**A COMPENDIUM OF ACHIEVEMENTS OF THE
GOV. MUHAMMAD BADARU LED ADMINISTRATION
MAY 2015 - 2018**

“ **The broad based policy thrust of our government will focus on security of lives and property, education and human capital development, water & sanitation and primary healthcare, youth employment, women empowerment and poverty alleviation through agriculture and agro allied processing.** ”

- April 2015

FOREWORD

The last 3 years in Jigawa State have been a mixed bag of fiscal challenges, discovering untapped opportunities and striking a balance between providing critical infrastructure and meeting the recurrent demands of public service.

Governor Muhammad Badaru Abubakar has defied all skeptics in steering the State out of an almost hopeless financial situation, to the enviable status quo of being compared to an 8 year two term tenure in less than half that time. This feat is even more striking when one considers the fact that State earnings within the period were typically about half of what obtained between 2008 and 2014.

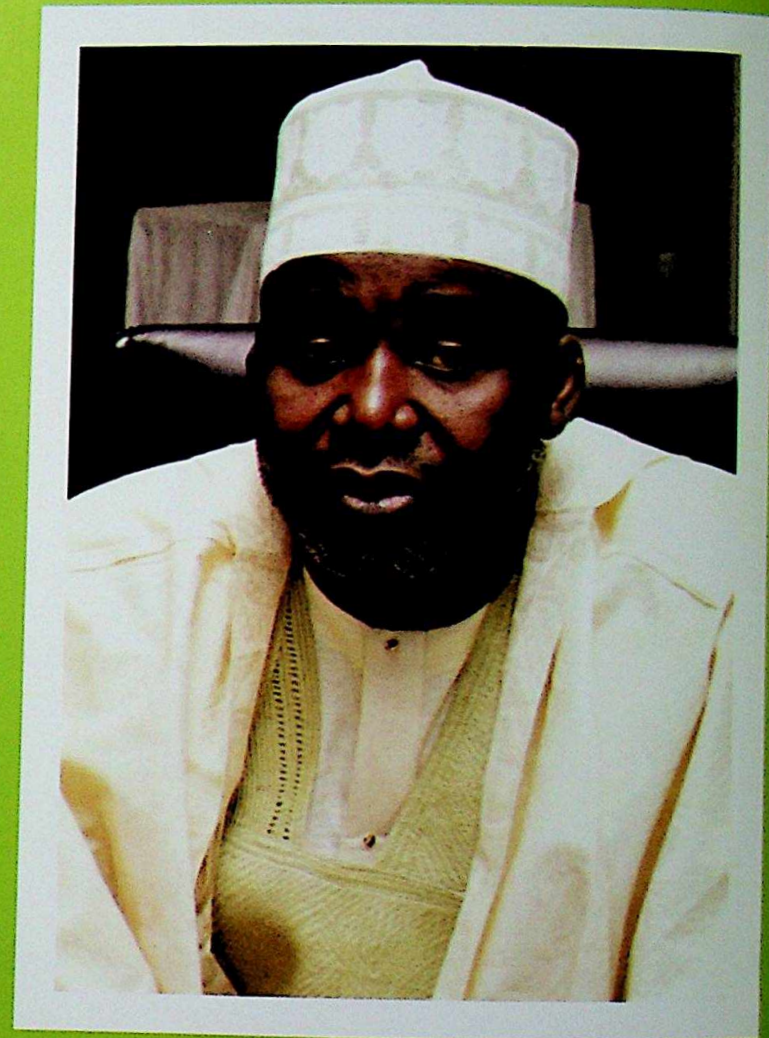

With a focus on people orientation and careful needs assessment, Governor Badaru has provided exemplary leadership and motivated his team to deliver on almost all his

promises and commitments to the electorate, defying all political logic by committing to complete a massive portfolio of inherited projects and still create the capacity to embark on new ones through prudence and a value for money mantra.

This publication is an eye opener to the silent revolution that has taken place within this short but eventful timeline, especially in infrastructure provision, Agriculture, Investment attraction and empowerment & social protection.

This administration is indeed about team spirit and citizen centric policies and has been appropriately defined by results and outcomes, not attributes and self glorification.

The facts speak for themselves, happy reading!

His Excellency
Ibrahim Hassan Hadejia
Deputy Governor and Chairman,
Publication committee

The challenge of development... is to improve the quality of life...better education, higher standards of health and nutrition, less poverty, a cleaner environment, more equality of opportunity, greater individual freedom, and a richer cultural life

- Worldbank development report, 1991

ADMINISTRATION FINANCIAL MANAGEMENT AND GOVERNANCE

Governance is a public trust and no where should this be more evident than in the management of public resources-financial or otherwise

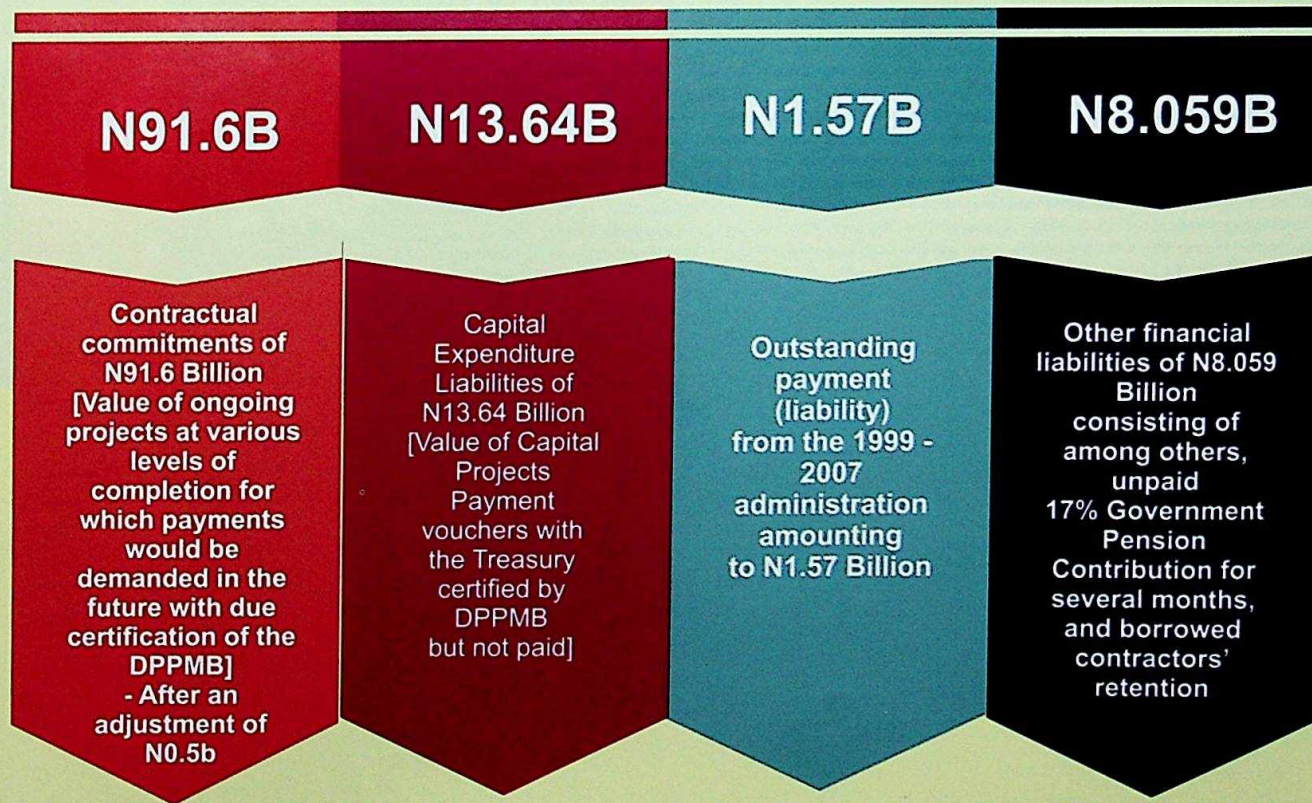

His Excellency, Governor Muhammad Badaru Abubakar

The above statement underscores the dexterity with which this administration wriggled its way through the financial burden prevalent on assumption of office and the declining fiscal resources accruable to the State. The contractual commitments and financial liabilities bequeathed to this administration are being managed effectively without hindering the delivery of dividends of democracy to the citizenry.

It should be noted that as at 29th May, 2015, the volume of liabilities and ongoing capital projects was at the time more than the entire annual budget of the State which was about N100bn. Ironically, the State's financial liquidity position stood at just about N16million.

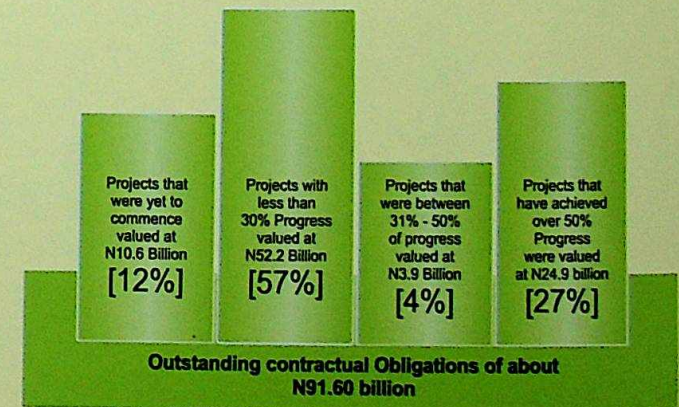

Some of the financial liabilities inherited include capital expenditure liabilities of N13.64billion, contractual commitments valued at N91.6b, outstanding payments (liabilities) from the 1999-2007 administration amounting to N1.57b, other financial liabilities of N8.05b consisting of unpaid 17% Government pension contribution for several months, borrowed contractual retention, outstanding internal/external scholarship for 2013/2014 academic session, outstanding fees for the 2014/2015 WAEC, NECO, NABTEB and NBAIS examinations for 19,000 students, N2bn MSME loan from the Central Bank of Nigeria as well as outstanding pension liabilities for Local Government and Local Education Authorities.

It is worthy of note that counterpart funding were not paid for SUBEB since 2013. The same can be said for FADAMA III, IFAD, among others.

Financial liquidity position as at 29th May, 2015

- N16 million

Inherited financial liabilities and contractual obligations - N114.87BN

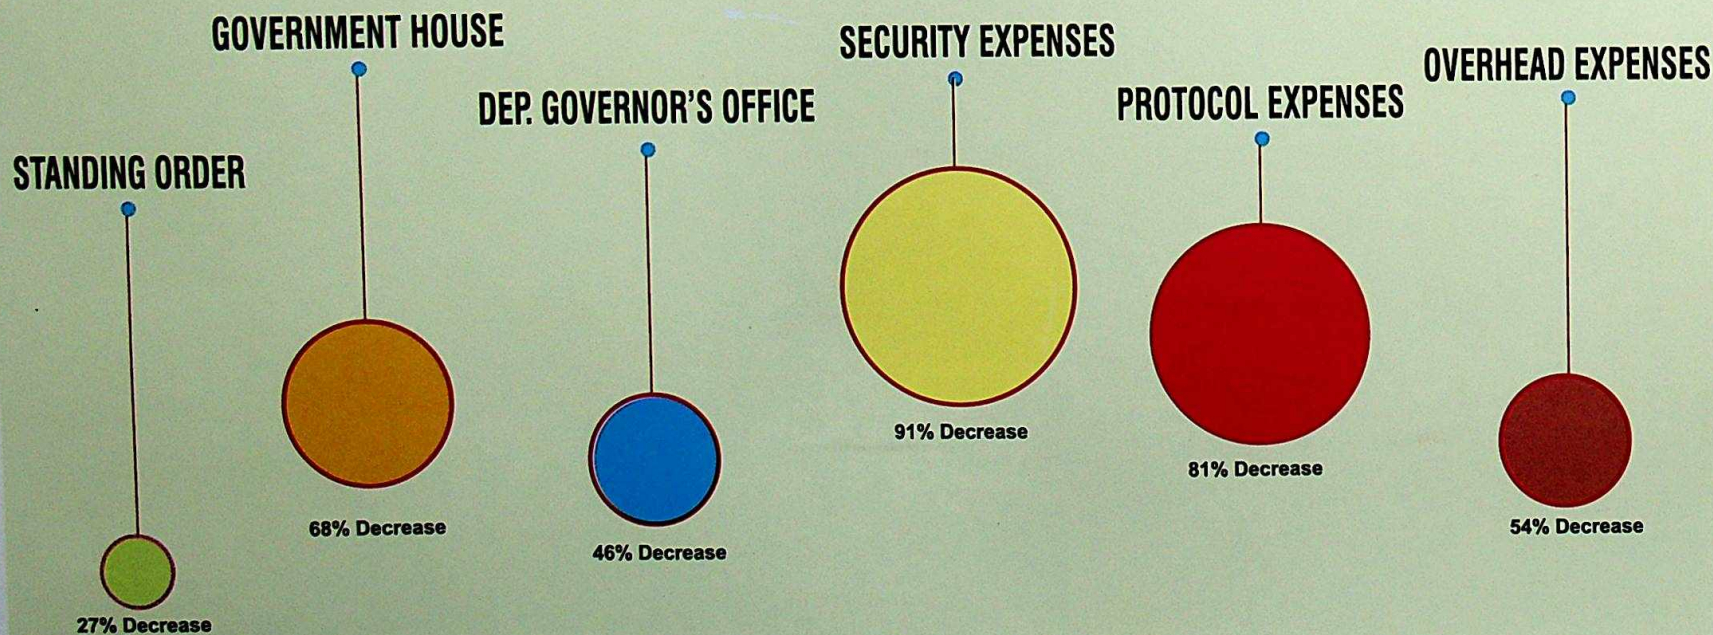

Coupled with the problem of financial liabilities, the State was also burdened with a lot of other challenges which could have crippled the operations of Government if they had not been properly managed. These include, declining fiscal resources (from a monthly federal allocation of N5bn in 2014 to an average of N3bn in 2017), high cost of governance, unsustainable salary bills, inefficiencies in resource management and low Internally Generated Revenue (IGR).

To forestall the State from plunging into financial chaos, Government quickly adopted the “prudence and value for money” principle. Governor Badaru being a trained accountant understands that governance is public trust and no where should this be more evident than in the management of public resources - financial or otherwise.

Through these measures, the cost of governance and service delivery was drastically reduced and the quality of public service expanded. For instance, the cost of facility management for various government buildings was reduced by more than 50% with no loss in quality and with almost all existing contractors retained.

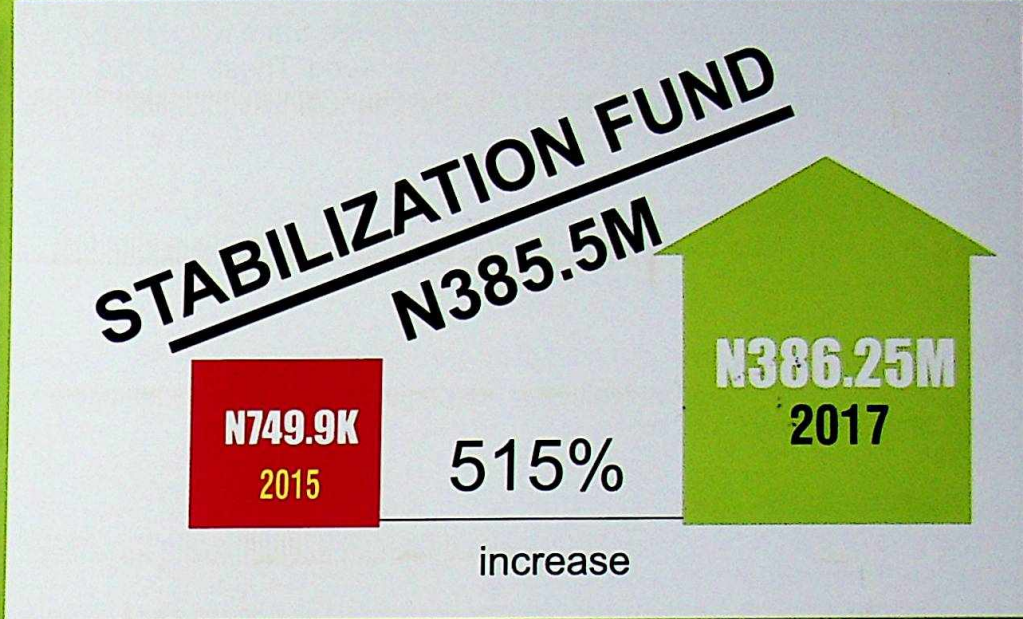

In addition, standing orders on government spending has been reduced by 27%. Also, Government House expenditure has been reduced by 68%, expenses of the Deputy Governor's office reduced by 46%, security and related expenses reduced by 91%, protocol expenses reduced by 81% while overhead has been reduced by 54%. (This is a comparison of the last 2 years of the past administration and the first 2 years of the present administration). The Government also rationalized and realigned MDAs for efficiency and cost reduction.

On capital expenditure, a review of the inherited contracts from the previous administration was undertaken and many contractors have given discounts ranging between 10 – 20 %, which resulted in significant savings.. of about N11bn with road sector discount amounting to N8.23bn.

N11bn

The Civil Service

At the inception of this administration, the civil service was faced with a lot of challenges such as:

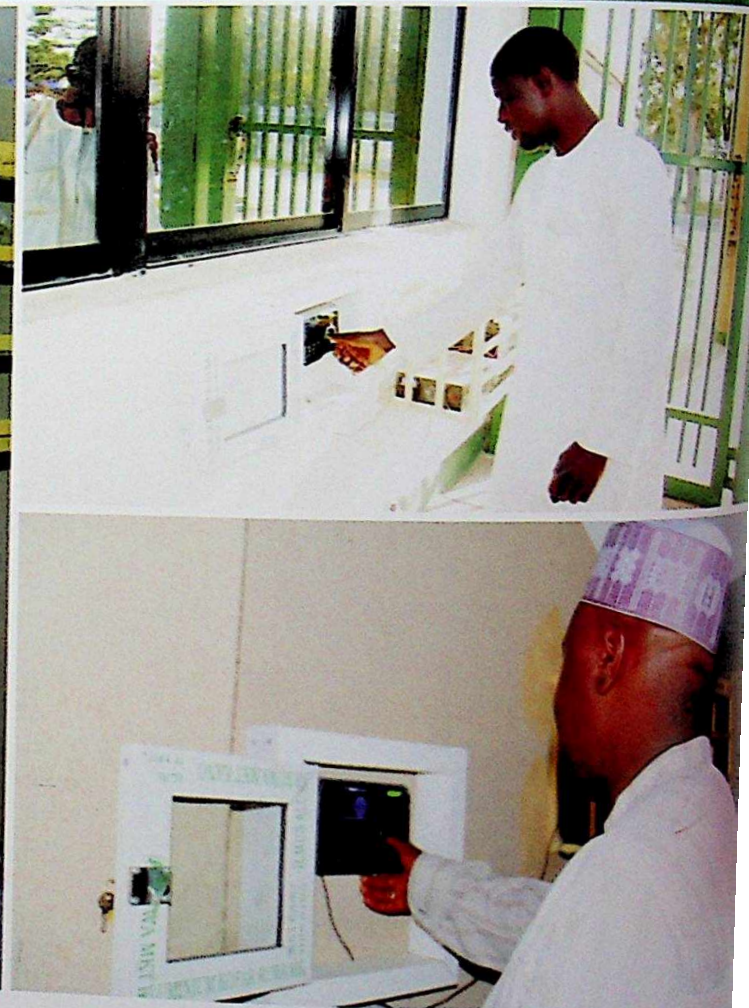

- A workforce of over 64,000.
- Wage bill of almost N4,000,000,000.00, representing 75% of State revenue which goes into servicing about 1% of the State population.
- Duplication of functions in almost all MDAs
- Inadequate skilled manpower across the Service.
- High rate of attrition/retirements
- Poor attitude to work/high rate of absenteeism.

