**W**hen the ETF announced it had earmarked N41.4 billion its special high impact projects in 13 selected focal institutions across the country, many Nigerians thought it was just a pronouncement. The ETF has been working extremely hard to

ensure the success of the programme which is meant to provide world class environment and facilities for learning and research. So far, the initiative has generated excitement and expectations in the sector, as the beneficiaries and the students see hope for the future. The ball has been set rolling for working out modalities for implementation.

To complement this, the Fund announced the establishment of a National Research Fund to the tune of N3 billion to boost the conduct of research in Nigeria's tertiary institutions of learning. The ETF also announced the setting up of a Book Development Fund of N2 billion with the aim of reviving and encouraging the production and consumption of academic texts in the nation's tertiary institutions. The modalities for the implementation of both the Book Development Fund and the National Research Fund have been worked out by teams of carefully selected experts and Professors drawn from different parts of the world.

This edition therefore, will focus more on these laudable efforts of the Fund towards repositioning education in Nigeria. Within a short period of time, the education sector has witnessed some revolutionary strides by the ETF, that cannot be compared to any in the annals of education in Nigeria.

The ETF has remained focused in its resolve to ensure that its interventions are restricted to the area of core academic activities of its beneficiaries.

It has also remained resolute in ensuring accountability and transparency in its dealing. As the Fund moves on for these positive changes in Nigeria, it needs the support of not only its beneficiaries, but the society at large.

We therefore, welcome suggestions that will extend the positive impact of the Fund on the sector.

## OUR SERVICE CHARTER

### VISION

"... to be a World Class Public Sector Intervention Agency in the Education Sector."

### MISSION

...to deliver competent and forward looking intervention programmes through funding, to all levels of the Nigerian education system, in line with the provisions of its enabling act.

### OUR SERVICES

- Provide funding for educational facilities and infrastructural development.
- Promote creative and innovative approach to educational learning and services.
- Stimulate, support and enhance improvement activities in the educational foundation areas, like Teacher Education, Teaching practice, Library Development and Speacial Education Programmes.
- Champion new literacy enhancing programmes as scientific, information and technological literacy.

### OUR CUSTOMERS

- Public Tertiary institutions
- Public Secondary and Primary schools

## ETF Board Meets With Management Staff

The Board of Trustees recently held a meeting with the General Management Staff of the Fund.

While welcoming the Staff, Chairman of the Board of Trustees, Dr Musa Babayo stated that the meeting was an interactive one and members were expected to air their views on how to move the Fund forward. The fact that the Fund has become visible in Nigeria today, he said, was an indication that the staff have been up and doing in their various responsibilities. The Board, he continued, works within the limits of its powers, to address issues that would enhance the productivity of staff of the Fund.

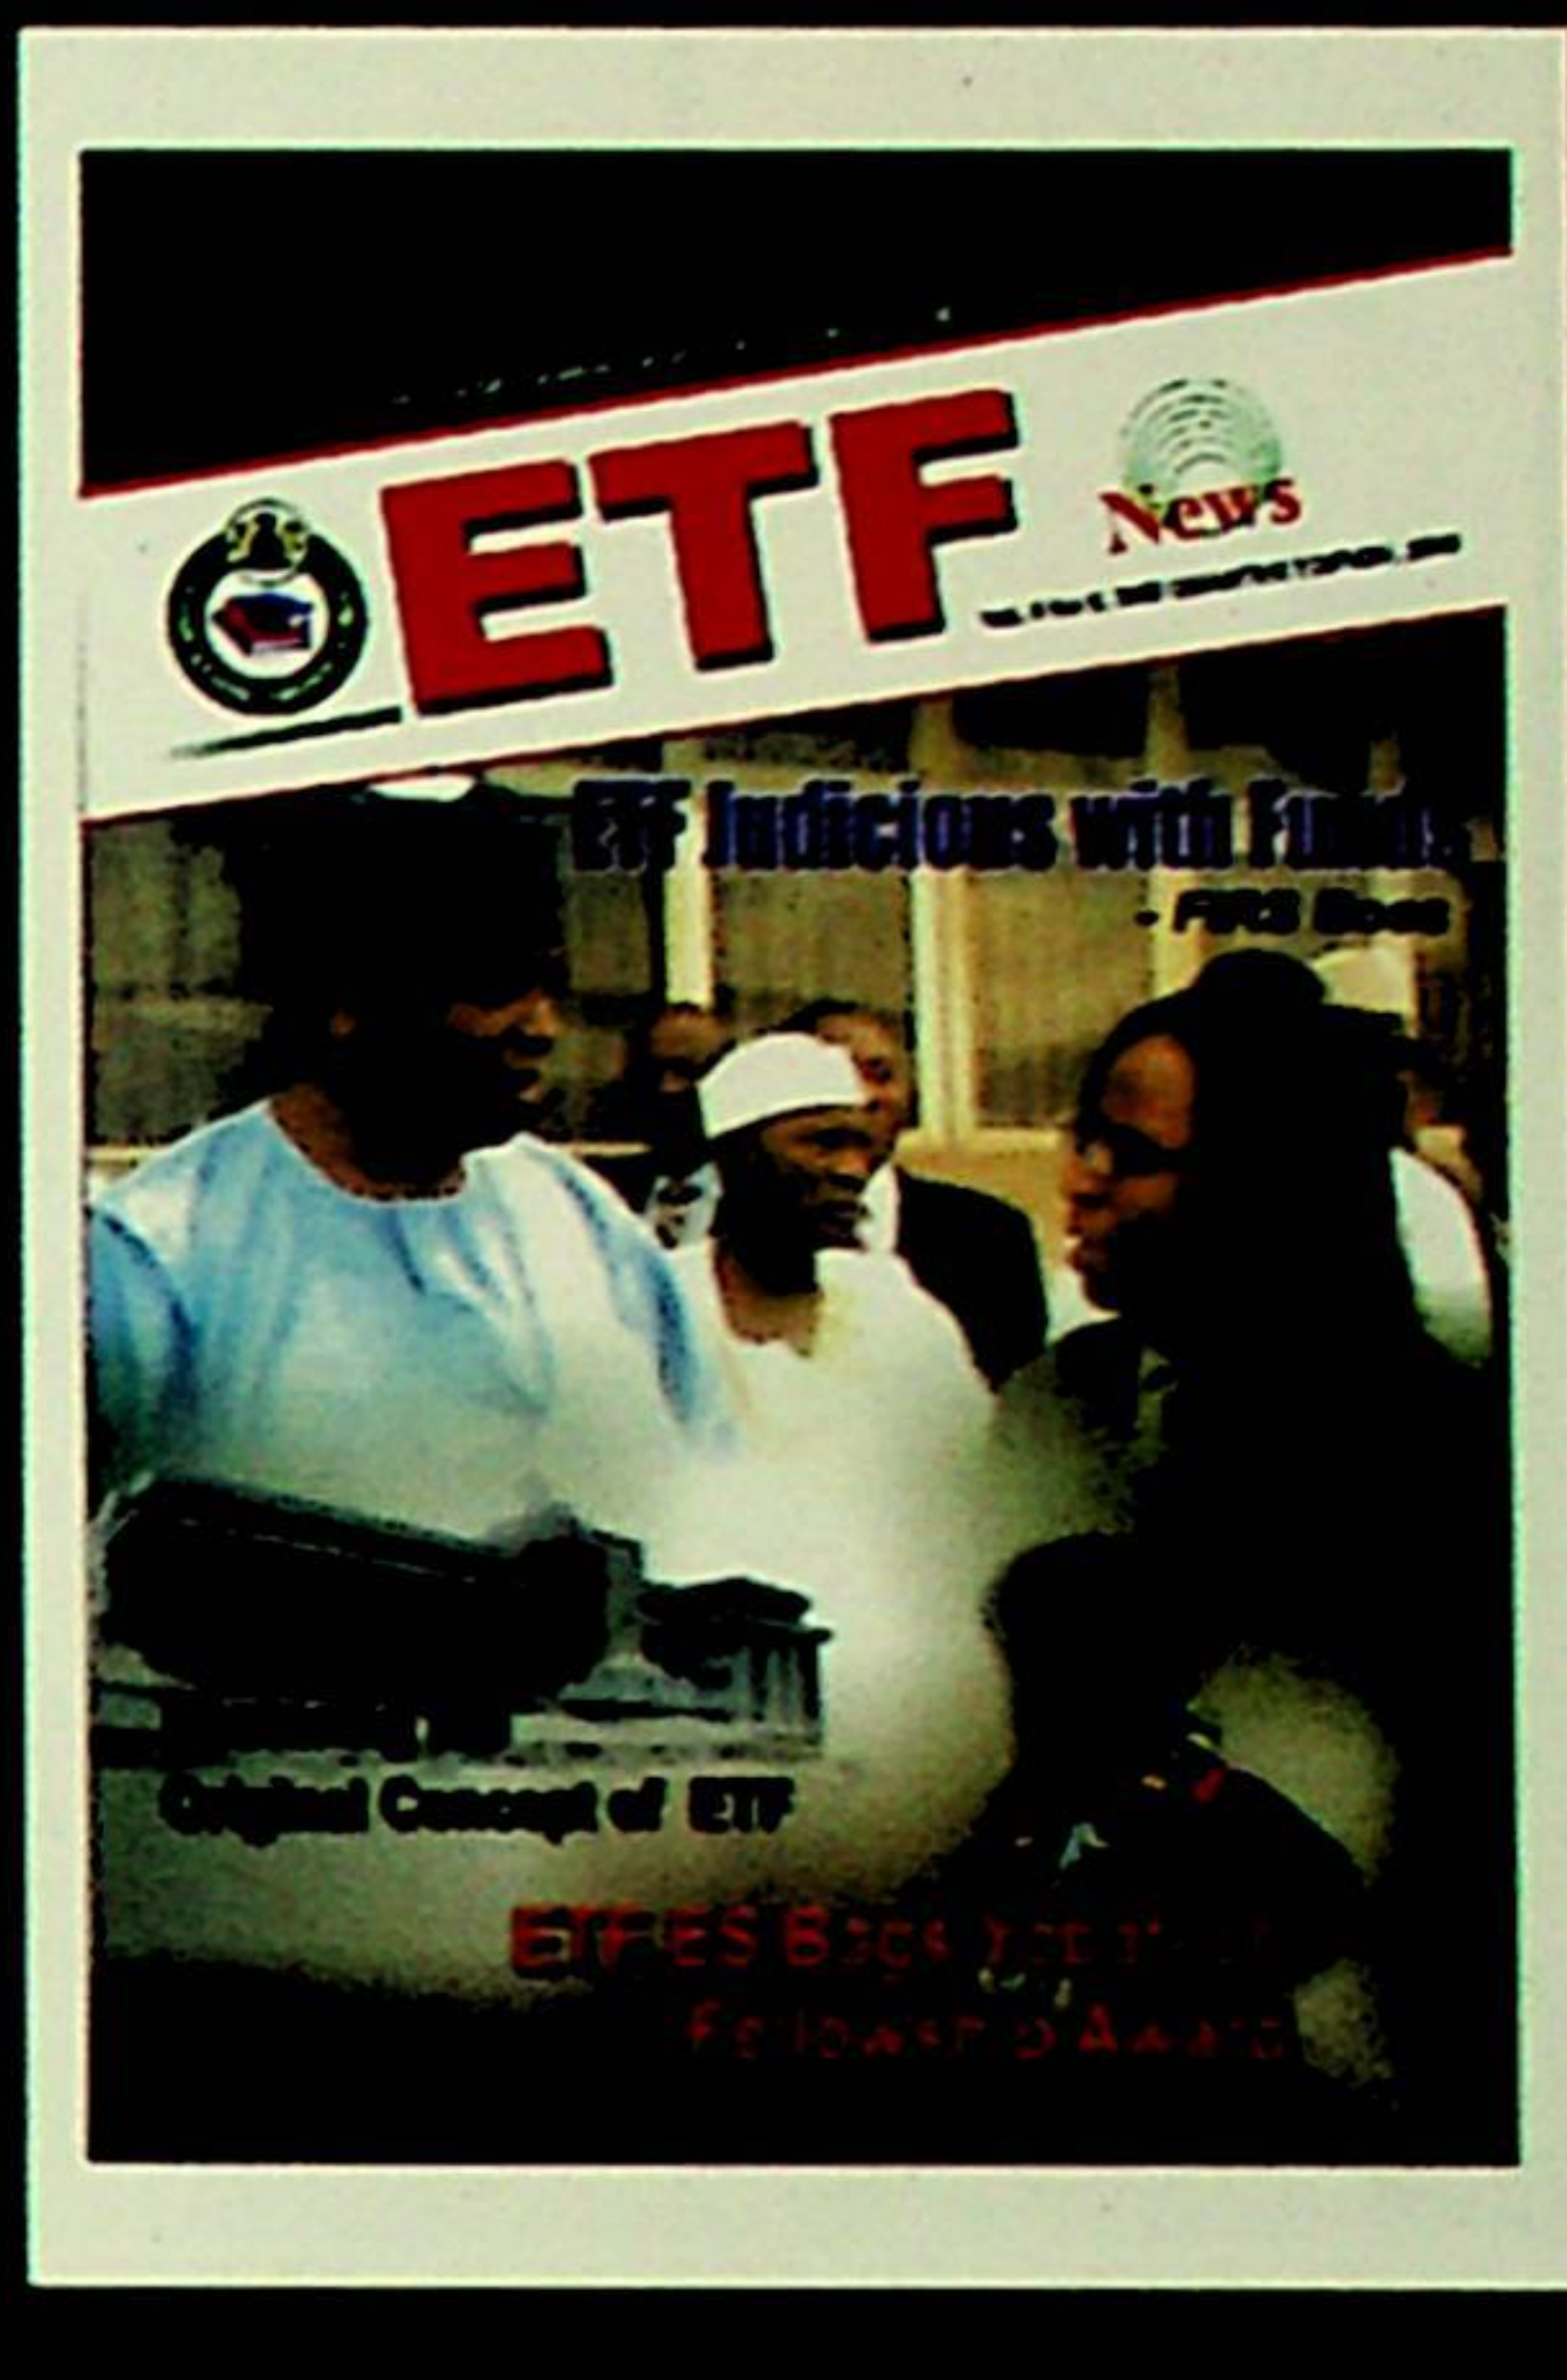

He then called on the staff to join hands with the Board in adding value to the system with the aim of achieving vision 2020. He requested members of the General Management to convey the goodwill of the Board to all Staff of the Fund.

