PROVISION OF BOREHOLES IN SECONDARY SCHOOLS IN OSUN STATE**

The state government is drilling boreholes in all secondary schools in Osun State. Under the phase one of the exercise, five boreholes are to be drilled in every local government.

The exercise has been completed in six local government areas. The underlisted schools have benefited from the project.

**A. ODO-OTIN**

- (1) Odo-Otin Grammar School
- (2) Okuku Grammar School
- (3) Eekosin Community Grammar School, Eekosin
- (4) Inisa Grammar School, Inisa
- (5) Okoyekola High School, Ijabe

**B. ATAKUMOSA WEST LGA**

- (1) Ibodi Grammar School, Ibodi

- (2) Atakumosa High School, Osu
- (3) Akinyemi Memorial Grammar School Ifewara
- (4) Oke Bode Grammar School Oke Bode
- (5) Aparo Community High School, Aparo

**C. EDE NORTH LGA**

- (1) C.A.C Grammar School, Ede.
- (2) Baptist High School, Ede
- (3) Mapo-Arogun Grammar School, Ede
- (4) Muslim Grammar School, Ede
- (5) Timi -Agbale Grammar School, Ede

**D. OLA-OLUWA LGA**

- (1) Ogbagba High commu School
- (2) Ikire Ile Community High School, Ikire-Ile
- (3) Bode-Osi Commercial High School, Bode-Osi
- (4) Ilupeju Comm. High School, Ilemowu, Iwo
- (5) Ajagunlase Comm. High School

**E. IREWOLE L.G.A.**

- (1) St. John's Grammar School, Ikire
- (2) Comm. Grammar School, Oke Ada, Ikire
- (3) Ayedaade Grammar School, Ikire
- (4) Fatima College, Ikire
- (5) Community High School, Wasinmi, Ikire

**F. IFE CENTRAL LGA**

- (1) Oduduwa College, Ile-Ife
- (2) Olorogbo Grammar School, Ile-Ife.
- (3) Oranmiyan Memorial Grammar School, Ile-Ife
- (4) St. David's Grammar School, Ife-Ife.
- (5) Ife Girls High School, Ile-Ife.

The following boreholes were drilled as constituency projects of members of the Osun State House of Assembly:

A motorized borehole at Oba-Oke

### SUPPLY OF SIX HUNDRED HAND PUMPS TO OSUN STATE

The Federal Ministry of Water Resources Abuja gave six hundred (600) hand pumps to Osun State to aid the provision of potable water to rural communities. The pumps have been collected and put to good use.

### REPLICATION OF UNICEF CHILD FRIENDLY SCHOOLS IN OSUN STATE

The state government replicated the child-friendly school initiatives of UNICEF by providing one hand pump borehole and three (3) compartment VIP latrines in each of the following primary schools in Osun State.

- (1) St. Michael Primary School, Okuku.
- (2) Temidire Primary School, Ibodi
- (3) St. James Anglican Primary School, Ogbagba.

### BORDER COMMUNITY BOREHOLE PROJECT

In order to give a sense of belonging to border communities that have been neglected for a long time, especially those in Iwo and Ejigbo Local Government Areas which border Oyo State, the Oyinlola administration approved and release the funds for the drilling of 26 boreholes which comprised two motorized boreholes each in Ogburo and Agberire in Iwo Local Government Area and Owu- Ile in Ejigbo Local Government Area. Twenty hand pump boreholes were given to other border communities in the two local government areas.

### PROVISION OF MOTORIZED BOREHOLES:

The state government has approved that one motorized borehole be drilled on the premises of the following federal parastatals and other locations in the state

- (1) NTA, Osogbo
- (2) NTA, Ile-Ife

- (3) Recreation Club Ile-Ife
- (4) Obalufe Palace, Ile-Ife and
- (5) Government House Annex, Osogbo.

#### **REPAIR OF BROKEN DOWN BOREHOLES IN ALL THE FEDERAL CONSTITUENCIES IN OSUN STATE**

Some one hundred broken down boreholes/deep wells were identified and repaired by the agency in all the nine federal constituencies in the state. A motorized borehole rehabilitation was carried out in 2004 and 2005.

#### **SELECTION OF OSUN STATE FOR EU/UNICEF/FGN WES PROGRAMME**

Osun State was selected for assistance under the EU/UNICEF/FCN Water and Environmental Sanitation programme implementation along with five other states in the country namely: Abia, Cross River, Kebbi, Nassarawa and Plateau. Osun State is the only state selected for the EU assistance in the South West.

#### **RELEASE OF COUNTERPART FUND FOR EU/UNICEF/FGN WES PROGRAMME**

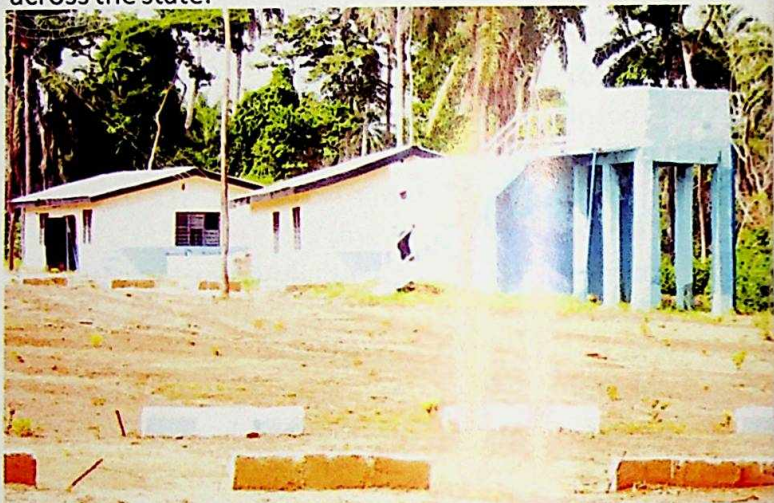

The Oyinlola administration approved the counterpart fund to be paid by the state in 2006 for the implementation of the EU/UNICEF WES programme in Osun State. Because of the commitment of the state government, Osun State is one of the two states selected by the European Union to serve as a "guide" in the implementation of Water and Environmental Sanitation Programme for all other participating states in the country.

#### **ESTABLISHMENT OF OSUN STATE RURAL WATER AND ENVIRONMENTAL SANITATION AGENCY**

The state government signed the Memorandum of Understanding (MoU) for the implementation of EU/UNICEF/FGN WES Programme implementation in the last quarter of 2005 and the Environmental Sanitation Agency (RUWESA) was saddled with the task of coordinating the provision of potable water and environmental sanitation in the rural areas. In addition, the Water and Environmental Sanitation (WES) Department was created in all the 30 local government areas to ensure the implementation of WES programme in all local government areas and community levels.

#### **MAINTENANCE OF WATER WORKS**

Six oil blast circuit breakers have been installed at the new Ede Waterworks to replace the defective ones. This multi-million naira major maintenance has ensured constant supply of water to areas serviced by the headworks. The Ife Booster Station also got an 11KV switch gear while the old AC pipes in the swampy areas on Ila Rising Main were replaced with steel pipes. The government carried out major rehabilitation works on all water schemes across the state.

Mini Water Schemes established throughout the State

Dam and reservoir of one of the Water Schemes

**T**oday, the people are happy because the government of Prince Oyinlola has redressed the injustice inherent in the sack of many teachers and civil servants by recalling them. The last administration of Chief Bisi Akande recorded it that it sacked about 6,000 workers made up of 3,884 teaching and non-teaching staff of TESCO and 2,105 civil servants in its four years of tenure.

However, the Oyinlola administration has given employment to over 12,000 graduates and other cadres in the last six years.

This figure is made up of well-trained professionals such as medical doctors, nurses, engineers, geologists and teachers, among several others. These graduates, through deliberate policy of job creation in productive manner, have been employed in such areas as hospitals, information technology, water provision, the civil service, local government service and teaching. These are apart from those gainfully engaged in the informal sector.

The Oyinlola administration, through these appointments, has clearly proved that when the righteous rules, the people rejoice.

Some of these youths are very lucky to have come from Osun State and it was astounding to discover that some of them had been without jobs for over ten years!

Teachers on appreciation visit to the Governor at the Government House

**OSUN STATE INTEGRATED CASSAVA INDUSTRIAL PROJECT**

Through this programme, the government was able to establish three pilot large scale cassava processing industries in the three senatorial districts of the state. Also, twelve micro-processing centres were established for commercial production of cassava. In 2007, the three main factories were leased to investors. The 12 micro-processing centres will also be leased out soon.

**GRADUATE GAINFUL EMPLOYMENT SCHEME**

The scheme was designed for unemployed graduates of tertiary institutions.

**INDUSTRIAL ESTATE**

**Development of Osogbo Industrial Estate:** The opening of the main road as well as drainage facilities of Osogbo industrial estate has been completed. A 330KVA transformer has been installed to boost the supply of electricity. All external electrification of the main road has been completed and pipes laid along the main road and connected to the main water pipes of Osun State Water Corporation.

**Development of Ilesa Industrial Estate:** The award of contract for the earthworks and drainage construction is at an advanced stage.

The government, in collaboration with the Small and Medium Scale Enterprises Development Agency of Nigeria (SMEDAN), organized training programmes between 10th and 21st December, 2007 for machine fabricators and welders in the state to improve the quality of their products.

The government in her bid to attract foreign investors to the state, held industrial promotion meeting with Nigerians in Diaspora. Top government officials also met with a trade delegation from Prince Georges Country Maryland USA in September, 2007.

**Commerce and investment promotion/trade fairs**

As a matter of policy, Osun State participate in three international trade fairs of Kaduna, Enugu and Lagos. This is in addition to the joint international trade fair zoned to Oyo, Osun, Ondo, Ekiti and Ogun State in the South West, being sponsored by the five states and the Odu'a Chambers of Commerce and Industry. The state as a co-organiser could not participate in the 2nd Edition of the Odu'a

International Trade Fair which was held in Ibadan, Oyo State capital, between 12<sup>th</sup> October and 22<sup>nd</sup> October, 2007 due to logistic reasons.

**MICRO-CREDIT SCHEMES**

The Osun State Micro-Credit Agency was established by the Osun State Micro-Credit Agency (Establishment) Law of 2006. The Agency was set up to motivate local producers of goods and services and develop entrepreneurship skills in the state, stimulate appropriate economic activities and raise the level of productivity of the people therein and reduce unemployment, among others.

**Multi-purpose Micro-Credit Scheme**

Since the agency took off in 2008, approval had been given for the disbursement of loans to 528 entrepreneurs engaged in diverse businesses, notably industrial, agricultural and commercial ventures under the Multi-purpose Micro-Credit Scheme of the agency. The total volume of approved loans under this scheme is N166,900,000. From this approved sum, N101,450,000 was disbursed to 275 beneficiaries who had met all necessary conditions for the draw down of their credit facilities.