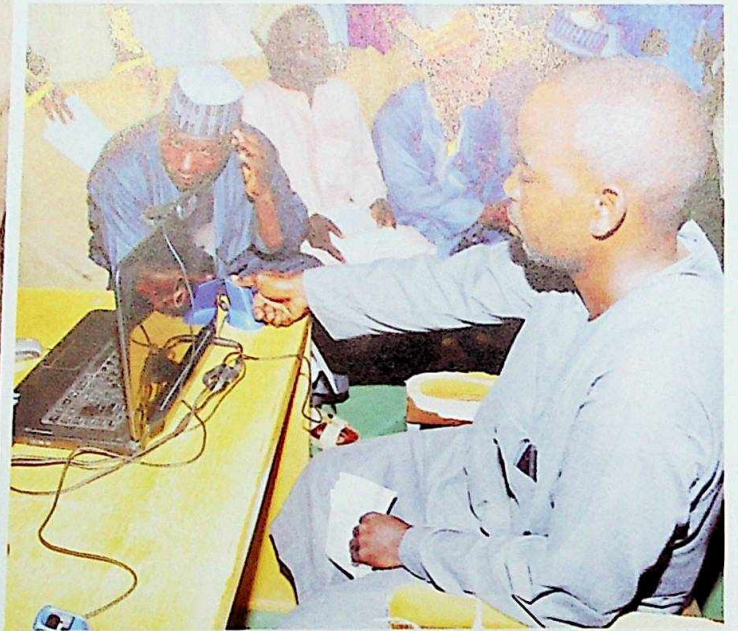

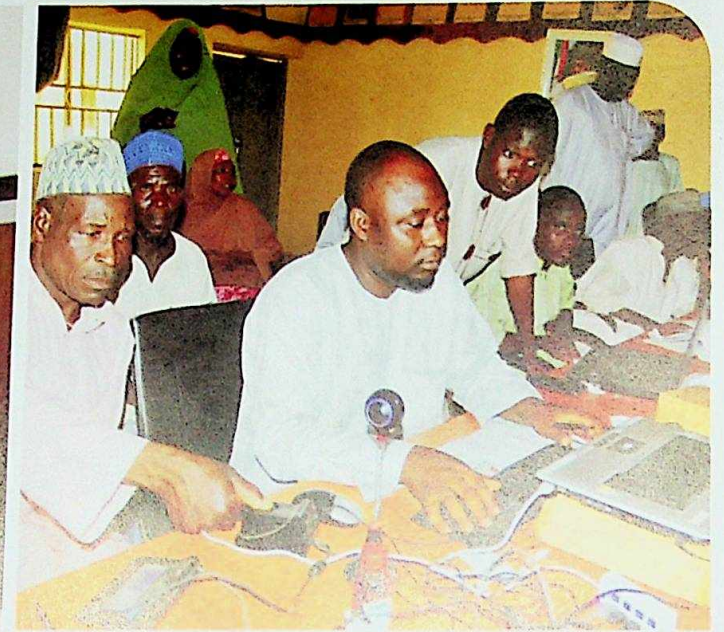

Initiatives of this administration in tackling some of the challenges include:

- Rationalization/Realignment of MDAs
- Installation of electronic biometric thumb – printing machine/register.
- Linking staff BVNs to salary.
- Prompt payments of salaries, pensions and gratuities
- Introduction of abridgement courses to meet capacity gap identified in the service.
- Improved and sustained the conduct of regular short-term training.

4,807 Ghost workers expunged from the payroll

N90.194m in monthly savings

Regular Interactive forum between the Governor and civil servants has helped tackled a lot of the challenges in the service

OTHER INITIATIVES OF THE GOVERNMENT INCLUDE

- Lifting of embargo on employment particularly in critical areas i.e Education, Health.
- Payment of 5% leave grant to workers
- Establishment of the department of PSR/SERVICOM with Unit in MDAs.
- Upward review of operational cost of MDAs
- Up ward review of vehicle loans
- Ensure workers promotion as and when due

His Excellency flagging off the tricycle loan scheme for civil servants

AGRICULTURE

Our priority on assuming office in 2015 was to develop a local economy driven largely by agriculture which is the principal local activity in the State.

Consistent with the economic diversification strategy of the Federal Government, Agriculture was selected as the main driver of the strategic vision of the Badaru administration. With the slogan "Farming is a Business", His Excellency was able to galvanize the people, particularly the youths, into a sector that was beset with a myriad of challenges - age-old model of subsistence agriculture characterized by small-farm holdings, high-level drudgery, inadequate extension services, ineffective response to periodic pest and disease outbreaks and inadequate access to high quality agricultural inputs.

This created an uncompetitive environment with low productivity, leaving the farmers wallowing in a vicious cycle of abject poverty from generation to generation. This is despite the huge comparative advantage enjoyed by the State including its 1.8 million hectares of cultivable land with over 0.4 million hectares of this being fertile FADAMA suitable for all-year round cultivation and huge reservoir of water and able-bodied youths.

Our first point of action was to develop an all encompassing agricultural policy and master plan that will provide a platform for transforming the agricultural landscape to impact on the local economy through improved productivity and value addition in production and post harvest processing. We were able to achieve this all important milestone with the technical assistance of DFID programs (SPARC, ARC, ENABLE2 and GEMS3) operating in the State.

The key objectives of the plan are to:

Develop Agriculture along value chains

Strengthen extension, Research and Development (R & D) in Agriculture

Increase irrigated land, water and alternative energy infrastructure for agriculture.

Increase level of mechanization in agriculture

Promote opportunities in the State for private investments

Mainstream youths, women and other vulnerable groups in agriculture for employment generation and poverty reduction

Adopt a cluster approach to aggregate small holder farmers for better management in input provision to balance the demand for large scale agri-investors with local land holder interests

THE CLUSTER FARMING INITIATIVE

The Cluster Program was established to refocus the subsistence mindset of the small holder farmer and open his eyes to the commercial potential of his farming activity. A State wide slogan of "Farming is a Business" was adopted and made the catch phrase for all activities of the Agriculture ministry in the State.

The cluster farming initiative reflects the steps being taken by Jigawa State to attain the sustainable development in the agriculture sector through improvements in small scale agricultural development focusing on precision quality, input provision to poor farmers and targeted extension service to attain huge improvements in yield.

The Jigawa State Government took the initiative of registering individual small holder farmers and clustering them for target input provision and extension service.

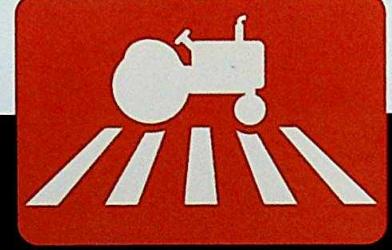

At inception, a maximum cluster size of 50 Hectares was formed in each of the 287 wards in the state with a maximum of 5 sub clusters where a 50 hectare contiguous lot is not feasible. with input provision in the form of quality seeds, fertilizer and pesticide. So far, a total of 1,306 clusters were established with 64,184 farmers participating. Average farm size was 0.8 Ha per farmer.

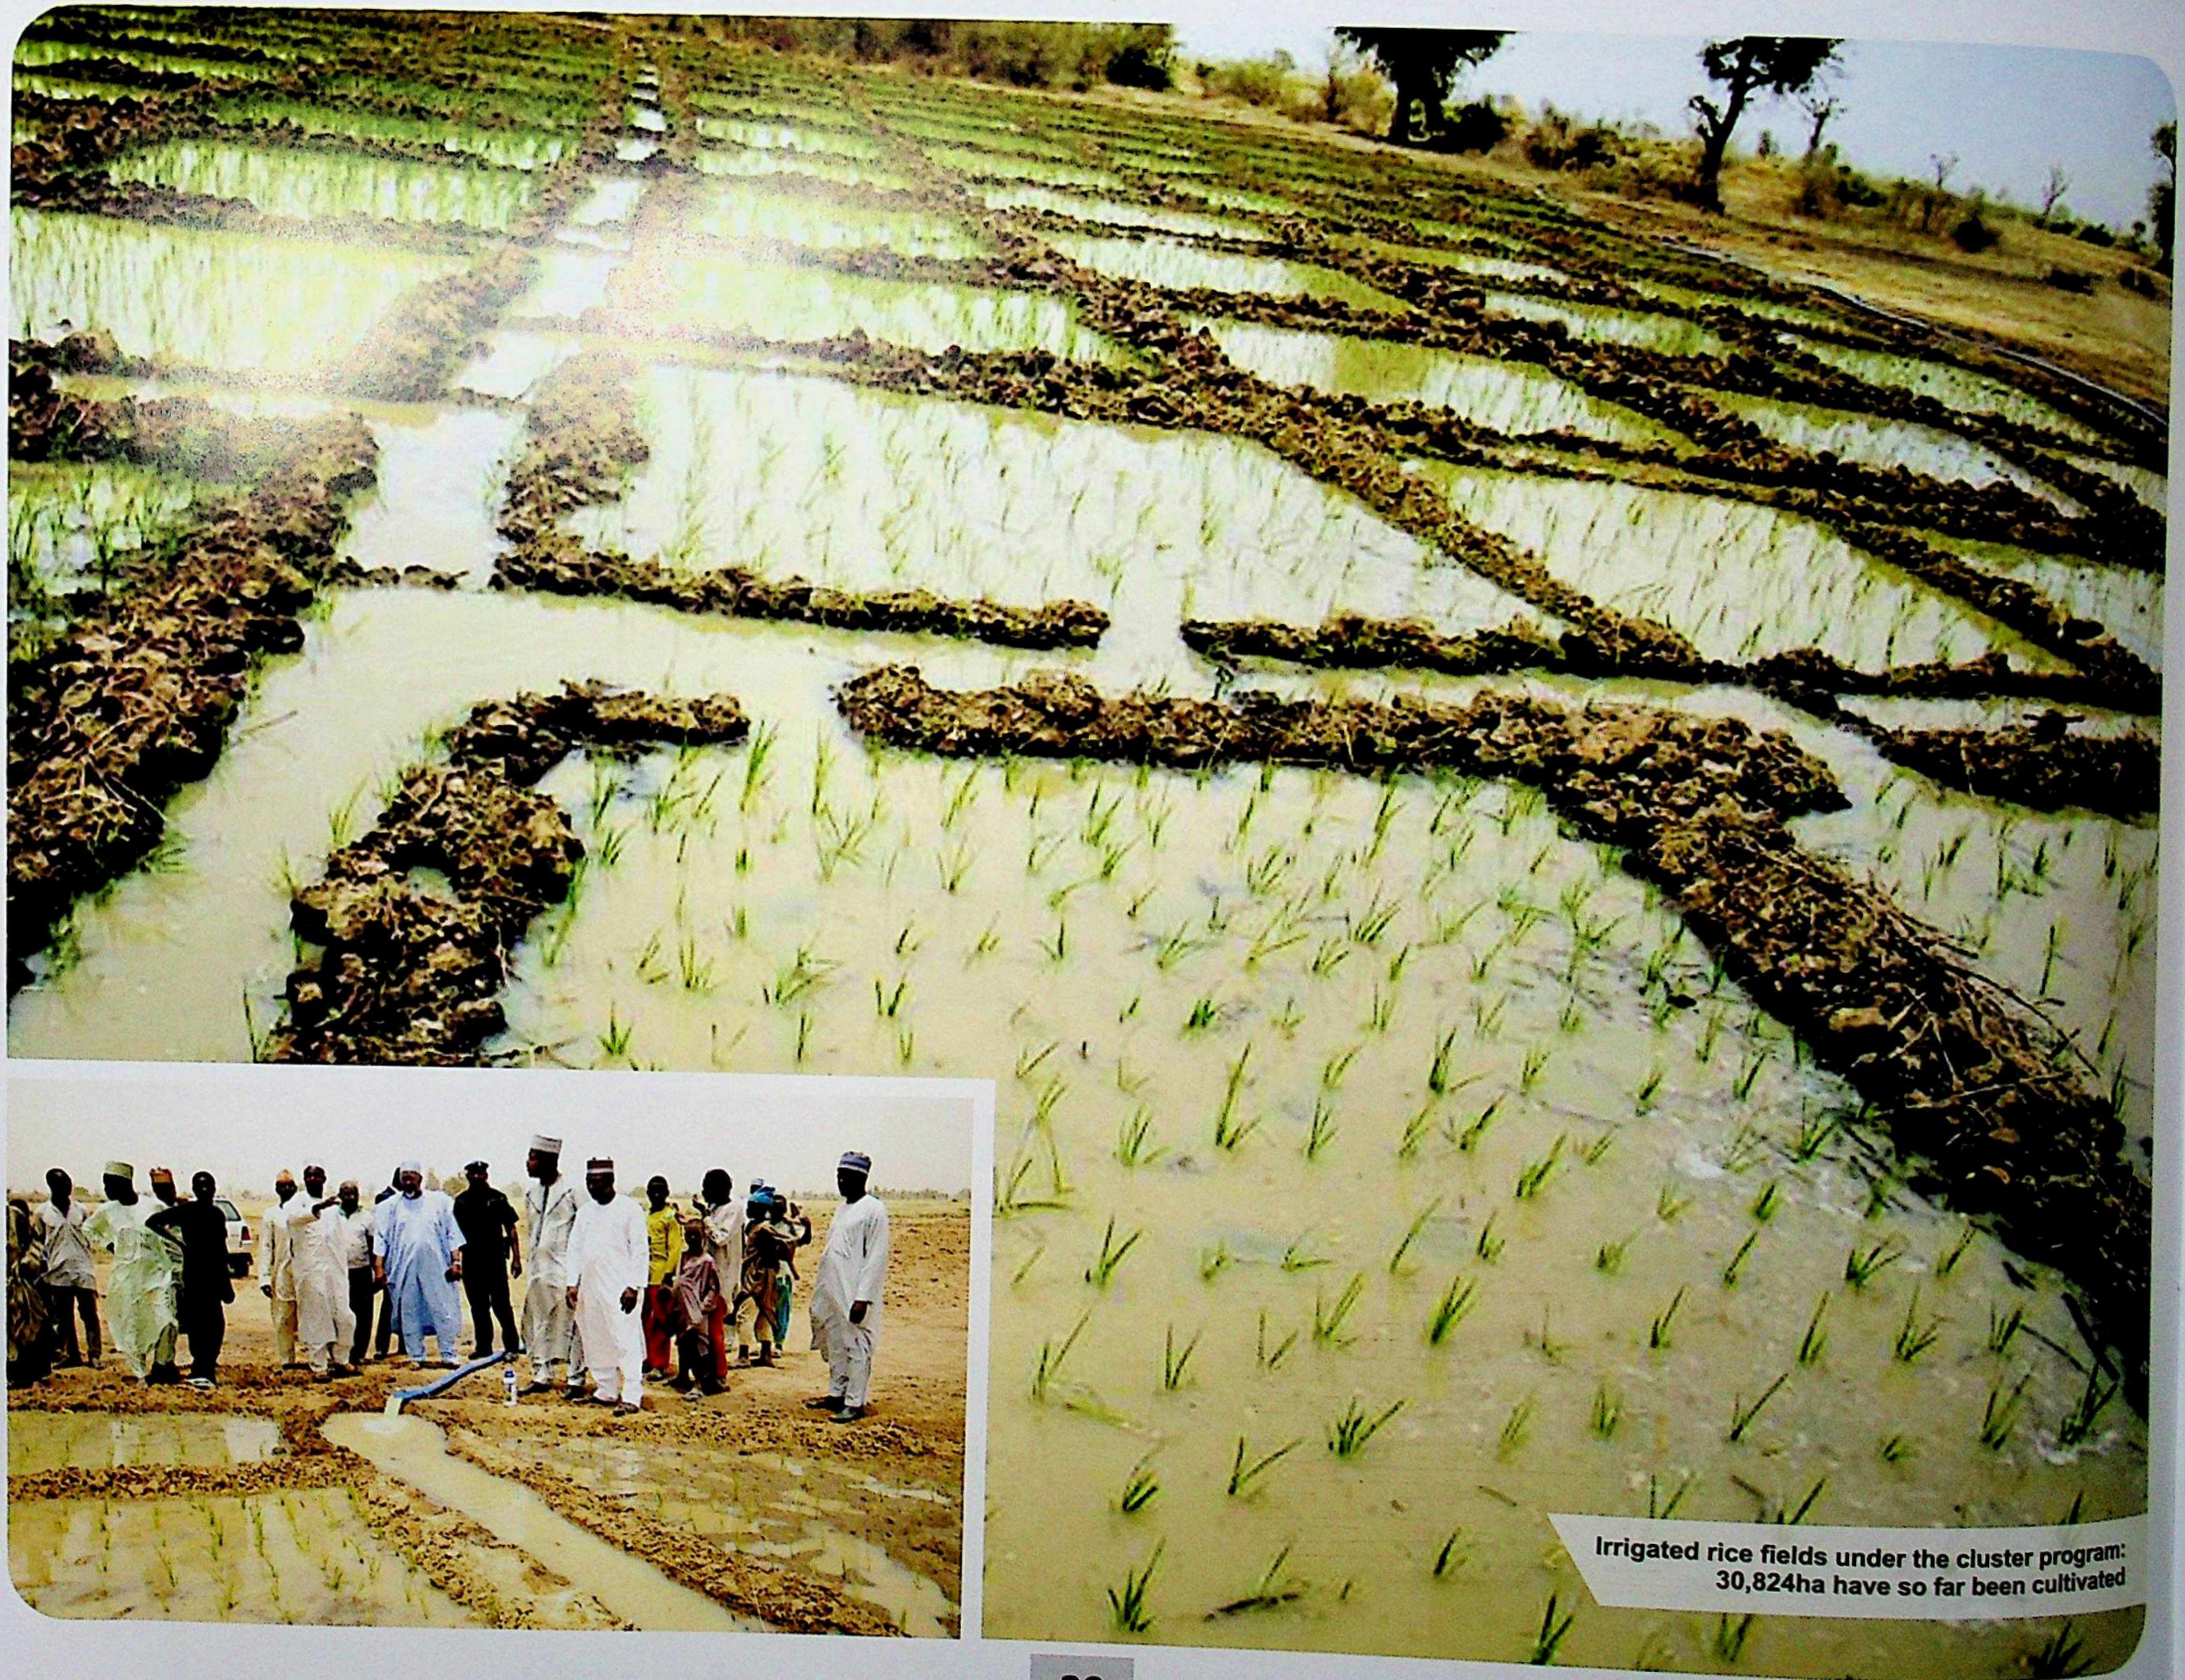

1,306
Clusters

64,184
Farmers

59,258
Hectares

Irrigated rice fields under the cluster program:
30,824ha have so far been cultivated

**A wheat farm in one of the clusters:
8,024ha have been cultivated so far**

5,184 ha cultivated under the groundnut scheme

Solar irrigation system introduced to increase competitiveness

Government was able to achieve unprecedented, across-the-board productivity improvement at par with global averages. In the last 3 years, 1 306 farm clusters have been established and fully supported by the Government under the model, ensuring that the principles of business competitiveness and economy of scale are deployed even for small-scale farmers. This has made it possible to achieve significant positive rate of return on agricultural investments through timely access to high quality inputs such as seeds, fertilizer, pesticides and equipment, at much lower cost.

Results so far indicate that there has been a significant improvement in the yield of crops currently being supported under the cluster program. For instance, the average yield of rice has increased from 2.4 ton per hectare to about 5.1 tons for rice with some cluster recording yields as high as 8.0 tons. The same can be said of sesame, groundnut and wheat whose yield have increased to 0.5 tons per hectare for sesame; and 0.9 ton per hectare for groundnuts were achieved.

S/N	CROP	Average Yield – Farmer Practice (T/Ha)	Average Yield – Trained Cluster Farmer (T/Ha)*	Percentage increase
1	Rice	2.4	5.10	113
2	G/nut	0.4	0.85	113
3	Sesame	0.2	0.46	130

NOTE: * - Maximum yields recorded for rice, groundnuts and sesame were 8.1 MT/Ha, 1.4 MT/Ha and 1.04 Mt/Ha respectively

Extension service is considered germane to the success of any agricultural intervention. In view of this, this administration began the identification, adaptation and dissemination of technologies on crops, livestock, fisheries and agro processing with desired results being witnessed in terms of yield and productivity. The provision of 450 motorcycles and capacity building exercise for Extension workers across the State ensured that investments in agricultural research achieve the desired impacts even in hard to reach areas of the State.

Vehicles, motorcycles are distributed to extension agents and lead farmers to reward productivity and recovery performance

His Excellency, Governor Muhammad Badaru Flagging off the distribution of 450 motorcycles to agric-extension service workers

Under the cluster initiative, Inputs are costed, provided on credit and deducted at harvest in cash or kind. Everything is performance driven and clusters are assigned to off takers on an out grower basis with a guaranteed off take price.

Big Ticket names like Dangote Rice, Umza Rice mills and WACOT have all been integrated into the cluster scheme and have taken the model to develop and expand their own cluster out-growers modeled on the government example.

Inputs are sourced direct from manufacturers to guarantee quality and price fairness. The no subsidy culture was adopted for fertilizer and focused on delivery direct to registered farmers and cluster groups even before the presidential initiative on fertilizer took effect.

The Governor Badaru led Presidential Fertilizer Initiative committee presenting a souvenir to president Muhammad Buhari

Value Addition

Apart from rice and sugar mills at various stages of completion Government has also encouraged value addition to export crops like sesame and hibiscus by encouraging exporters to engage cluster groups for farm gate purchase which affords a better price for the farmer. These crops are then warehoused in a government provided facility for cleaning,

sorting and bagging for export.

This arrangement has resulted in WACOT Ltd expanding its out grower arrangement from 200 hectares in 2015 to 8,000 hectares for the 2017 season with 13,000 hectares on standby to be integrated into a total of 20,000 HA of sesame for 2018 and has encouraged

new entrants like Axxon Link Limited to set up a sesame cleaning facility in Andaza Dutse .