Speaking on behalf of the Staff, the Director Administration and Procurement, Mr. Femi Ojo Melefa thanked the Board of Trustees for deeming it fit to meet with members of General Management. He said the ETF was one agency of government blessed with competent staff who ready to work and pledge the support and cooperation of the management and the entire Staff of the Fund to the realisation of the goals and objectives of the Fund.

Dr. Musa Babayo, Chairman, Board of Trustees,

Dear Editor,  
I am a student of one of the Universities in Nigeria, and I am so glad I picked up the last edition of your News magazine! It is exactly what I have been looking for. I was entertained, educated and enlightened. Keep up the good work.

**Seun Tolushe**  
Federal University of Technology  
Minna, Niger State

Dear Editor,  
Let me start by saying I am always anxious to get your News magazine and never want to miss any issue! I want to use this opportunity to thank the Federal Government for establishing of ETF. ETF is the leading Government Agency in Nigeria in terms of service delivery and accountability.

**Umar Bashir**  
Federal University of Technology  
Yola, Adamawa State

Dear Editor,  
I have noticed that the ETF is one of the few agencies of government in Nigeria that is proud to announce its allocations and disbursement to the general Public. The Agency feeds the public with facts and figures devoid of the razzmatazz employed by other agencies to conceal their ineptitude. ETF should be commended for its accountability, transparency and effective service delivery.

**Dr. D.J. Ajala**  
Senior Lecturer, Department of English  
University of Maiduguri, Borno State

Dear Editor,  
Thank you for the last edition of your News magazine. It is refreshing to know that the ETF is expanding its wings internationally. I read in your last edition of your partnership with the World Bank. I think it's a good gesture and I hope the collaboration would go a long way in further improving the quality of education in the Country.

**Job Asumo**  
c/o Baptist Church  
Odole Mopa, Kogi State

Dear Editor,  
I am glad to finally know that there is a Federal Government Organization that is concerned about book development in Nigeria. This is an area of education that has been neglected for a long time due to lack of funding. Reviving it is a milestone achievement by the Fund. ETF has made a difference in the history of education in Nigeria. I travel a lot and have seen much of its

## ETF provides N200 million for procurement of learning materials for the blind

*Dr. Sam Egwu,  
Hon. Minister of Education*

*Hajiya Aishatu Dukku  
Hon. Min. Of State for Education*

Zamfara states received 28 Braille machines, 420 talking calculators, 240 Braille writing slates, 462 sign books, seven speech trainers and 700 plastic alphabet sets while the South-East zone made up of Abia, Anambra, Ebonyi, Enugu and Imo states received 20 Braille machines, 300 talking machines, 300 Braille writing slates, 330 sign language books, five speech trainers and 500 plastic alphabet sets.

Similarly the South East zone made up of Adamawa, Bauchi, Borno, Gombe, Taraba and Yobe States got 24 Braille machines, 360 talking calculators, 360 Braille writing slates, 396 sign language books, 6 speech trainers and 600 plastic alphabet sets while the SouthWest zone made up of Ekiti, Lagos, Ogun, Ondo, Osun and Oyo states got 24 Braille machines, 360 talking calculators, 360 Braille machines, 360 talking calculators, 360 braille writing slates, 396 sign language books, 6 speech trainers and 600 plastic alphabet sets.

The North-Central zone which consist of Benue, Kogi, Kwara, Niger, Nasarawa and Plateau including the Federal Capital Territory (FCT), got 28 Braille machines 420 talking calculators, 420 Braille writing slates 462 sign language books, 7 speech trainers and 700 plastic alphabet sets while the South-South zone mane of Akwa-ibom, Bayelsa, Cross River, Delta, Edo and Rivers States received 24 Braille machines, 360 talking calculators, 360 Braille writing slates, 396 sign language books, 6 speech trainers and 600 plastic alphabet sets.

**L**earning materials for visually impaired children worth N200 million were acquired by UBEC for distribution to the State Universal Basic Education Board (SUBEB).

The procurement of these materials which include Braille machines, talking calculators, Braille writing slates, sign language books, speech trainers and plastic alphabet sets were made possible with funding from the Education Trust Fund (ETF).

Speaking at the handing over ceremony to the beneficiaries, the Executive Secretary, UBEC, Dr. Ahmed Modibbo Mohammed, said the N200 million grant from the ETF was set aside for Schools for Children with special needs and after exhaustive meetings it was decided that materials worth N5

million should be procured for each state. The Honourable Minister of State for Education, Hajiya Aishatu Dukku, who presented the materials to SUBEB Chairmen in Abuja, said that it had become important that Government at all levels take initiatives to provide as a matter of priority all the necessary support needed for the education of those with special needs.

“Along this line, the Minister said government recognizes that special education requires specialized methodology and is putting in place, the necessary policy and functional framework for actualizing its policy thrust in this direction” she said.

According to the information made available to us the North-West zone made up of Jigawa, Kaduna, Katsina, Kebbi, Sokoto, and

# ETF Approves N3 Billion For Research Fund

*Dr. Tarilah Tebepha  
Chairman ETF Research Fund Committee*

In a bid to address the issue of dearth of Research in the country, the Education Trust Fund (ETF), has earmarked the sum of N3 billion to boost the conduct of Research activities in universities and other tertiary institutions across the country.

The Chairman, Board of Trustees, ETF, Dr. Musa Babayo, during an interactive session with stakeholders working on the blueprint for the disbursement of the fund, said, that the money was complementary to other allocations made to tertiary institutions.

This Research fund, he said, which was approved by President Umaru Musa Yar'adua as a special intervention fund to complement ETF's high impact projects in tertiary institutions as is aimed at providing the driving force towards the actualization of the Vision 20:2020. According to him, "The funds are expected to facilitate Research on activities that will impact positively on the competitiveness of the country and build up a capacity of Nigerian Researchers to contribute to the national development efforts as well as tackle global challenges".

It is against this backdrop he said, that the ETF decided to interact with institution managers to produce a policy document that would spell out the administrative

procedures, framework and guidelines for accessing this Research Fund.

Also speaking at the occasion, the Executive Secretary of the Fund, Prof. Mahmood Yakubu, said the gathering was necessitated by the fact that for any meaningful national development to be achieved in Nigeria, there must be a deliberate policy on ground to stimulate Research activities in our tertiary institutions. The ETF, he continued, has a mandate, to intervene in areas such as work centres and prototype development, and the procurement and maintenance of research equipment, but these cannot translate into better educational system that could produce a world-class manpower needed for national development and global competitiveness, as well as stimulate the realization of the vision 20:2020. Provision of these facilities alone cannot make us succeed in our quest for national development without a substantial commitment to a research", "Serious research, he said requires serious researchers and serious funding", And ETF is ready to support researchers on the quest to break new barriers in the global age of knowledge.

Prof. Yakubu continued that there was no way there would be experts without expertise and specialization without specialists, adding that Professors and expertise all over the world are committed to research that are expected to translate into national development.