**Fadama Credit Scheme:**

In order to ensure the availability and affordability of food, particularly during the dry season, loans totaling N8,800,000 were granted to and accessed by 88 Fadama Farmers for dry season farming.

**Government-Guaranteed Agricultural Loan Scheme:**

A sum of N250,000,000 was disbursed to farmers through the Nigerian Agricultural, Co-operative and Rural Development Bank. The agency engaged the Osun State Agricultural Development Corporation as the technical partner in this scheme.

**Osun State Micro-Credit Agency Trust Fund for Agricultural Development:**

The agency has committed N32,000,000 to disburse as loan to farmers in collaboration with the Central Bank of Nigeria and the United Bank for Africa. The Osun State Agricultural Development Corporation serves as the technical partner to the scheme.

**Entrepreneurship and Project Management Training Programmes:**

In a bid to develop entrepreneurship skills of loan applicants and sharpen their project management ability, regular training programmes are organised for them. Three such training programmes were organised by the agency from December, 2008 to August, 2009. This is in addition to such programmes organized by microfinance banks which are appointed as agents in loan disbursement.

**TRADING ACTIVITIES**

The new Orisunbare Shopping Complex received adequate attention from the government. For instance, 32 single-phase metres were purchased and installed. Landscaping work has also been done.

**COOPERATIVE SERVICES**

Some 464 cooperative societies have been registered. Seminars were organised for members of the societies during which they were given cooperative education to enhance their performance.

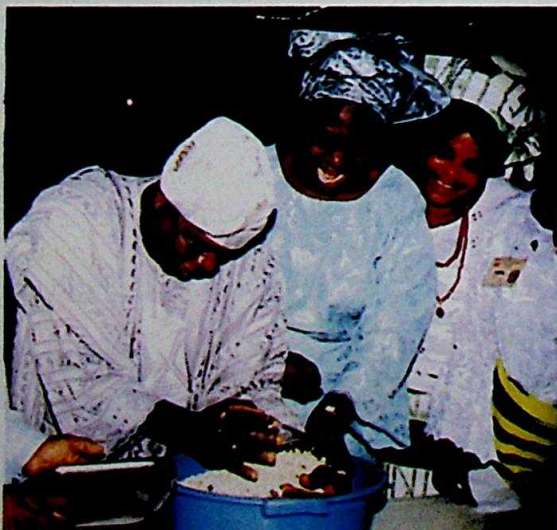

**COOPERATIVE COLLEGE, ODE-OMU**

Staff Development: Twelve officers of the cooperative department trained and awarded diploma certificate in cooperative studies. This is out of the total number of 254 that passed out during the year. In 2007, potable water was provided for the college through linkage with the main water pipes that supply water to Ode-Omu community from the Ede Water Works.

**FINANCE AND ESTABLISHMENT**

**Revenue Generation:** There was a great improvement in revenue generation drive during the year. This is largely due to increase in the registration of business premises, registration of cooperative societies, associations/unions in the state and better commitment to duty. The sum of eight million, two hundred and seventy-seven thousand one hundred Naira (N8,277,100.00) was generated up to November, 2007 as against four million, one hundred and ninety-nine thousand, three hundred and eighty-five Naira (N4,199,385.00) during the corresponding period in 2006.

S/NO	PROJECTS	LOCAL GOVT. AREAS
1.	Establishment of 15 Cassava processing centres	15 local governments
2.	Upgrading of the Permanent Trade Fair Complex, Osogbo	Osogbo
3.	Registration and support for coop societies and trade groups, e.g. Butchers Association, Produce Association, Artisans and Trade Association	All local governments
4.	Development of Osogbo Industrial Estate and Ajaka Industrial Estate, Ilesa	
5.	Provision of 500 Globacom Call Centres	All local governments
6.	Provision of Motorcycles	All local governments
7.	Establishment of skill acquisition centres	All local governments
8.	Purchase and distribution of buses, Motorcycles and taxi cabs	All local governments
9.	Purchase of Grinding Machines for Women	All local governments
10.	Establishment of Free Trade Zone	All local governments

With market women

Signing MOU with an investor

The Oyinlola administration has opened up the state for people to know how their government is run. This is done through print and electronic media reports on the activities of the government. Local and national radio and television stations are employed for this purpose. Some of the programmes run on weekly basis are: Living Spring Glimpses, Osun Update, Oyinladun Osun on MITV, AIT, NTA Osogbo and OSBC respectively and focus on Osun on Ben TV, London. Some of the other activities of the government relating to information are as follows:

**Iwo Television House:** The Television House located in Iwo was initiated by the Bola Ige Administration in the early 80s, was completed by the Oyinlola administration to end the over 25 years abandonment of the project by successive governments. It was abandoned in 1983 and not even the government of Chief Bisi Akande who was a key figure in the Bola Ige administration resuscitated the project. It took the government of Prince Olagunsoye Oyinlola to complete it. In it now, are a film village and a video production facility. The TV, now christened REALITY TELEVISION, is a beauty to behold and a testimony to the goal-getting character of Oyinlola's government.

**GOVERNMENT PRESS**

The government in 2007 commenced the construction of a permanent structure for the Government Press. The building project was completed and inaugurated in May, 2008. All other printing machines have also been installed there. It is worthy of note that the Government Press has been resuscitated by this administration such that production and printing of government documents which were hitherto contracted out will now be handled by it.

**OYINLADUN OSUN:**

This is a radio/television programme which highlights the weekly activities of the government in various ministries and agencies. It is produced in Yoruba and aired on OSBC, NTA Osogbo, NTA, Ile-Ife and other broadcast media. In addition to these

special programmes, Governor Oyinlola grants interviews regularly to journalists in the print and broadcast media.

**OSUN STATE BROADCASTING CORPORATION (OSBC)**

Adequate provision of equipment for the State Broadcasting Corporation (OSBC) has remained a priority of the Oyinlola administration. Among the equipment are:

1. Installation of a 1x30 digital TV transmitter for Channel 32, Osogbo.
2. Installation of a digital transmitter for Reality Television, Iwo
3. Installation of materials for the studios of 104.5FM
4. Construction and equipment of digital studio for Channel 32, Osogbo
5. Construction and equipment of digital studios for Reality Television, Iwo
6. Sundry equipment for the upgrading of OSBC infrastructure
7. Purchase and installation of 500KVA generator in Ile Awiye
8. Purchase of teleprompter equipment for OSBC, Osogbo
9. Internet link for OSBC
10. Construction of OB Van with mobile generator for NDTV, Ibokun
11. Procurement and installation of 1 x 5KW transmitter for Orisun FM, Ile-Ife.

**OPEN FORUM**

This is a live bilingual interview programme on the network of the Osun State Broadcasting Corporation radio and TV where the governor features every month to answer questions from members of the public.

**AGOGO IPINLE OSUN:**

This is a bi-annual Yoruba newspaper published by the State Ministry of Information to inform the populace about the various projects and programmes being executed by the government.

**NTA, OSOGBO, ILE IFE AND FRCN, ILESA**

Since 2003, these two agencies owned by the

# INFORMATION DISSEMINATION

Federal Government, have received tremendous support from the Oyinlola administration in a way that has made them more efficient. They have been given operational vehicles in addition to the provision of electricity and construction of access roads to the stations. Other logistics have been extended to these stations and others.

Let there be light - Prince Olagunsoye Oyinlola commissioning an Electrification Project in Osun State

**BUREAU OF COMPUTER SERVICES AND INFORMATION TECHNOLOGY**

**INTRODUCTION**

In today's turbulent business environment, characterized by rapid technological innovation, unpredictable advancements and changes and accelerating globalization, Information and Communications Technology (ICT) has become a strategic must to stimulate and enhance rapid development in all sectors of the economy. ICT is re-defining the ways we do almost everything and it is now an indispensable tool in response to this global necessity. It is in response to these challenges that the Osun State Government, on 1st January, 2005 created the Bureau of Computer Services and Information Technology from the erstwhile Department of Computer Services in the Ministry of Finance and Economic Planning to midwife e-Governance of Osun State Government.

**GENERAL OBJECTIVES OF THE BUREAU OF COMPUTER SERVICES AND INFORMATION TECHNOLOGY**

The objectives behind the emergence of the Bureau of Computer Services and Information Technology, as contained in the Approved Estimates include, but not limited, to the followings:

- (a) to initiate policies on the acquisition/uses of computer/Information Technology with a view to ensuring the efficient and effective computerization of the salient activities of the entire public service;
- (b) to act as the chief adviser to the government on Computerization/ Information Technology;
- (c) to develop ICT implementation strategy to meet the global challenges so as to avert the state becoming a victim of the global divide;
- (d) to establish and manage ICT infrastructure for the state public service and ensure its optimal utilization state wide;
- (e) to develop ICT human capital with intention of creating and supporting knowledge-based society and to be responsible for ICT training of public officers and its contents' determination;

- (f) to be responsible for the acquisition, standardization, coordination, regulation of the usage and harnessing of computer resources, Information Technology and related matters in the public service;
- (g) to liaise on behalf of the state government with external bodies on matter concerning ICT and related matters;
- (h) to monitor, process and collate personnel information in agencies of government for the determination of public officers, entitlements in conjunction with the Ministry of Finance and Economic Development;
- (i) to process applications from desiring computer firms for registration as contractors and to be so registered if considered suitable to handle computer projects in the public service of the state.

**THE EVOLVEMENT AND DEVELOPMENT OF ICT IN OSUN STATE**

Towards achieving the fundamental objectives behind the birth of the Bureau of Computer Services and Information Technology in the State, activities aimed at arriving at the desired destination, segmented into phases, were embarked upon. The different phases for the evolvement and development of ICT in the state are as follows:

**Phase I:** Full computerization of budget preparation, implementation monitoring, control, performance evaluation, budget review and report generation of the Ministry of Finance and Economic Development, including interactive web-based applications.

**Phase II:** Integrated Personnel Information and Gratuity/Pensions processing scheme, salary information monitoring/processing scheme of the Bureau of Establishments and Training.

**Phase III:** Computerization of the activities of the Office of the Accountant General and the Auditor-General across all agencies of government.

**Phase IV:** Computerization of tele-health diagnostic centre and hospital records management system

**Phase V:** Computerization of the judicial

management system and digitalization of the Osun State laws and legal system.