TOONS limited is entering into the same arrangement for Hibiscus processing to assure quality assurance following the near ban on Nigerian Hibiscus by Mexico which is our largest market.

Sesame seeds been processed for export at the WACOT facility located in Maigatari EPZ

The agricultural sector being the economic backbone of Jigawa State has enjoyed tremendous support from the present administration. Budgetary allocation, for example increased from a paltry 2.9 billion in 2015 to N9.0bn in 2018 (A significant 210% increase).

In consolidating the gains recorded so far in

the agricultural sector, Government is strengthening the existing institutions for efficient service delivery and sustainability of current programme. For instance, the recapitalization of the State Inputs Supply Company, JASCO has brought more liquidity into the company thereby, guaranteeing the availability of input and farm machinery to farmers across the

State. Also worthy of mention is the repositioning of Jigawa Research Institute and the establishment of the State technical committee on Agriculture. The Committee, which is headed by His Excellency the Governor meets on a weekly basis to evaluate and improve on the implementation of agricultural interventions State wide.

4. National Poverty Incidence, NBS 2015

One of the focal points of the Governor Badaru led administration in Jigawa State is to tactically reduce poverty, create wealth and promote the wellbeing and prosperity of the populace. In achieving this, a strategic approach aimed at job creation in the areas of private sector investment generation, improvement of agriculture practices among the peasant farmers, development of human capital and increment in economic activities in the rural areas is being adopted and pursued vigorously by the Government.

The alarming rate of unemployment and extreme poverty (see factsheet above) in

the State which has been further worsened by the dwindling economic fortunes of the country needs to receive attention in the short and medium term to forestall a collapse of the social and economic order of the State, which could pose serious security challenges for the Nation in the near future. This reality led to the massive roll out of empowerment programmes targeted at the women, the youth and the vulnerable.

To ensure that the interventions are tailored to the needs of the people, the Government constituted a committee on empowerment with a clear mandate to

embark on community consultations on their needs and priority trades and come up with various economic empowerment programs that are demand driven and efficient.

From 2015 till date, 134,344 people have benefited from the various empowerment programs by the State. These programs cut across agriculture, artisanship, commerce, transportation e.t.c Some of the programs are highlighted in the subsequent pages

AGRICULTURE VALUE CHAIN EMPOWERMENT SCHEME

To complement the cluster initiative, small scale mechanization was introduced to the farming process to improve efficiency and reduce drudgery in the clusters. Unemployed youths were trained in mini harvester and thresher operations and pesticide applications. Hand held harvesters, mini threshers and sprayers and pesticide were supplied to them on an empowerment loan basis and they are assigned to clusters to provide these services as and when due. This has improved

efficiency in harvesting and reduced post harvest loss from manual threshing by over 35%.

It has also created thousands of jobs along the value chain for youth that are not themselves directly engaged in the cluster farming in one of the government provided Youth in Agriculture schemes. Some months ago when Army worms infested about 11 States, we deployed over 600 pest control agents across the state and contained invasion within 3 days. Affected Farmers simply called

the nearest extension worker close the location and a pest controller will be directed to collect the appropriate pesticide from a JASCO store and deploy accordingly. We have bought and distributed thousands of small implements to youths and cooperatives who are dubbed VCAs (Value Chain Agents) as well as mini rice mills to service local small scale consumption, while women are trained in small scale parboiling to complement production.

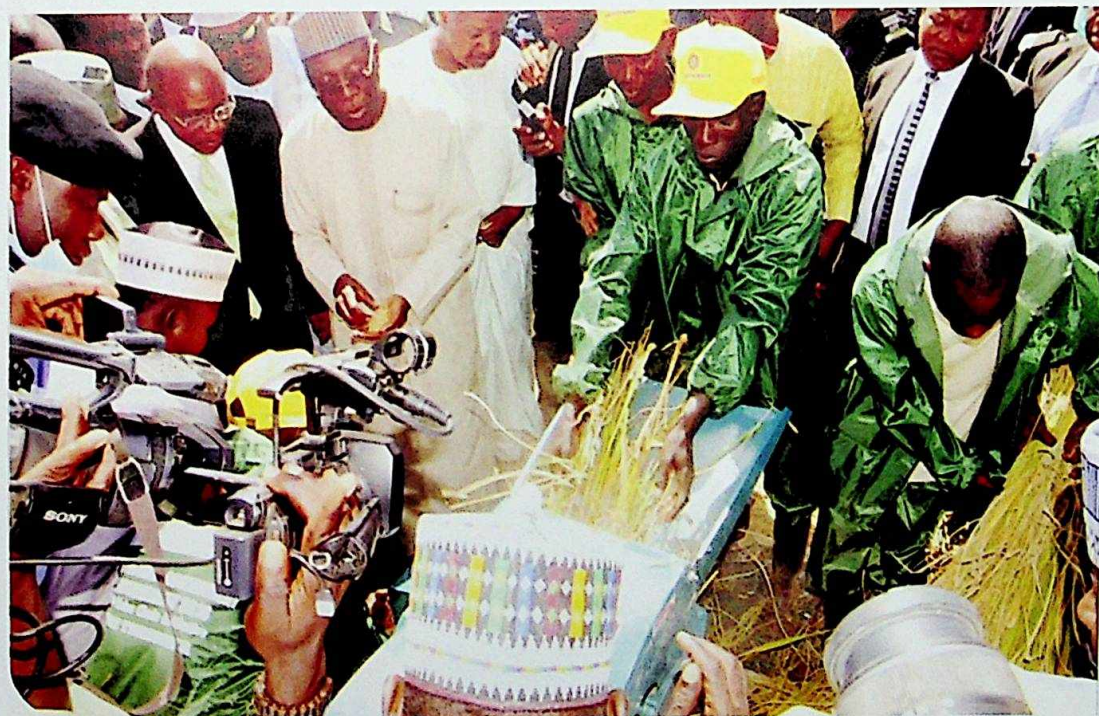

4,844
Beneficiaries

- 400 planters
- 1,140 Harvesters

Goat Breeding Micro-Credit Scheme

Livestock production in the form of a women specific goat breeding program was undertaken in early 2016 on the basis of a huge export opportunity for goat meat into the Middle east through an entity in Kuwait. The minimum demand could not be met and a long term initiative was started with 20 women per ward selected across 287 wards and given 3 live goats on loan to be retrieved after 18 months. This is essentially a micro-credit scheme with the goat representing the currency.

His Excellency, the Deputy Governor, handing over goats to a beneficiary

His Excellency, Governor Muhammad Badaru, assisted by APC women leader distributing goats to a beneficiary

A total of 17,220 goats were distributed and collection commenced on schedule with a retention rate of 91% and repayment of 82%. Earlier in the year, re-distribution commenced in 12 Local Government Areas.

This scheme is set to receive a huge boost under the CBN-AADS where we are targeting 40 women per ward or 11,480 beneficiaries receiving 34,440 goats.

It is expected that the livestock pattern of the State will be transformed if the reproduction momentum is maintained providing the backdrop for a robust livestock export initiative. The exporters are impressed with the progress so far and are in the process of setting up a Halal slaughter facility and cold room.

Other market driven empowerment initiatives

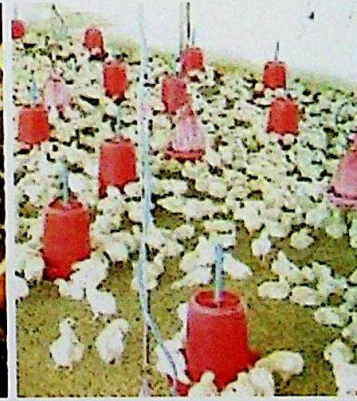

This administration also embarked on the empowerment of youth and women in various aspect of trade through the disbursement of working capital, equipment and other business input. These include tailoring, welding, potent medicine sales, poultry, aquaculture, apiculture, scrap dealing, groundnut oil milling, tomato preservation, e.t.c.

Some of the buses distributed to members of the NURTW

One of the patent medicine stores opened for the 287 beneficiaries of the Lafiya Jari program