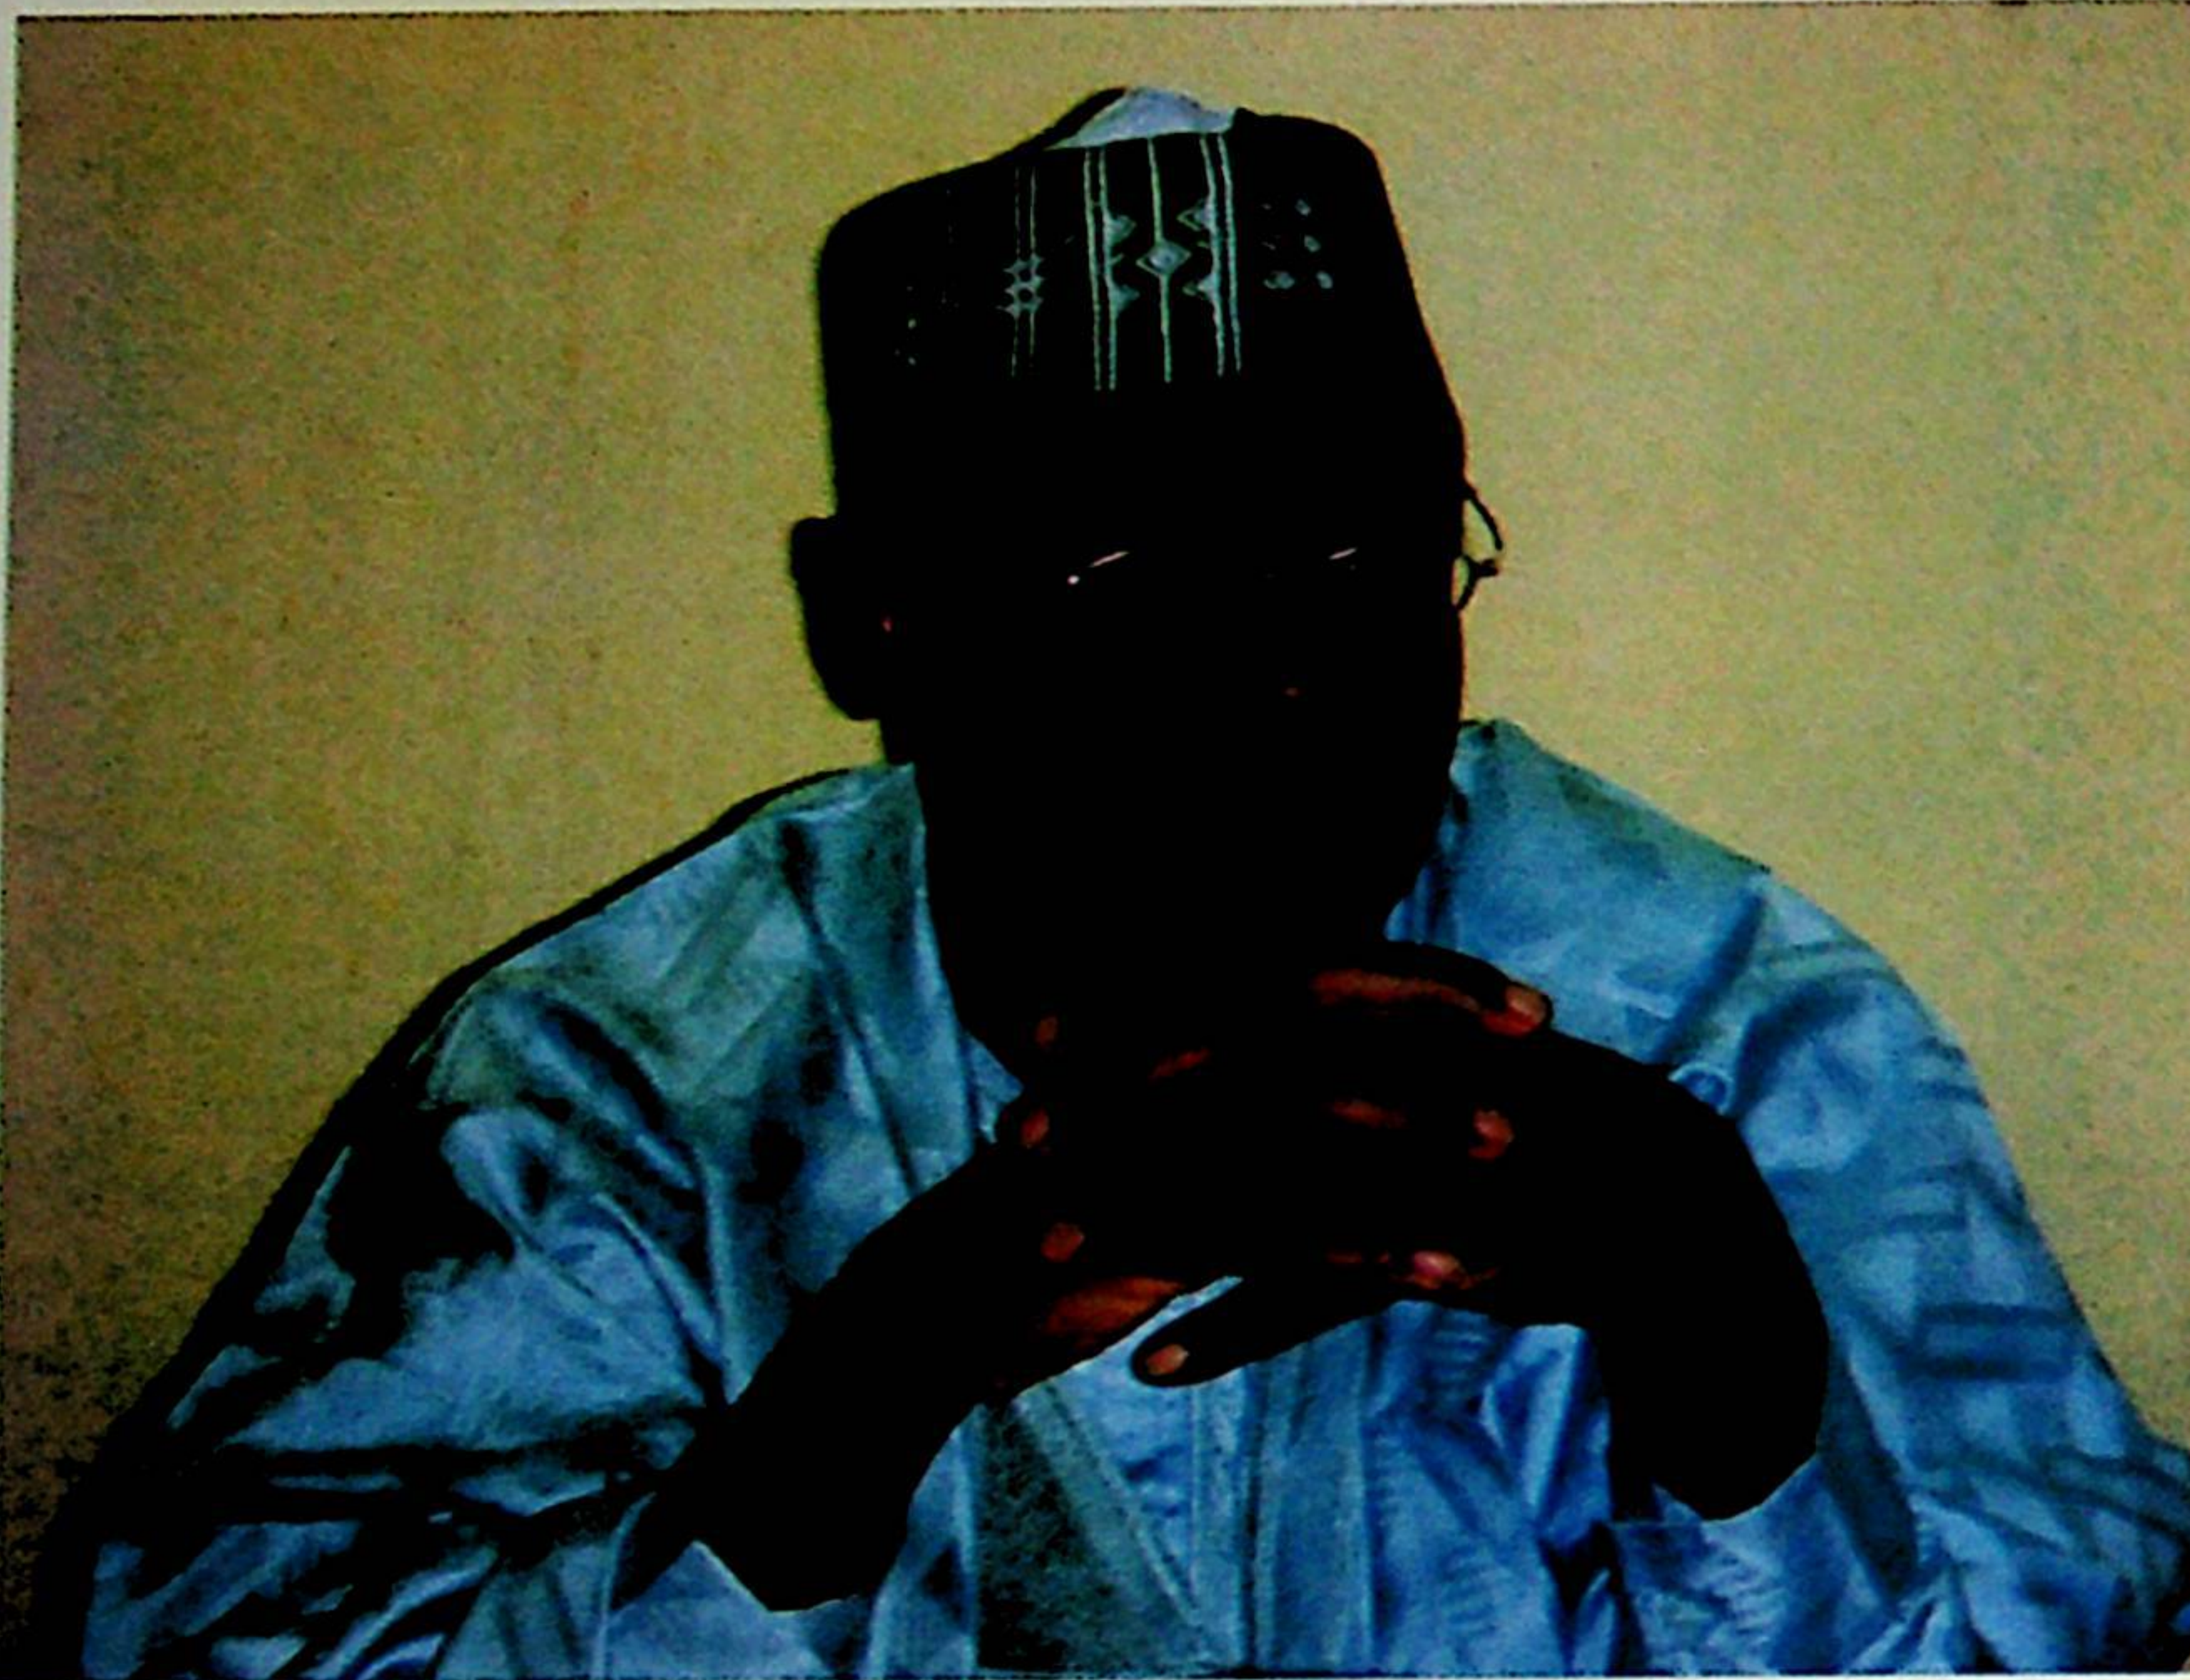

The Co-Chairman of the ETF Research Fund, Dr. Emmanuel Denenu, on his part said that the drive towards achieving the vision 20:2020 goals without effective and functional Research was "like building a vehicle without an engine". This brainstorming session, he continued, would afford the nation the opportunity of tackling the problem of research in Nigeria thereby paving the way for her to be in a competitive 21st Century.

## ETF Workshops On Accumulated, Unaccessed Funds Take Off

*Prof. Mahmood Yakubu Executive Secretary ETF*

The Education Trust Fund (ETF) recently organized Technical Workshops on accumulated and unaccessed funds and project implementation in the six geo-political zones of the country as follows: Lagos for the South West Zone, Enugu for south East Zone, Port-Harcourt for South South Zoner, Minna for North Central Zone, Bauchi for North East Zone and Kaduna for North West Zone.

The Executive Secretary, Education Trust Fund, Professor Mahmood Yakubu speaking during the workshops stated that the workshops were organized because some ETF benefiting institutions were yet to access over N23.672 billion intervention fund.

The idea of leaving the funds unaccessed, he said, would

defeat the purpose for which ETF was established. Prof. Yakubu further stated that the interactive workshops provided a forum for key officials driving ETF intervention projects at all levels in the country to assess the level of their institutions' compliance in accessing their outstanding allocations and review the performance of on-going ETF intervention projects.

The Fund, he continued, had in 2008 unveiled a regime of enhanced education tax allocations by more than 100 per cent for all benefiting institutions which is the first of its kind in the 10 years history of the Fund and lamented the seeming lack of seriousness of some beneficiaries to take advantage of this encouraging move.

He said: "While the Fund

has been discharging its obligations to beneficiaries consistently over the years", it is regrettable that, "some of these beneficiaries have not been fully accessing their annual allocations for the purpose of rehabilitation, restoration and consolidation of educational infrastructures facilities, and other learning resources" in their Institutions.

By the first quarter of 200, he continued, the volume of unaccessed funds grew with to a staggering sum of N23.672 billion, a development, which he said was unacceptable. This development did not go down well with the former Minister of Education, Dr. Sanjiv Egwu, who immediately approved a drastic measure initiated by the Education Trust Fund. This therefore informed the publication of the names of beneficiaries with such huge outstanding amount' in the newspaper "with a date-line of 31st December 2009 to utilize or forfeit" their allocations.

While acknowledging that some State Ministries of Education (MOEs) and Universal Basic Education Boards (SUBEBs) had substantially taken steps to access their outstanding allocations, the Executive Secretary said some others had outstanding funds running into several millions of naira to pick-up.

Speaking during the interaction, the Director of Operations of the Fund, Mr. Emmanuel Manasa presented a comprehensive list of both performing and non-performing MOEs and SUBEBs, who had two more months to access or forfeit their allocations.

Similar workshops were held with universities, polytechnics and monotechnics to address the same issue.

The Executive Secretary of the Education Tax Fund (ETF), Professor Mahmood Yakubu has said that the ETF does not determine the projects priorities for the institutions that the Fund caters for.

He stated this recently when the United State Agency for International Development (USAID) led by Dr. Sandy Olesky-Ojikutu paid him a working visit in his office recently.

Explaining the functions of the ETF to the visiting USAID team, Prof. Yakubu said that the responsibilities of the Fund was to accept proposals within certain ceilings from the institutions under its funding, release funds to them and monitor the implementation of their projects.