**Phase VI:** Computerization of education and school system

**Phase VII:** Digitalization of the legislature process and interactive system.

**Phase VIII:** Geo-Information System/Land Perce Information System, statewide ICT infrastructure and introduction of e-Governance into the statewide public service delivery

## ACHIEVEMENTS

It is gratifying to note that the first phase of the global computerization project of the state government has been completed. This has culminated in the following achievements:

- (a) Provision of a highly reliable Metropolitan Area Network (MAN) and Local Area Network (LAN) using Very Small Aperture Terminal (VSAT), Wireless Radios and Cables, including optic fibre to interconnect all agencies of government within and outside the headquarters, as well as all official quarters and provide them access to the internet backbone which guarantees continuous and uninterrupted communication between the state and the outside world on the internet.
- (b) Establishment of State Official Website, [www.osunstate.gov.ng](http://www.osunstate.gov.ng) which facilitated direct exchange of information about the government with all stake-holders both at home and in the Diaspora and live streaming of radio and television broadcast.
- (c) Computer installations and inter-connectivity of agencies of government for e-document management and virtual office system.
- (d) Computerization of salary monitoring processes and integrated personnel information system for the entire public service of Osun State, consisting of the core civil service, schools, corporations, parastatals and tertiary institutions which involved the generation of bio-data statistics about the individual staff classified by age, length of service, educational and technical

qualifications as well as discipline, local government of origin, nationality, marital status, family size, salary grade level, distribution across agencies, sex, subject taught by teachers in schools, etc.

- (e) Provision of the state-of-the art ICT equipment and infrastructure at the Bureau of Computer Services and Information Technology.
- (f) Production and issuance of computerized personalized Identity Cards to all authenticated staff.
- (g) Computerization of the budgetary process (Batch System) encapsulated in budget formulation, budget implementation, budget monitoring and control, budget review and evaluation which also involves the publishing of the annual budget of the state government.
- (h) Computerization of the entire public finance sectors and integrated services.
- (i) Regular placement of the state government documentary materials and information on the salient activities of government on the website.

In line with the Osun State Government policy guideline on the Information and Communication Technology (ICT) implementation, some relevant capacity building arrangements to ensure an efficient state public service delivery system have been put in place. This includes, among others, the following:

- Computer Appreciation Course for all members of the Executive Council, the governor, and the deputy governor;
- ICT trainings for permanent secretaries and all head of non-ministerial agencies;
- Computer basics and office management improvement course for all administrative officers;
- Computer application courses for professionals such as engineers (civil, electrical and mechanical), architects, surveyors, town planners, estate management officers etc.
- Fundamentals of computing and office practices for secretariat staff; and
- Computer application courses for the account officers.

The state is currently partnering some key players in the ICT industry in the country such as Microsoft, CISCO, HP, Oracle, National e-Governance

Strategies (NeGSt) etc. for the effective development and deployment of ICT in the state.

The Federal Government, in recognition and appreciation of the commitments and achievements of the present administration in Osun State, chose the state as the secretariat for the South-West ICT initiative. This is not unconnected with the reliable empirical data available on her ICT projects.

Inter-connectivity of the 30 local governments and Ife East Area Office to the state network and website.

The state government adopted the Computer for All Nigerians Initiative (CANi) Programme of the Federal Government by supplying personal computers and laptops to civil servants at affordable prices payable over a period of 24 months.

**Internet Backbone Connectivity Services.**

Internet access services backbone has been provided on the satellite communication technology called VSAT. The deployed VSAT operates on the C-band platform known to be less susceptible to rain attenuation. The VSAT also operates on a reliable frequency division multiple access satellite protocol technique at a dedicated capacity. This can increase to 2MB as the needs arise. The VSAT ground element is configured to provide a 24 / 7 global Internet connectivity to the state government computer network. The primary network operation center is energized by the power supply from PHCN, and a 100KVA generating set, backed up by 24hr power autonomy from deep circle set of batteries and inverters. The VSAT ground element and electronics were designed to support up to 2Mbps.

**Metropolitan Area Network**

The internet traffic and the statewide mission critical information centrally located at the IT Bureau are routed to some remote locations within Osogbo metropolis via a high capacity IP services oriented point - to - multipoint broadband wireless access system to provide 54 Mbps air-interface connectivity to these places. The remote locations connected over this fixed wireless access radio include Osun State House of Assembly Complex,

Osun state Broadcasting Corporation and Osun State Secretariat at Abere and some official quarters. The base station radio consists of transceivers and 120° sectorized antennas. The radios operate in the unlicensed frequency band in Time Division Duplex (TDD) mode using Orthogonal Frequency Division Multiplexing (OFDM) modulation with Forward Error Correction (FEC) coding. Using the enhanced multi-path resistance capabilities of OFDM modern technology, the radio enables operation in near and non-line of sight (NLOS) environments. This quality is considered valuable to reach the inaccessible and broader segment of the targeted users now and in future. The Metropolitan Area Network was designed to accommodate seamless expansion.

**Local Fibre Optic Transmission Backbone Network at State Secretariat**

The state government has deployed a backbone transmission network based on fibre optic transmission to provide connectivity between network operation centre at Abere Secretariat and all ministries/parastatal/agencies. The fibre optic cable's resilience, ability to transmit data at higher transmission rate and with lower losses made the state government to subscribe to this enduring transmission system. At Abere, three 24 core multimode fibre cable were laid and terminated as primary cable at two Optical Distribution frame points. Secondary fibre cables were cross connected at these distribution points to feed various ministries and agencies within their vicinities. Both the primary and secondary fibre cables that constitute the transmission backbone network are designed and configured to be in high redundancy mode to facilitate easy expansion and recovery in case of any failure. View the diagrammatic illustration

**Local - Fibre Optic Transmission Backbone Network at GRA**

The fail-proof and resilience properties of fibre optic cable as earlier discussed above made the state government to implement a fibre transmission backbone network at the Government Reservation Area to provide highway Internet and intranet traffic access to top government functionaries. In

Governor Oyinlola inspecting some of the facilities at the Bureau of Information and Computer Technology

this transmission segment, the primary and secondary fibre cables were also configured in high redundancy mode for easy expansion and recovery in case of any failure.

#### **Local Area Network at Abere Secretariat**

The state government has provided a model LAN engineering in each agency to provide user connectivity to at least three designated topmost government officials in that agency and the IDF room. The LAN engineering is provisioned on Ethernet access architecture.

#### **PROSPECTS**

(i) **Eventual Introduction of e-Government:** The introduction of ICT infrastructure in Osun State has no doubt signaled the commencement of a successful journey to e-Government. This development will not only bring about transformation in the government processes and procedures but there shall be a corresponding revolution in relationship existing between the governed and the government.

#### **(ii) Harnessing the State Human and Natural Resources**

The human and natural endowment of the state resources will undoubtedly be harnessed and enhanced with the advent of ICT in Osun State. Our rich cultural heritage, for example, shall in no time receive international attention while through interaction with global Internet connectivity; our people can optimally harness their talents and potential.

#### **(iii) Youth Educational Development**

Information and communication technology as a service delivery vehicle will bring transfer of information to the doorstep of the youth which will consequently increase their knowledge base and keep them at par with their peers anywhere in the world.

#### **(iv) Creation of Business Opportunity**

Advent of ICT in Osun State will attract foreign investors to partner the state or individual to enhance the government and citizenry wealth base.

## LIVING SPRING LOANS AND SAVINGS LTD

The moribund Osun State Living Springs and Loans Limited was revived through the governor's quality leadership. The bank re-opened for business on 30th November, 2004 and has by now surpassed the regulated equity share capitalization stipulated by the Central Bank of Nigeria. It's now operating from its permanent structure.

Ultra-Modern Office Complex of the State-owned LivingSpring Savings Loans Ltd., Osogbo

## STATE ECONOMIC EMPOWERMENT AND DEVELOPMENT STRATEGY (SEEDS)

In 2004, the governor established the State Committee on Osun SEEDS as well as the local committees LEEDS. The governor heads the SEEDS committee while the Deputy Governor, Erelu Olusola Obada, presides over the local government committee on LEEDS. The Ministry of Finance and Economic Development, being the secretariat of SEEDS, facilitated the collation of contributions of agencies of government and members of the public. The Zero Draft of SEEDS document was prepared by the ministry. It was eventually considered and approved by the state committee on the SEEDS document. The SEEDS document was published after the approval by the State House of Assembly. It was officially launched in December 2005. The SEEDS document has been widely distributed to government agencies/functionaries, Civil Society Organisations (COSS) and Non-Governmental Organisations (NGOs). Through the activities of the Ministry, the state government performed creditably in the SEEDS benchmarking exercise carried out in 2005 by the National Planning Commission, foreign donors and international observers. The Osun State Government was one of the thirteen states in the federation that attained the minimum standard in all the four areas of SEEDS benchmark which are:

(a) Policy formulation and implementation;

- (b) Budget and fiscal management
- (c) Service delivery; and
- (d) Communication and transparency.

Osun State led all other states in service delivery.

## STATE ECONOMIC SUMMIT

The Oyinlola administration was instrumental to the organisation of the first Osun State Economic Summit with the theme: "Accelerating economic development of Osun State through public and private sector collaboration". The summit, which held at MicCom Golf Hotel, Ada, led to the establishment of Kajola Integrated Investment Company, an investment holding company with private investors as drivers.

## DUE PROCESS OFFICE

The administration established a Due Process Office now Bureau of Public Procurement, to handle all government contract transactions in a transparent manner. The office has developed benchmarks for the various types of jobs and items for procurement. This has enabled the government to have value for money spent on projects and items purchased.

## FOREIGN SUPPORT PROGRAMMES

The various technical assistance programmes in the state have been effectively executed. Prompt payment of the Government Counterpart Cash

## FINANCE AND ECONOMIC DEVELOPMENT

Contribution (GCCC) has become a policy of the Oyinlola administration. These projects have made Osun State first among equals in the whole country. UNICEF was so impressed by the seriousness of the Oyinlola administration that it declared Osun the best it had worked with since it came to Africa. For instance, the state government, by 2006, had released a counterpart cash distribution totalling N36,757,925.00 for UNICEF-assisted activities and N14,411,775.05 for UNFPA-assisted activities.

The European Union has also introduced two new programmes: the Support to Reforming Institutions Programme (SRIP) and Water Supply and Sanitation Sector Reform Programme (WSSSRP) in which Osun State has been selected as one of the beneficiaries. The conditions stipulated for the take-off of the two programmes have been met.

### TREASURY AND PENSION SERVICES

Prompt and regular payment of pensions is a remarkable character of the Oyinlola administration. Also, a new treasury cash office was established at Ifon-Osun in Orolu Local Government to serve the needs of the people of the area, particularly pensioners.

**GRATUITY:** The Oyinlola administration has settled debt of N2.5billion as unpaid gratuities of retired workers.

### PAYMENT OF FEDERAL SHARE OF PENSION TO RETIRED PRIMARY SCHOOL TEACHERS

It is on record that up till February, 2003, the Federal Government was responsible for the payment of the federal share of pensions to all eligible pensioners, including retired primary school teachers in the state. However, in March 2003, the Federal Government stopped further payment of pensions to the retired primary school teachers such that they were left with only the state's share of pension for sustenance. The kind-spirited government of Prince Oyinlola did not feel comfortable with the development and therefore took over the burden of payment of the federal share as from December 2003.