ONE HUNDRED AND THIRTY FOUR THOUSAND, THREE HUNDRED AND FORTY FOUR PEOPLE SO FAR EMPOWERED

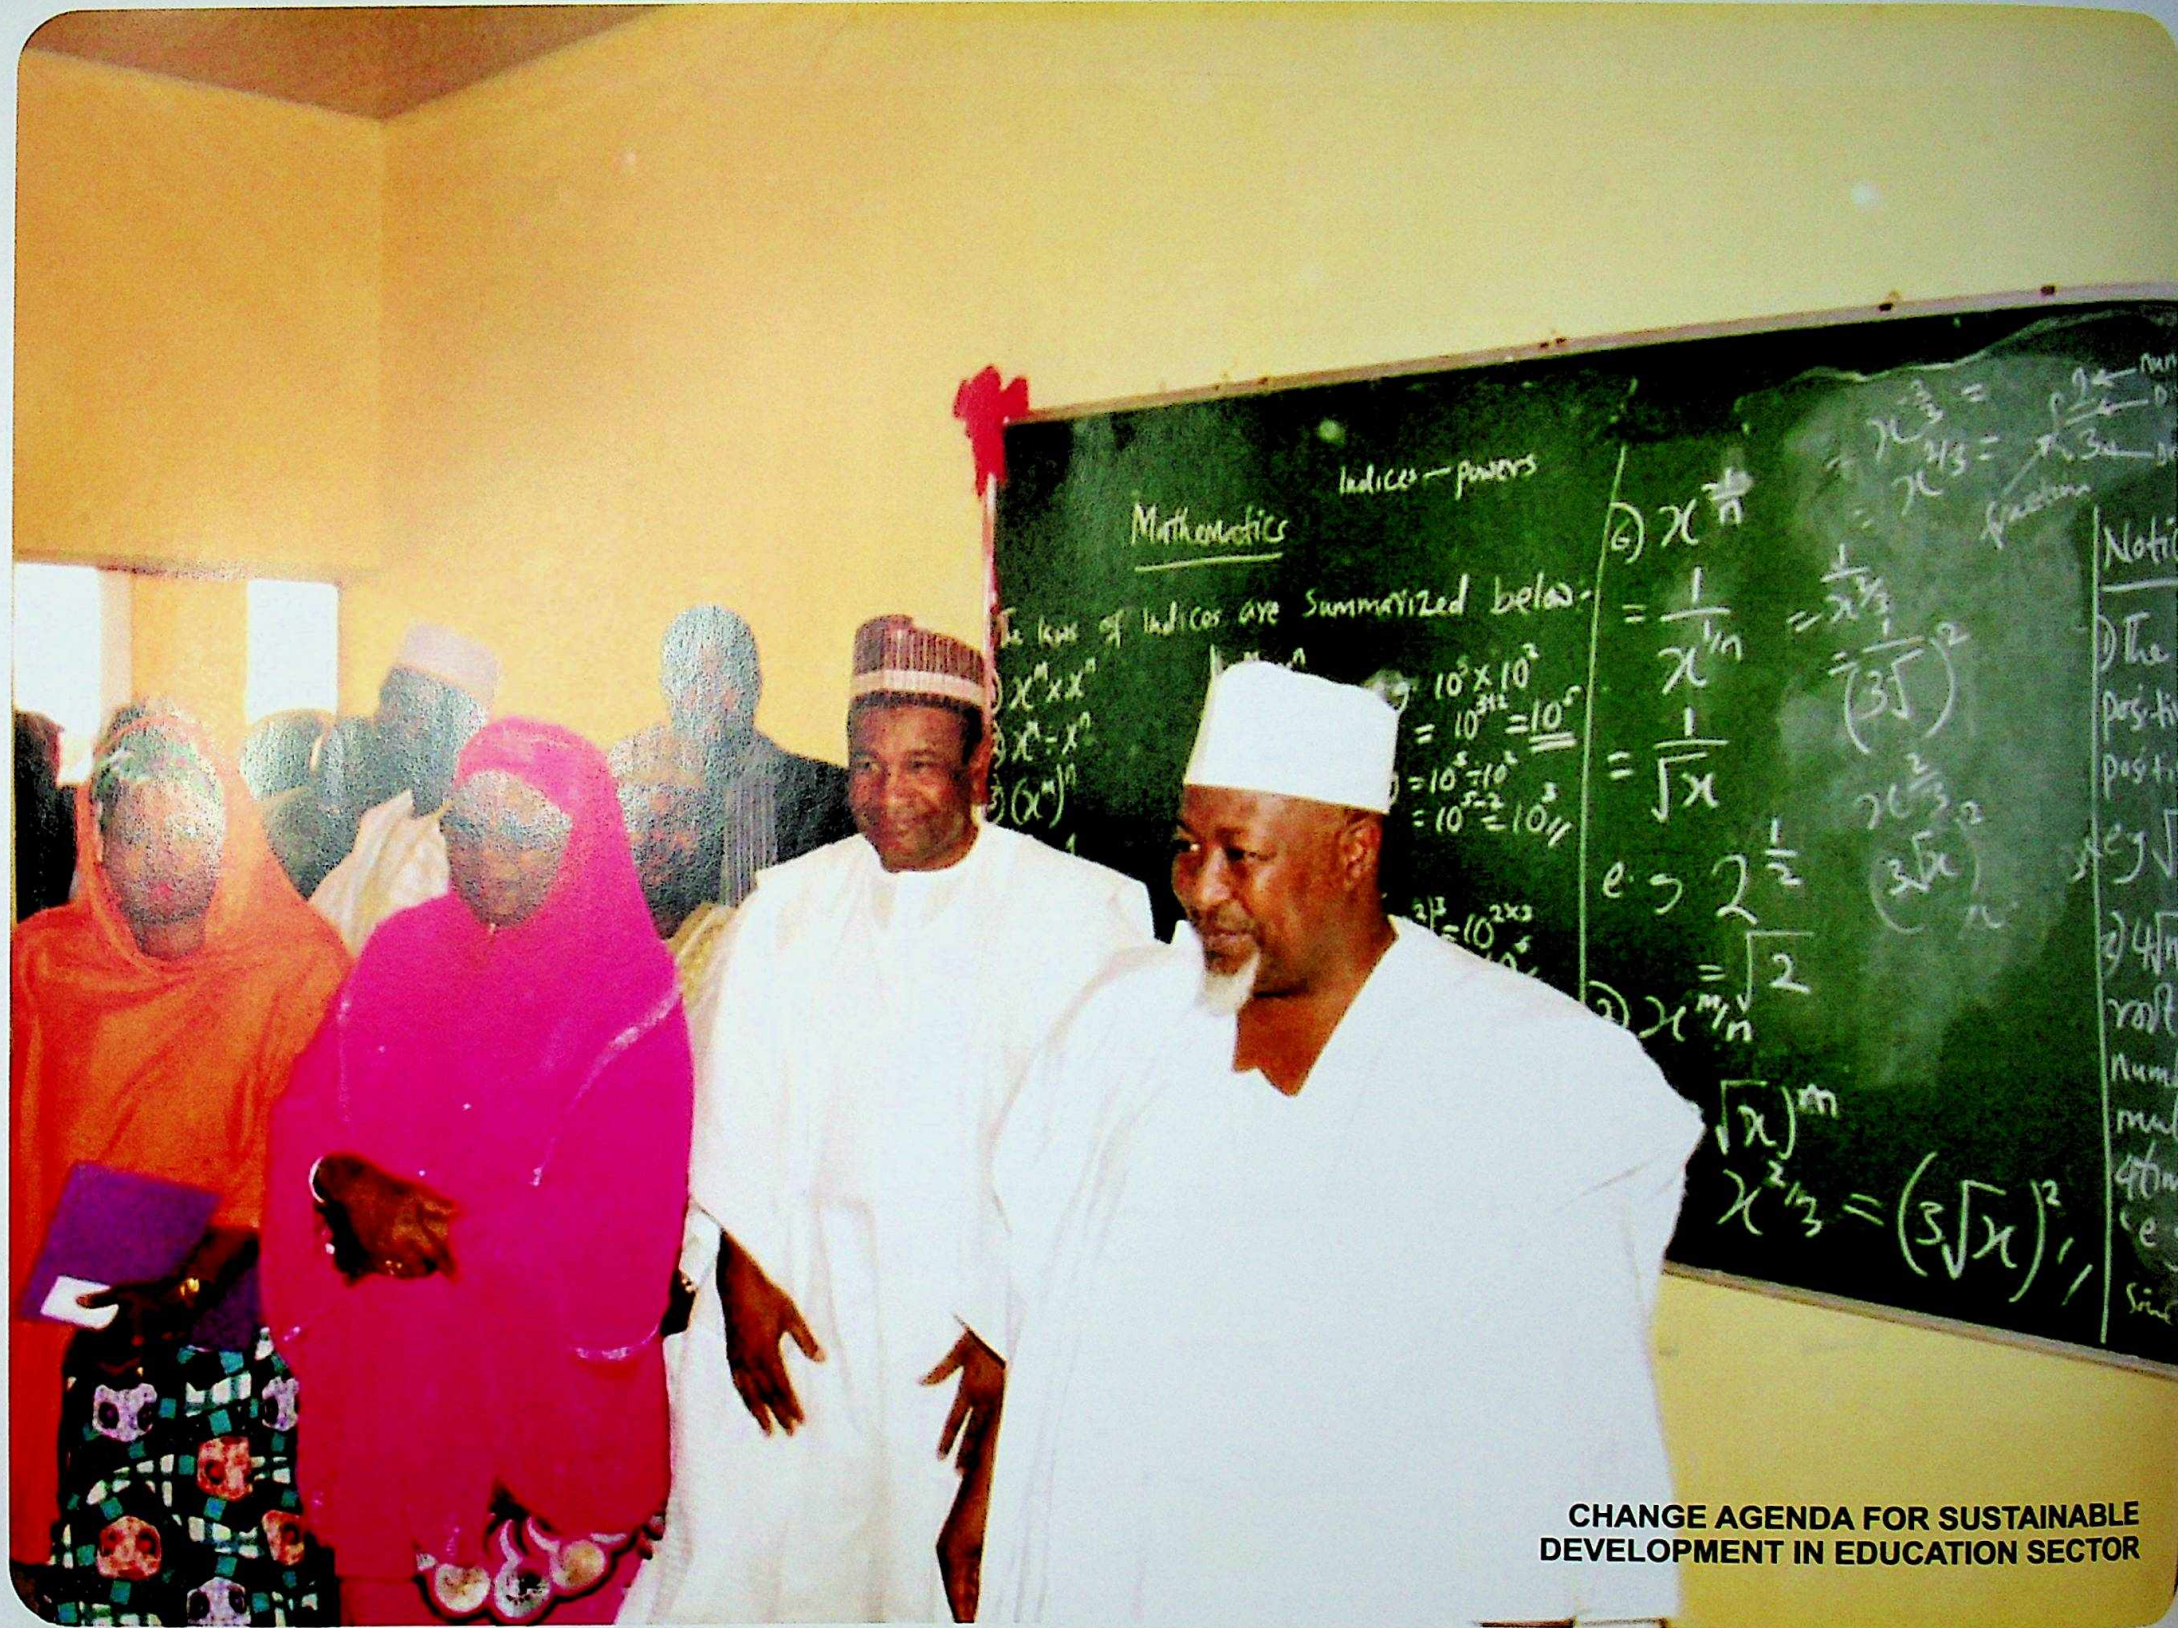

EDUCATION

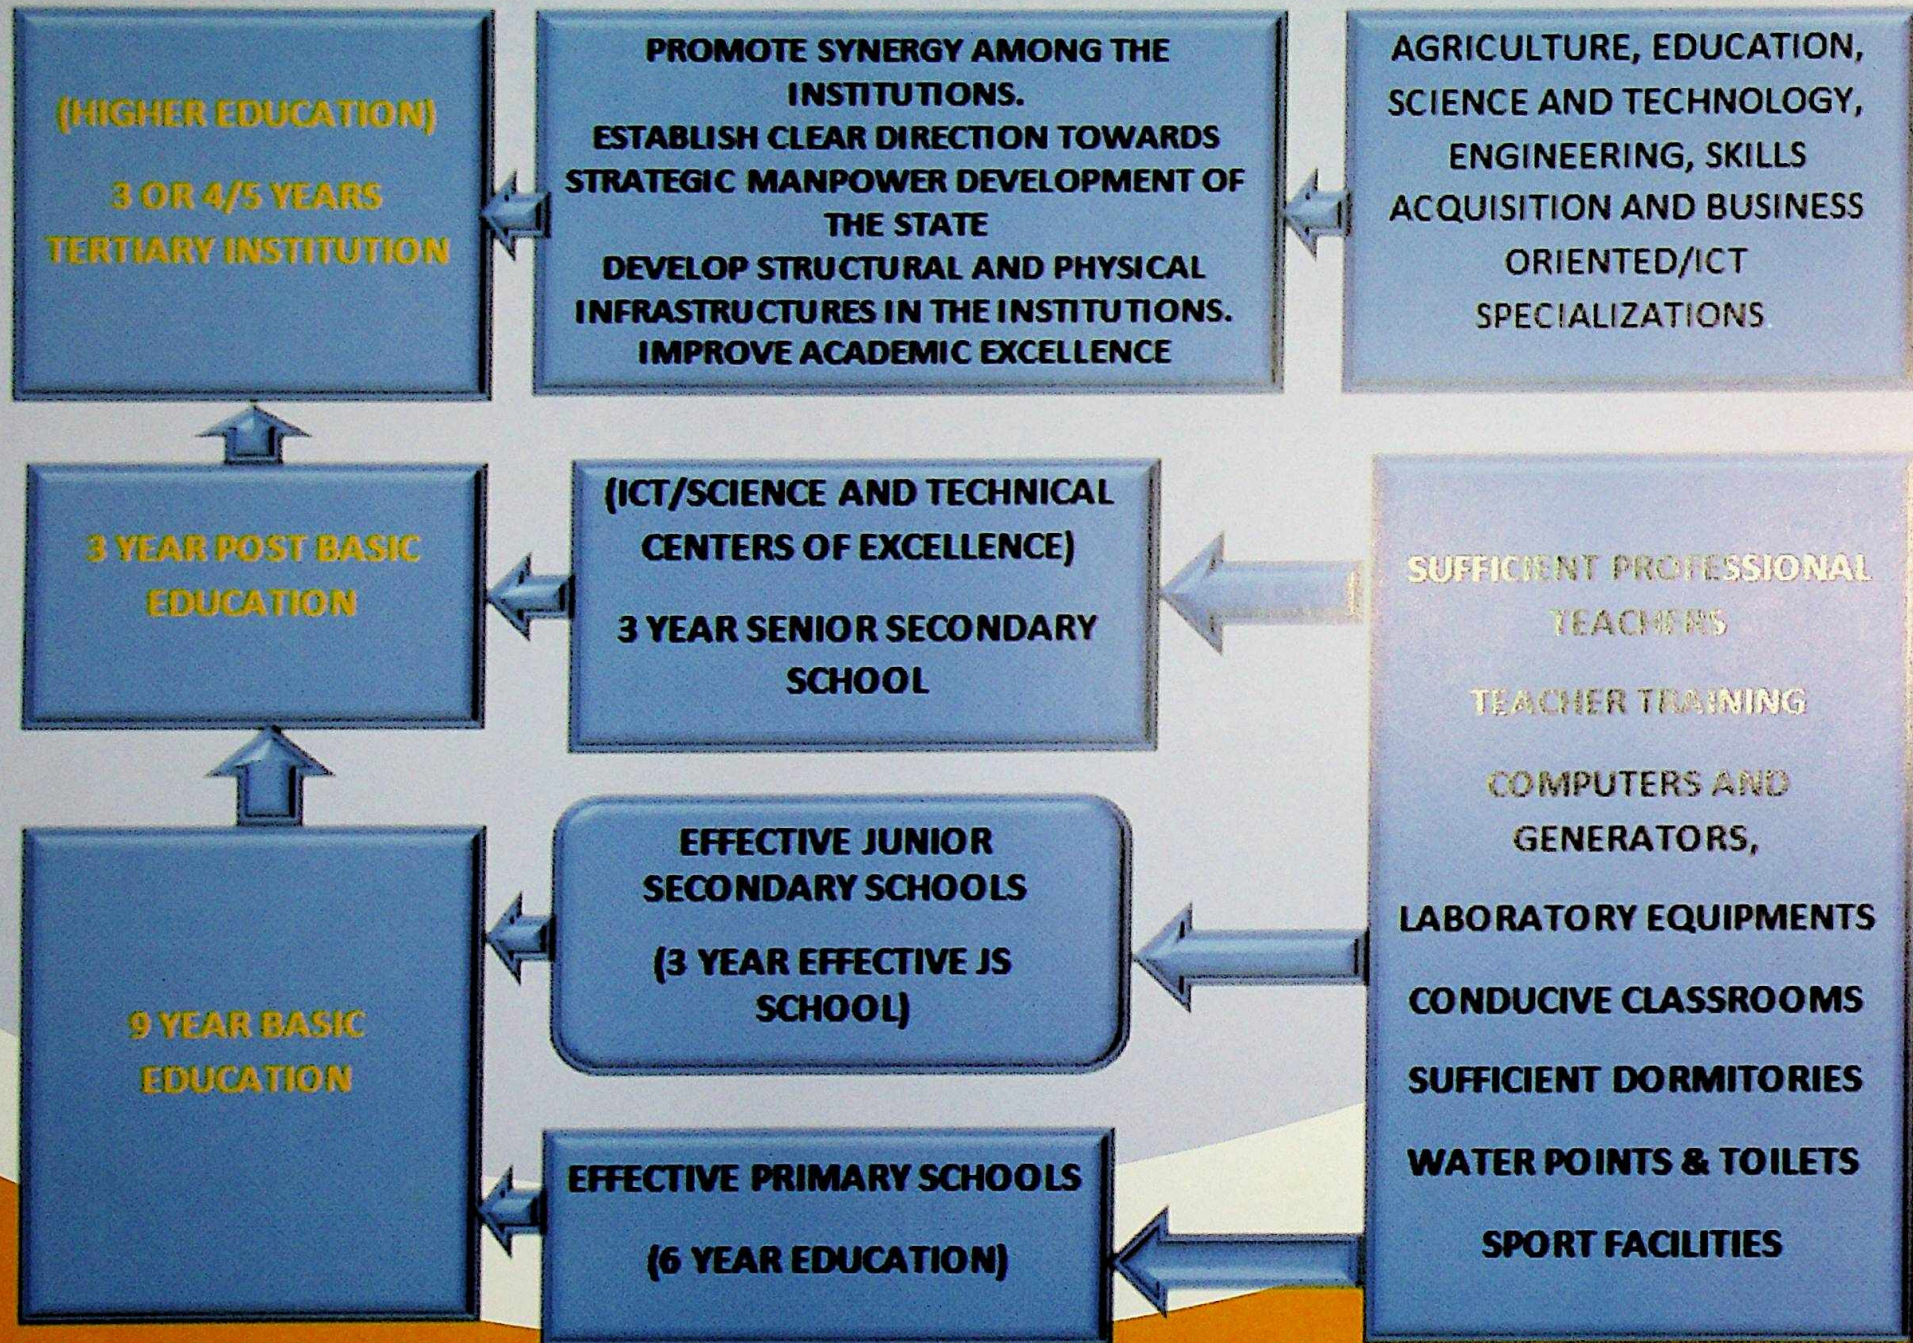

At inception in 2015, the education sector was in a state of near collapse. The sector faced challenges ranging from infrastructural deficit, low enrolment figures, poor quality teachers, poor learning outcomes, high number of out of school children and paucity of instructional materials compounded by absence of policy support and resources.

This administration immediately embarked on a State -Wide consultation with stakeholders in the sector. The painstaking exercise led to the formulation of the **Education Change Agenda**.

CHANGE AGENDA FOR SUSTAINABLE
DEVELOPMENT IN EDUCATION SECTOR

The Change Agenda

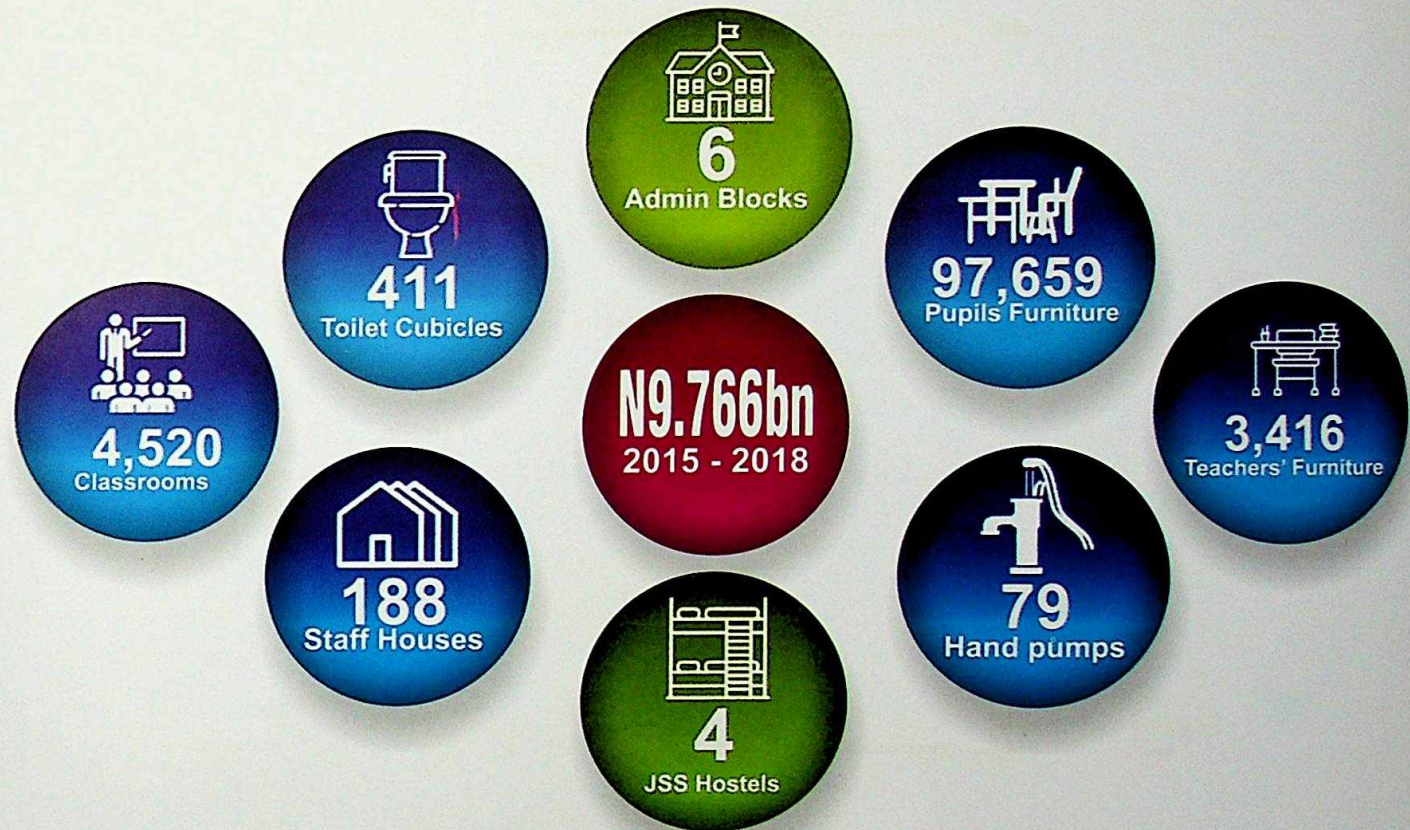

Basic Education

“ Before we took over, counterpart funding for SUBEB and UBE were unpaid for 2 years, which meant the last time primary school structures received any decent attention was in early 2013. ”

Governor Muhammad Badaru Abubakar
First year anniversary speech, May 29, 2016

From May 2015 to date, Government has spent the sum of (N9.766bn) in the construction /renovation of 4,520 classrooms, 411 toilets cubicles, 6 Admin Blocks, supply of 97,659 sets of pupils/students furniture and 3,416 sets for teachers, 79 hand pumps, 188 staff houses and 4 hostels buildings (completed and on-going)

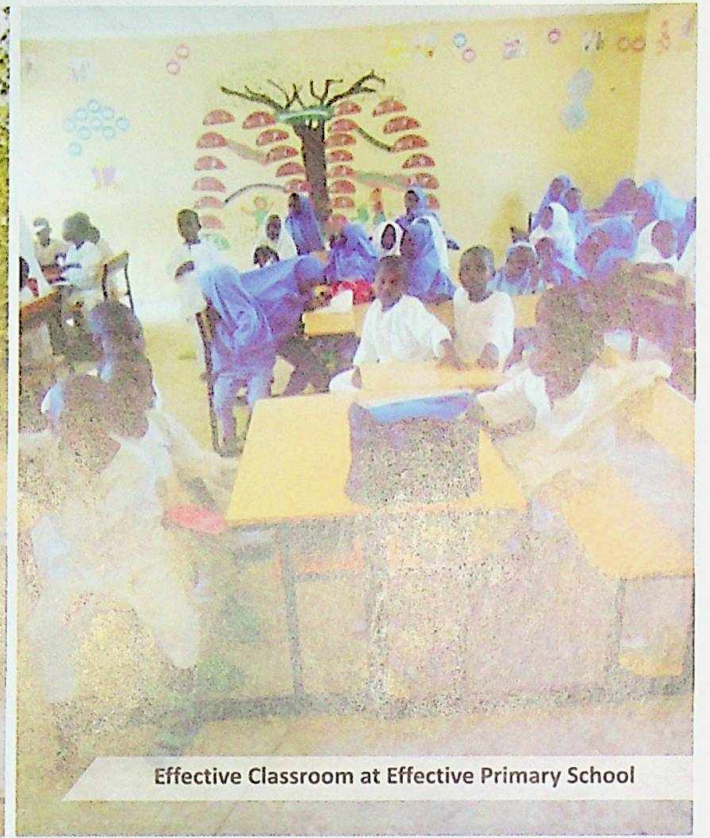

Capital investment in Basic Education over the last 3 years

CHANGE AGENDA FOR SUSTAINABLE DEVELOPMENT IN EDUCATION SECTOR

Islamiyya, Qur'anic and Tsangaya Education (IQTE)

SITUATION

Over 700,000 estimated number of Out of School children roaming around Jigawa State according to ESSPIN Survey (2014).

The cost of sustaining current models of Tsangaya schools is very high. The Almajiri migration from Jigawa to other areas and vice versa is high.

Absence of teaching and learning as pupils pass out without learning the basics such as reading and writing even in the mother tongue. There is also absence of awareness and commitment of the communities

SCHOOL ATTENDANCE AND NON ATTENDANCE IN JIGAWA STATE 2014 - 3-18 YEAR OLDS

Status	Number			Percent		
	Boys	Girls	Total	Boys	Girls	Total
Attend any form of education	710,558	667,708	1,378,266	51.6%	48.4%	100%
Attend only Islamiyya/ Qur'anic school	39,718	55,750	95,468	41.6%	58.4%	100%
Dropped out	50,014	37,534	87,548	57.1%	42.9%	100%
Never attended	370,666	362,716	733,382	50.5%	49.5%	100%
Overall out of School	420,680	400,250	820,930	51.2%	48.8%	100%

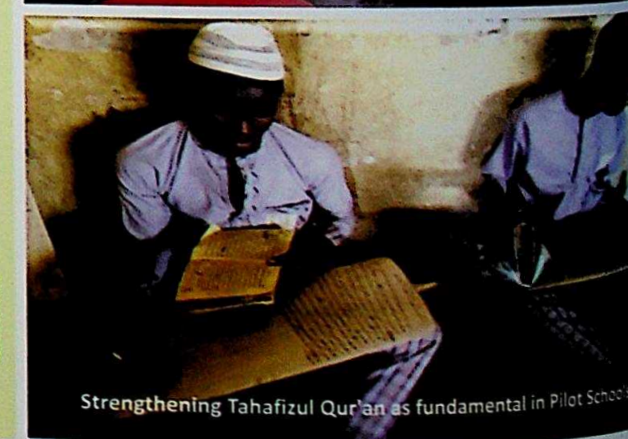

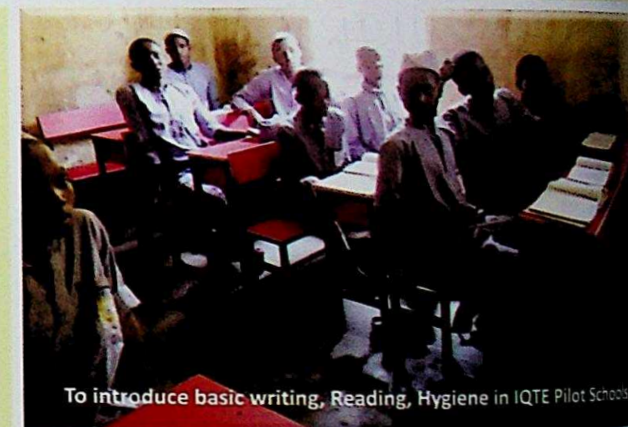

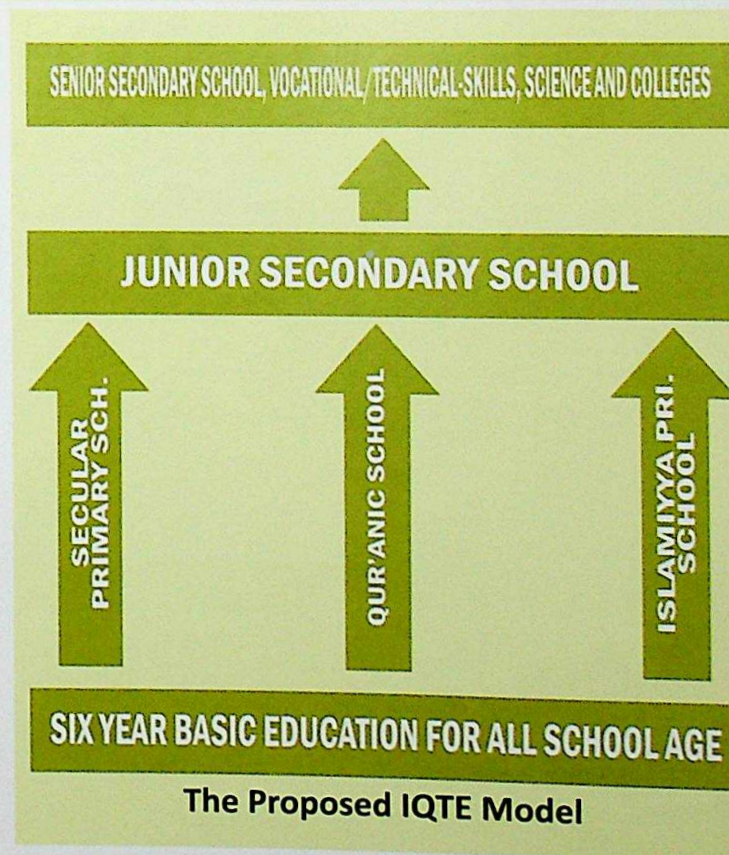

SOURCE: TDP/ESSPIN SURVEY- 2014

STRATEGY

A strategy to increase enrolment of out of school (OOS) children by 10% in 3 years of pilot phase through 6 year primary education which provide basic reading and writing in MT, hygiene and mathematics to serve as avenue of transition and integration to upper basic of 3 years in JSS (secular education schools) with the aim of creating equal opportunities for all

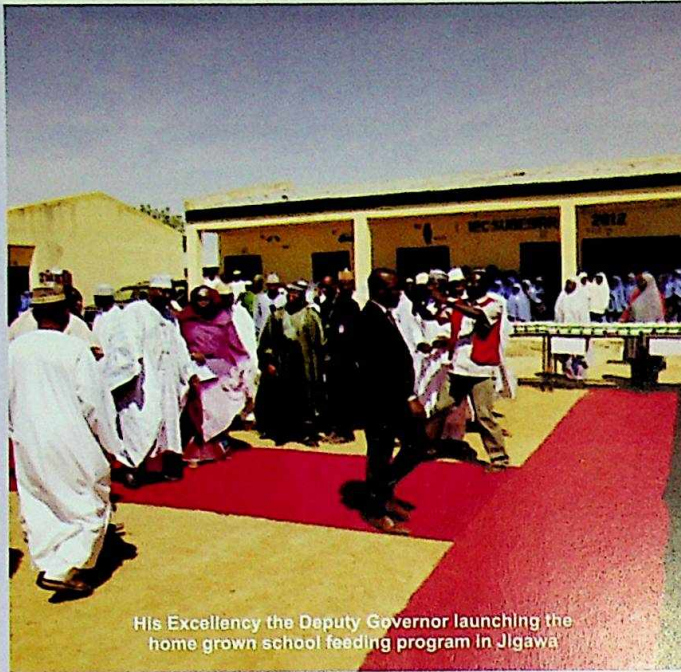

SPECIFIC ACTIONS

- Select 9 communities with high OOS to pilot the program
- Identify, select and train facilitators/research teams Develop survey instruments
- Conduct surveys and FGDs to validate assumptions and create demand and community ownership
- Harmonize the curriculum of ahafizulQurn models
- Field test the curriculum and produce final copies
- Provide teachers of languages (Hausa/Arabic), arithmetic, basic hygiene and crafts subjects
- Regulate and supervise the progress of the learners through termly and annual assessments
- Scale up in year three
- Integrate in JSS 1 with the pupils from secular schools after year 6 to create equal opportunities

HOME GROWN FEEDING PROGRAM

- The School Feeding Started with the followings:
- 427,000 primary 1-3 pupils
- 319,000 primary 4-6 pupils
- As at 2018 March ending the School Feeding Program has raised attendance and reduce the OOS and widened access which is more than 1 Million pupils.
- From 2015 to 2018 there is an increase of access and attendance by 35%

His Excellency the Deputy Governor launching the home grown school feeding program in Jigawa

AGENCY FOR NOMADIC EDUCATION (ANE) Inclusive Education

Between 2015 and now, resources have been allocated and disbursed for the improvement of Nomadic Education in the State in line with Gov Badaru's commitment to increase the literacy rate

Distribution of uniforms to Nomadic Pupils across the State

Learning materials distributed to nomadic pupils under ANE

POST BASIC EDUCATION SUB SECTOR

LEARNING CONDITION IN SECONDARY SCHOOLS

INTRODUCTION: Congestion in schools, classes, dormitories became major challenge in providing atmosphere conducive for learning. Classroom congestion, ranged from 70-120 students per class in Primary/ Junior schools and 65-120 in Senior schools while the hostel range from 140-210 per hostel/dormitory. In some cases a hostel of 200 capacity occupied by 300-400 students.