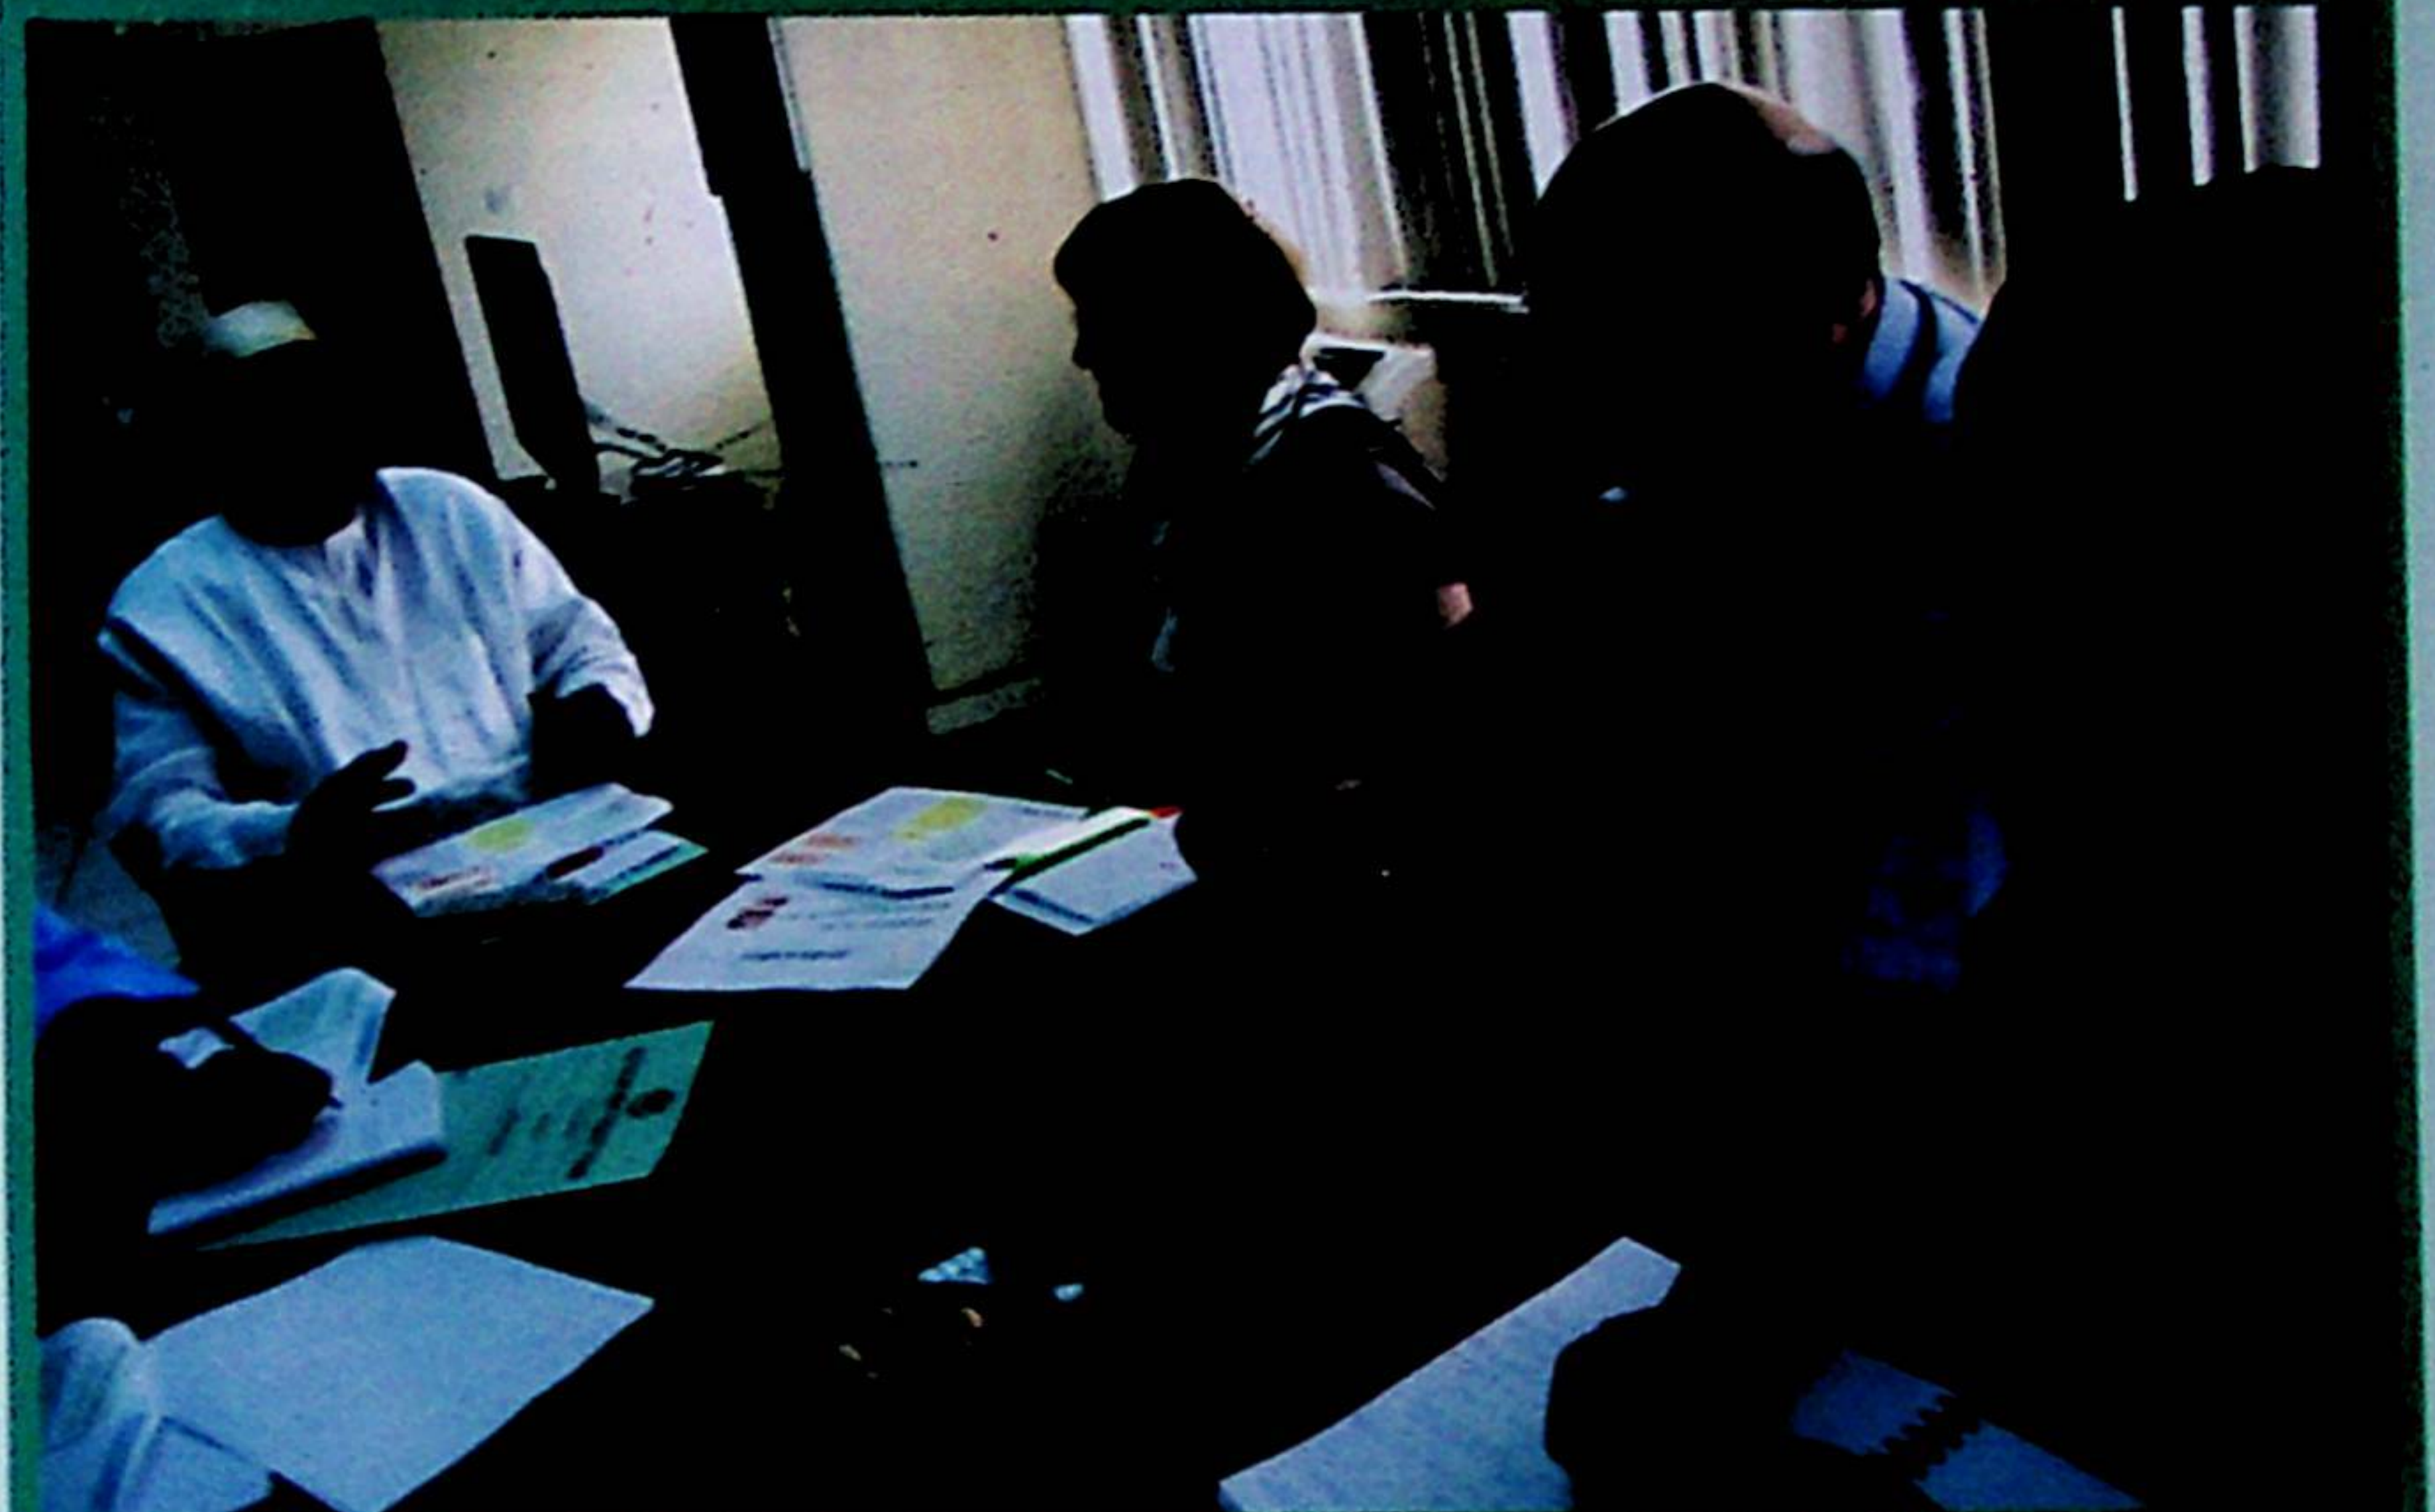

Reacting to the request to partner directly with the USAID the Executive Secretary said that ETF does not partner directly with Non-Governmental Organisations (NGO'S) but added that it could only complement the efforts of such organisations.

He said, "Our laws is right now being amended so that we exit basic and secondary education, we want to exit from the level, so, we will not fund Basic and Secondary education for the simple reason that the ETF was never originally conceived to fund every level of education. It was originally conceived to fund tertiary education. But for the past 11 years, ETF has not had an abandoned project."

On the efforts being made by the ETF to improve learning, he said the organisation has funded the training of over 1600 teachers within the last six months both inside and outside Nigeria.

"Over 207 lecturers are studying abroad, most of them for their doctorate and master's degrees in

## ETF does not determine priorities for institutions

*From L-R Prof. Mahmood Yakubu, Executive Secretary, ETF; Dr. Sandy Olesky-Ojikutu, Team Leader, Education - USAID, and an Education/Development Adviser.*

various disciplines. We made provision to sponsor the candidates for certain duration of their programmes and make funds available for them so that they will be sure that the resources are there for them until they complete the programme, so nobody comes back on account of lack of funding", he said.

According to him, it was the hope of the management of ETF to be able to add value to what USAID is doing. "We have been speaking with the PTFD to know if we could work together. We may not directly relate with you as you want but help to strengthen your activities with the NCCE which usually is handicapped by funding. They will find us useful in this aspect".

Earlier, the leader of the USAID team, Dr. Sandy Olesky-Ojikutu in her opening remark, briefed the Executive Secretary of the ETF on

efforts of the body in supporting the Education ministry's road map for the development of Nigerian education sector.

As part of its efforts, Ojikutu said that USAID was concentrating on teacher training colleges, noting that some of the colleges were overcrowded with students.

She also said that the USAID was focusing on basic education where programmes like the Northern Education Initiative in Sokoto and Bauchi State would benefit adding that the lessons learnt in the last 8 years in the education sector would be utilised in the new challenges.

Ojikutu said that the USAID was working in concert with two Nigerian Media broadcasting stations including the AIT and NTA to air a programme called Sesame Street Nigeria broadcast which will address the pre-school learning for the next five years.

# ETF Research Fund Submits Report

The Education Trust Fund (ETF) recently set up a N3 billion Research Fund for tertiary institutions in Nigeria. Consequent upon this, a Committee of experts was set up to develop the research thematic areas and identify areas of focus for the Research Fund as well as facilitate research activities that would impact positively on the competitiveness of the country and build up the research capacity of Nigerian researchers to enable them start contribute to the national development efforts as well as tackle global challenges.

The Committee has concluded its assignment and has come out with a policy document that spells out the administrative procedure, framework and guidelines for accessing the Research Fund.

Speaking during the submission of the Research Fund Blue Print Document, the Chairman of the Committee as well as the Vice-Chancellor of Bayero University, Kano, Professor Attahiru Jega said that the recommendations embodied in their report will enhance the implementation of the

ETF Research Fund. He therefore, on behalf of his Committee expressed his profound gratitude to the Fund for the opportunity given

provide requisite manpower for the nation's development programme, which he said could not be achieved without

*From L-R Prof. Mahmood Yakubu, Executive Secretary ETF, Dr. Emmanuel Denenu, Co-Chairman Committee on Research Fund & Alh. Aliyu Na'iyu, Deputy Director, PRS ETF, Prof. Attahiru Jega, Chairman Committee of Experts on the Research Focus for ETF Research Fund, during the submission of ETF Research Fund Report*

to them to serve.

While receiving the report, the Executive Secretary of the Fund, Professor Mahmood Yakubu, said that setting up the Research Fund was a move to improve the nation's University ranking as well as

Research. He assured that the ETF would ensure proper disbursement and monitoring of the utilization of the Research Funds. The list of the egg head professors who came up with the blueprint document areas follows

# ETF sets up Inter-agency Planning Committee On High Impact Project

The six old generation Universities in Nigeria namely the University of Nigeria Nsukka (UNN); University of Maiduguri (UNIMAD); Ahmadu Bello University, Zaria (ABU); University of Benin (UNIBEN); University of Ibadan (UI) and the University of Ilorin (UNILORIN) would be wearing a new look soon. The new look is not in their physical appearance, but in terms of their capacity to produce quality graduates especially in the sciences.

These six federal Universities are beneficiaries of the special intervention of the Federal Government through the ETF for the pilot phase. The project, according to the Executive Secretary of the Education Trust Fund, Professor Mahmood Yakubu is unique in that ETF is poised to reverse the old trends, whereby equipment worth millions of money were procured and never installed for a lot of factors. These equipment lay waste in many of the Universities because there was no long term planning and research conducted on the capacity of the institutions to sustain the equipment in terms of maintenance and application or usage. According to him, the new regime is to ensure a thorough research and collaboration not only with the institutions, but the manufacturers and vendors of this equipment to ensure what was required for a particular institution were actually procured.

*A cross section of ETF Inter-Agency Planning Committee members*

Professor Mahmood Yakubu stated this during the two day workshop organized in Abuja by the Fund on the Review of the Project Proposal of Beneficiaries of the Special Intervention in Tertiary Institutions. In attendance were the representatives of the beneficiaries, the International Foundation of Science (IFS), the PRISM Consortium, Foreign Experts on Science Equipment Procurement, installation and maintenance, as well as officials and technical staff of ETF.

While giving a brief on the concept and purpose of the ETF Central Research Laboratory, Professor Yakubu said there would be no room for failure and expert advice was therefore paramount if the public funds budgeted for these projects were to be maximally put

to use. Details of the needs of the institutions were obtained through proposals received, which underwent several screenings by the experts, to avoid mistakes. He stressed that to succeed, there was the need to plan properly. "We

have several expectations on the basis of the submission from the institutions; we need international experts, consistent with our vision resolve to build world class facilities. The advice we want on the equipment is to ascertain the relevance or irrelevance of the equipment that these institutions have proposed. We want to establish a harmony between the equipment and the physical infrastructure, right from the on set, to avoid the mistakes of the past, where equipment becomes incongruent with the physical infrastructure housing them".

The second expectation is to get advice from experienced people who have been in the business around the world on how to source these equipment. "We prefer to deal with manufacturers instead of third parties, so that we

*Dr. Musa Babayo, Chairman ETF, Prof. Mahmood Yakubu Executive Secretary ETF, Members of the International Foundation of Science (IFS) and the PRISM Consortium.*

know what we are getting. We want to be absolutely sure before we commit public funds”.

The third is not just a question of getting the right equipment and where to get them, we must also engage those who provide the equipment to install therein. “If you go round some Universities you will see equipment kept in containers for over a long period of time. We can't afford to do this in this project. There must be synergy between the right equipment we get, the procurement and installation of these equipment”. Professor Yakubu further enthused that, these laboratories equipment must be maintained and sustained. There is no point spending a lot of money building a wonderful laboratory if that laboratory won't give maximum result because one expensive component is broken down. We want to make long term commitment to the sustainability of these wonderful machines and edifices that we are going to provide. We need advice on the kind of physical infrastructure that we need to build. We have to build structure that can stand the test of

time that we won't have to change often. We need advice on capacity building to build the capacity of our technologists, even if it means sourcing them from outside the country.

Professor Yakubu further stated that the ETF engaged the focal institutions chosen for the high impact on a technical session, so as to get their advice on what exactly to provide, what manner of central laboratory they need, what type of programme to upgrade, the type physical infrastructure they want us to provide, or the existing infrastructure they want to rehabilitate. Consequently the institutions submitted their proposals to the ETF and an Inter-Agency Planning Committee was set up for the special intervention, made up of the representatives of the Regulatory Agencies, and the ETF.

With the initial proposals submitted by the institutions, an institute visitation was also necessitated by the need to see these needs as a way of fast tracking these proposals. All the focal institutions according to Professor Yakubu were visited. Thus, “we have a long

list of equipment and infrastructure which they need to rehabilitate. Having achieved that, the ETF he said, met with the International Foundation for Science, to discuss the issues of procuring the equipment. Consistent with our directive and our determination to provide these institutions with world class facilities the Executive Secretary said, we engaged the International Foundation of Science (IFS) so that we can look at the submissions from the institutions and get world class advice on exactly what we need to procure and how we intend to proceed to provide the country with the type of facilities need.