The implementation of 12% pension increase which was effective from 1<sup>st</sup> May, 2000 was ignored by the Akande administration. However, the

administration of Prince Oyinlola considered it as very important to the sustainable living of pensioners. The government, therefore, gave approval for the implementation of the pension increase in October, 2005, and the pensioners have since been enjoying the enhanced pensions.

### REHABILITATION OF TREASURY CASH OFFICES

The state government embarked on the rehabilitation of its treasury cash offices in 2005 in order to provide conducive environment for revenue collection.

The following treasury cash offices which were in deplorable conditions benefited from the gesture of the state government. They are:

- Treasury Cash Office, Ikire
- Treasury Cash Office, Ereja, Ilesa
- Treasury Cash Office, Okuku
- Treasury Cash Office, Eleiyele, Ile-Ife.

### ESTABLISHMENT OF THE PROJECT FINANCIAL MANAGEMENT UNIT (PFMU) FOR WORLD BANK ASSISTED PROJECTS IN THE STATE

The Project Financial Management Unit (PFMU) for the World Bank Assisted Projects was established and domiciled in the Office of the Accountant-General in 2004 for effective keeping of financial records of all assisted projects.

### STAFF WELFARE

Public officers in the state have continued to enjoy the welfarist programme of the present administration since its inception. One of such programmes is the granting of motor vehicle loans to them. Between June 2003 and April 2006, a total sum of N510.87million was released by the state government as motor vehicle loans to 4,244 public officers. The programme, being a self revolving scheme, is still continuing

### VEHICLE LOANS

S/NO	YEAR	AMOUNT EXPENDED
1.	MAY, 2003-DEC., 2003	45,000,000.00
2.	JAN., 2004-DEC., 2004	170,000,000.00
3.	JAN., 2005-DEC., 2005	125,000,000.00
4.	JAN., 2006-DEC., 2006	140,930,000.00
5.	JAN., 2007 to date	1,070,565,120.00

Prince Oyinlola discussing with the Ooni of Ife at an event

### **ACHIEVEMENTS**

The Ministry was able to make some remarkable achievements which include:

- (i) Issuance of guidelines on administrative procedures for operations of local government councils after approval of the State House of Assembly has been sought with a view to ensuring:
  - (a) discipline and efficiency in the administration and management of local government;
  - (b) effective monitoring of fiscal performance; and
  - (c) Minimizing areas of friction among political functionaries and careerists through spelling out of the functions of each functionary.
- (ii) Granting of approval to local government on capital projects. That is, the request to embark on meaningful capital projects above N1 million by the local government is

processed for approval of the Deputy Governor. These projects were scrutinized by this Ministry to ensure that the cost for executing them is reasonable and that such projects are of direct benefits to the people. Through this measure, it is interesting to note that all our local governments have physical projects to showcase as their modest achievements.

- (iii) The Ministry made significant efforts to boost agriculture at all local governments level as a way of not only enhancing internally-generated revenue for the local governments but also at ensuring food sufficiency and creating employment opportunity for youths. In this regard, some key officials of local governments made trips to Songhai farm experiment in Porto-Novo. This experiment is with a

view to revolutionising agriculture in

the local government councils. Five youths per local government were sent out to undergo training at the Songhai Farm Settlement at Porto-Novo.

- (iv) The Ministry also ensures that proceeds from the excess crude oil from the Federation Account were used on tangible projects, such as construction of roads, new blocks of classrooms, purchase and installation of transformers, etc.
- (v) The Ministry assisted all the local government councils in the preparation of their yearly budgets so as to ensure that they have capital projects that will have direct impact on the lives of the people. The Local Government Treasury Board meeting, under the chairmanship of the Deputy Governor, considered the yearly budgets of the 30 local governments and the area office. All the local governments are expected to present the budgets, after consideration by the Local Government Treasury Board, to their various local government legislative houses for passage into law.
- (vi) The Ministry embarked on periodic supervision of local government projects to ensure that funds expended on capital projects are judiciously spent.
- (vii) The Ministry serves as the secretariat for the State Joint Local Governments Account Allocation Committee which is saddled with the responsibility of sharing the allocation from the Federation Account to all the local governments and the Area Office in the state. In this regard, both technical and plenary meetings of the committee were held regularly and on monthly basis.
- (viii) The Ministry processed for approval from time to time

workshop/conferences organized by various institutions in different parts of the country and overseas for political appointees of the local governments.

- (ix) The Ministry in collaboration with the State Due Process Office has concluded arrangement for the establishment of a Central Local Government Due Process Unit in each of the local government areas and Ife East Area Office. This actually took off on 1<sup>st</sup> June, 2009 with the appointment of professionals as consultants in their various fields such as architecture, electric/electronics, mechanical engineering, etc.
- (x) E-portal and website have been established/installed in all the local government councils to facilitate better and effective communication.

Communities were mobilized and formed into Community Development Associations from time to time. This is with the aim of imparting the right techniques for executing their projects, making them self-reliant and complementing government's efforts in their various communities. So far, 200 communities were registered in addition to the existing 1,800 that have been registered.

The Ministry facilitated the disbursement of local governments grants-in-aid for worthy self-help projects. The grant increased from N2.1 million in 2006 to N3 million in 2008 per local government. That of the state was increased from N3 million in 2006 to N7.5 million which was doled out to 151 worthy self-help projects, in 2008.

The project support communication television programme titled "Ajose Wa" and a radio programme tagged, "Ka Sowo Po" to motivate and support local communities to understand self-help approach and engage in public enlightenment through radio and television were regularly aired. The programmes succeeded in creating healthy rivalry amongs communities in Osun State.

Under community driven rural development programme of the Ministry, a two-day roundtable donor conference was held at MicCom Golf Hotels and Resorts, Ada from 30<sup>th</sup>-31<sup>st</sup> March, 2009. It was attended by various stakeholders such as industrial magnates, members of the National Assembly, banking icons, governors from South West states, legislators from states and other dignitaries. The roundtable afforded the state government the opportunity of showcasing her investment potentials to partners in attendance. Pledges were made by different organizations towards identified projects for support and following activities.

The state government procured 1,220 farm implements which were on Tuesday, 2<sup>nd</sup> June, 2008 at the Multipurpose Hall of Local Government Service Commission, Osogbo, distributed to farmers in 61 local communities. The materials distributed to farmers were knapsack sprayers, Gramazone and Attrazine.

As regards her commitment towards reducing poverty and empowering women in the 61 local communities, a ten-day skill acquisition and income generating exercise was held from 19<sup>th</sup>-29<sup>th</sup> May, 2009 at the headquarters of the nine federal constituencies of the State. A sum of N10,000.00 interest-free loan was given to each beneficiary.

Again, to achieve zero dependence of the same 61 communities, the government approved a five-day intensive training for 134 artisans, including six UNICEF assisted local communities on the repair of hand-pump boreholes. The first batch of the training took place from Sunday, 31<sup>st</sup> May-Friday, 5<sup>th</sup> June, 2009 and the second phase started on 7<sup>th</sup> May, and ended on the 12<sup>th</sup> June, 2009.

### CHIEFTAINCY DECLARATION

The following chieftaincy declarations were processed and approved by the Executive Council in line with the Chiefs' Law, Cap. 25 Laws of Osun State, 2002:

- (i) Amended Declaration for Oluwo of Iwo;

- (ii) Amended Declaration for Alademure of Ibokun, Obokun Local Government;
- (iii) Amended Declaration for Owa of Otan-Ayegbaju, Boluwaduro Local Government;
- (iv) Amended Declaration for Onijeda of Ijesa-Ijesa, Oriade Local Government;
- (v) Elerinmo of Erinmo, Oriade Local Government;
- (vi) Alasaba of Asaba, Odo Otin Local Government;
- (vii) Olopete of Opete, Odo-Otin Local Government;
- (viii) Olugbense of Agunrodo, Ejigbo Local Government
- (ix) Ologuro of Oguro, Iwo Local Government;
- (x) Olukotun of Ikotun, Iwo Local Government
- (xi) Eburu of Iba, Ifelodun Local Government;
- (xii) Agbowu of Ogbaagbaa, Ola-Oluwa Local Government
- (xiii) Akire of Ikire-Ile, Ola-Oluwa Local Government;
- (xiv) Aladodo of Aladodo-Ijesa , Atakunmosa East Local Government Area;
- (xv) Aloya of Iloya, Atakunmosa West Local government;
- (xvi) Aloya of Iloya, Atakunmosa West Local Government;
- (xvii) Elerin of Erin-Osun, Irepodun Local Government area;
- (xviii) Oluwo of Iwo-land, Iwo Local Government area.aa

### Rift Settlement

This government also intervened in the lingering chieftaincy crises between Ife-Modekeke, Imogbara and his subjects; the Owa Obokun of Ijesaland and his chiefs, Kajola-Ijesa in Atakunmosa West Local Government Area; Alaagba of Aagba in Boripe Local Government Area; Olowena of Owena-Ijesa in

Oriade Local Government Area; Ologbaaga of Ogbaaga in Ayedaade Local Government Area; Akinla of Erin-Ijesa in Oriade Local Government Area, Sooko of Itaakun in Irewole Local Government Area; and Olu of Ile-Ogbo in Ayedire Local Government Area.

**Restoration to Part II Status**

In the same vein, the Ministry processed and got approval for restoration to Part II Status of the following chieftaincies:

- (i) Aladodo of Aladodo-Ijesa - Atakumosa East Local Govt.
- (ii) Alamo Ayegbaju Ijesa - Atakumosa East Local Govt.
- (iii) Akoromoja of Ikoromoja Ijesa - Atakumosa East Local Govt.
- (iv) Alajido of Ajido-Ijesa - Atakumosa East Local Govt.
- (v) Alapa of Ita-Apa - Atakumosa East Local Govt.
- (vi) Oloni of Eti-Oni - Atakumosa East Local Govt.
- (vii) Atiya of Itiya - Obokun Local Govt.
- (viii) Aregun of Iregun - Obokun Local Govt.
- (ix) Onitegun of Itegun - Obokun Local Govt.
- (x) Alowa of Ilowa - Obokun Local Govt.
- (xi) Alagunmodi of Itagunmodi - Obokun Local Govt.

**Approval of Filling of Vacant Stool**

During the period under review; the following Vacant Stools were filled:

- (i) Owa of Otan-Ayegbaju;
- (ii) Aragbiji of Iragbiji;
- (iii) Timi of Ede;
- (iv) Olufon of Ifon-Osun;
- (v) Onibode of Bode Osi;
- (vi) Oloni of Eti-Oni;
- (vii) Orangun of Oke-Ila etc.