- **GSS Aujara** – 1no Hostel Block, Renovation 4nos Labs and renovation of admin block
- In addition (STEB) awarded contracts for the construction of 1no classroom block, 1no hostel block, a workshop and supply of students desks and double decker beds at GSTC Ringim at the total sum of over **N86m**
- **GGASS Danzomo** – Renovation of all hostels, all staff quarters and all classrooms
- **GGASS Babura** - Renovation of all hostels, staff quarters including principal's official residence and all classrooms
- **GGSS Kazaure** – Renovation of all hostels, staff quarters and construction of an additional hostel block
- **GSS Commercial Unity Dutse General** -Renovations at the cost of **N87,655.390.48**

SSCE RESULT PERFORMANCE IMPROVEMENT

TARGET ON PERFORMANCE IMPROVEMENT Short Term Strategies

Improvement targeting SS3 to raise WAEC scores from 4% to 30% through camping of final year students, teacher TOT and school level step-down training on external examination question and answer techniques.

Medium term strategy targeting 22,220 (2016), 16,301 (2017) 2018 (26,575) number of SS1, 2 and final year students across the state.

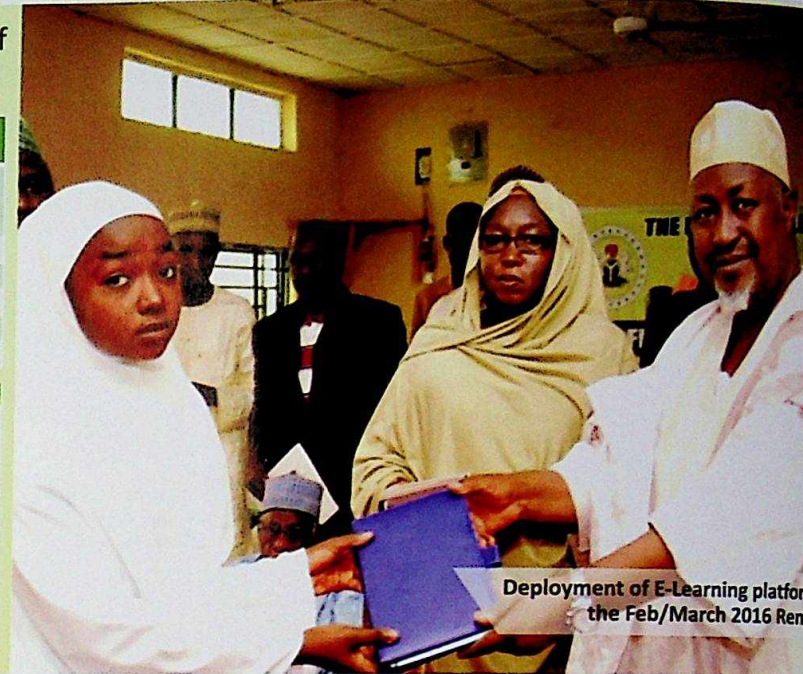

Long term (12 year) strategy

The long term strategy lies on providing quality education delivery at Effective Primary and

Junior Secondary Schools and Centers of Excellence.

TEACHER RECRUITMENT/ DEPLOYMENT STRATEGY

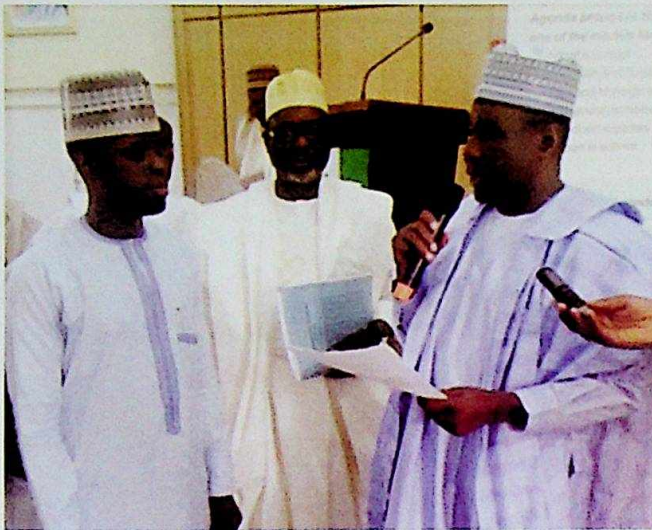

Ministry of Education Science and Technology

MoEST was cleared to recruit 500 teachers as phase I of the series of teacher recruitment approved by the State Government.

312 teachers already collected their appointment letters with the Ministry and have been posted to various schools.

More recruitment is already in progress where the 118 teachers are to be recruited in the phase II of the exercise.

This is the most unbiased, professionally and logically conducted recruitment in the history of the State. Transparent recruitment process developed and entrenched. It is also regarded as the largest number recruited since 2013.

Jigawa State Head of Service- presenting Letter of Appointment to one of the qualified Applicants

State Universal Basic Education Board SUBEB is cleared to recruit 1393, out of which 773 are waiting for interview

Plans are concluded for another round of aptitude test to recruit 620 teachers among the thousands of applicants.

The Board established a sound, unbiased and professional recruitment process based on merit.

In SUBEB the new teachers are to be posted to their respective Local Governments.

Teachers' houses are built in the disadvantaged areas (hard to reach) for smooth discharge of duties. In MoEST, new teachers are posted to newly establish 26 schools. Henceforth the Ministry and SUBEB make it a mandatory to cater for schools with insufficient teachers as a priority during postings

AGENCY FOR MASS EDUCATION

The Agency for Mass Literacy in Jigawa is targeting young adults (males and females), non-literates older people, second chance students, school dropouts and physically challenged for general literacy and numeracy for both basic and post basic as well as skills acquisition.

SUCCESS STORY IN MASS LITERACY DELIVERANCE

- Training of facilitators
- Establishment of new 30 remedial centers established in 27 local governments
- 135 basic literacy centers
- 81 new post basic literacy centers.
- 27 women skills acquisition centers
- 27 vigilant basic and post basic literacy centers
- 35,000 youth were trained second chance remediation on SSCE out of which all female candidates were registered by state government.
- Agency for Mass Literacy also – captured and is training 40,000 learners in basic education 50,000 in post literacy education across the state.
- Procurement of instructional materials for the establishment of 135 and 81 basic and post basic literacy centers.
- Payment of facilitators allowances for basic and post basic literacy programs.
- Payment of facilitators allowance for fifty four (54) centers of remedial and continuing education programs.

ICT/SCIENCE AND TECHNICAL CENTERS OF EXCELLENCE STRATEGY

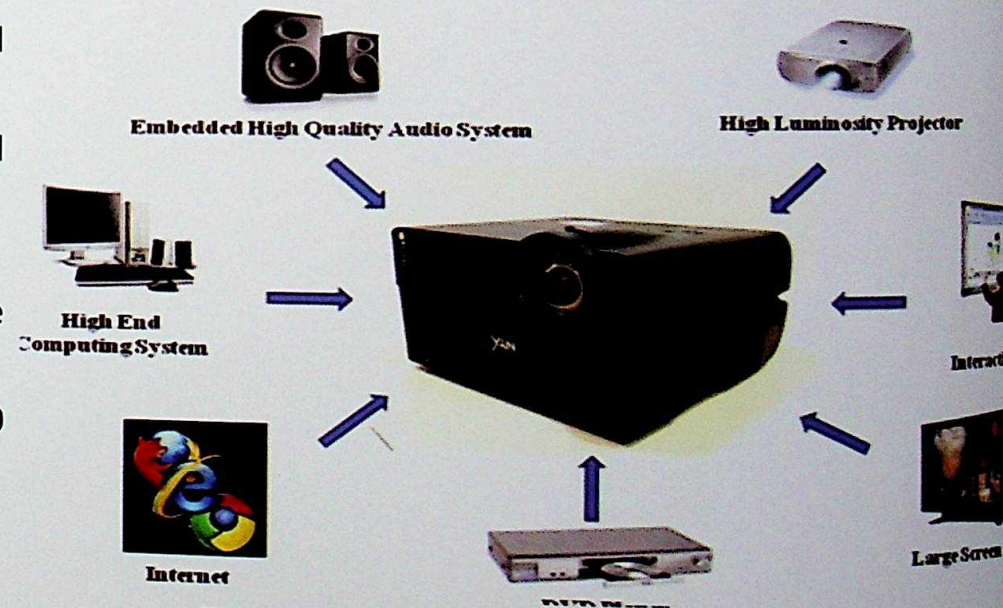

STRATEGY: aimed at strengthening science and technical education through long term goal of establishing special secondary schools all over the stated which will lay emphasis on ICT, Science and technology training. 27 schools are selected for the program. The schools are to be provided with computers, laboratory equipment, consumable laboratory materials, power generators and sufficient and qualified teachers of all subjects.

TARGET- To establish 27 centers of Excellence in 3 cores over three years.

ACCOMPLISHMENTS -8 schools are already established as centers of Excellence: 1- MIS Dutse, 2- GUSS Ringim, 3- GUSS Fantai-Hadejia, 4- GDSS Babura, 5- GDSS Bulangu, 6- GGUSS Gwaram, 7- GGUSS Kazaure, 8- SSS Lautai- Gumel.

- Procurement and Installation of ICT materials for 8 Science and Technical Centers of Excellence at the cost of **₦148,885,944.48**
- Procurement of laboratory equipment for 8 Science and Technical Centers of Excellence schools (biology, chemistry and physics) at the cost of **₦106,144,082.93**
- Renovations of 8 Science and Technical Centers of Excellence Laboratories at the cost of **₦41,352,400.79**
- Procurement of 185 KYAN MACHINES at the cost of **\$749,000** for ICT related usage

The KYAN e-learning machine for better learning outcomes

SUPPORT FOR GIRL CHILD EDUCATION

- GPE/NIPEP provides Female Teacher Training Scholarship (FTTS), 900 female teachers benefitting from the award.
- Free Girls Education up to tertiary level for the State Indigenes.
- Free Uniform to Girls at primary to secondary levels

FEMALE TEACHER DEVELOPMENT STRATEGY

Situation- At basic level in Jigawa state, there are 13,567 teachers. Out of the aforementioned numbers, only 1,611 are females which is a mere 12% in the basic education sub-sector. While on the other hand, post basic education sector has 2,199 teachers and only 185 teachers are females (indicating only 8%). The strategy is to promote the teaching career among girls by providing mentorship and adequate support for them. 4 schools selected for the program

GOAL: To Increase teacher quality, quantity and retention in the state

OBJECTIVES

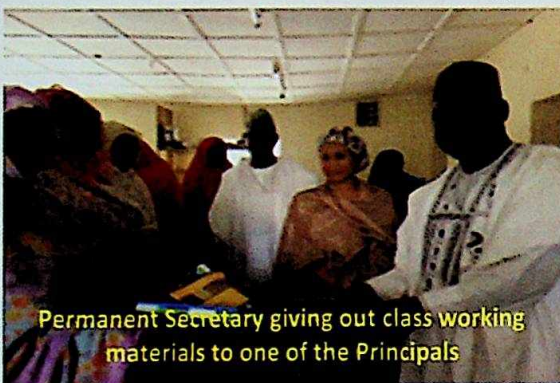

- To increase the number of female teachers
- To increase female teacher participation in to higher education

FTDs students received MoEST Girl Child Support

FTDs - Receiving Skill Acquisition materials from Hon. Commissioner

Permanent Secretary giving out class working materials to one of the Principals

ACHIEVEMENT SO FAR.....

250 female students are involved in the scheme from 2017

250 registered in 2018

Provide Writing and reading materials and kitchen utensils to 5 schools and skills acquisition instruments and materials.

SELECTED SCHOOLS

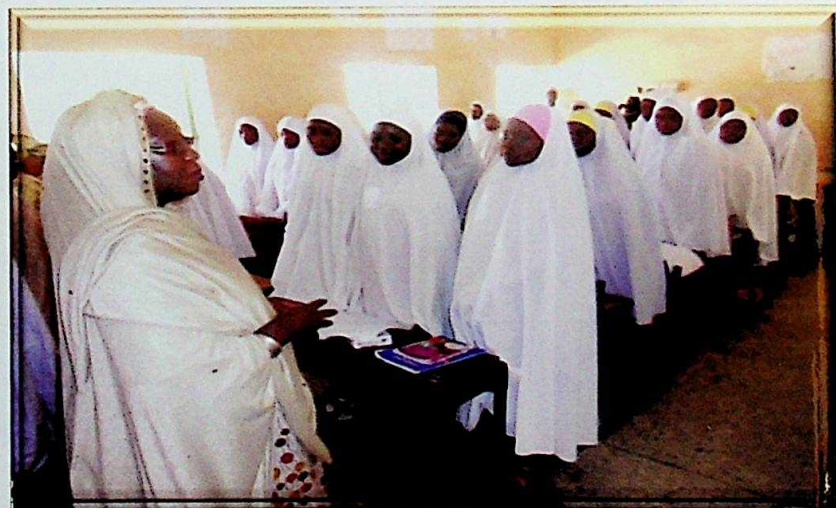

- Government Girls Secondary School Malam Madori
- Government Girls Secondary School Gwaram
- Government Girls Secondary School Sule Tankarkar
- Government Girls Secondary Science Schools Jahun

LONG TERM BENEFITS (8-Ps for Girls)

- Preparing girls psychologically to be good teachers
- Preparing girls to be role models in their immediate communities
- Preparing girls to be mothers of their children
- Preparing girls for skill acquisition like tailoring, baking, weaving and soap making
- Preparing girls to be equipped with basic pedagogical and professional teaching quality
- Preparing Girls for challenges in their pursuit of higher education
- Providing girls with support in SSS levels, pursuit of admission and employment
- Providing conducive atmosphere for female teacher quality, quantity and retention

Hon. Commissioner with Female Students at Kude Model

Hon. Commissioner addressing Boarding Female students

STRENGTHENING TERTIARY INSTITUTIONS/ ALIGNMENT WITH STATE MANPOWER STRATEGY POLICY AND INFRASTRUCTURE RENEWAL

Introduction: The policy is to establish synergy among the institutions and provide manpower needs for the state through Education, Science and Technology, Engineering related fields and ICT meet the 21st century development challenges within and outside the Country.

ENVIRONMENT

Understanding that no meaningful human capital development can be achieved without a clean and secure environment, the Governor Badaru led administration made it a priority to tackle some of the environmental challenges confronting the people of Jigawa State.

At inception of this administration, it was discovered that the State was faced with some of the most devastating environmental challenges such as desertification, typha and aquatic weeds invasion, massive flood and erosion as well as poor waste management.

Combating Desertification

In order to reduce the adverse effect of desert encroachment and its attendant consequences, the following measures taken by the present administration:

Raised and distributed **7.5 million** (2.5million per year) assorted/indigenous tree seedlings at 25 nurseries as shown below:

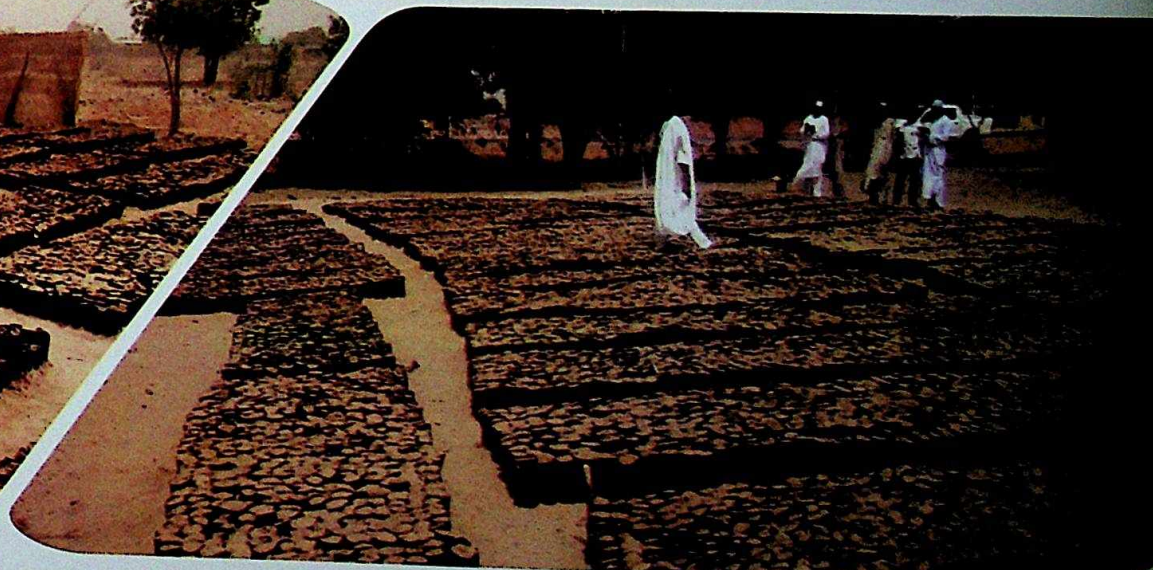

Birniwa seedlings nursery

Birnin Kudu seedlings nursery

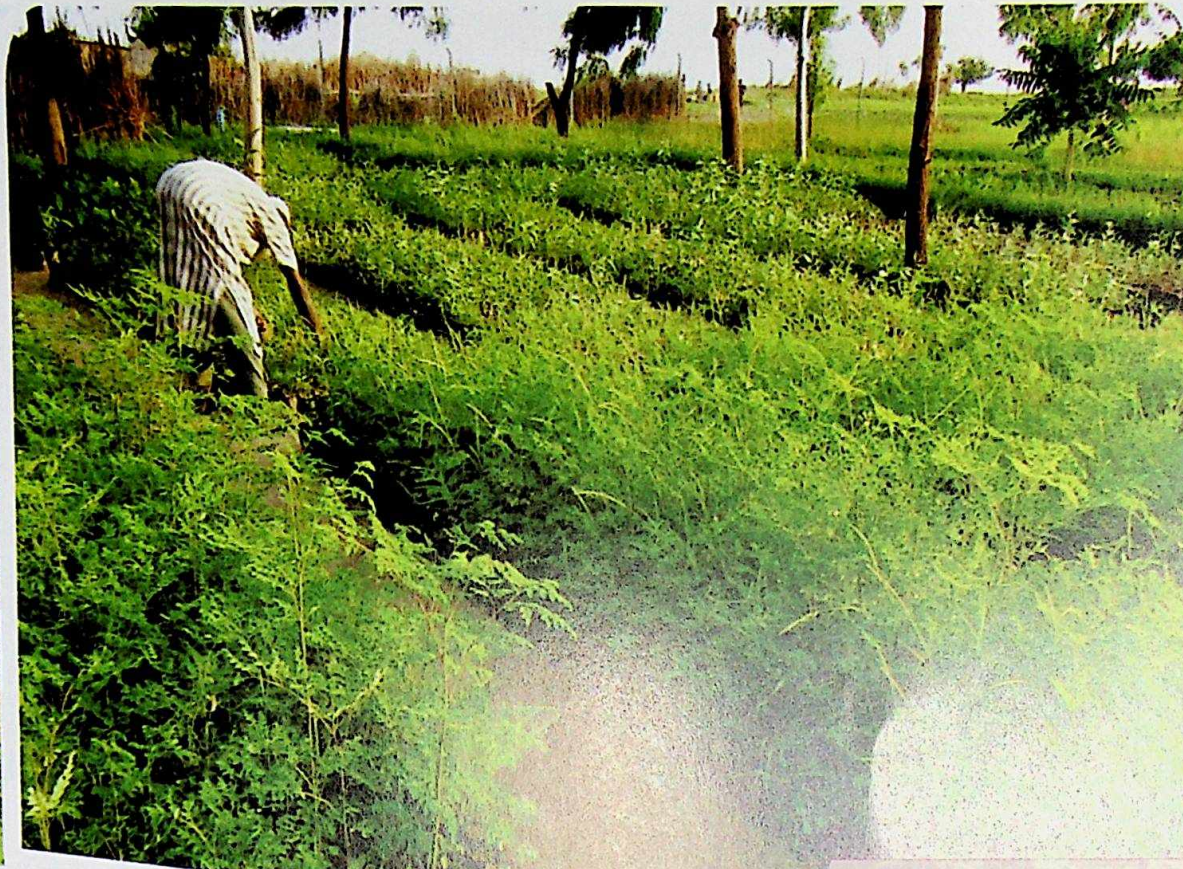

Kafin Hausa seedlings nursery

Kudai seedlings nursery

Gwaram seedlings nursery

Gemza seedlings nursery

Andaza seedlings nursery

At the World Desertification Day celebrations which was hosted in the State in 2016, His Excellency directed that 11 trees should be planted during any public occasion in the State. That has since become a tradition .