Professor Yakubu further said, “there are three major challenges of power, water and gas needed to power these edifices on completion, adequate arrangements would be made by the Fund to surmount them.

Hopefully, as we scale down our commitment to these institutions, we will assume greater responsibility as we will take on additional institutions. This project is a continuous one which is expected to spread to other tertiary institutions across the country.

## Executive Secretary ETF Meets With Committee Of Pro-Chancellors

*Dr. Wale Babalakin, Chairman, Committee of Pro-Chancellors of Nigerian Universities*

The Executive Secretary of the Education Trust Fund, Prof. Mahmood Yakubu in a recent briefing session in Abuja informed the Committee of Pro-Chancellors of Federal Universities that the ETF, which intervenes in 311 institutions in Nigeria has a record of not having any uncompleted project since its inception.

The ETF, according to him, has been repositioned in such a manner that it would only fund projects related to core academic areas. ETF would no longer accept situation where its beneficiaries used its interventions for provision of municipal services such as water, light, gates, security fence, etc. Beneficiaries of ETF funding have therefore been asked to reprioritise

their needs in line with the new direction of the Fund.

The Fund in line with its new thinking also sought and obtained approval from the Federal government for it to in good conscience vacate some earlier approvals by the previous Board of Trustees for projects which are not related to core academic activities. By this singular act the Fund was able to save the sum of N18 billion which would be ploughed into other critical areas of need by our institutions of learning.

Furthermore, he said, the Fund has set up a stabilisation Fund of N10 billion which it hopes to top up yearly depending on the quantum of the collections in a given year. The Fund is meant to serve as a fall back in the event of dwindling collection of Education tax.

Similarly, the sum of N41.4 billion has been set aside by the Fund for the execution of high impact projects in some selected tertiary institutions across the country namely; University of Maiduguri, Ahmadu Bello University Zaria, University of Benin, University of Ibadan, University of Unsuksa, University of Ilorin, Kaduna Polytechnic, Yaba College of Technology, Akanu Ibiam Federal Polytechnic Uwana, Federal College of Education Kontogora, Federal College of Education (Technical) Omuku, Federal College of Education (Technical) Gombe and Nigerian Defence Academy Kaduna.

The fund, Prof Yakubu continued, would be used to provide Central Zonal Teaching/Research Laboratories in the six focal Universities for, Programme upgrades and improvement of Teaching and Learning Environment in all the selected institutions. Each of the Universities he contended, would get N5.5 billion

while each of the Polytechnics and Colleges of Education would get N1.2 billion and N1.1 billion respectively. The Nigerian Defence Academy will get N1.5 billion.

The universities according to Prof Yakubu recorded a 127% increase in their allocations by the Fund in the year 2008. Each of the universities got an allocation of the sum of N127 million as intervention from the Fund with the breakdown as follows; N10 million for Library Development, N67 for projects and N50 million for Academic Staff Training within and outside the country.

The Fund he also said, has set up both a National Research Fund of N3 billion to boost the conduct of Research in Nigeria's tertiary institutions of learning and a Book Development Fund of N2 billion to revive and encourage the production and consumption of academic texts in tertiary institutions in the Country. Finally, Prof Yakubu informed the Committee that the Fund would soon exit the Funding of Basic and Secondary education and concentrate only on tertiary institutions if the Bill seeking to amend the Laws establishing the Fund, which has gone through 2nd reading in both the Senate and House of Representatives is passed.

The Chairman of the Committee Dr. Wale Babalakin thanked Prof. Yakubu for the briefing which he said had shed more light on the allocations from the Fund to their various institutions. Most of the Pro-Chancellors hitherto this briefing, he contended, have been in the dark as regards to the Funds coming from ETF. The committee therefore agreed that the ETF should make available to it all releases to the Universities to enable the Pro-Chancellors monitor utilization.

## ETF Task Poly On Intervention Fund

**D**r. Hafiz Abubakar of the Education Trust Fund (ETF) has declared that the ETF was ready to give out massive intervention funds to the five Federal Polytechnics and Colleges of Education selected from the six geopolitical zones of the country for N9 billion support. He made the statement at the Yusuf Grillo Auditorium in Yaba, Lagos. He added that the institutions were expected to come up with projects that will upgrade their programmes as well as improve their learning facilities and environment. They are also expected to explain how the money will be implemented before the fund could be released to them.

"That is why we came as a team to Yaba College of Technology (YABATECH), one of the selected institutions to look into the projects they plan to undertake" he said.

Abubakar, who was the leader of the team, explained that the agency was not imposing projects on the institutions concerned, rather it is using a participatory approach to make sure that the institutions involved will make judicious use of the fund.

"After the pronouncement made by the president, he asked the ETF to set aside the fund. The fund is already in

the coffers of the ETF and the ETF has been mandated to make sure that the fund is well utilized. That is why we have been taking participatory approach. This team will be coming back to look at the proposal and determine the ones that will be carried out." He said.

Also speaking at the forum, the Rector, YABATECH, Mr. Olubunmi Owoso, who spoke on what the institution intended to do with the N1.79 billion allocated to it, listed eight important areas that needs urgent attention in the college, with emphasis on provision of equipment, laboratories two for each of the science-based schools and one for other (art, design and printing, management and business administration). N100 million will be for the procurement and development of interactive teaching and learning platforms in 100 model lecture rooms in all the departments. Other proposed projects include refurbishment of student hostels (N40m), repairs, renovation of physical structure and fittings in classrooms and laboratories (120m) and construction of a 10-floor building to house the administrative unit, seminar rooms, staff offices, studios and lecture rooms at the cost of N725 million. He showed the

group a multimedia presentation of the proposed building designed by a lecturer in the college adding that such structure was needed considering that the 16.4 hectares the college occupies in the densely populated Yaba metropolis is now too small to comfortably accommodate its 18,000 students and 2000 members of staff.

"Increase in the number of students and staff population led to overcrowding in class rooms, halls of resident and inadequate staff offices. 'Partition technology' has become a regular feature in our budget to provide offices. But it is still grossly inadequate" said

Owoso said the projects being proposed by the institutions were agreed upon after due consultation and deliberation with deans of the various schools. "Immediately after the April, 21 meeting with the Education Minister, we set up a meeting with the Deans of Schools to discuss what projects we should put forward." He declared The Education Minister, Dr. Sam Egwu proposed the massive injection of funds from the ETF to tertiary institutions on rotational basis until the schools are up to standard. The first set of beneficiary institutions are expected to complete their projects within two years.

## Non Academic Staff EXCO of Colleges of Education Visit ETF

**T**he Executive Committee of the Non Academic Staff of Colleges of Education in Nigeria, led by its President, Mal. Muhammed Sani Umar recently paid a courtesy visit to the Executive Secretary of the ETF, Prof. Mahmood Yakubu. The purpose of the visit according to the President of the union was to explore the possibility of the Fund extending to its members, training opportunities, which is being enjoyed by their

counterparts who are academics.

The Executive Secretary while welcoming the Visitors informed them that the ETF did not as a matter of policy, sponsor staff of its beneficiaries on professional training programmes as it is not within its mandate to do so. The core activities in any tertiary institution of learning are teaching and research, which are the primary responsibilities of academic staff. To do these effectively they need to be

equipped with academic degrees which the non academic staff do not necessarily have to acquire to perform their duties

He therefore advised the union to engage their managers peacefully with a view of using Internally generated revenues of their various institutions to sponsor their members for professional courses desired by them. He thanked the Exco for the visit and enjoined them to continue to contribute their quota to the growth and development of their institutions.

## ETF Earmarks N3bn For Research In Tertiary Education

The chairman, ETF Board of Trustees, Dr. Musa Babayo has disclosed that the fund, in a bid to address the dearth of research in the country, has earmarked three billion naira to bolster the conduct of research activities in universities and other tertiary institutions.

Babayo, who made this known in Abuja recently at an interactive meeting of the stakeholders on the ETF Research Fund Blue Print Document, said the fund was part of the two per cent education tax charged on the assessable profit of registered companies in Nigeria in accordance with the Act establishing of ETF.

The chairman added that the fund was expected to facilitate research on activities that would impact positively on the competitiveness of the country, and build up a research capacity of Nigerian researchers to contribute to the national development efforts as well as tackle global challenges.

He further stated that President Umaru Musa Yar'Adua approved the utilization of the funds, as part of efforts to ensure the integration of research to impact positively on the economy towards the realization of Vision 2020 of Nigeria becoming one of the top twenty economies in the world.

He therefore said the purpose of the interaction was for the experts to brainstorm and come out with a policy document that would spell out the administrative procedure, framework and guidelines for accessing the research fund.

The Executive Secretary of the Fund, Professor Mahmood Yakubu, said the move was another gesture to improve on the nation's university ranking as well as provide requisite manpower for the nation's development programme, which he said could not be achieved without research.

He assured that the fund would be properly disbursed and monitored for effective utilization.

*New Nigerian, Wednesday, July 29, 2009 pg. 40*

## N3bn Grant: ETF Prepares Blueprint For Disbursement

The Education Trust Fund (ETF) met with stakeholders recently in Abuja to develop a workable blueprint for the disbursement of the N3billion special intervention fund for research findings in some selected tertiary institutions across the country.

The special fund has been earmarked for disbursement to universities, polytechnics and colleges of education, one from each geopolitical zone, as approved by former President Umaru Yar'Adua with a view to fast tracking the attainment of his vision of making Nigeria one of the largest 20 economies in the world in 2020.

Chairman, Board of Trustees of ETF, Dr. Musa Babayo, during an interactive session with stakeholders on the blueprint document for the disbursement of the fund, said the Fund's aim at building the capacity of researchers in the tertiary institutions, to enable them conduct research findings on the national development efforts of the present administration as well as the current global trends.

He stated that the meeting is geared towards drawing up a policy document that would clearly spell out the administrative procedures for accessing the research fund by the institutions.

He said: "In realization of the critical need for high quality manpower to drive the nation's economy towards the attainment of vision 2020 economic agenda, the federal government approved a special intervention to fund high impact projects on the core activities of tertiary institutions which are teaching, learning and research."

"The effort is to ensure the integration of research efforts to impact positively on the economy towards the realization of the vision 2020.

"The ETF, in order to achieve this goal has set up a research fund of N3billion as a complement to address the paucity of funds to conduct these

## NDA Postgraduate School gets N1.3bn

The Education Trust Fund (ETF) said in Kaduna that it would provide N1.3 billion towards the improvement of infrastructure at the Post-Graduate School, Nigerian Defence Academy (NDA), Kaduna.

Dr. Hafiz Abubakar, a member of ETF Board of Trustees, made this known shortly after a team from the Board visited the NDA.

A statement issued in Kaduna and made available to the News Agency of Nigeria (NAN) recently quoted Abubakar, the

Leader of ETF Technical Committee, as saying that 16 months deadline had been given for the completion of the project.

It said the project would be executed speedily because money had been approved for its take-off, adding that ETF expected the project to be completed and put to use by December, 2010.

It quoted Abubakar as saying that NDA post graduate school was among the institutions benefiting from ETF funding.

The statement explained

that the oldest universities from each of the six geo-political zones were selected for the board's intervention.

"NDA was chosen because it is the only postgraduate school that has its own campus and does not share its facilities or infrastructure with any other school," the statement said.

It quoted the team leader as saying that similar criteria was used in selecting polytechnics to benefit from ETF funding, adding that while each polytechnic would receive N1.5 billion, the universities would get N1 billion each.

*Leadership Press, July 2009  
Pg. 7*

University administrators last week, met with the management of the Education Trust Fund (ETF) to produce a blueprint on how best the N3 billion research funds for universities, set aside by the Fund could be utilized.

ETF's Chairman, Board of Trustees (BOT) Dr. Musa Babayo, said, at an interactive session, that the money was complementary to other allocations aimed at addressing the paucity of funds for the conduct of research projects in tertiary institutions.

This amount, he said, was approved by President Umaru Musa Yar'Adua as a special intervention fund for high impact projects on core activities of tertiary institutions as a driven force towards actualizing the Vision 20:2020. "The funds are expected to facilitate research on activities that will impact positively on the competitiveness of the country, and build up a capacity of Nigeria researchers to contribute to the national development efforts as well as tackle global challenges" he said. He said it was against this backdrop that the ETF preferred a wider consultation with institution

## ETF Parleys Varsity Managers On Research Fund

managers to produce a policy document that would spell out the administrative procedures, framework and guidelines for accessing the fund.

Executive Secretary of the Fund, Professor Mahmood Yakubu, said the gathering was a re-affirmation of players of the system to re-focus the Federal Government's intervention to the tertiary education system.

He said ETF was mandated by law, to intervene in work centres and prototype development, as well as the procurement and maintenance of research equipment, adding that these objectives could not translate into a better educational system that could produce a world-class manpower needed for national development and global competitiveness, as well as the realization of the vision 20:2020.

"This alone cannot succeed without a substantial commitment to research", he said, adding "Serious research, required serious researchers and serious funding."

According to him ETF was ready to support researchers on the quest to break new barriers in the global age of knowledge.

Yakubu said there was no way there could be expert without expertise and specialization without specialists, adding that professors and expertise all over the world were committed to research development and, therefore bringing everyone together for the international session was an onerous task.

Co-chairman of the board, Dr. Emmanuel Denenu, in his response, said the drive towards achieving the vision 20:2020 goals without effective and functional research was "like building a vehicle without an engine." He noted that science and technology innovations played a central role in research and development which the country could not afford to neglect, adding that brainstorming would afford the nation the opportunity of tackling the problems and paving the way for her to be in a competitive 21st century.

*Peoples Daily, Monday, August 3, 2009 pg.34*

research activities. This would enable researchers' have access to funds to conduct high impact and long term researches on the national development efforts as well as to tackle the global challenges."

ETF Executive Secretary, Professor Mahmood Yakubu noted that the fund, which is the first of its kind would be closely monitored, adding that beneficiaries would not get more money until they have satisfactorily utilized the disbursed funds.

He also disclosed that since he assumed office, not one ETF project has been abandoned largely for two reasons of close monitoring and ensuring projects are completed before releasing another fund.