The Governor presented instruments and staff of office to thirty-four traditional rulers, among who were Owa of Otan-Ayegbaju, Asaobi of Isaobi, Agbadae of Igbadae, Aloba of Iloba, timi of Ede, Olufon of Ifon-Osun, Lilerin of Ilerin, Asaoni of Ora-Igbomina, Orangun of Oke-Ila, Alagunmodi

of Itagunmodi, Onibode of Bode Osi, Oluwo of Iwo-Oke, Olaresa of Masifa, Asundunrin of Isundunrin and Aragbiji of Iragbiji.

The state government approved the wearing of beaded crowns for the following traditional rulers:

- (a) Owaloja of Kajola-Ajaba in Ila Local Government Area;;
- (b) Obalaaye of Ife in Ife Central Local Government Area etc.
- (c) Obalaye of Iraye, Ipole, Ile-Ife
- (d) Ogunsua of Modakeke
- (e) Obalufe of Ilare, Ile-Ife
- (f) Obaloran of Ilode Quarters, Ile-Ife
- (g) Obawara of Iwara, Ile-Ife
- (h) Obajio of Moore Quarters, Ile-Ife
- (i) Olu of Awolowo Town
- (j) Alakila of Akinlalu
- (K) Alasipa of Asipa

The Ministry also processed the setting up of administrative panels of inquiry to investigate the dispute in the following chieftaincies:

- (i) Aragberi of Iragberi - Egbedore L. G.
- (ii) Akinla of Erin-Ijesa - Oriade L. G.
- (iii) Ataoja of Osogbo - Osogbo L. G.
- (iv) Alahun of Ilahun-Ijesa - Obokun L. G.

Presentation of Staff and Instrument of Office to Oba Francis Adedoyin, the Ogunsua of Modakeke

## UPGRADING OF IDO-OSUN AERODROME TO AN INTERNATIONAL AIRPORT

The Osun State Government is desirous of upgrading the Ido-Osun aerodrome to an international airport to ease the transportation of goods, equipment and men from the airport to the Living Spring Free Trade Zone. Detailed survey, engineering design and drawings have been undertaken by reputable consultants to the satisfaction of the Federal Airport Authority of Nigeria (FAAN) and the Federal Ministry of Transport (Aviation).

Based on the initial design of a local airport, contractors were pre-qualified and after a keenly competitive Bidding the contract was awarded to Messer P. W. Nig. Ltd at a cost of N3.7b. However, the Federal Airports Authority of Nigeria called for the extension of the runway to an international standard. This necessitated re-designing which now raised the estimated project cost to N8.1b.

As at 2007, the Federal Government has agreed to fully sponsor the project but it did not make provision for it in the budget until 2008. In view of the importance of the airport to the successful operation of the Free Trade Zone, the state government is contemplating seeking approval from the Federal Government to make use of a private developer under a Built, Operate and Transfer (BOT) arrangement, if the Federal Government is no more forthcoming on funding the project.

The works to be carried out on the upgrade of the aerodrome to an international airport are:

### A. CIVIL WORKS

- (i) Construction of Runway: 2700m x 60m
- (ii) Construction of Taxiway: 2 legs of

550m x 25m width

- (iii) Construction of Apron: Construction of Apron of dimension 75x250mm
- (iv) Construction of Internal Roads: 3.50km
- (v) Perimeter Road: 10km
- (vi) Chain link Fence: Expanded metal fence/solid block wall 12,000m
- (vii) Car Park: 135 x 40m

### B. BUILDING WORKS

- (i) Main Terminal Building
- (ii) Control Tower
- (iii) Fire Station
- (iv) Power Station Security Post.

## CENTRE FOR BLACK CULTURE AND INTERNATIONAL UNDERSTANDING

The United Nations Educational, Scientific and Cultural Organization (UNESCO) selected Osogbo for the siting of the Centre for Black Culture and International Understanding. As part of its contribution to ensure the realization of the vision, the government embarked on the provision of infrastructural facilities for the centre.

The Centre, the first of its kind in Africa, is an avenue to prove the fact that Osun State is indeed the home of culture and tourism.

### PROJECT COMPONENT

Essentially, the project comprises seven buildings, road networks and extension of electricity valued at over N1.0billion. Work is almost completed on the Centre and the progress is as follows:

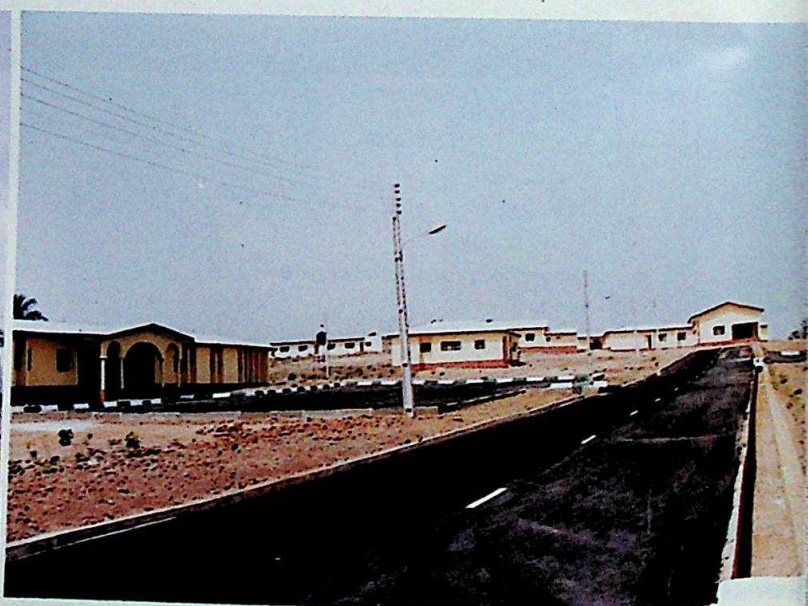

S/NO	PROJECTS COMPONENTS	STATE OF WORK	REMARKS
<b>A.</b>	<b><u>BUILDINGS</u></b>		
i.	Administrative Block	Completed	100%
ii.	Auditorium	Roofing stage	65%
iii.	Bukataria	Almost completed	60%
iv.	Gate house	Completed	90%
v.	Workshop/vocational centre	Almost completed	90%
vi.	Library	Almost completed	70%
vii.	Shops (3 Nos.)	Almost completed	40%
<b>B.</b>	<b><u>ROAD NETWORK</u></b>		
	Construction of dual carriage way access road to the centre, including street lighting.	Almost completed	98%
<b>C.</b>	<b><u>EXTENSION OF ELECTRICITY</u></b>		
	Extension of 33KV HT Electricity Network including Installation of 500KVA Transformer and 500KVA sound proof Generator.	Completed	100%

## LIVING SPRING FREE TRADE ZONE/INDUSTRIAL PARK

The Living Spring Free Trade Zone is sited on a 1,300 hectare of land about 3km to the state secretariat, Abere. It is bounded by Ede, Cocoa Product Industries and Ido-Osun airport. The zone is for large scale industrialists, foreign and indigenous.

2. LSFTZ is designed to be a world-class Free Trade Zone characterized by:

- (a) a simplified business environment, explicitly designed to attract investment by offering clearly defined incentives;
- (b) an enclave in which physical facilities and support services are operated to a high level of efficiency;
- (c) an area where special customs procedures will be operational. The procedure will allow the landing of raw materials and machines without immediate payment of import and taxes until the products are to be traded in the customs territory;
- (d) foreign investors will be allowed 100% remittance of profit to their countries; and
- (e) the zone will be operating as a "country within a country".

3. The government is to provide the basic infrastructure such as:

- (a) Road network, including drainage and sewage system,
- (b) Electricity,
- (c) Potable water,
- (d) Perimeter fencing,
- (e) Administrative building,
- (f) Prototype factory building/warehouse,
- (g) Police post
- (h) Customs and Excise building
- (i) Fire station,
- (j) Observatory/security
- (k) and other necessary facilities.

Management of the zone will be the responsibility of government through the Living Spring Free Trade Zone Company.

4. LFTZ will be demarcated into zones to ensure that related industries are located in the same area. Investors will be allocated land to build their factories and warehouses. The acquired area of land is expected to accommodate over 2,000 investors.

5. The state government has entered into an agreement with Industrial Development Group to develop the first phase of the zone. The portion which is about 30 hectares will be for food processing factories that will be utilizing major agricultural food products cultivated in the state. Some foreign investors have shown interest in having demonstration farms in selected local governments of the state, train youths on these farms and process products from the farms in the Free Trade Zone for local/export purposes.

6. Construction work is going on the first phase described in 5 above with a view to commencing operation soon. The projects under construction are:

- (i) Asphalt road network,
- (ii) Perimeter fence,
- (iii) Street light,
- (iv) Extension of 33KV high tension electricity line with installation of 2 Nos. MVA transformers,
- (v) Conference room,
- (vi) Warehouse.
- (vii) Transit camp for lodging of investors on transit.
- (viii) Administrative Building to serve as temporary office for custom, export processing zone etc.

7. LFTZ when fully operational, will provide over sixty thousand jobs for skilled and unskilled labour. Economic activities in the state will be boosted by the large number of distributors and suppliers that will be required by the industries in the zone. In addition to this, the demand for residential accommodation and transportation of goods and men will increase.

Governor's Lodge, Abuja built by Oyinlola's Government

Newly constructed Centre for Black Culture and International Understanding, Osogbo.

The Oyinlola administration since 2003 has taken steps to make life more comfortable for the people, especially the unemployed. Some of the programmes executed in this area are:

**SKILL ACQUISITION PROGRAMME**

Tools were given to youths who participated in the state government approved skill acquisition scheme.

500 Globacom call centres to empower the unemployed

Some of them were trained on how to barbe. The ninety-one youths were drawn from the thirty local governments and Ife East Area Office, Modakeke. To achieve this laudable programme, a sum of N3,700,000.00 was spent by the government.

**PROVISION OF LOAN FACILITIES:**

For the empowerment of its people, including youths and artisans, loan facilities were made available through various programmes and cooperative societies to artisans, butchers and others.

Taxi cabs bought to empower the unemployed and ease transportation problem

# CULTURE & TOURISM

## HIGHLIGHTS ON CULTURE AND TOURISM

- The Lagun Skills Acquisition Centre was inaugurated in April 2007. The centre is for the training of youths in wool carving, tailoring, textile making, among others, so as to make them self employed.
  - The state government, under Prince Olagunsoye Oyinlola, gave guest aristes of the Council on Culture permanent appointments.
  - The Osun Osogbo Groove was recognized by UNESCO as a World Heritage Site.
  - Following the approval of UNESCO, the Centre for Black Culture and International Understanding has been established in Osogbo.
- The call on the private sector to support efforts of the state government in developing the culture and tourism sector with the establishment of good hotels for the comfort of tourists has been well heeded. Osogbo, Ilesa, Iloko, Ile-Ife, Ede and other major towns in the state now have very good hotels that can compare favourably with other top-rated ones nationwide.

