

...exceptional leadership, resilient PHC, better outcomes.

Borno State

ADVOCACY BRIEF
2024

About the Leadership Challenge

The PHC Leadership Challenge was put together to accelerate the implementation of the Seattle Declaration made by Governors in 2019 and to catalyze renewed political commitment of all Governors to improve PHC outcomes at scale. The Challenge provides an opportunity for the 36 states and FCT to equitably compete within their respective geopolitical zones for an annual best performing and most improved awards in PHC delivery. The Challenge is being implemented in partnership with National Primary Health Care Development Agency, UNICEF and funded by Bill and Melinda Gates Foundation and Aliko Dangote Foundation.

Key Actions

The State Government has made huge investment in strengthening PHC facilities across the state. However, the **State Governor** should:

-  **1** Ensure that PHC performance is discussed at State Executive Council meetings with clear actions for improvement.
-  **2** Ensure timely release of funds for implementation of activities in the Annual Operational Plan.
-  **3** Sustain efforts towards visiting at least one PHC facility per quarter across the different senatorial zones.
-  **4** Convene biannual meetings with traditional leaders on PHC issues.