On whether the N3billion would be enough for the selected institutions, Vice Chancellor of the University of Ibadan, Professor Olufemi Bamiro, said though it may not be enough, it is left for universities to make priorities, adding that the government would also take a cue

from the level of success achieved and determine whether it should be increased or not.

"There can never be a time we can say it is enough, but we can start somewhere and that is why this meeting is very important to set the priority. This is one of the things they too will learn when they start with the volume of research they would be involved in," he explained.

## ETF to spend N8 bn on higher institutions

The Education Trust Fund is to spend a total of N8 billion on the nation's military university, the Nigerian Defence Academy, 12 universities as well as polytechnics and colleges of education

from its special intervention project

The Nigeria

n Defence Academy (NDA) will receive about N1bn while 12 universities as well as polytechnics and colleges of education will get N5.5bn and N1.5bn respectively.

Dr. Hafiz Abubakar, a member of ETF's Board of Trustees who

made this known to newsmen when he led a delegation to the NDA. According to him, the special intervention was different from the normal ETF intervention. He said the quantum of funds injected in this intervention had

never been so enormous in the history of this country.

According to him, there has never been a time when a single university has N5.5bn at a go to be spent within 16 months. Dr. Abubakar explained that the funding for polytechnics and universities differ because of the

depth and emphasis of the intervention. He said the universities would get N5.5bn because they have three areas of intervention.

"Each of them will set up a zonal research and teaching laboratory, they will have programmes upgrade and the improvement of teaching and learning environment," he said. According to the leader of the delegation, the age of the institutions and specialty were the criteria used to determine the beneficiaries.

He further said the oldest university and polytechnic from each of the six geo-political zones were selected for the special intervention project, adding that the exercise would be a continuous one. Dr. Abubakar further explain that the NDA was a beneficiary because it is a specialized institution.

*...the quantum of funds injected in this intervention had never been so enormous in the history of this country... there has never been a time when a single university has N5.5bn at a go to be spent within 16 months... the funding for polytechnics and universities differ because of the depth and emphasis of the intervention.*

## ETF puts smiles on faces of NDA students, staff, mgt.

The Commandant, Nigerian Defence Academy (NDA) Kaduna, Major-General Mohamood A. Yerima was in high spirits recently when the technical team of the Education Trust Fund (ETF) visited him at the headquarters of the academy.

He was delighted by the good tidings brought to him and the entire management of the academy by the ETF technical team led by Dr. Hafiz Abubakar.

According to the team NDA was selected by the Federal Government as a special military training institution among the conventional universities, polytechnics and colleges of education in the country to benefit from the national education intervention fund to improve on a number of educational programmes in all the Ivory Towers in the country.

The ETF technical team which is representing the North-West zone comprises management team from National University Commission (NUC), National Board for technical Education (NBTE) as well as National Commission for Colleges of Education (NCCE).

Dr. Abubakar reminded the Commandant that government has some weeks ago made its intention clear to make fund available to universities, polytechnics, colleges of education as well as special institutions like NDA in the country.

He said the key objective of the intervention fund was meant to uplift the development of education in the country, stressing that beneficiaries should inject the fund into the areas of needs in the academic development.

To this end, he therefore, urged beneficiaries to implement the use of the fund as soon it was

received and ensure that projects executed with the fund were put to use by December, 2010 as deadline given by the Federal Government.

The team leader said there was enough fund already in the coffers of the ETF for beneficiaries to make their projects feasible by 2010, adding that one of the reasons for the tour by the technical team was to ginger up beneficiaries to draw up their proposal as quickly as possible so that, you can complete the implementation of your projects."

He was of the belief that the Federal Government would make the exercise a continuous one because according to him the first phase has just begun with the selection of 12 universities, polytechnics and colleges of education in each of the six geopolitical zone with NDA as the special military institution in West Africa that offers degree and post graduate programmes.

Abubakar said the intervention fund was a special one because of the quantum of the fund, the nature of projects to be undertaken and the time frame, stressing that there was never a situation where a single university has N5.5 billion within a short period of time in the history of the country.

He further added that while universities are having N5.5 billion each to improve on three programmes area, polytechnics and colleges of education are having equal amount of N1.5 billion each to up grade their programmes and improve on the

teaching methods by the teachers, pointing out that the NDA would be having over N1 billion for post graduate programmes.

The Commandant of NDA, Major-General Mahmood Yerima expressed happiness over the initiative by the federal government, saying that the academy was thankful of when it get fund to carry out some of its projects, adding that the ETF intervention fund is a kind of blessing to the institute.

Yerima added that the fund could be used to give a face lift to the laboratory, lecture rooms and other facilities at the post graduate training wing of the academy situated at the old site of the NDA.

The post graduate training block building, Daily Sun gathered was commissioned by former President Olusegun Obasanjo on December 26, 2004 during the 40th anniversary of the NDA, and it was sponsored by the government of River State.

Taking the ETF team round the building from the ETF desk office at the NDA, the Desk Officer, Wing Commander Engineer Ciroma (retd), showed the team some dilapidating structures ranging from lecture rooms, laboratory to the entire buildings that would enjoy the intervention fund.

Wing Commander Ciroma who is also a senior lecturer at the academy pointed out a number of rooms that would be converted to laboratory, computer science training centre, integrated engineering workshop among others.

Also, speaking on the intervention fund, the academy registrar, Brigadier-General Ahmed

T. Jibrin said, "there are two things line up, one is the visit of the technical committee, and the visit became possible because we have made submission to the ETF after the Honourable Minister of Education briefed all the benefitting universities.

"We made our submission, and based on our submission they set up a technical team, and also instructed us to set up a technical team, so they have now come to harmonise what we have submitted to them with what is on the ground."

After this, they are likely to advertise the contract and to work according to so how long it takes, mainly it depends on how quickly they finish this tour not only here, they are going round all the benefitting universities.

"So it is not easy to say the exact date the contract will commence but from the briefing you heard that by December, 2010, all the projects for this education intervention should have been completed, so at last it will be as soon as possible."

Brigadier-General Jibrin added that the fund might not be enough for the projects at the NDA but he said it was a good thing that something has started coming in.

"I don't think the fund will be enough for the projects but we have to start from somewhere, if you look at some of the buildings, they are not in use, so whatever fund that is released, we should be able to start something, so gradually with the support of ETF and NDA own budget we should be able to develop all the places to the fullest so as to use them for the purpose they were meant," Jibrin concluded.

## ETF spends N2bn on book project

**E**ducation Trust Fund (ETF) has injected two billion Naira into a Book Development Intervention Programme for tertiary educational institutions in the country.

The Chairman, Board of Trustee of ETF, Dr. Musa Babayo who disclosed this during an interactive session with Technical Advisory Group (TAG) on the Fund's Book Development Intervention Programme Blueprint Document in Tertiary Education Institutions (TEIs), said the move was to drive the expected competitive edge for Nigeria in respect of production of reading materials that would meet international standards.

According to him, with blueprint already developed by the ETF, the intervention was intended to be a vehicle for stimulating and piloting growth in book development related programmes, projects, among others, geared towards advancing the nation's economy.

The meeting he noted was a quest for wider consultations from a wide range of stakeholders to ensure its smooth

implementation. He charged the participants to deliberate, fine-tune the blueprint and generate more ideas, project strategies and evolve a strategic document that would clearly spell out the administrative procedures, frameworks and guidelines for intervention in TEIs.