The building of a 100-room five star hotel in Osogbo with an 18-hole golf course through a BOT with a private company, despite the initial difficulties, is on course. Nine holes in the golf course are ready and are being played by interested golfers. A number of other tourist centres that dot the state have been enlivened with development of physical infrastructure there.

The first Osun State Tourism carnival took

place between Monday, 27<sup>th</sup> September and Saturday, 2<sup>nd</sup> October, 2004. It featured a lot of breath-taking activities, especially Miss Tourism Beauty Pageant. The Osun State Miss Tourism emerged as the national queen and the world's 4<sup>th</sup> best at a global pageant

Also, the state government has been admitted into the prestigious Presidential Council on Tourism (PCT) which features only a few tourism active states in Nigeria with its attendant benefits.

## CULTURAL TOURISM

The state government facilitated the rehabilitation of a new cultural centre complex which includes Duro Ladipo Hall for the use of performing artistes. There are craft buildings built within the premises of the Council for Arts and Culture, they have four major workshops, eight offices and two 43 diameter domes. The council recently inaugurated its Vocational Training Centre, the major objective of which is to train youths from across the state in various handicrafts and skills. It is believed that this would drastically contribute to the government's poverty alleviation programmes. Osun State, home of the rich Yoruba heritage, sent a 10-man performing team to Japan in 2005 at Aichi International Trade Fair to showcase the vintage culture of its people. There, "Eegun Olaifa" was adjudged the best and the troupe itself the most well-behaved from Nigeria.

Processing of applications for Certificates of occupancy (Cs of O) and other transactions in land have improved tremendously since the inception of this administration. This is because the procedure for processing of Cs of O has been overhauled such that it is now possible to obtain a certificate of occupancy within two months after publication in a daily newspaper. Same is true for other transactions. For example, it is possible to obtain a letter of consent for mortgage/sub lease within one week and consent to assign is processed within two weeks if all relevant documents submitted to facilitate processing are correct and complete.

The number of applications processed during the period is as follows:

TYPES OF APPLICATION	APPLICATIONS RECEIVED	APPLICATIONS APPROVED	APPLICATIONS REGISTERED
Certificate of Occupancy	330	216	293
Mortgage	68	41	84
Assignment	54	-	55
Sub-lease	42	4	8
Power of Attorney	5	5	5

**ESTATE DEVELOPMENT AND LAND ALLOCATION AT GOVERNMENT RESERVED AREA**

Since 2007 over 100 plots have been allocated to applicants who had deposited the prescribed premium into the government coffers. A sum of two million, one hundred and twenty-six thousand, one hundred naira (N2,126,100.00) was released for the re-grading of estate roads within Osun GRA, Gbongan Road, Osogbo. Work has commenced on the acquisition of land for Ikirun GRA in Ifelodun Local Government Area. This is in line with the policy of the present administration to create Government Reservation Areas in the six zonal headquarters in the state.

**OSUN STATE HOUSING ESTATE, OBA ROAD, OKE ONITI, OSOGBO**

The government has continued to secure buildings in the estate while it has put in place a committee to supervise the handover of the buildings to buyers. A sum of twelve million naira was released by this administration for clearing of bush, construction of drainages and culverts and grading of roads in the estate. Fifty housing units were allocated to Living Spring Loans Bank Limited to beef up its asset base.

**LAND ACQUISITION AND COMPENSATION**

An industrial estate has been marked out in Osogbo for use by the government. The government has paid the outstanding compensation of N5,800,000.00 for the acquisition of the acquired

two thousand hectare of land situated on Iwo/Odo Osun Road, Osogbo. The plots of land will be allocated to local investors to establish industries in the state.

The government has also paid one million nine hundred and thirty thousand naira (N1,930,000.00) to land owners, with genuine titles, affected by the acquisition of land for refuse dump. The land is located on Iwo/Osogbo Ido Osun Road. A sum of N30m was approved by the state government as payment to claimants affected by the dualisation of Olaiya Junction to Akoda (Ede) Junction road alignment.

**INTER-STATE BOUNDARY SURVEY:** The State Boundary Committee presented the state's position on Osun/Ekiti and Ogun/Ondo inter-state boundaries at the National Boundary Commission, Abuja. The survey departments of the three states and that of the Federal Government were directed to identify and monument the tripartite points and carry out ethnographic study of some segments of the boundaries. However, efforts to execute the identification/monumentation of the tripartite point and the ethnographic study have proved abortive because Ondo State has declined to honour the communiqué signed in Abuja.

**TOWN AND COUNTRY PLANNING**

During the years under review, the design and redesign of government reservation areas at

Osogbo and Ilesa were carried out so as to make more GRA plots available for allocation to members of the public.

#### **WORKERS' VILLAGE**

The Oyinlola administration conceived and completed the first phase of the workers' village at Akoda, Ede. The estate was inaugurated by Prince Oyinlola on 23<sup>rd</sup> May, 2005 to mark the second anniversary of the PDP administration in the state.

The houses and the infrastructural facilities provided include:

Twelve 2-bedroom detached bungalows;

Seven 3-bedroom detached bungalows;

Earth roads with drains;

Electricity provided with a 33KVA transformer which was connected to the national grid. A Memorandum of Understanding has also been designed by the government with a private estate developer to build more houses in the state.

#### **PRESIDENTIAL INITIATIVE, TO BUILD 500 HOUSING UNITS IN EACH STATE AND FCT USING UBRR1 TECHNOLOGY**

There was a presidential initiative to build 500

housing units in each state and the FCT. The Osun State Government, through the Osun State Property Development Corporation, has carved out about 20 hectares of land on three of its estates at Akoda Ede; Moremi Ile-Ife and Ajaka Ilesa where there is a proposal to build at least 100 housing units in the first phase of the programme. The government, as part of the conditions for participating in the programme, has accepted to provide the basic infrastructural facilities such as roads with drainages, electricity and water to the areas earmarked for the construction of the houses in the three estates.

#### **FEDERAL GOVERNMENT IMPACT**

As a way of reducing constraints associated with currency management in the state, the Central Bank of Nigeria has opened a branch office in Osogbo, the state capital. Its permanent branch building is being built in the capital. Contract for an airport at Ido-Osun has been awarded, federal roads were rehabilitated, contract for Ilesa and Iwo Water Schemes have awarded also and, among other things, an NNPC mega station has also been built and is operating in Osogbo.

Workers' Village, Akoda, Ede

# SPORTS

and women. School sports competitions have been encouraged while the state is becoming more prominent in football and tennis.

The government sponsors an annual football competition among local governments in the state. The state at the Gateway Games (2006 Sports Festival) won some of medals. Kano State hosted the second edition of the national Primary School Games Competition between April 17-25, 2004. The state contingent featured in five sporting events namely: boys football competition, girls handball, Tennis Boys and girls and Athletes. The state athletes through their hard work and excellent performances during the competition, won 2 gold, 4 silver and 3 bronze medals to be placed 9th on the overall table.

**S**ports remained a priority of the government. It is significant that during the first four years of the Oyinlola administration, the state, for the first time, has a football club representing it in the nation's Premier League. The government has given the club a Coaster bus while the Osogbo Sports Stadium has been re-grassed and rehabilitated for better performance of sport men

### NATIONAL PRIMARY SCHOOL GAMES (OYIN 2005)

Over N35m was spent by the Osun State government for the hosting of the National Primary School Games tagged "OYIN 2005". The state contingent came out tops and won the gold medal in football. The under-13 boys equally made appreciable impact in football at the international level when they won a cup in Argentina, thereby placing the name of the state on the world map.

Osun State U-16 Soccer Team being welcomed back to the State after an International tournament in Argentina

Trophy won by the State Football Team at the National Primary School Games (Oyin 2005) posted by the State

That Osun State under Prince Oyinlola is very peaceful is acknowledged by all, including even opponents of the Oyinlola administration. This is a product of so many factors; chief among them is the will of the political leadership to consciously achieve peace in all ramifications. To this end, the government has a policy of assisting all security agencies in the State, with necessary logistics. The government has provided communication equipment that has effectively linked all police formations in the state. It also donated 250 bulletproof vests to the state police command. Vehicles and other logistics have also been given to the police and other security agencies, including para-military outfits of the Federal Government.

Patrol Vans bought by Governor Olagunsoye Oyinlola's Administration for Nigeria Police

Bullet-proof Jackets purchased for Nigeria Police

One of the Police Stations constructed by the State Government

The government has taken seriously the implementation of development policies as they affect such areas as:

(i) **Juvenile Welfare:** Since May, 2003, a total of 233 cases of juvenile offenders were treated. Majority of the cases have been disposed off in the law courts. Sixty (60) juvenile offenders are accommodated in the juvenile remand home where they are properly fed and taken care of generally by the government. In the same vein, the structures of Remand Home Institution which were neglected by successive administrations in the state have been repaired and renovated by this administration.

(ii) **Family Violence Services:** A total of 581 cases of matrimonial disputes were handled out of which 286 were resolved.

(iii) **Care and upkeep of fostered children:** In four years, over 50 cases of abandoned children were effectively handed while child adoption, in line with the provisions of the law, was properly executed. The present administration has been providing funds for the care and upkeep of fostered children. For instance, this administration released fund to train Seun Olajinmi and procured for her working tools after training.

(iv) **Nigerian Legion:** The present administration has been boosting the morale of the Nigerian legion.

The state government has released money for the execution of various youth training programmes to ensure a brighter future for youths. In addition, fund was made available for the purchase and distribution of sporting and games materials to various youth recreational centres in all the six zones of the state.

The Oyinlola administration is a gender sensitive one and has continued to promote full utilization and integration of women potentials into national development. It has, for instance promoted the following programmes and policies:

- (A) Mobilisation of women to enlighten them on their basic rights and their expected roles in nation building through various seminars, workshops and training programmes;
- (b) Establishment of women empowerment committee to further mobilize, sensitize and empower women socially, economically and politically.
- (C) Rejuvenation of the Women Development Centre at Oke-Fia, Osogbo which serves as a rallying point for women's socio-economic activities, particularly in the area of vocational skill development.
- (d) Provision of various food processing machines at the grassroots level purposely to enhance the economic activities of women through increase in the quantity and quality of food processed.
- (e) Celebration of landmark event e.g. World AIDS Day, International Women's Day, Children's Day, International Day of the Family, Day of the African Child etc.
- (f) Re-inauguration of the Child Rights Implementation Committee to monitor and supervise the implementation of the rights of the child.
- (g) Inauguration of the Children's Parliament, a mock House of Assembly providing platform for children to express their views on national issues and problems facing the children.
- (h) Organisation of seminars for aged women in the state.
- (I) Economic Empowerment Programme to further enhance the economic status of rural women. This administration has approved a sum of N10m for a training programme for the acquisition of various vocational skills for about 1,300 women in all the thirty local governments and Ife East Area Office, Modakeke. Subsequently, a grant of N5,000 was given to each of the participants at the end of the training programme.