Former Minister of the Environment, Hajiya Amina J. Muhammad planting a tree during the 2016 world desertification day.

His Excellency, Governor Muhammad Badaru planting a tree during the 2016 world desertification day event

Alh Isa Musa, Governor of Zinder region of Niger Republic planting a tree at a public event in Dutse.

His Excellency, Governor Umar Ganduje of Kano State planting a tree at a public event.

His Excellency, Governor Muhammad Badaru planting a tree during the commissioning of Kafin Hausa township road projects.

His Excellency the Deputy Governor planting a tree at an event.

Some of the traditional rulers planting trees at different occasions

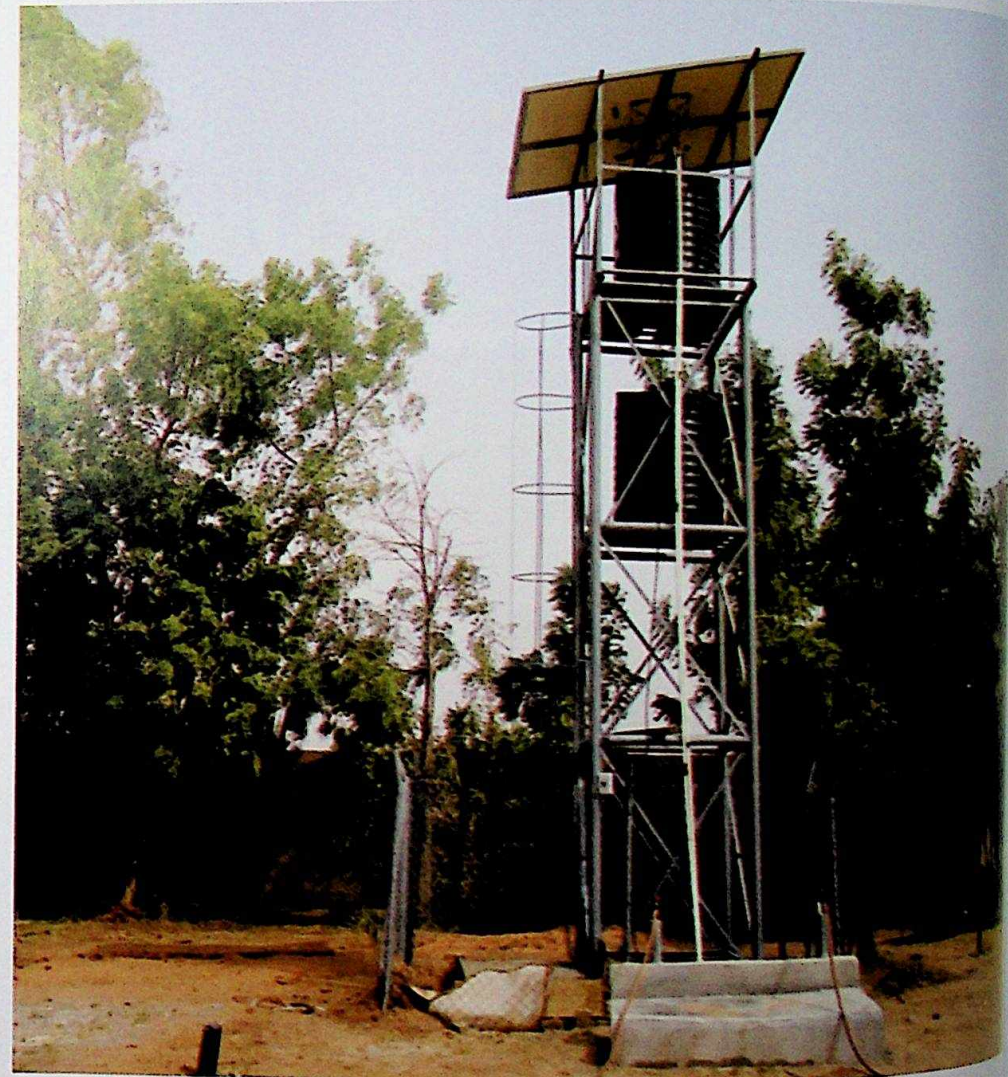

Also worthy of mention is the establishment of 10kms of shelterbelt at Azamu, Muni and Garki in M/Madori, Babura and Garki LGAs respectively and the re-demarcation of some portion of Baturiya Game Reserve. Government also:

Supported the establishment of 30km shelterbelts, 10kms each in Babura, Sule Tankarkar and Birniwa Local Governments Areas by the National Agency of the Great Green wall (NAGGW).

Supported the provision of 21 solar boreholes to the following communities, Damu, Unguwar Sharu, Jansa and Baba Duro in Babura local government area, Jeke, Danmakama, Takure and Garin Sule in Sule Tankarkar local government area, Danborno, Kankare and Alhazai in Maigatari local government, Barikin Faka, Kokinami and Maigazari in Gumel local government area, Girtigini, Gwalarima and Garin Bukar in Kaugama local government area and Diginsa, Kupsa-ciroma, Bulamalum and Gura-gura in Birniwa local government respectively by the National Agency of Great Green wall (NAGGW).

-  Solar Water Boreholes
-  Temporary Forest Guards
-  Orchards

Map showing some of the efforts to prevent desert encroachment

Control of Typha and other aquatic weeds invasion

To control aquatic weeds invasion and enhance free flow of water along the course of river Hadejia, the Ministry in collaboration with Hadejia-Jama'are River Basin Development Authority, deployed equipment for typha grass clearance downstream of Burum-gana in Guri Local Government Area, a distance of 15kms was cleared.

Clearing of the Guri Bridge Channel

Machine collecting cleared typha channel along one of the channels

The Ministry also facilitated manual river channels clearance, by identifying and supporting 15 self-help organizations along river Hadejia, covering 13 Local Government Areas namely; Ringim, Taura, Jahun, Miga, Kaugama, K/Hausa, Auyo, Hadejia, Malam Madori, Kirikasamma, Guri, Birniwa and Gwaram. The concerted efforts resulted in the clearance of over 100km of rivers, primary and secondary tributaries and ponds.

some of the materials distributed to self help groups for manual typha clearing materials

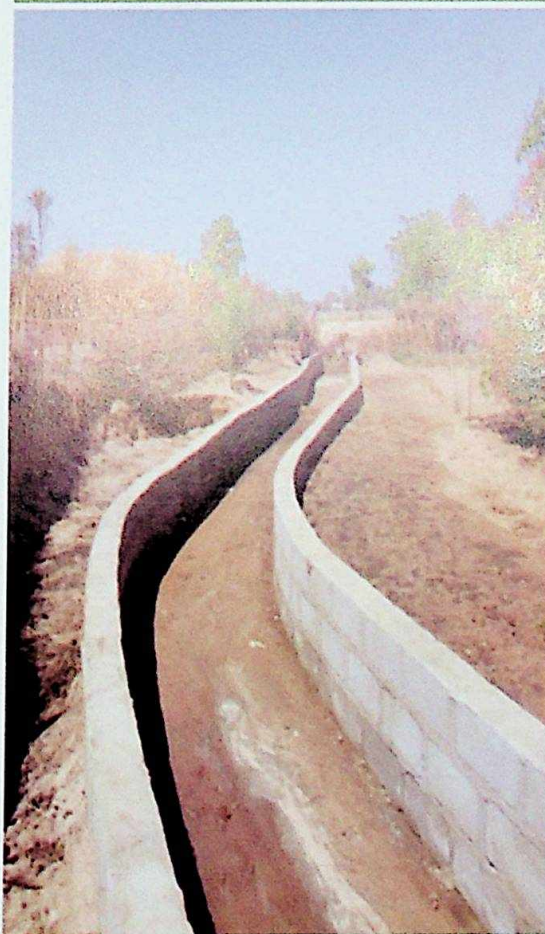

Manual Removal of Typha Grass at Burungana river channel

The mitigation measures taken by the present administration have resulted in increased river flow downstream; reduced flooding; increased water availability for irrigation and above all reduction in conflict over natural resources utilization as more land is now freed for farming, fishing and grazing.

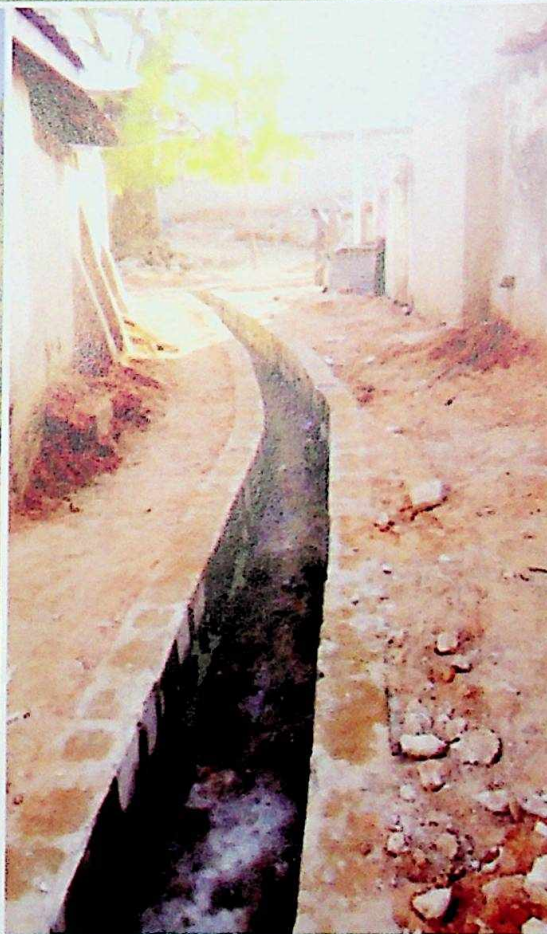

At a recent ceremony held to distribute canoes and cutting implements in May 2017, Local Government Chairmen and community leaders from Yobe and Bauchi States attended in solidarity and testified to the effectiveness of the exercise in Jigawa to the extent that communities that had not cultivated their farms in 20 years had suddenly got back to the farm because of the availability of water.

Government has adopted a preventive measure to curb the issue of perennial flooding by embarking on the construction of drainages and culverts in several locations across the State Some of the areas are:

- Achauya, Sule Tankarkar
- Limawa, Galamawa, Chamo and Garu in Dutse LGA
- Along School of Nursing, Birnin kudu and Sabon Gari Quarters in Birninkudu LGA
- Makara, Duhu and Fanisau quarters in Hadejia LGA
- Yalleman, Dakaiyawa, Kaugama LGAs
- Ashuran Ciroma, Kafin Hausa, e.t.c.

The menace of malaria is being tackled at its root. We embarked on rural communities anti-mosquitoes spray and sensitization across the State

Knock down mosquitoes exercise at Gidan Dugus, Dutse LGA

Flood Control

For towns that are threatened by river banks, pre-emptive measures are taken by providing sand bags and construction materials for embankment as well as drainage de-silting tools. Government also provided heavy duty water pumps to evacuate water from ponds and water collection points that are prone to flooding

A self help group desilting drainages

Distribution of desilting materials to self help groups

Evacuation of water at Mailolo pond, Hadejia

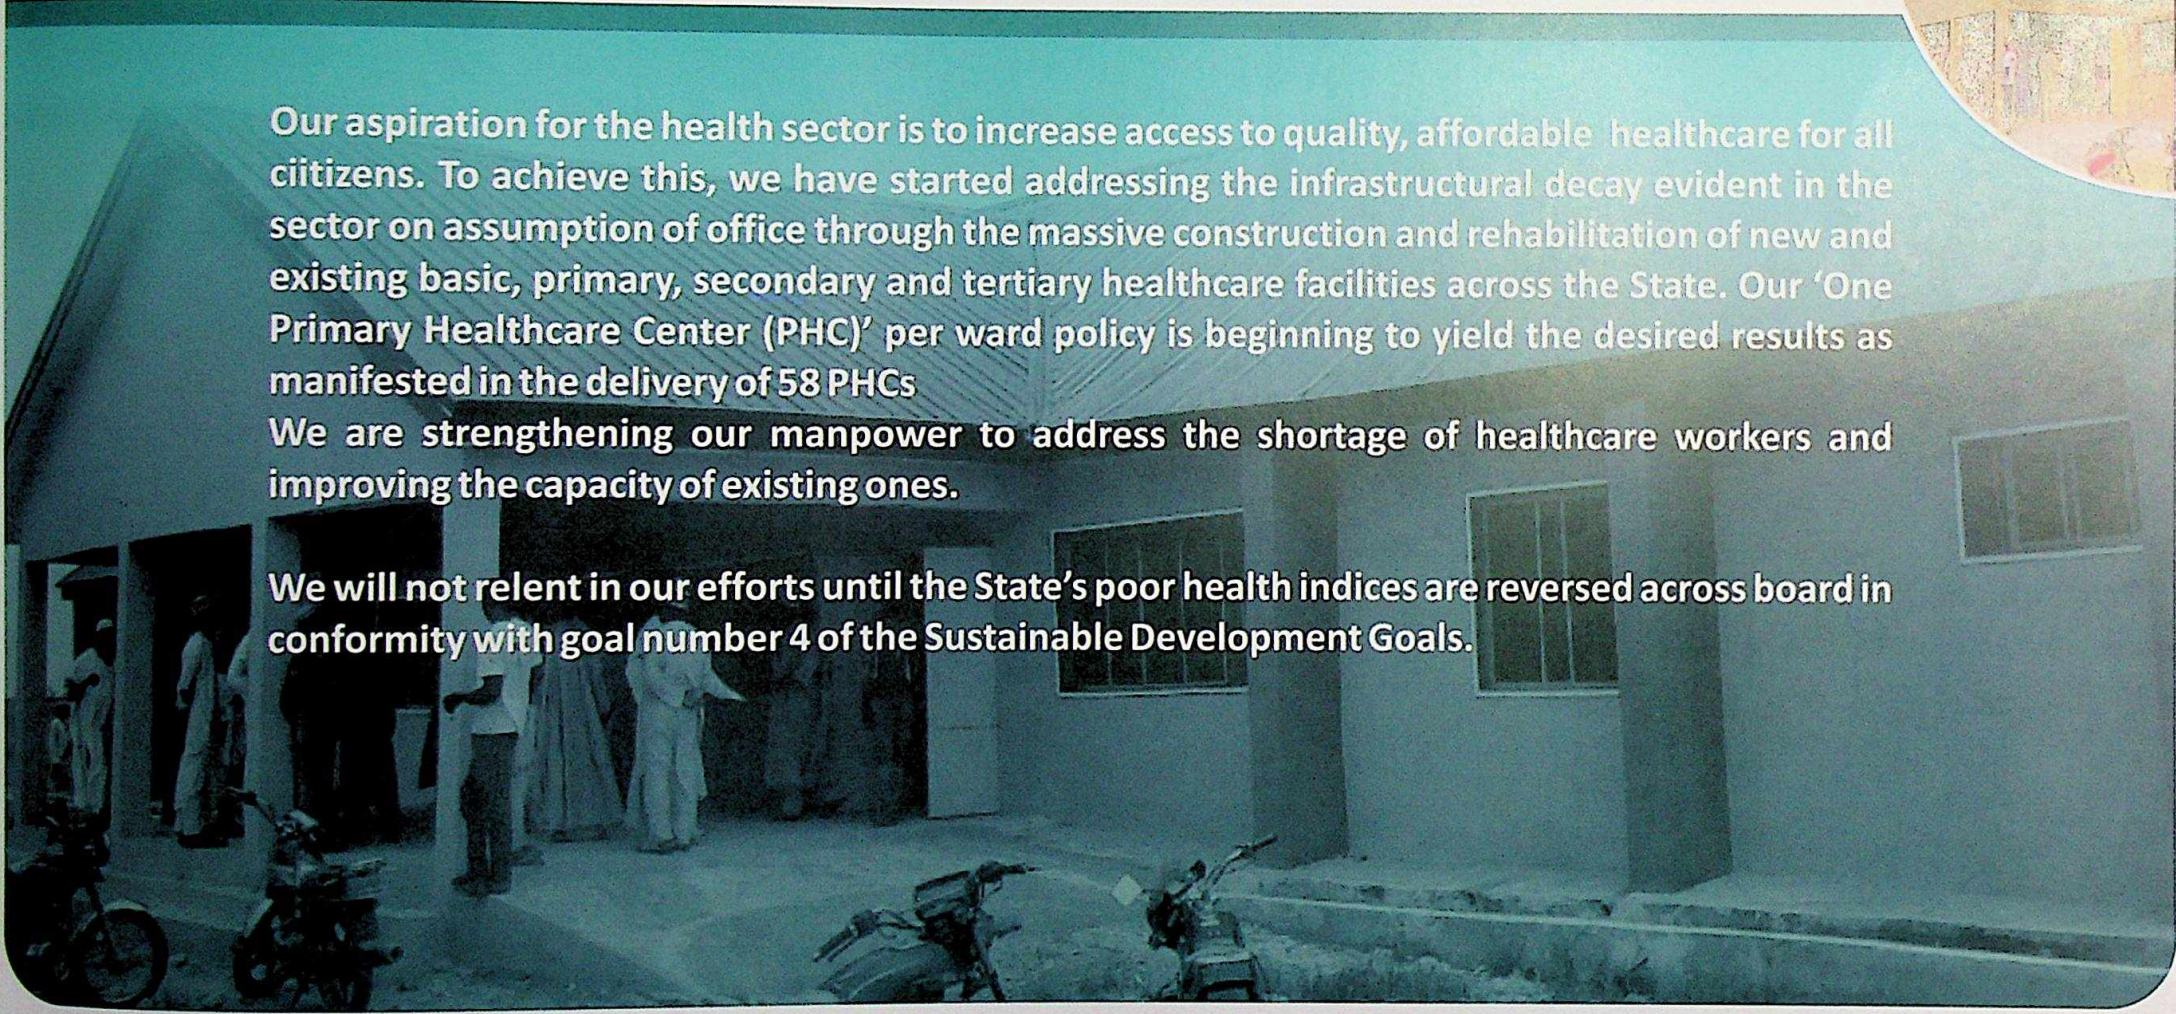

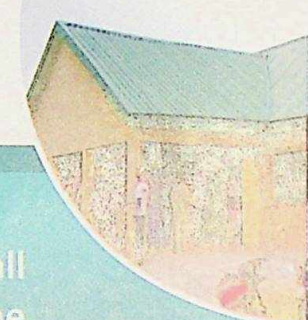

River embankment at Malamawar, Taura

HEALTH

Our aspiration for the health sector is to increase access to quality, affordable healthcare for all citizens. To achieve this, we have started addressing the infrastructural decay evident in the sector on assumption of office through the massive construction and rehabilitation of new and existing basic, primary, secondary and tertiary healthcare facilities across the State. Our 'One Primary Healthcare Center (PHC)' per ward policy is beginning to yield the desired results as manifested in the delivery of 58 PHCs

We are strengthening our manpower to address the shortage of healthcare workers and improving the capacity of existing ones.

We will not relent in our efforts until the State's poor health indices are reversed across board in conformity with goal number 4 of the Sustainable Development Goals.

PRIMARY HEALTH CARE

- The policy of having one functional PHC per ward continued in to 2017/18 as additional 31 PHC clinics were constructed at a cost of about N583 Million
- Same facilities are equipped at a cost of N98,965,965.00
- Previously 27 such facilities were constructed across the state and 27 midwife quarters spread across the 27 LGAs
- National Policy on Food and Nutrition was domesticated and
- In the process of domesticating National Task Shifting/Task Sharing Policy

Interior of New PHCs

- Another set of 30PHCs will be constructed in 2018 which will bring to total 89 facilities. This will fulfill the 'at least' One PHC per ward agenda of the Federal Government when added with already existing PHCs
- Other PHCs renovated from May 2017 to May 2018 include:

Renovation of Roni PHC

- Contract Value: N26,766,366.64
- This PHC will be eventually upgraded to General hospital

Hdj Specialist Workshop building

Provision of solar power in Hospitals

To ensure that critical segments of hospitals have access to constant electricity supply, Government have embarked on the provision of solar power to health facilities across the State. This will eliminate the incidence of darkness in patient wards and other essential areas at night and enhance efficient service delivery to the public at all times. In the long run it will reduce the running cost of diesel procurement and generator maintenance across board

So far, three hospitals have been benefited from the scheme. These include Dutse, Babura, and Gumel general hospitals.