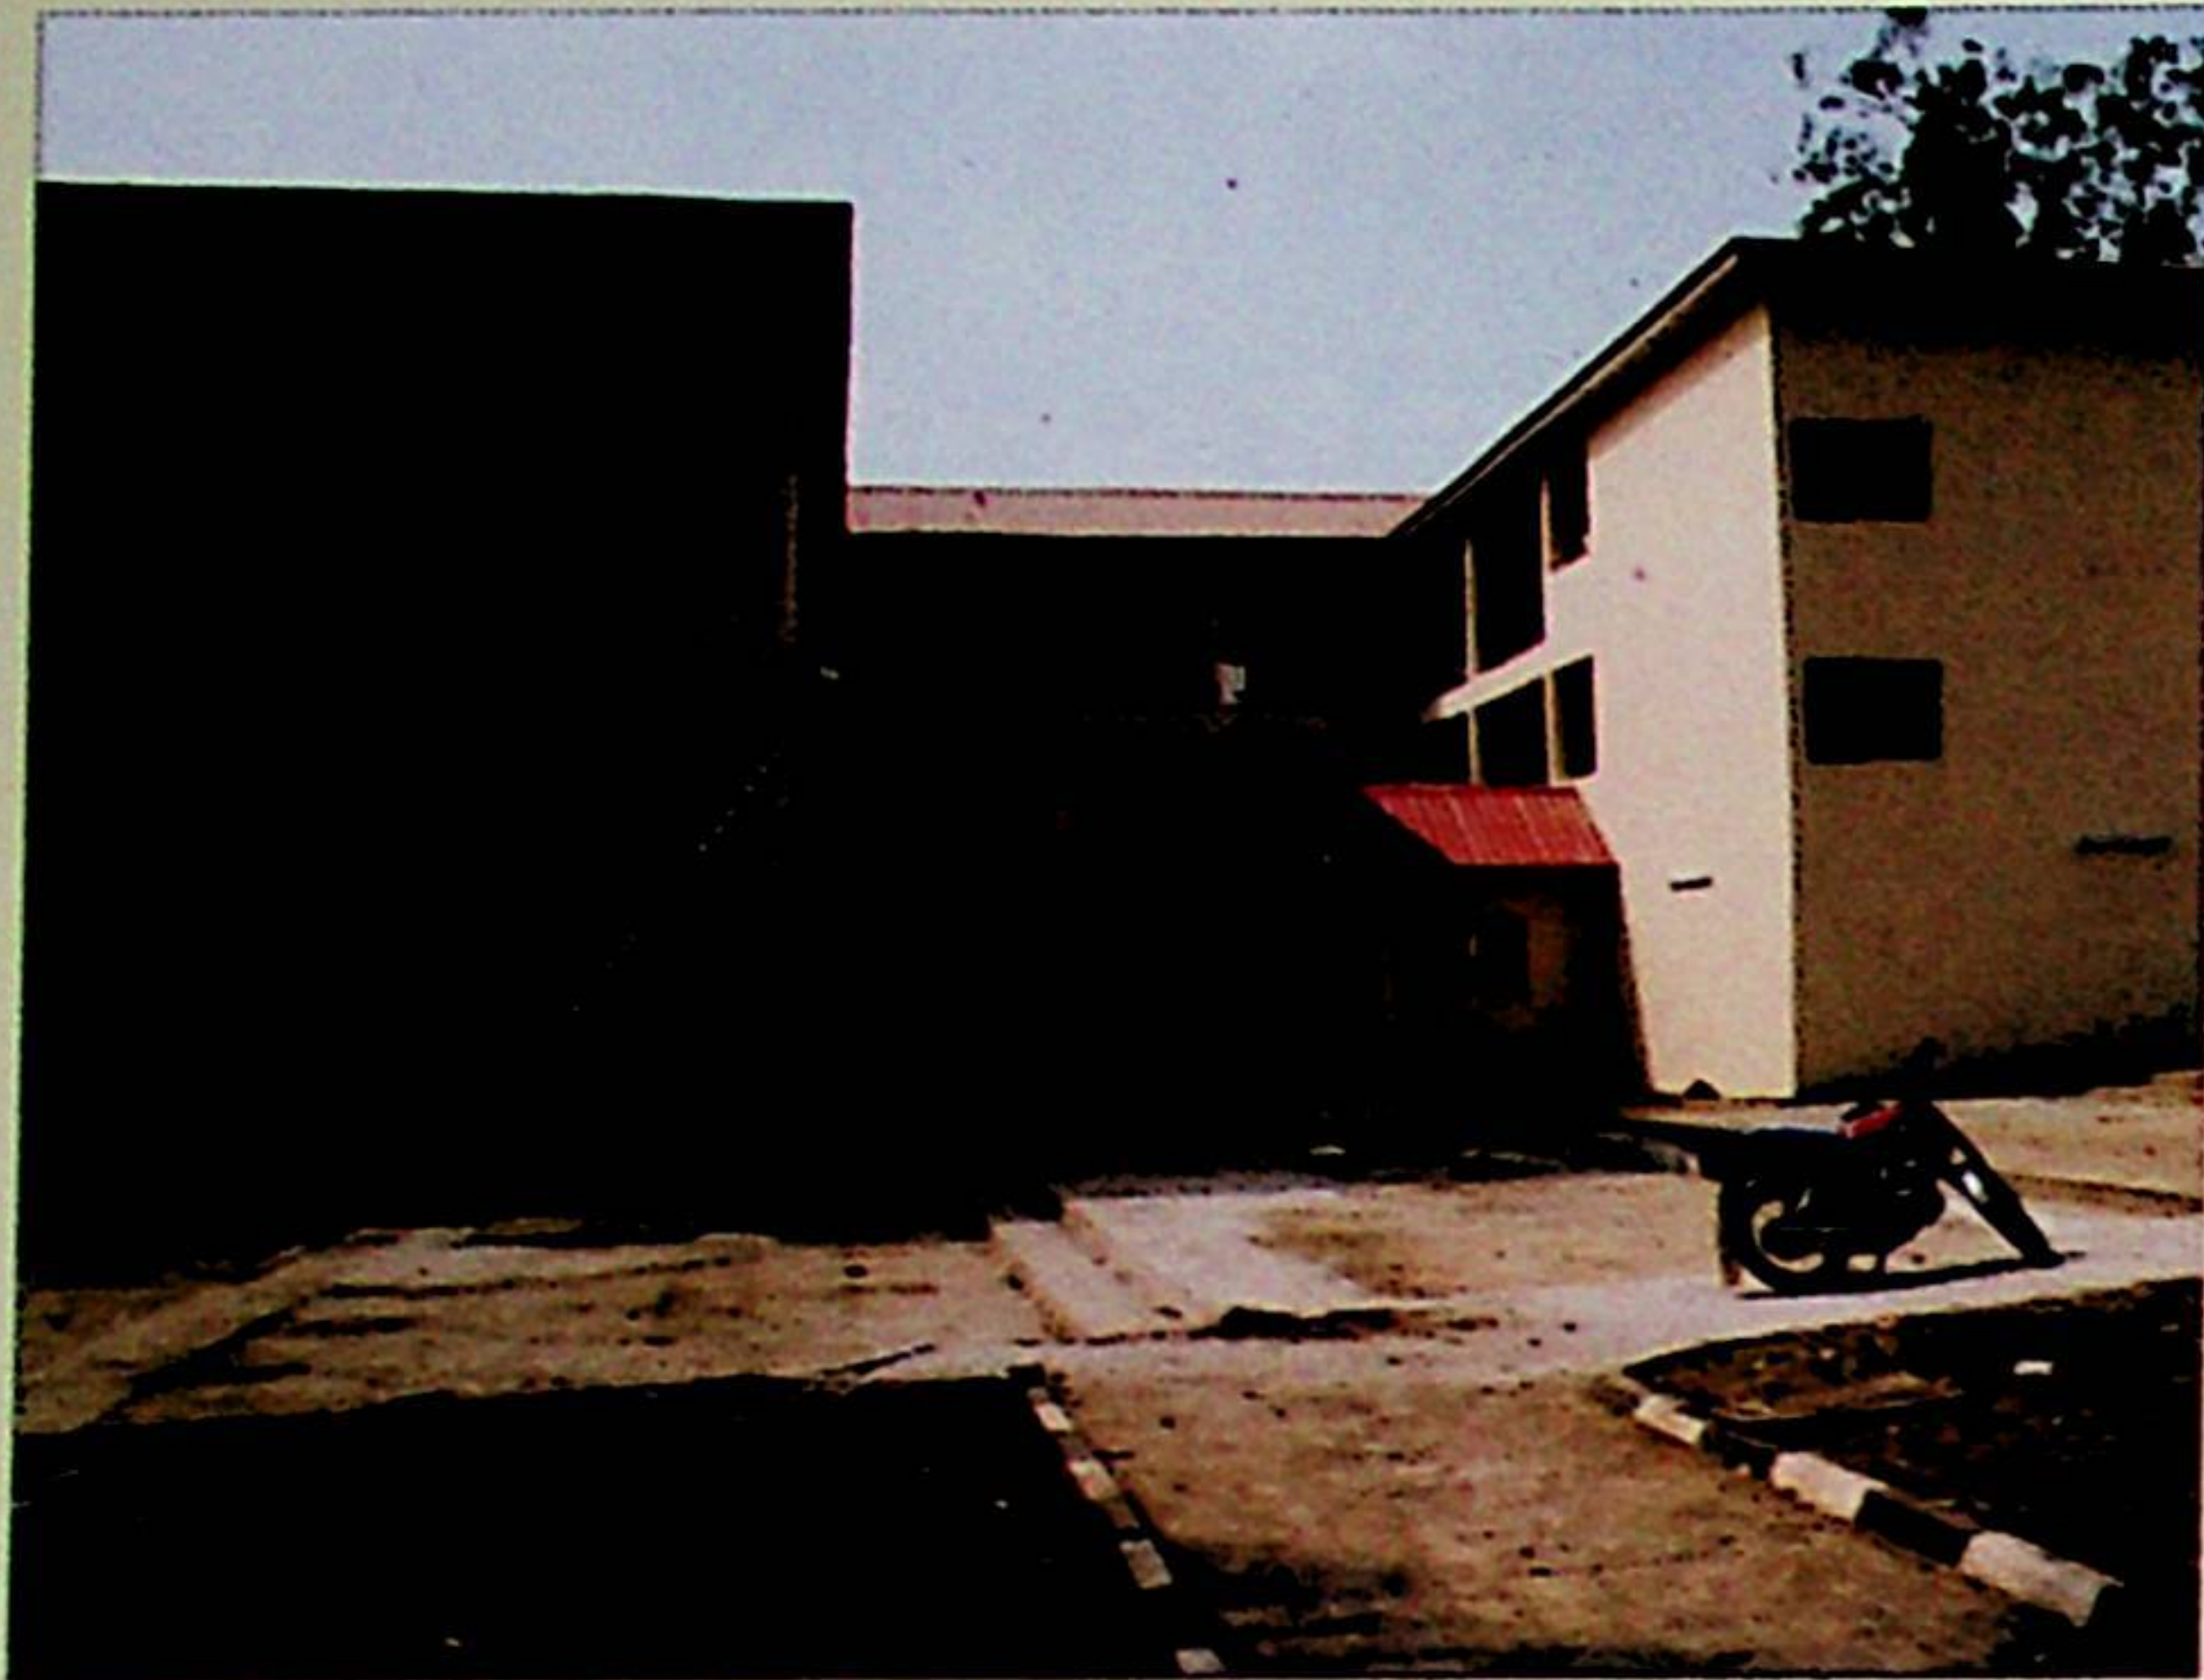

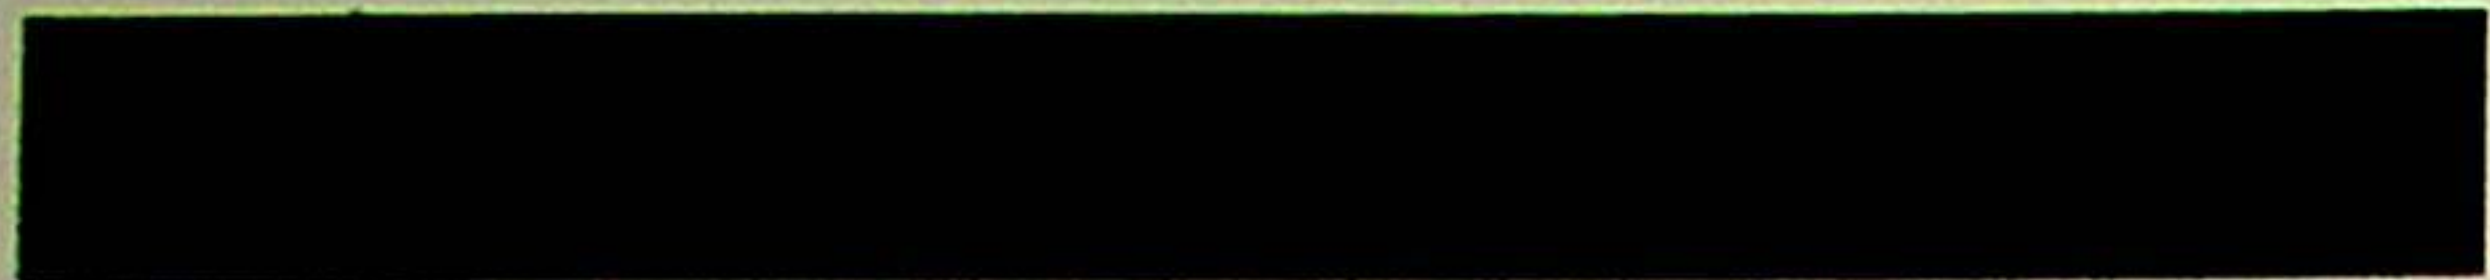

Chairman of the ETF Book Development Project, Dr. Hafiz Abubakar in a speech at the occasion, said the meeting was a gathering of the nation's "think tank" who would in addition to critiquing ETF blueprint document, would also touch all aspects of book development including operational guidelines for addressing book development programmes in the nation's tertiary institutions.

On his part, the Executive Secretary of ETF, Professor Mahmud Yakubu while welcoming the participants said the government had taken a bold step by approving the fund for the resuscitation of journals, which he explained had suffered neglect over the years.

# ETF, academics devise strategies to revive book production, reading culture

A small percentage of Nigeria's respected professors, their colleagues from several tertiary institutions across the country, and senior officials of the education sector regulatory bodies, spoke with one voice, last week, against the dearth of locally produced academic textbooks and the prevalence of handouts in the academia.

Brushing protocols aside, with some sounding somewhat prophetic, they declared that constant indulgence in the production of handouts by some teachers across the universities, polytechnics and colleges of education was regrettable, demeaning and should be halted with immediate effect. Instead, they called on all academics to follow the path of honour and do what is expected of them: Produce credible books.

The statement formed part of the robust arguments that dominated an interactive meeting organized by the Education Trust Fund (ETF) in Abuja, for the Technical Advisory Group (TAG) on the Fund's Book Development Intervention Programme. The membership of this group was drawn from regulatory agencies and relevant stakeholders from the tertiary institutions.

According to Dr. Hafiz Abubakar, who chairs the ETF Book Development Committee, the meeting "is a collaboration of brains to chart strategic efforts and guidelines to address the issue of book development in Nigeria". Besides, he said the round table was designed to fine-tune the ETF Book

Development blueprint and generate intervention project types. An implementation and action plan "that will stimulate the advancement of book development programmes" in the country's tertiary institutions, was also expected.

Already, the Federal Government has allocated N2 billion for the initiative for the current year. However, if this allocation is not spent by December 31st, the ETF would be required to return it to the treasury. With this at the back of the participants' minds, Abubakar observed that the meeting was expected to generate support and facilitate the resuscitation of journals and production of books in the tertiary institutions.

The assignment of the TAG, according to him, "is to interact, brainstorm and generate a strategic communique and blueprint".

Executive Secretary of the ETF, Prof. Mahmud Yakubu implored the participants to regard their

Dr. Hafiz Abubakar, Chairman, Book Development Committee

assignment as a national one. He explained that the membership of the group was arrived at painstakingly, due to the importance and sensitive nature of its assignment. He observed that the latest initiative, unlike the previous ones, was designed to encourage the production and consumption of internally generated books and journals.

The blueprint prepared by the ETF's experts contains several assumptions. For instance, it declared that book scarcity had approached crisis proportions "which is reflected not only in the

quantity of books available, but also in the quality of locally produced books". It traced the country's book development crisis to the Structural Adjustment Programme (SAP) of the 80s. It noted that the overall underfunding of libraries robbed both lecturers and their students of the opportunity of following developments in their various disciplines. It declared that the very high cost of book production, due to the scarcity of book print as a consequence of the near collapse of both Olu Ibe and Iwopin paper mills, had made things very difficult. It also assumed that lecturers were reluctant to write because of the absence of incentives and that publishers were not willing to take the risk of publishing unsolicited manuscripts. Instructively, among the legion of other assumptions, the document also pointed to the growing decline in the absence of reading culture among Nigerians within and outside the school system.

The blueprint listed seven areas for possible intervention. It stated that a lack of indigenous authorship had been noticed and should be corrected. "An indigenous book industry is needed to provide opportunities for the nation's writers, thinkers and artists to express them," it declared.

The document identified the collapsed University Presses as one of the areas begging for attention. It stated: "Publishing houses have a vital role to play as preservers of national literature and heritage. University Press are supposed to facilitate the production of research findings, journals and specialized tertiary textbooks. Unfortunately, many of the Press have been closed down and those that manage to stay

alive have been reduced to publishing school textbooks or materials that have prospects of generating handsome profits."

Besides, the document underscored the shortage of writers and editors, for which a number of workshops, to be anchored by the ETF was proposed. Closely associated with this is the lack of personnel/training for electronic publishing with the blueprint suggesting that some training be organized. Absence of committed stakeholders, lack of funds for new titles and over dependence on foreign books were equally identified as areas needing attention.

After taking in the contents of the blueprint, the meeting established five syndicate groups to consider five themes: Literacy and the promotion of Reading Culture (Group A); Workshops (Group B); Production of Journals (Group C); Revitalizing University Presses (Group D); and Book Publishing (Group E).

After putting their heads together, the groups came up with individual resolutions. Group A identified the paucity of reading materials as being primarily responsible for the poor reading culture in the country. It suggested continual campaign to encourage and nurture the culture among staff and students of tertiary institutions. Those who should constitute the target of such campaigns, according to the group, should be: in school youths, pre-tertiary education students, lecturers, parents, administrators and policy makers. It also suggested that the campaign be waged through the mass media, interpersonal communication, drama, town hall meetings, exhibition, focus groups, advocacy visits and reading competitions.

Group B suggested two

categories of workshops: interactive- for literary writers, professional and academic associations and capacity building workshops for writers.

Group C recommended that the ETF identifies professional journals in the country with the help of professional bodies and provide funds for such. To revive the University press, Group D suggested that state of the art equipment be purchased and installed; requisite skill for printing and publishing of academic text be developed and contemporary marketing strategies within and outside the country be acquired amongst others. But it also advised that such interventions should be phased.

Group E suggested that National Editorial Committees be set up in 10 broad areas: Medicine and Pharmacy; Engineering and Technology; Arts and Humanities; Social Sciences; Education. Others include: Agriculture; Physical Sciences; Life Sciences; Law and Veterinary Medicine. The textbooks to be produced should be useable in tertiary institutions. The mandate of the committees, according to the group, should cover survey for available materials across the institution in the respective area; needs assessment and identification of gaps; means of filling such gaps; peer review and assessment of manuscripts; and identification of foreign textbooks that are critical to the core areas for local adaptation.

Members of the TAG were also informed that they would be called upon regularly until the objectives of the intervention are completed.

## ETF Gives Institutions Ultimatum On N23.6bn

*Prof Mahmood Yakubu, ES, ETF*

**E**ducational institutions that are yet to access their Education Trust Fund (ETF) special intervention funds have only two months to collect or forfeit them.

The warning came as a result of many of the institutions who are foot-dragging in accessing the over N23.6 billion

intervention fund with the ETF.

Executive Secretary, ETF, Prof. Mahmood Yakubu, pleaded with the authorities of such institutions to expedite action for disbursement of these funds.

He stated this while speaking at the ongoing Zonal Technical Workshops for officials of State Ministries of Education and State Universal Basic Education Boards (SUBEBs) taking place in the six geopolitical zones of the country.

According to Yakubu, the importance of the interactive workshop was to provide forum for key officials driving ETF intervention projects at secondary and basic education levels in the country to primarily assess the level of compliance of beneficiaries in accessing all outstanding allocations of education and also review the performance of ongoing ETF intervention projects.