The Ministry of Environment was established in August, 2007. It has the following departments:

- Finance and Administration
- Planning, Research and Statistics
- Environmental Health and Urban Renewal
- Forest Management, Biodiversity and Wildlife Services
- Forest Regeneration and Utilization.

The Department of Forestry was domiciled in the Ministry of Agriculture and Natural Resources before the creation of Environment Matters. Major achievements of the Department of Forestry/Ministry of Environment since 2003-2009 are as follows:

#### Osun State Policy on the environment:

The policy document has been packaged and submitted to the State Executive Council for approval and adoption.

#### Revenue generation:

Details of revenue earning on yearly basis is shown below:

S/NO	YEAR	REVENUE GENERATED
1.	2003	N23,133,445.80
2.	2004	N30,300,481.37
3.	2005	N44,149,317.55
4.	2006	N43,547,021.00
5.	2007	N42,794,031.93

7.	2009 (July)	N45,917,906.00
		<b>N295,657,126.30</b>

New areas of revenue generation by the ministry include:

- Environmental and Haulage fee on Metal Scrap
- Environmental and Haulage fee on quarable materials
- Environmental Consultancy fee

#### Protection and Conservation of Forest Estates

Protection and conservation of a total of 58, 641 hectares of forest reserves in the state were vigorously pursued. Below are the names, locations and sizes of each of the Forest Reserves:

S/NO	RESERVE	LOCAL GOVT AREA.	SIZE (HA)
1.	Shasha	Ife South	23,064
2.	Ife, F3	Ife South	7,168
3.	Ago-Owu	Ayedaade	19,847
4.	Oba Hills	Ejigbo	4,225
5.	Ikeji-Ipetu	Oriade	2,549
6.	Oni	Atakumosa	(Disputed)
7.	Ila	Ila	230
	Ede	Ede	1,044
	Ejigbo	Ejigbo	214

#### Inauguration of Special Task Force on Forest Exploitation

The Executive Governor, Prince Olagunsoye Oyinlola, on 7th February, 2005 approved and inaugurated the Special Task Force on Forestry Exploitation to complement the efforts of staff in the ministry to monitor and police forest exploitation in the state.

#### Watershed Management:

The water bodies of Osun State, most especially the dams, are protected from evapo-transpiration and siltation through the introduction and planting of trees along the banks of the water dams (Iwo Water Dam, Esa-Odo Water Dam).

#### Apiculture:

The Ministry of Environment has embarked on the pilot scale honey production in the State.

#### Afforestation and Regeneration

#### Table of Achievements on Afforestation and Seedling Distribution

YEAR	PLANTATION ESTABLISHMENT (HA)	SEEDLING RAISING	SEEDLING DISTRIBUTION	SILVICULTURE TREATMENT (Ha)
2003	42	500,000	100,000	36
2004	17	60,000	161,600	-
2005	6.4	55,000	30,000	-
2006	18.5	66,000	28,800	-
2007	20	51,000	36,000	-
2008	12	92,000	45,000	40
2009	18	200,000	45,000	-
Total	133.9	1,024,000	446,400	76

A Total of 133.9 Hectares of Tree Plantation has been established.

# ENVIRONMENT

### Green Park and Recreational Centre:

The preliminary work on Green Park and Recreational Centre has been concluded. The project is a Private Public Partnership (PPP) initiative.

### Landscaping and Maintenance of Secretariat Complex and other Government Quarters:

The Ministry of Environment in 2009 was saddled with the responsibility of landscaping and maintenance of Secretariat Complex and other government quarters in the state. The Government Secretariat has been fully transformed.

### Beautification of Roundabout and Strategic Places in the State:

The Ministry has facilitated the beautification of roundabouts in the state among which are Lameco, Secretariat, Onitsha and Okefia. The frontage of old the Government Secretariat and the Oke Oniti Government Quarters were also beautified.

### Omo-Shasha-Oluwa Conservation and Eco-Tourism Development:

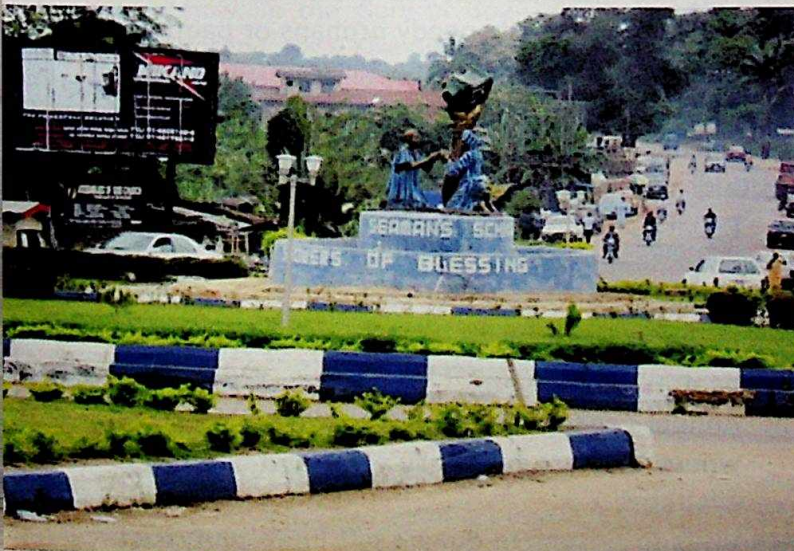

Osun State is involved in international and state collaboration in the long term conservation and eco-tourism development in Omo-Oluwa and Shasha forests of South-West Nigeria. The British Gas Nigeria, Nigeria Conservation, Ogun and Ondo States are the collaborators in the project.

### Other Achievements include:

- National Environmental Sanitation Day for

2008 and 2009 were observed.

- Flood Awareness Campaign was carried out in August 2009
- Tree planting campaign was carried in July 2009
- Amendment to Forestry Law for the preservation and control of forests in Osun State and other matters connected therewith was enacted and signed into law by Oyinlola on 7th April, 2008.
- Inauguration of Environmental Sanitation Day at the local government level.
- Reduction in illegal and indiscriminate felling of trees.
- Increase in the awareness of the people on environmental issues such as bush burning, indiscriminate dumping of refuse on waterways and other areas of environmental sanitation.
- Collaboration with the British Council on the World Environmental Day.
- Concrete channelisation of streams and flood-prone areas through OSEPA in some parts of the state.
- Establishment of the first climate change unit in Osun State.
- Awareness creation of Survey and Enumeration of Telecom (GSM) masts within Osun State.
- Awareness creation on issues relating to pollution and emission control.

# WOCDF: SIX YEARS ON

Her Excellency  
**Princess Omolola Oyinlola**  
Initiator, WOCDF

The vision came into fruition five years ago when in June 2004 Women and Children Development Initiative Foundation (WOCDF) was initiated by the wife of the Osun State Governor, Princess Omolola Oyinlola. The project was borne out of her interest and concern for women and children because of their vulnerability in the society. It is also aimed at focusing on advocacy for their roles in the society and to assist them on survival strategies, rights, growth, development and empowerment so as to make them realize their full potentials like their male counterparts. The vision of the NGO is to provide welfare services to uplift women, children, the aged, the physically-challenged, youths and the destitute in the society. To achieve its desired result in the midst of limited resources, the WOCDF multipurpose hall was built to serve as an income generating venture and as the administrative headquarters. Ever since its establishment, WOCDF, through the focused and visionary leadership of its initiator as well as the members of the board of trustees has been able to impact positively on the lives of the less privileged in the state.

Some of the achievements of WOCDF are stated below:

## COORDINATION AND MOBILISATION

On assumption of office of the present administration in Osun State, Princess Oyinlola organized a workshop on protocol, security and etiquette for all stakeholders comprising wives of members of the State Executive Council, wives of Osun State House of Assembly members, wives of local government chairmen and representatives of women non-governmental prepared for the onerous task of governance to which they and by extension, their spouses, have been added with. The workshop has become a periodic one and its results are obvious in the performance of wives of the local government chairmen who have taken after the mother of the state in executing masses-oriented projects, especially for the less-privileged.

## WELFARE SERVICES

Virtually all the activities of WOCDF are aimed at bringing succour, growth and development to all and sundry. There are numerous people in the society in dire need of assistance. All letters for assistance received from individuals are treated on merit. Some are counseled while some are referred to relevant agencies that could assist them. The WOCDF usually assists needy orphans or paupers. The Office of the Wife of the Governor has neatly collaborated with WOCDF to assist the needy in the underlisted areas:

- i. Individuals in need of assistance;
- ii. Relief packages to widows, physically challenged persons etc;
- iii. Distribution of gifts and food items to widows, physically challenged persons, the elderly, single parents, paupers etc;
- iv. Annual get-together for the aged in the state where they are medically examined and given gift items;
- v. Visits to prisons to donate gift items and relief materials to inmates;

vi. Graduation ceremony for those trained free of charge at the WOCDIF Vocational Training Centre.

**HEALTH CARE SERVICES**

Most of the requests to Princess Oyinlola for assistance are for settlement of medical bills. Examples of such cases are as follows:

- (i) Kidney transplant for Mr. Shola Awoyinfa in India;
- (ii) Provision of N465,000 for Opeyemi Ojo for a heart operation in Israel;
- (ii) Charity visits to hospitals, health centres and motherless babies' homes;
- (ii) Donation of a fully-equipped children's ward to the State Hospital, Asubiaro, Osogbo in May 2008;
- (ii) Treatment and rehabilitation of two mentally ill women, Sherifat (from Ile-Ogbo) and Aisha (from Kogi State ) and their children. They were later reconciled with their families;
- (ii) Visiting and assisting people with HIV/AIDS with provisions, food items and other consumables;
- (ii) As part of her commitment to the health care of the people, especially those living with HIV/AIDS, Princess Oyinlola has organized several programmes for People Living With AIDS (PLWA) from across all the 30 local government areas of Osun State, including Ife East Area Office, Madakeke-Ife. They were given food and gift items as well as cash gift. They were also encouraged and given assurances that all hopes were not lost;
- (ii) In November 2006, WOCDIF introduced free food supplement Dioscovite to about 150 Sickle Cell patients in Osun State for the first six months. It involves free medical test and application of Dioscovite as well as free medical proteinous food items. It is a monthly programme which still runs till now. To the glory of God, one of the patients, former Miss Kikelomo Popoola, a Law graduate from the University of Ibadan is now a mother with a baby living a normal healthy life;
- (ii) The fortnight WOCDIF Fitness Exercise commenced in September, 2007 to keep the women in Osun State physically fit and in good form;
- (ii) Payment of hospital bills of some indigent patients at UCH, Ibadan, LAUTECH Teaching Hospital, Osogbo, Osun State Hospital, Osogbo, Our Lady of Fatima Catholic Hospital, Jaleyemi, Osogbo etc.
- (ii) Distribution of 2000 free eye glasses in 2009.