- Contract Values:
 - Babura N20,984,971.88
 - Gumel-N30,263,168.13
 - Dutse-N27,835,303.13

Public Health Programme

- Distribution of anti-malarial commodities;-

– ACT	521,692
– SP	107,580
– RDT	1,404,200
– INJ. ARTESUNATE	36,600
– LLIN	78,102
- Sixth Year Polio Free

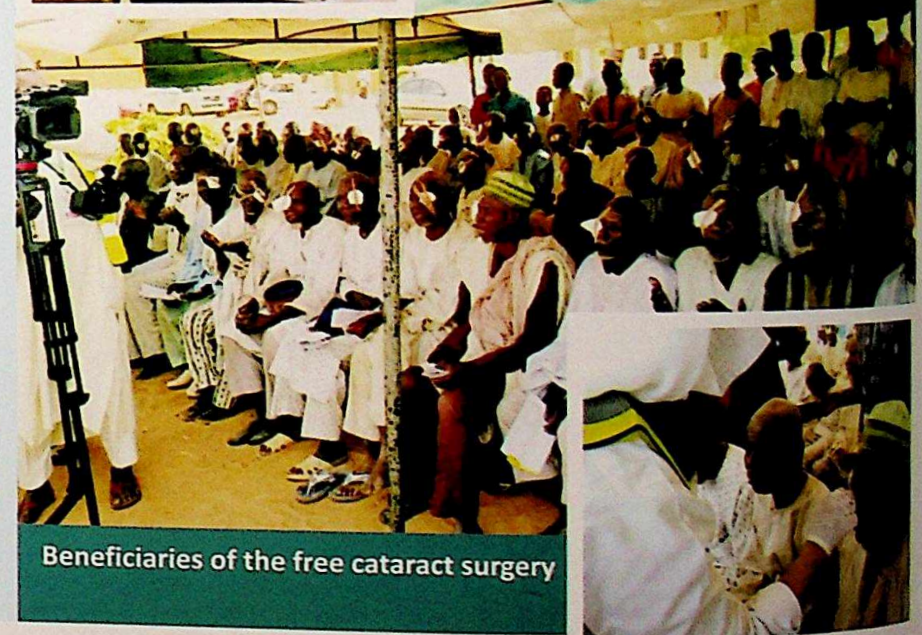

A total of 2510 new cases of TB were treated from January 2017 to date

- Treatment success rate was 88% and death rate about 8
- Established a 20 ward drug resistant TB ward in Hadejia
- 39 cases currently undergoing treatment

A total of 275 cases recorded and currently undergoing treatment

- **Trachoma impact assessment survey in 7 LGAs**
 - 640,400 Patients have since received treatment in August 2017

- 490,203 Children treated of Bilhaziasis from January 2017 to March 2018
- 4,504,331 persons prophylactic treatment for Lymphatic Filariasis - Oct-Nov 2017
- 568,248 people treated for Onchocerciasis –Oct-Nov 2017
- 503 patients had cataract surgery and 728 had lid surgeries in Nov 2017
- Monthly funds for free Maternal and child services increased from N15m to N75million monthly
- N150million worth of Ready to Use Therapeutic foods (RUTF) for malnourished children was procured through UNICEF

Beneficiaries of the free cataract surgery

Human Resources for Health

A number of measures are being taken to tackle the challenge of inadequate manpower in the health sector. Some of these measures are highlighted below:

Recruitment of health personnel

- PHC Agency has recruited 540 PHC workers; all are currently working across the state
- PHCA has continued the payment of 119 midwives and 65 CHEWS absorbed from sure-P and MSS programs'

Medical Students Bonding Programme Outcome

	MEDICAL OFFICERS	NYSC	HOUSE OFFICERS	TOTAL
• MBBS	35	17	31	83
• BSC PHARM	7	3	14	24
• MLS	5	1	1	7
• BSC NURSING	10	1	1	12
• PHYSIO	13	2	1	16
• RADIOGR	4	4	0	8
• MIDWIFE	1	0	0	1

Training the future health personnel

- Nurses and Midwives

Government has also acquired accreditation for School of Midwifery, Birnin Kudu. The school of nursing, Hadejia has been completed and has resumed classes. Another school of midwifery is being established in Babura this year while also working on upgrade of the Birnin kudu school.

The new schools are needed because the existing schools cannot produce beyond the capacity ceiling of only 100 nurses and 100 midwives annually as stipulated by the Nursing Council of Nigeria.

INFRASTRUCTURE

To enhance economic growth and improve the quality of lives of its citizens, critical infrastructure needs to be put in place. This will ensure that economic activities are carried out unhindered across the length and breadth of the State.

The Present administration understands the importance of providing qualitative infrastructure and is taking bold steps improve on existing and provide new ones.

ROAD PROJECTS

In line with the administration's commitment to provide quality road network, it is embarking on the massive construction and rehabilitation of roads, bridges and culverts connecting critical units and easing the movement of goods and humans across the State. As at 3rd May, 2018, there are **71 roads**, measuring **1,262.67KM** under construction.

716.5km of these are inherited from the previous administration at various levels of completion while another **396.85KM** were awarded by this administration between 2016 and 2017. So far, in 2018, another **149.32 Km** of road contracts were awarded with 20% of contract value (mobilization fees) paid.

INHERITED REGIONAL ROADS

On assumption of office in 2015, this administration inherited forty-two (42) road projects (measuring 716.5km and valued at N98.83bn) at various stages of completion.

ROAD PROJECTS AWARDED BY THIS ADMINISTRATION - 2018

In 2018, the State Executive council awarded another set of road projects in different parts of the State. This is to compliment ongoing and completed works and also open up more communities to market opportunities and ease the movement of goods within the State.

The new roads consist of 7 regional roads measuring **133.04KM** awarded at the cost of **N19,109,504,007.87** and 2 township roads measuring **16.28KM**, awarded at the cost of **N3,958,113,989.42**.

As at 3rd May, 2018, the contractors handling the projects have mobilized to site. Details of the projects are highlighted in the tables below:

REGIONAL ROAD PROJECTS AWARDED BY THIS ADMINISTRATION - 2018

S/N	Project	Length KM	Contract Sum	Commencement Date	Status
1	Construction of Dutse - Madobi - Katanga - Dangoli with a spur from Madobi to Baranda Road:	35.7	4,643,482,872.42	03/05/2018	Just Mobilized
2	Construction of Darai - Gilima Road:	9.5	2,492,310,165.97	03/05/2018	Just Mobilized
3	Construction of Gambari - Waza - Baranda - with spur from Waza to Yalwa Road	16.8	3,194,083,855.93	03/05/2018	Just Mobilized

HT LINE WORK IN PROGRESS ACROSS THE STATE

FUTURE OUTLOOK

- Continue to support KEDCO in the maintenance of the network to ensure that every part of the State enjoys power supply as much as is available.
- Connect at least one new town or village in each of the 30 House of Assembly constituencies in the State annually to the electric grid

STREETLIGHT PROJECTS

This administration inherited nine (9) streetlight projects being undertaken in some local headquarters across the state which were awarded at:-

- The total contract sum of **N2,194,796,657.31**
- Amount paid by the previous administration **N1,592,242,377.84**
- Balance **N602,554,279.47**
- Discount **N482,043,423.58**
- Amount Paid by the present administration **N179,742,870.53**
- Balance to Completion **N302,300,553.05**

In Addition to this the present administration awarded contract for the supply and installation of integrated stand along solar streetlight in Gujungu, Dutse and Kanya Babba at the total contract sum of **N194,874,366.46**.

WATER RESOURCES

Brief Introduction of the Water Sector

The Jigawa State Water Sector comprises of the Ministry of Water Resources and its three Agencies namely; Jigawa State Water Board (JSWB), Small Towns Water Supply and Sanitation Agency (STOWA) and Rural Water Supply and Sanitation Agency (RUWASA).

At the inception of this Administration there was acute shortage of water supply across the State of which only about 40% of all the schemes were fully functional, This is due to frequent breakdown of water facilities and the capital intensive nature of water resources management.

It is in view of this the State Government awarded contracts worth **N732,923,871.22** for the rehabilitation of all dysfunctional water supply schemes (hand pumps, motorized and solar schemes) across the State as highlighted in the breakdown below:-

- 1 Rehabilitation of **108** number Motorized water supply schemes under Jigawa State Water Board at the cost of **N389,879,731.63**;
- 2 Rehabilitation of **240** number Solar and Motorized water supply schemes under STOWA at the cost of **N250,222,357.26**;
- 3 Rehabilitation of **4,571** number hand pump operated Boreholes under RUWASA at the cost of **N92,821,782.33**;

The State Government Carried out additional rehabilitation of dysfunctional water supply schemes across the State by direct labour at the total cost of **N259,889,392.79** as per breakdown below:-

- 1 Rehabilitation of seven number Motorized water supply schemes under Jigawa State water Board at the cost of **N32,873,630.00**;
- 2 Rehabilitation of Solar and Motorized water supply schemes under STOWA across the State at the cost of **N256,602,029.79**.

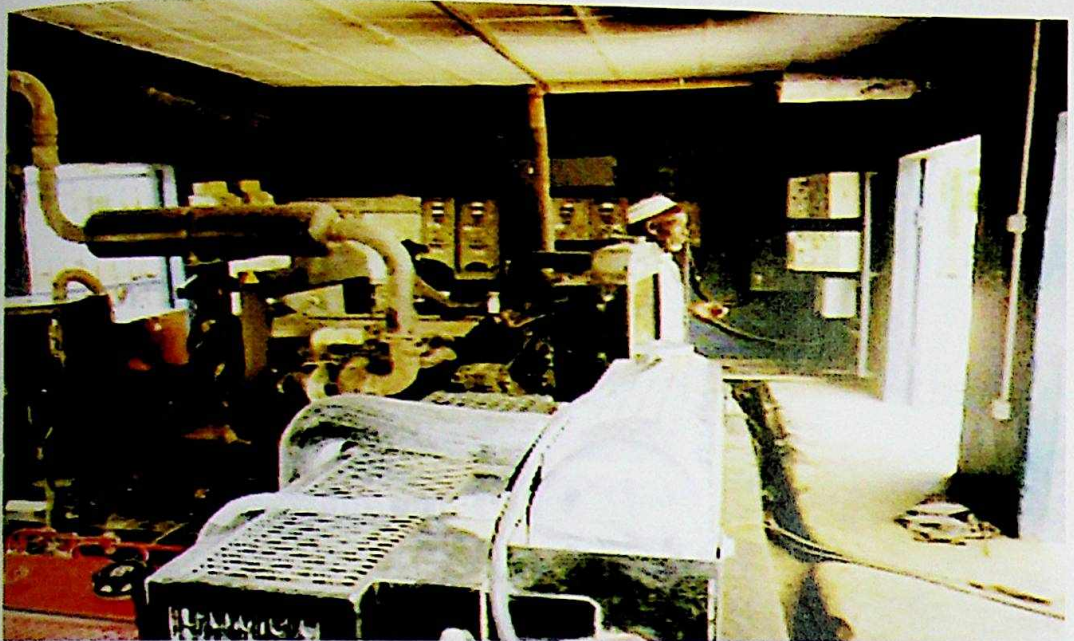

**1 MILLION M³ CAPACITY HILLTOP SURFACE TANK, ALONG
KIYAWA ROAD DUTSE AFTER REHABILITATION**

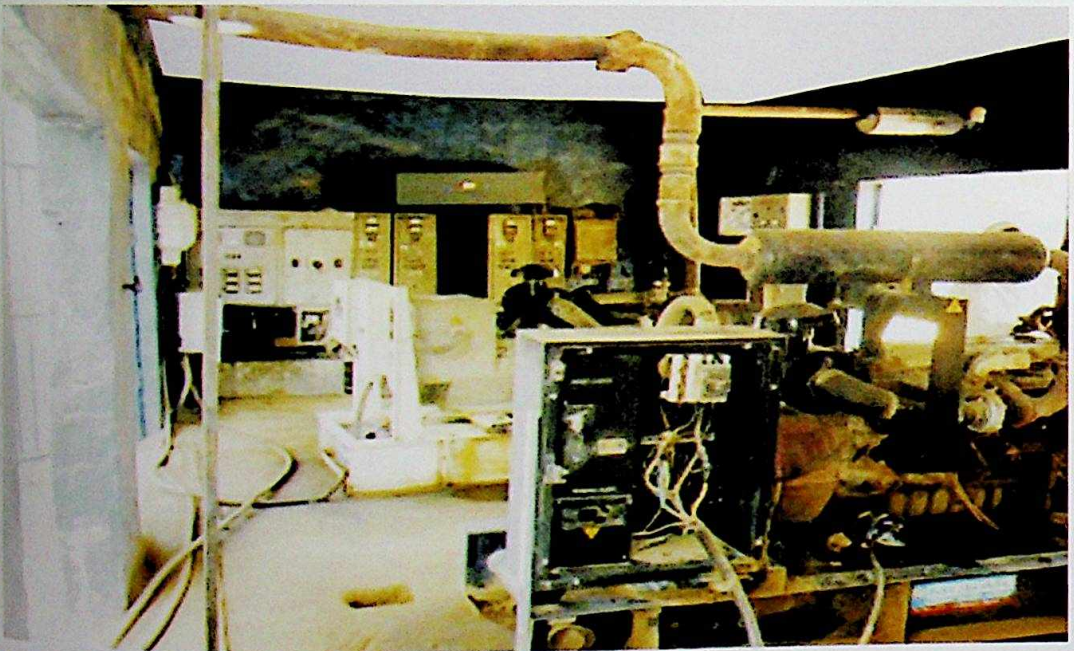

**REHABILITATED GENERATOR ROOM AND 200M³
OVERHEAD TANK AT HADEJIA MAIN PUMP HOUSE**

ONE OF THE GENERATING SET REHABILITATED AT BIRNIN KUDU WATER WORKS

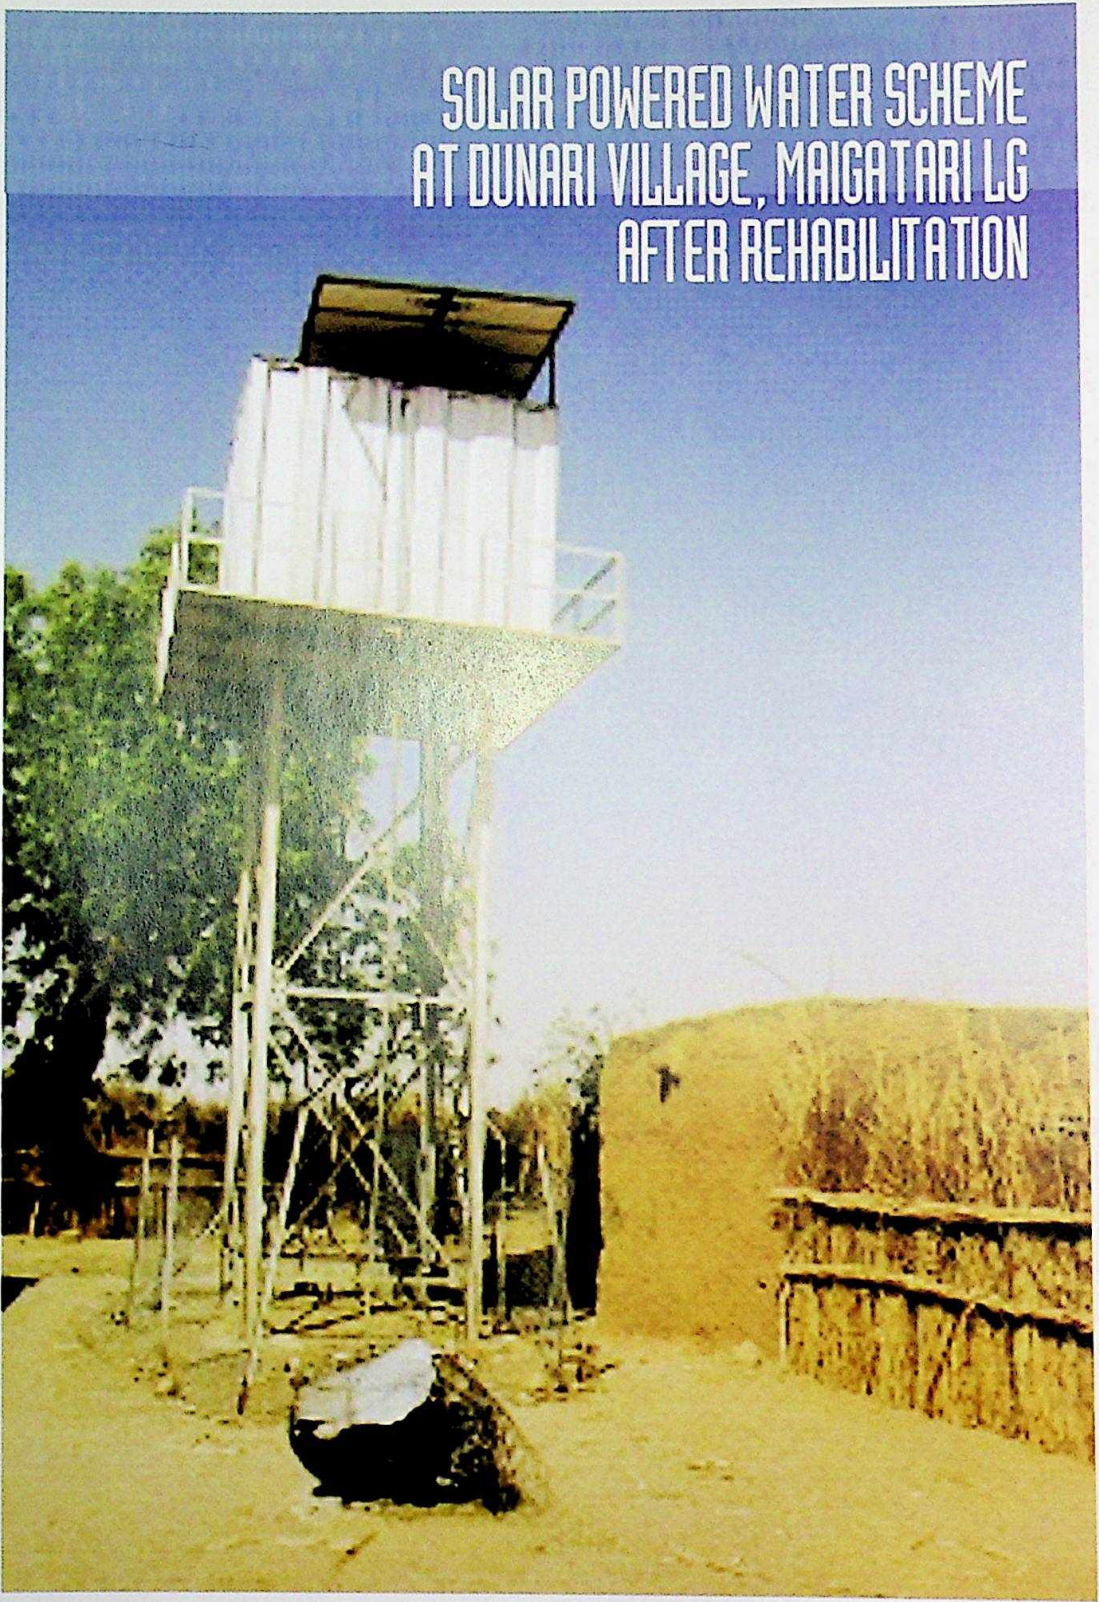

BEFORE REHABILITATION

AFTER REHABILITATION

SOLAR POWERED WATER SCHEME AT DUNARI VILLAGE, MAIGATARI LG AFTER REHABILITATION

ONE OF THE HAND PUMP AFTER REHABILITATION AT KWANDA KIYAWA LG

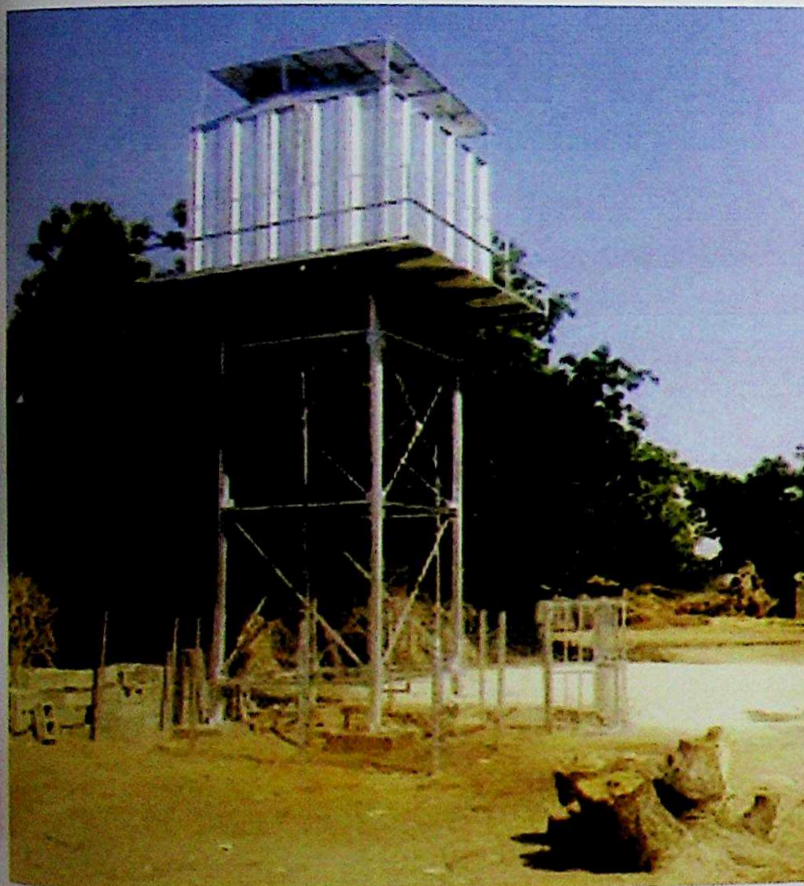

OTHER GOVERNMENT INTERVENTION ON WATER SUPPLY AND SANITATION (NEW PROJECTS)