Noting that the ETF had as at 2008, unveiled a regime of enhanced education tax allocations by more than 100 per cent for all beneficiaries for the first time in the 10 years of the fund, he expressed worries over what he called the un-seriousness of some beneficiaries to take advantage of the allocation.

He said: "While the fund has been discharging its obligations to beneficiaries consistently over the years, some of the beneficiaries have not been fully accessing their annual

allocations for the purpose of rehabilitation, restoration and consolidation of educational infrastructures and facilities and other learning resources.

"Consequently, by the first quarter of 2009, the level of unaccessed funds grew with the accumulation of a staggering sum of N23.6 billion which as he explained, is a source of worry to the Education Minister, Dr. Sam Egwu and subsequent approval for the drastic measures initiated by ETF, which led to the publication of the names of beneficiaries with huge amount still outstanding "with a deadline of December 31, 2009 for utilization or forfeiture of same".

Some of the State Ministries of Education that still have outstanding monies running into millions of naira as at October include Cross River State N239.4 million, Imo State N198.1 million, Plateau State 194.8 million, Bayelsa State N193.4 million, Bauchi State N189.8 million, Borno State N185.6 million, Kwara State N170.2 million among others.

The workshops are taking place in Lagos for South West Zone, Enugu for South East, Port-Harcourt for South South, Minna for North Central, Bauchi for North East and Kaduna for North West.

## Osun Subeb issues ultimatum over ETF projects

Osun State Universal Basic Education Board, (SUBEB) Chairman, Professor Wale Oladipo has charged all contractors handling the Educational Task Force (ETF) projects to complete them within a week or face the wrath of the law.

Professor Oladipo gave this charge in a press release made available to the *Sunday Tribune*.

Oladipo stressed further, "The 2007 Federal Education Task Force Projects meant for the state have been duly mobilized and distributed to various contractors by the Osun State government, but they have refused to complete and deliver the projects in good time."

"Although, the 2007 ETF projects have been awarded prior to my appointment as the chairman of this board, if the projects are not delivered, we cannot retrieve the 2008 ETF fund from the Federal Government."

The release stated further that the contractors concerned have been given up till October 16, 2009 to deliver the jobs, while failure to do so would be considered "as an act of sabotaging the effort of the state government in providing a befitting educational environment for our children."

The Chairman disclosed further that the 2007 ETF Projects cost over N240 million, which was paid as grant by the Federal Government to the State Universal Basic Education Board, while the first and second tranche have been duly paid to the contractors.

On the recruitment of

teachers for the primary schools in the state, Oladipo said: "The state government has approved the employment of teachers to the primary schools and we will choose the best from each local government. We have to go for a competent and recognized consultant that will handle the

recruitment exercise in which two criteria, examination and geographical spread would be used".

## ETF projects: Cross River gives Contractors deadline

The Cross River State Government has given contractors handling Education Trust Fund (ETF) projects in the state till the end of this month to complete the jobs or be sanctioned.

The Commissioner of Education, Prof. Offiong Offiong, told the News Agency of Nigeria (NAN) in Calabar recently that the contractors might also be prosecuted if they fail to deliver the projects.

He said that 12 projects were expected to be handed over to the government. "The delay in completing the jobs has made it impossible for the state to draw fresh funds from the ETF", he said.

"One of the major conditions for new funds from the ETF is for you to complete ongoing projects". Although the Commissioner did not disclose the value of the contracts, he said that two of them were direct jobs for the Ministry of Education while 10 others were for the State Universal Basic Education Board (SUBEB).

On the inability to draw about N3 billion from the Universal Basic Education Board (UBE), he regretted that the state had not met the conditions that would enable it to access the funds. He said the state had paid its counterpart funding for the scheme up to 2008, "but we still have the challenge of capacity building in terms of personnel at the SUBEB and it one basic condition that must be met".

Offiong, who expressed sadness over the issue, said: "This means a lot to us because some funds are lying out there to our credit but we cannot access them due to our own drawbacks".

"Before we can access the funds, we have to prove that we have capable and well-trained personnel at our SUBEB to handle the programme". He said the funds being held at the UBE Commission headquarters in Abuja were for 2007, 2008 and 2009.

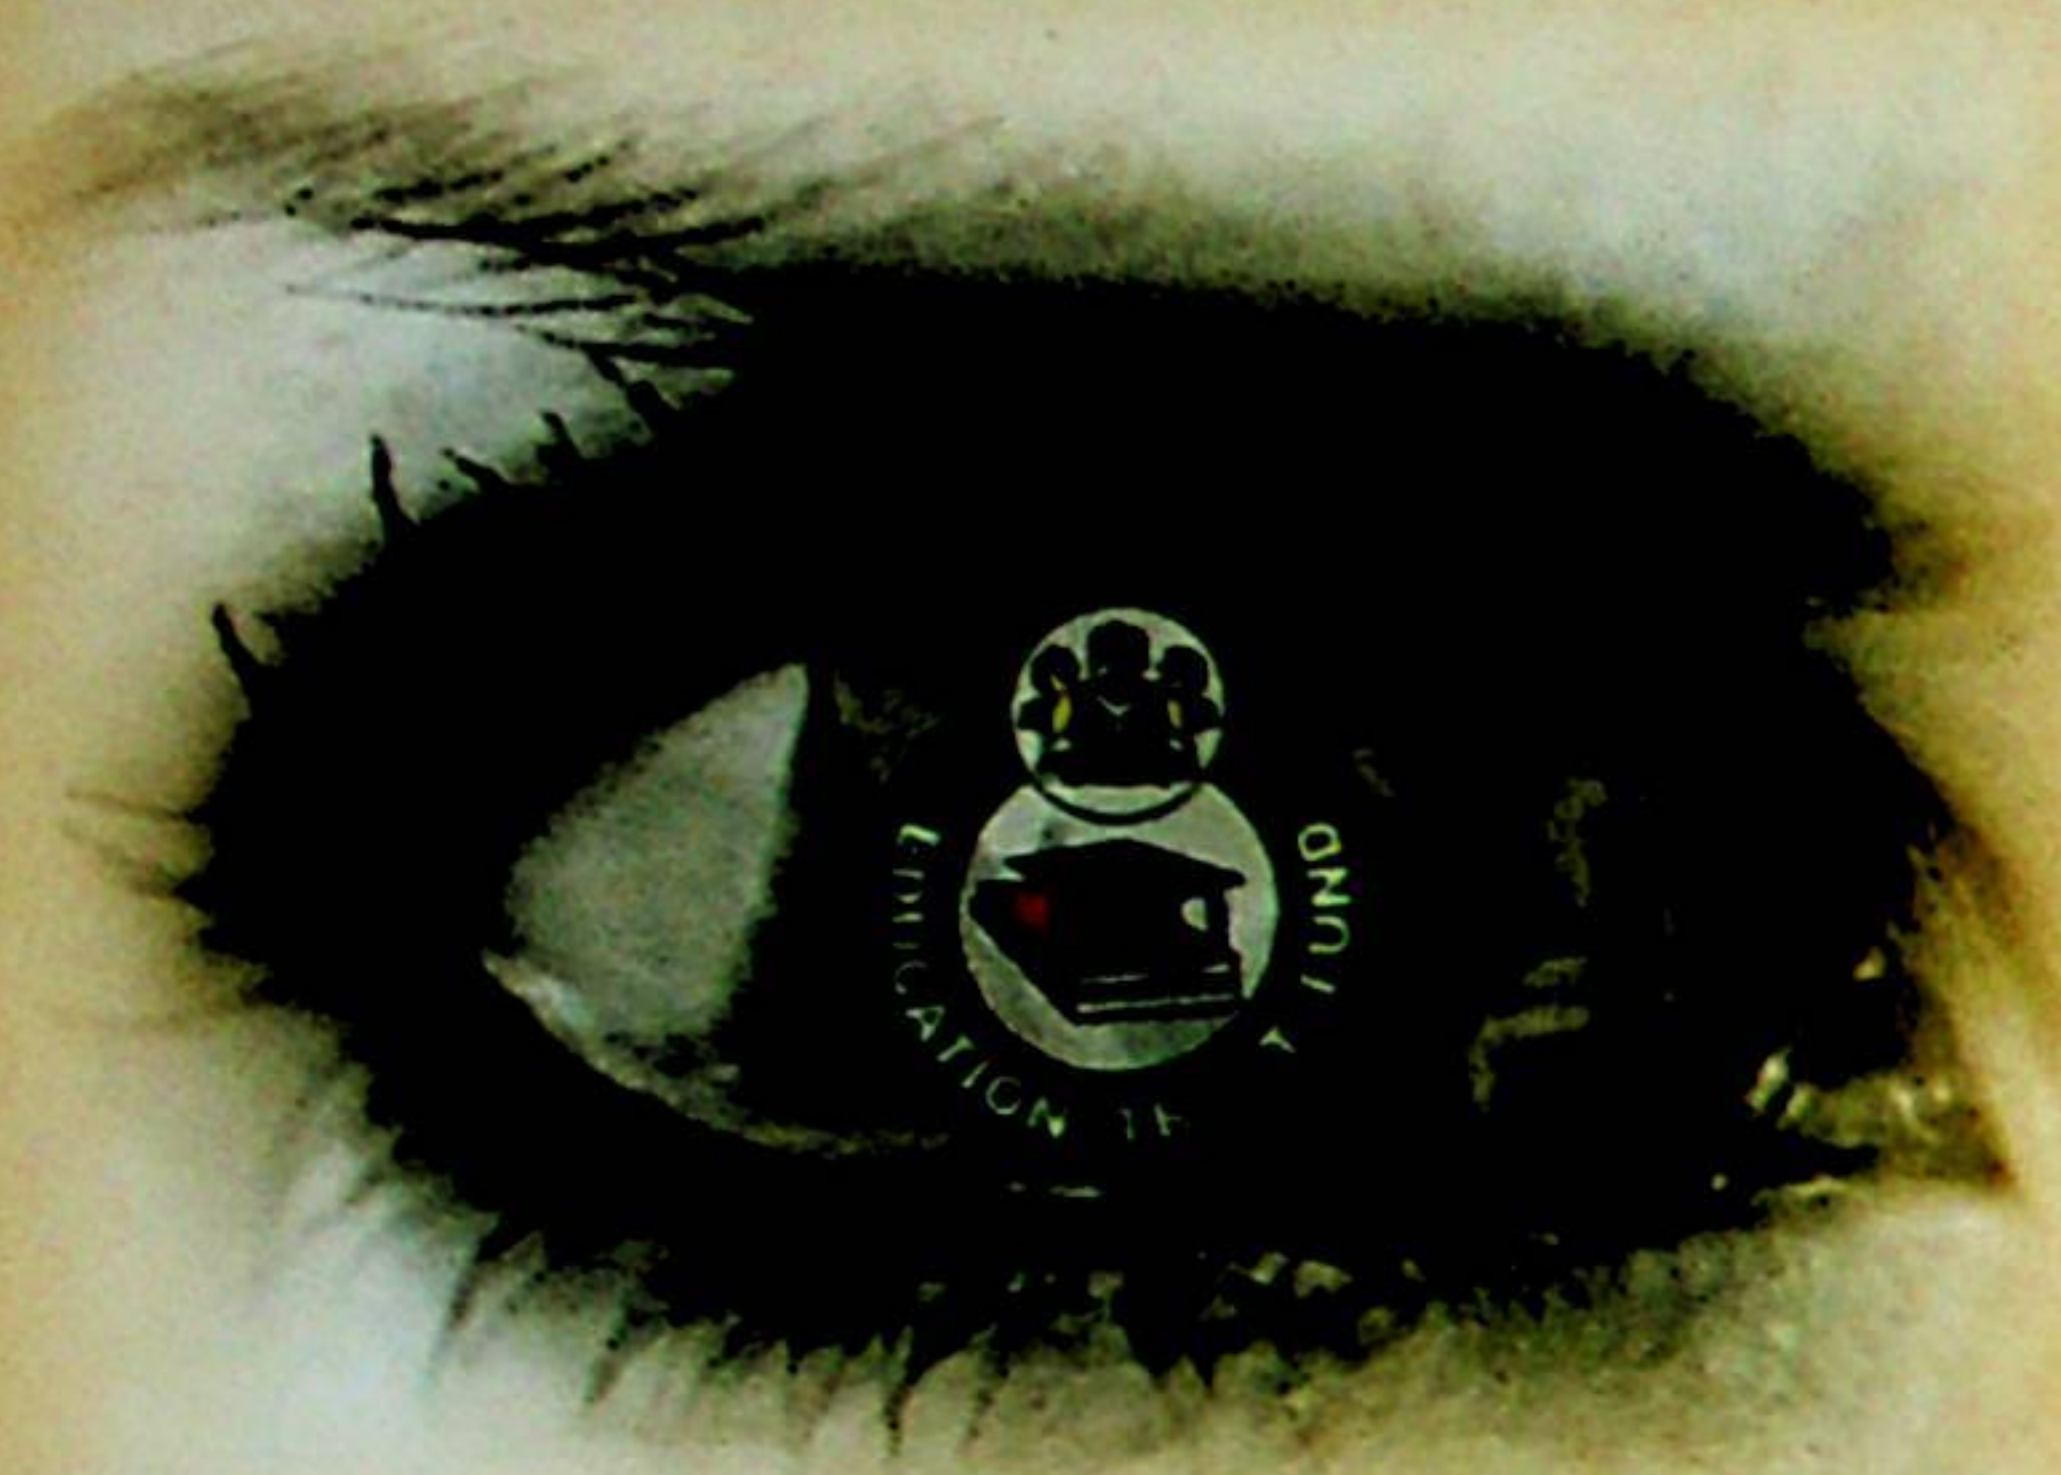

He, however, stated that efforts were on to ensure that the issues were sorted out before the end of this year. "By next week, we will begin to award contracts for 2007. When we finish that, we will process 2008 and part of 2009," the Commissioner said.

"The contracts would be for training of teachers, procurement of textbooks and instructional materials, procurement of desks and teachers' tables and renovation of classrooms".