**PHYSICALLY CHALLENGED PERSONS**

Princess Oyinlola has a strong passion for the physically challenged in the society. She believes that they need to

be assisted and encouraged to attain enviable heights in their chosen careers.

To achieve this noble objective requires assisting them in their desire to move around. This informs the purchase and distribution of wheelchairs to the physically challenged in addition to other assistances given to them.

**CHILDREN'S DEVELOPMENT PROGRAMME**

Princess Oyinlola is a loving, caring and good mother not only to her biological children but to other children in the state. In fact, this project has been uppermost in her heart and is being pursued it all vigour.

- (i) Charity visits to motherless babies' homes;
- (ii) Deworming of over 45,000 pupils across the state.
- (iii) Caring for sets of triplets;
- (iv) Assistance to all children in need;
- (v) Conveyance of a special children's summit in the state;
- (vi) The annual children holiday camping programme affords the participants the opportunity to interact among themselves, learn new things, visit places of interest and interact with top government officials;
- (vii) Annual end of the year party for children.

**WOMEN DEVELOPMENT PROGRAMME**

Various women development programmes have been designed to solve some of the identified social problems in the society which affect indigent widows, single parents, the aged, mentally ill women and poor women etc.

Some of the programmes implemented are as follows:

- (i) Involvement of women in WOCDIF farming programme;

**Revolving loans for indigent widows:**

Rehabilitation of two mentally ill women Sherifat from Ile-Ogbo and Aishat from Kogi State;  
Formation of a female football team called Oyinlola Queens with assistance of the state government.

**PHYSICAL PROJECTS**

The Centre has the underlisted components

- i. WOCDIF Multipurpose Hall
- ii. Vocational Training Centre
- iii. Children Recreational Centre
- iv. Restaurant
- v. Computer Centre
- vi. Office Complex
- vii. Gymnastic Centre
- viii. Open Space

The first project being WOCDIF multipurpose hall

# WOCDF

comprises:

- A. Multipurpose hall that can conveniently accommodate 2,000 people at a time
- B. Women Hall of Fame
- C. Administrative Office Space
- D. Library
- E. Waiting/Dressing Rooms
- F. Workshop syndicate rooms 2No.
- G. Stage
- H. Gallery
- I. Toilets 24 units
- J. Foyer/lobby

teeming population and provide raw materials for its industrial development is joking with its future. WOCDF has, therefore, embarked on farming to ensure adequate food production in Osun State. As a result of this, the foundation planted a large quantity of maize which was later sold to the masses at a subsidised rate.

Also, there is a 100-acre of palm tree plantation which was leased out for five years - 2005-2010 for the production of palm oil. The palm oil processed is sold to the public at reduced prices. Soon, the by products of palm trees shall be utilized for economic activities.

The first project was chosen with a view to generating funds for other projects and to carry on with the day-to-day running of the foundation. To be modest, the multipurpose hall with the architectural design, landscaping, car parks and serene environment makes it stand tall among others. The monumental edifice will therefore stand the test of time.

A fish pond, a honey farm and a cassava processing centre where gari and other cassava products are being produced, are now in place. The cassava produced in WOCDF farm forms the bulk of the raw materials at the cassava processing centre.

WOCDF is poised to contribute its invaluable quota to the growth and development of Osun State. Philanthropic individuals and corporate bodies at both national and international levels are therefore appealed to donate generously to WOCDF in kind and cash to assist it do more for the less privileged in the state

### FARM PROJECT

Farming is very important to the economic development of any nation because a country that cannot feed its

Princess Oyinola presenting gifts to People Living With HIV.

Following the April 14, 2007 assembly elections, the Peoples Democratic Party won 15 seats out of the 26 seats in the Osun State Parliament. The remaining eleven seats went to the Action Congress (AC). On the 4<sup>th</sup> of June, 2007, Governor of Osun State, Prince Olagunsoye Oyinlola, inaugurated the fourth Osun State House of Assembly.

Newly constructed Office complex of Osun State House of Assembly

In his address, the governor charged the House to build on the legacy left by the Third Assembly in respect of mutual understanding, legislative duties and effective execution of constituency projects. Hon. Adejare Bello the re-elected representative of Ede North State Constituency was unanimously elected to lead the House again as the Speaker. The erstwhile Majority Leader, Hon. Ropo Oyewole, who also returned became the Deputy Speaker.

It should be noted that while the 15 PDP members resumed for legislative duties on the 4<sup>th</sup> of June, 2008, the 11 AC members stayed away from the parliament until the 9<sup>th</sup> July, 2007.

The swearing in of the 11 AC members was conducted by the Speaker, who admonished them to realize the fact that they were in the parliament to work for the development of Osun State irrespective of party differences.

The Speaker promised to lead the parliament justly, fairly and with a large heart.

The fourth assembly has been forging ahead in its legislative and oversight functions with a common interest of moving Osun State forward.

The parliament has screened, considered and approved members for the State Executive Council. The Assembly has sixteen standing committees overseeing different ministries, agencies and government parastatals.

For effective discharge of oversight functions, the state government purchased official cars for the legislators.

So far, the parliament has been able to make

some decisions and intervene in number of knotty issues. Of note was the tripartite meeting called by the parliament to broker peace between the government and its workforce in respect of the actualization of the N9,500 minimum wage across the board for workers.

So far, the fourth Osun State House of Assembly has passed eleven bills into laws. These are:

- i. Osun State Property Development Corporation (Establishment) Law.
- ii. Osun State Public/Political Office Holders (revised Remuneration Package) Law.
- iii. Osun State University Development Fund (Establishment) Law.
- iv. Supplementary Appropriation Law 2008.
- v. Osun State Appropriation Law 2008.
- vi. Osun State Emergency Management Agency (Establishment) Law.
- vii. Osun State Revenue Generation Law 2007.
- viii. Child Rights Law 2007
- ix. Osun State Customary court of Appeal (Establishment) Law.
- x. Osun State Forestry Ammendment Law 2007.
- xi. Osun State Distric customary Courts and Customary Courts Law.

It is also noteworthy that following the success of the constituency projects in the third assembly which saw to the even spread of projects across the State, Governor, Oyinlola, following budgetary provision, released money meant for constituency projects to the House.

The state Judiciary has continued to enjoy adequate attention. Activities in this sector include the following:

#### JUDICIAL SERVICE COMMISSION APPOINTMENTS:

1. **HIGH COURT JUDGES:** have continued to be appointed on yearly basis.
2. **CUSTOMARY COURT OF APPEAL:** Hon Justice G. O. Ojo was sworn in as the pioneer President of the Customary Court of Appeal on 30th March, 2008. Subsequently, Hon. Justice S. A. Adeoye, Hon. Justice O. Daramola and Hon. Justice Ajeigbe were appointed and sworn in as members of the Court on 25<sup>th</sup> June, 2008. Mr. Falola S. O. was appointed as the pioneer Chief Registrar of the court with Mr. Adenlu as the Deputy Chief Registrar.
3. **ELEVATION OF SECRETARY, JUDICIAL SERVICE COMMISSION AND CHIEF REGISTRAR, HIGH COURT OF JUSTICE:** For the first time in the history of the judiciary in Osun State, Governor Oyinlola appointed the Secretary, Judicial Service Commission and the Chief Registrar, High Court of Justice as Permanent Secretaries. They were both sworn in on 23rd June, 2005.
4. **APPOINTMENT OF MAGISTRATES** as at when due
5. **RECRUITMENTS OF CUSTOMARY COURT SUPPORTING STAFF:** In line with the provision of Laws of Osun State Cap 37(5), the Governor approved that the State Judicial Service Commission should take over the affairs of Grade "C" Customary Courts, making it the duty of the commission to appoint supporting staff for the courts. The Judicial Service Commission has, therefore, appointed staff to man the one hundred and three (103) Customary Courts in the state.

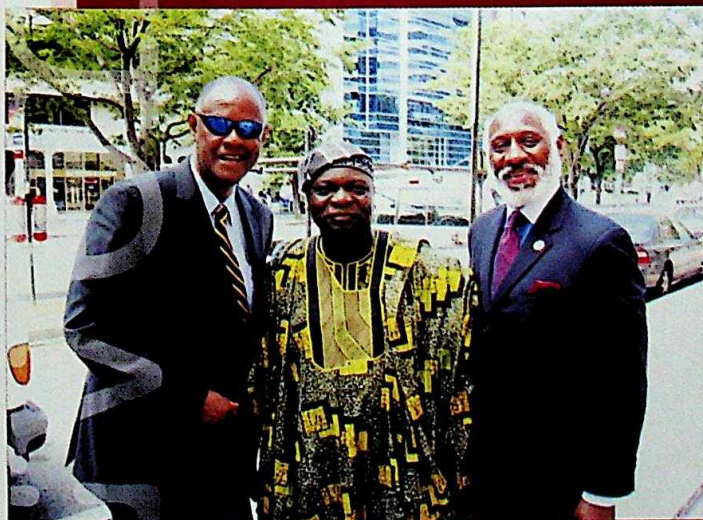

This has since improved the dispensation of justice at the customary court level and increased the internally generated revenue of the state government through the customary courts.

6. **REMUNERATION OF MEMBERS OF THE STATE JUDICIAL SERVICE COMMISSION:** For the first time also in the history of the Judicial Service Commission, members of the Commission were placed on consolidated salaries in line with the Public/Political Office Holders Remuneration Package Law 2000 Schedule B.

#### HIGH COURT OF JUSTICE

1. Construction of a new 40-room Administrative Block for use of members of staff.
2. Construction of the Multipurpose Hall for judicial events.
3. Amendment to the High Court Rules of Osun State.
4. Amendment to the Magistrates' Courts Rules of Osun State.
5. Provision of 18 Peugeot 406 saloon Cars to honourable judges of Osun State High Court.
6. Provision of 18 Toyota Corolla Cars for Deputy Chief Registrar, chief magistrates and senior magistrates in the state.
7. An additional provision of 17 Geely cars to magistrates within the State
8. Passage into law, and the inauguration of the Osun State Customary Court of Appeal Law.
9. Provision of Toyota Camry 2007 Series for the President of the Customary Court of Appeal as well as the provision of seven Toyota Corolla cars for the other judges and permanent secretaries of the court.
10. Renovation and equipment of the Osun State Customary Court of Appeal.
11. Provision of six (6) mobile court buses (Toyota Hiace) for the smooth running of the mobile courts in the state.