Government has intervened in the provision of water supply and sanitation facilities across the State at the total cost of **Four Billion, Seventy Two Million, Seven Hundred and Seventy Four Thousand, Four Hundred and Eighteen Naira Thirty Four Kobo (N4,072,774,418.34)**

Below is the breakdown of expenditure carried out:-

(A) WATER SUPPLY

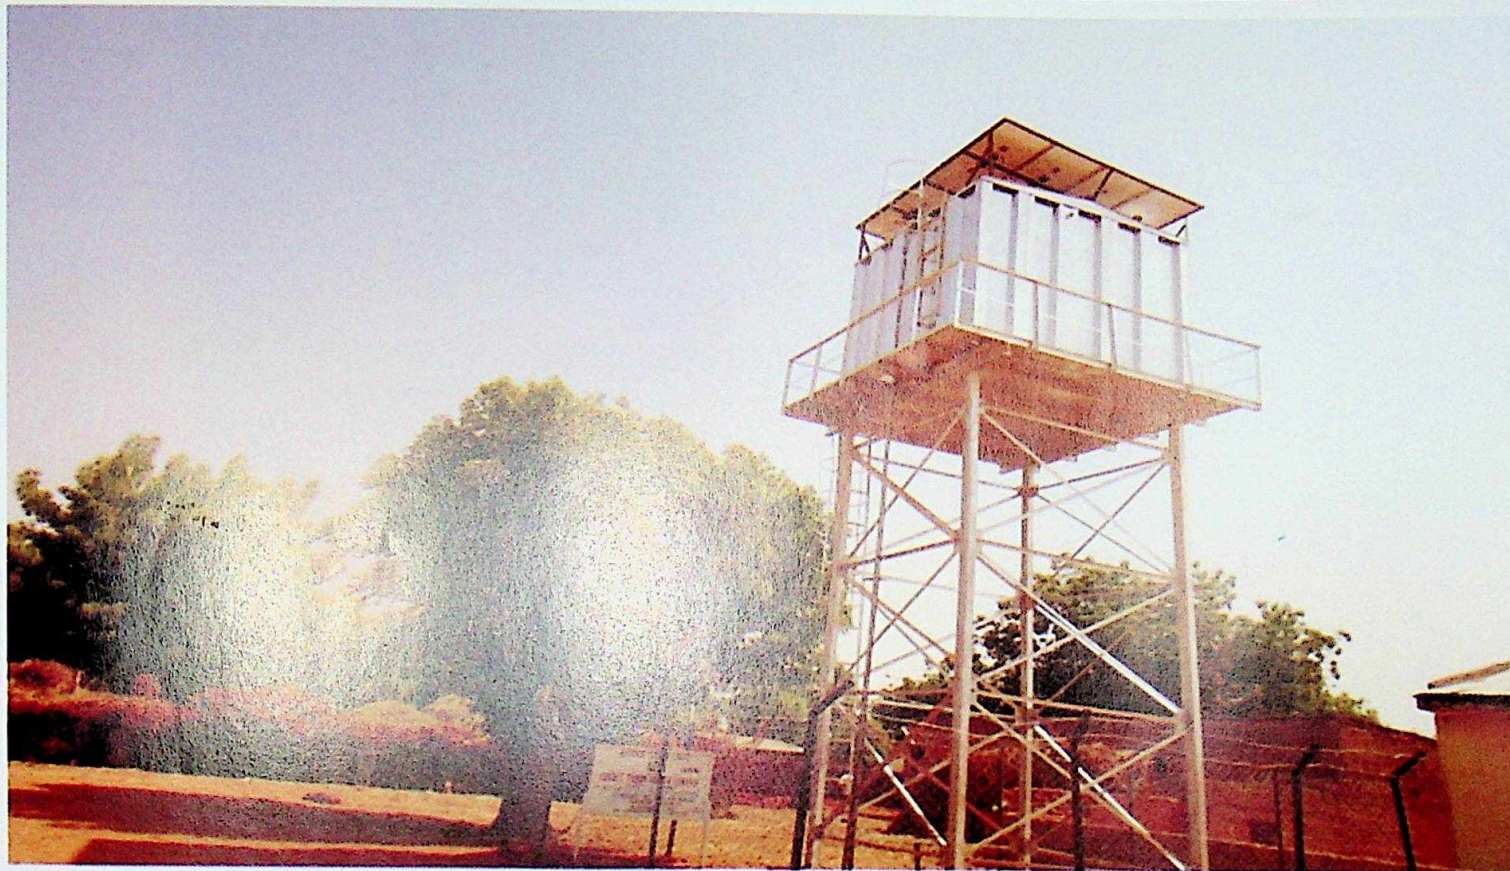

- Construction of **48** units of solar powered water supply schemes in collaboration with MDGs at total cost of **N296,780,558.00**
- Construction of **167** units of solar powered water supply scheme Constituency projects at total cost of **N1,025,727,053.25**

ONE OF THE NEWLY CONSTRUCTED SOLAR POWERED WATER SUPPLY SCHEME AT KWARTA IN RINGIM LGA (MDGS)

ONE OF THE NEWLY CONSTRUCTED SOLAR POWERED WATER SUPPLY SCHEME AT SABARU TOWN IN KAZAURE LGA (CONSTITUENCY)

One of the newly constructed Solar Powered water supply scheme at Sabaru town in Kazaure LGA (Constituency)

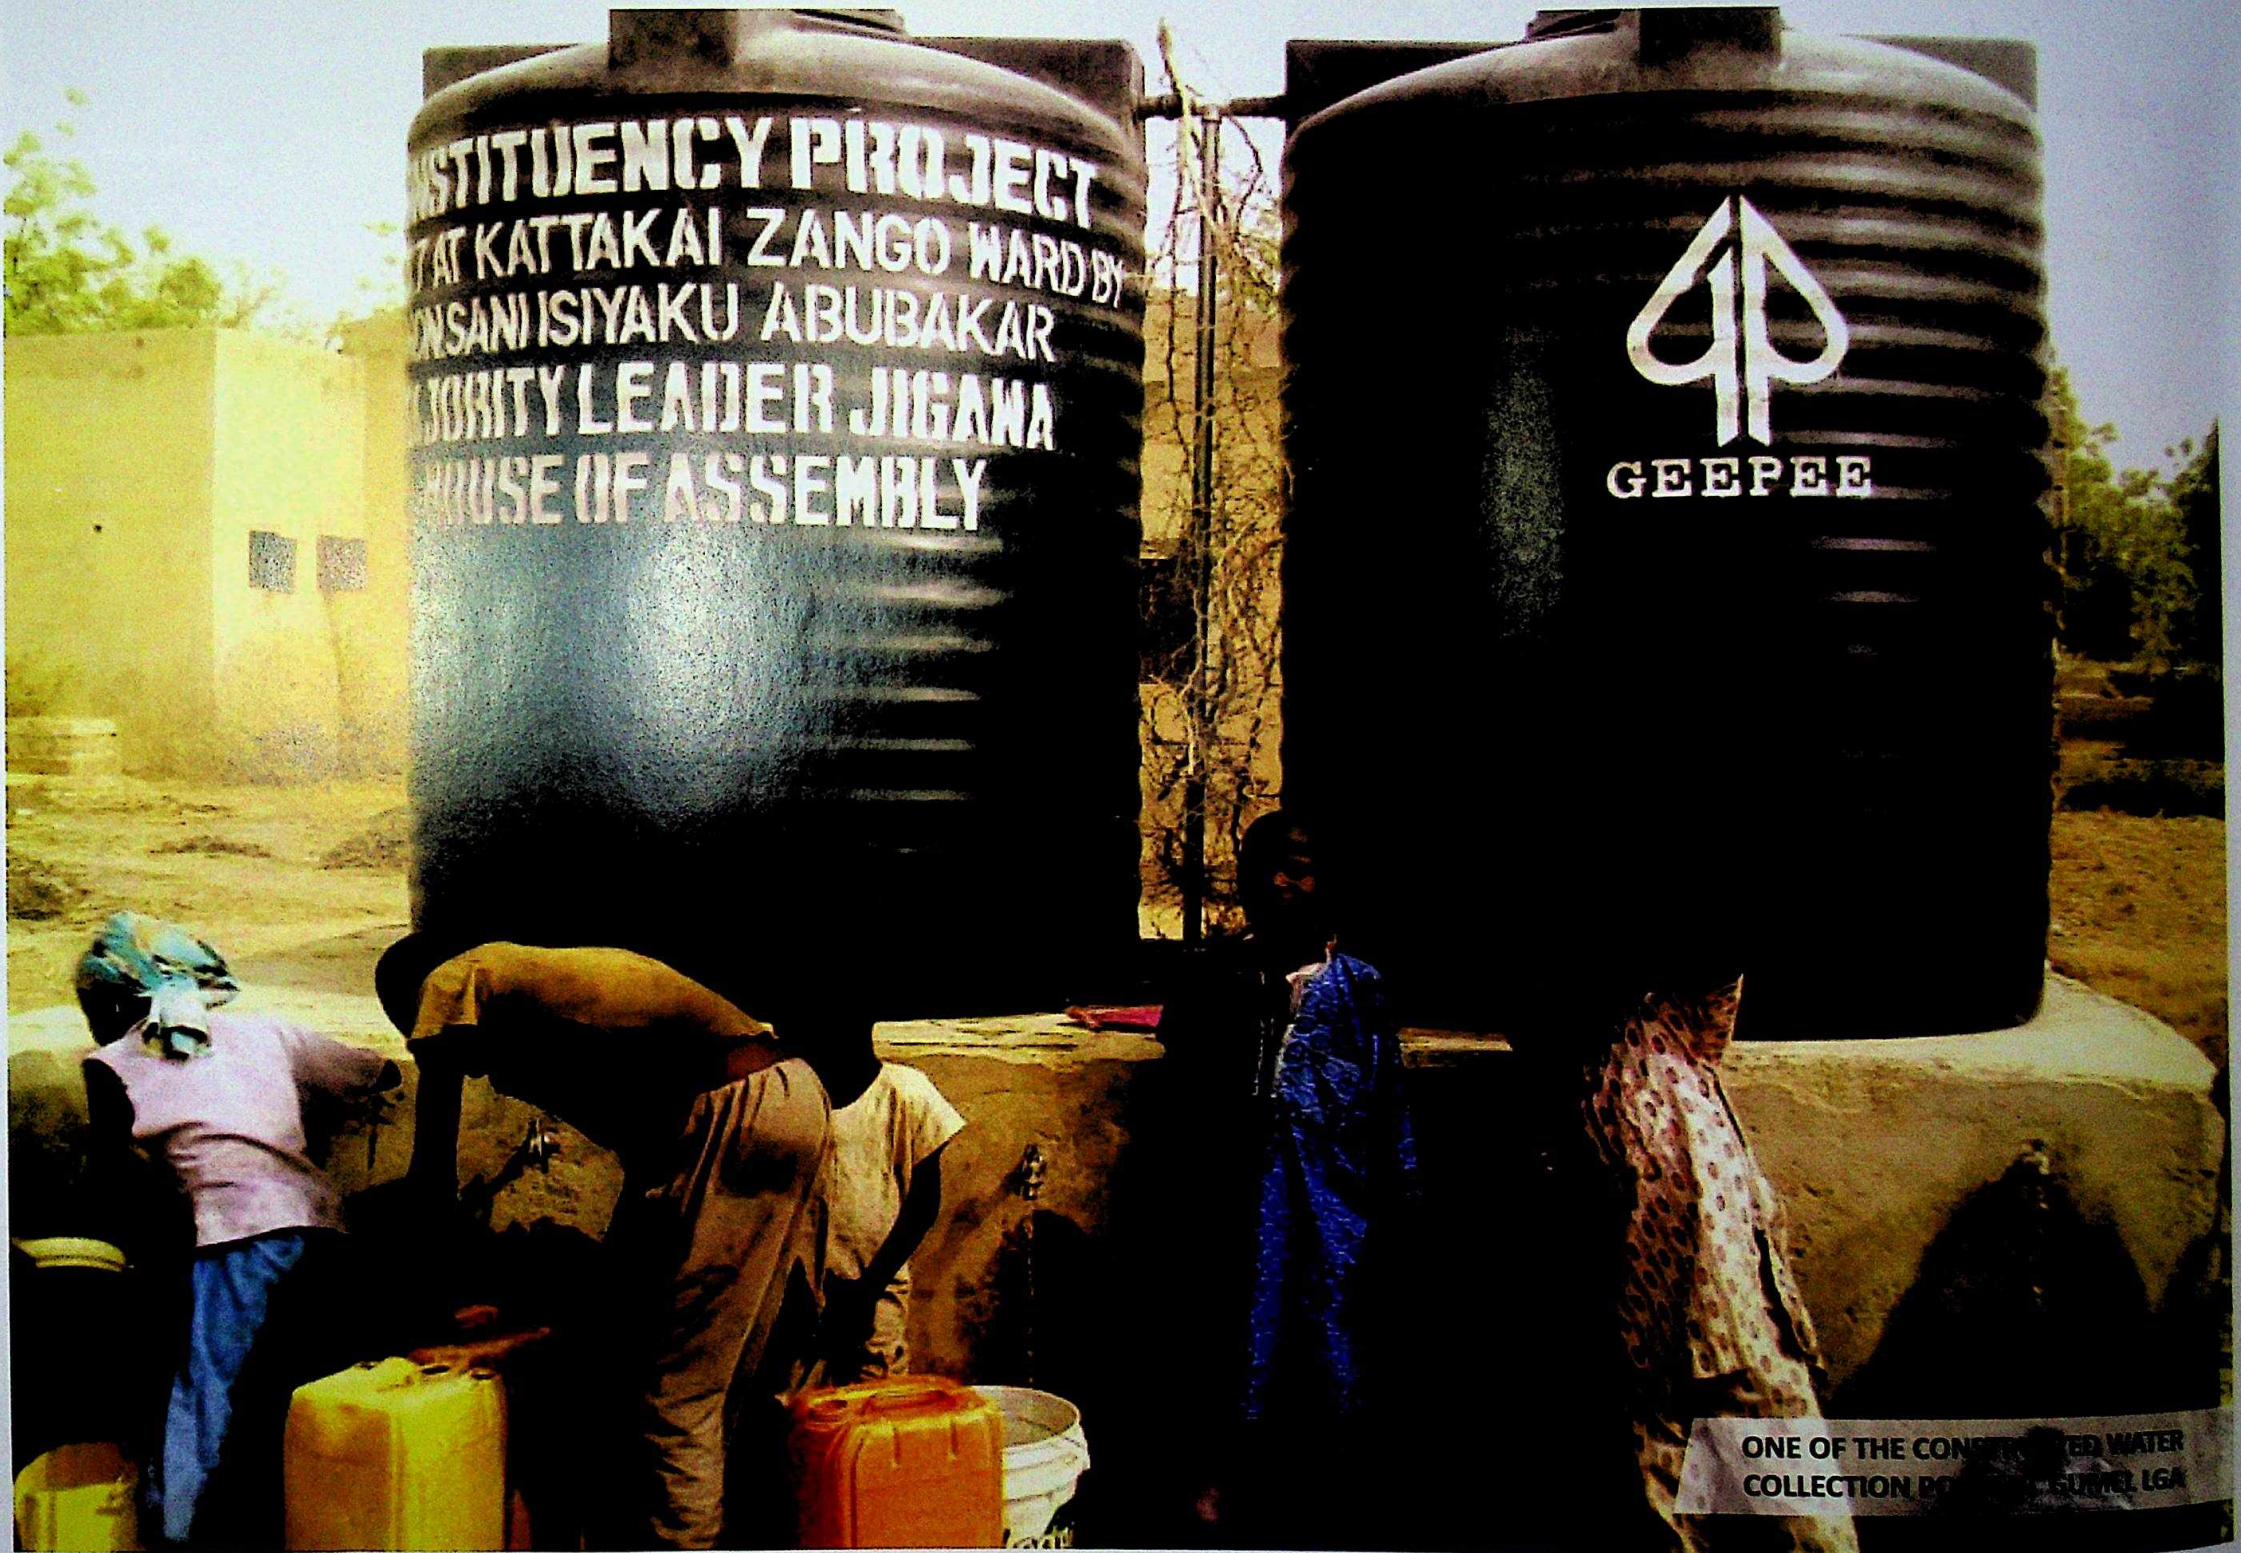

One of the newly constructed hand pump borehole in Nasarawa Guri LGA

3. Construction of 467 hand pumps under Constituency project at N297,946,641.50
 - Construction of 1,770 hand pumps in collaboration with UNICEF, EU and DFID. State counterpart funds = N523,189,975.00 UNICEF, EU DFID Contributions =

NEWLY CONSTRUCTED HAND PUMP UNDER DFID SUPPORTED PROGRAMME

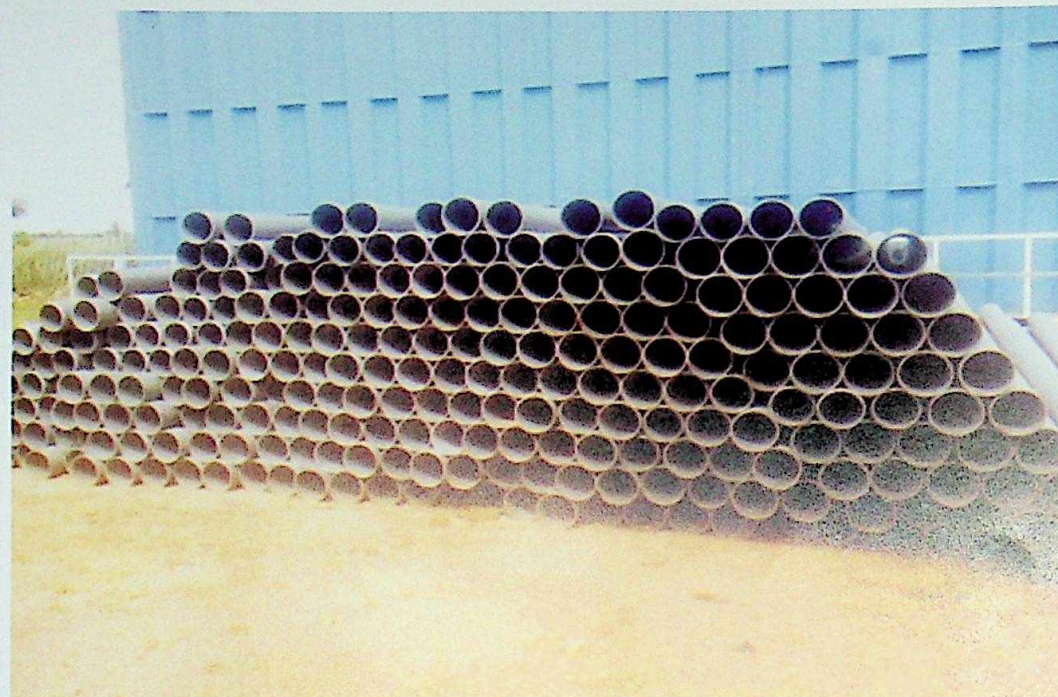

4. Construction of 51 Water Collection Points at N66,912,754.00

ONE OF THE CONSTRUCTED WATER COLLECTION POINTS IN GUMEL LGA

5. Improvement of water supply in major towns

COST: N1,382,377,288.95

AN IMPROVED WATER PUMP STATION AT GEZOJI IN KAZAURE TOWN

Improved Ringim water scheme

Improved Garki water scheme

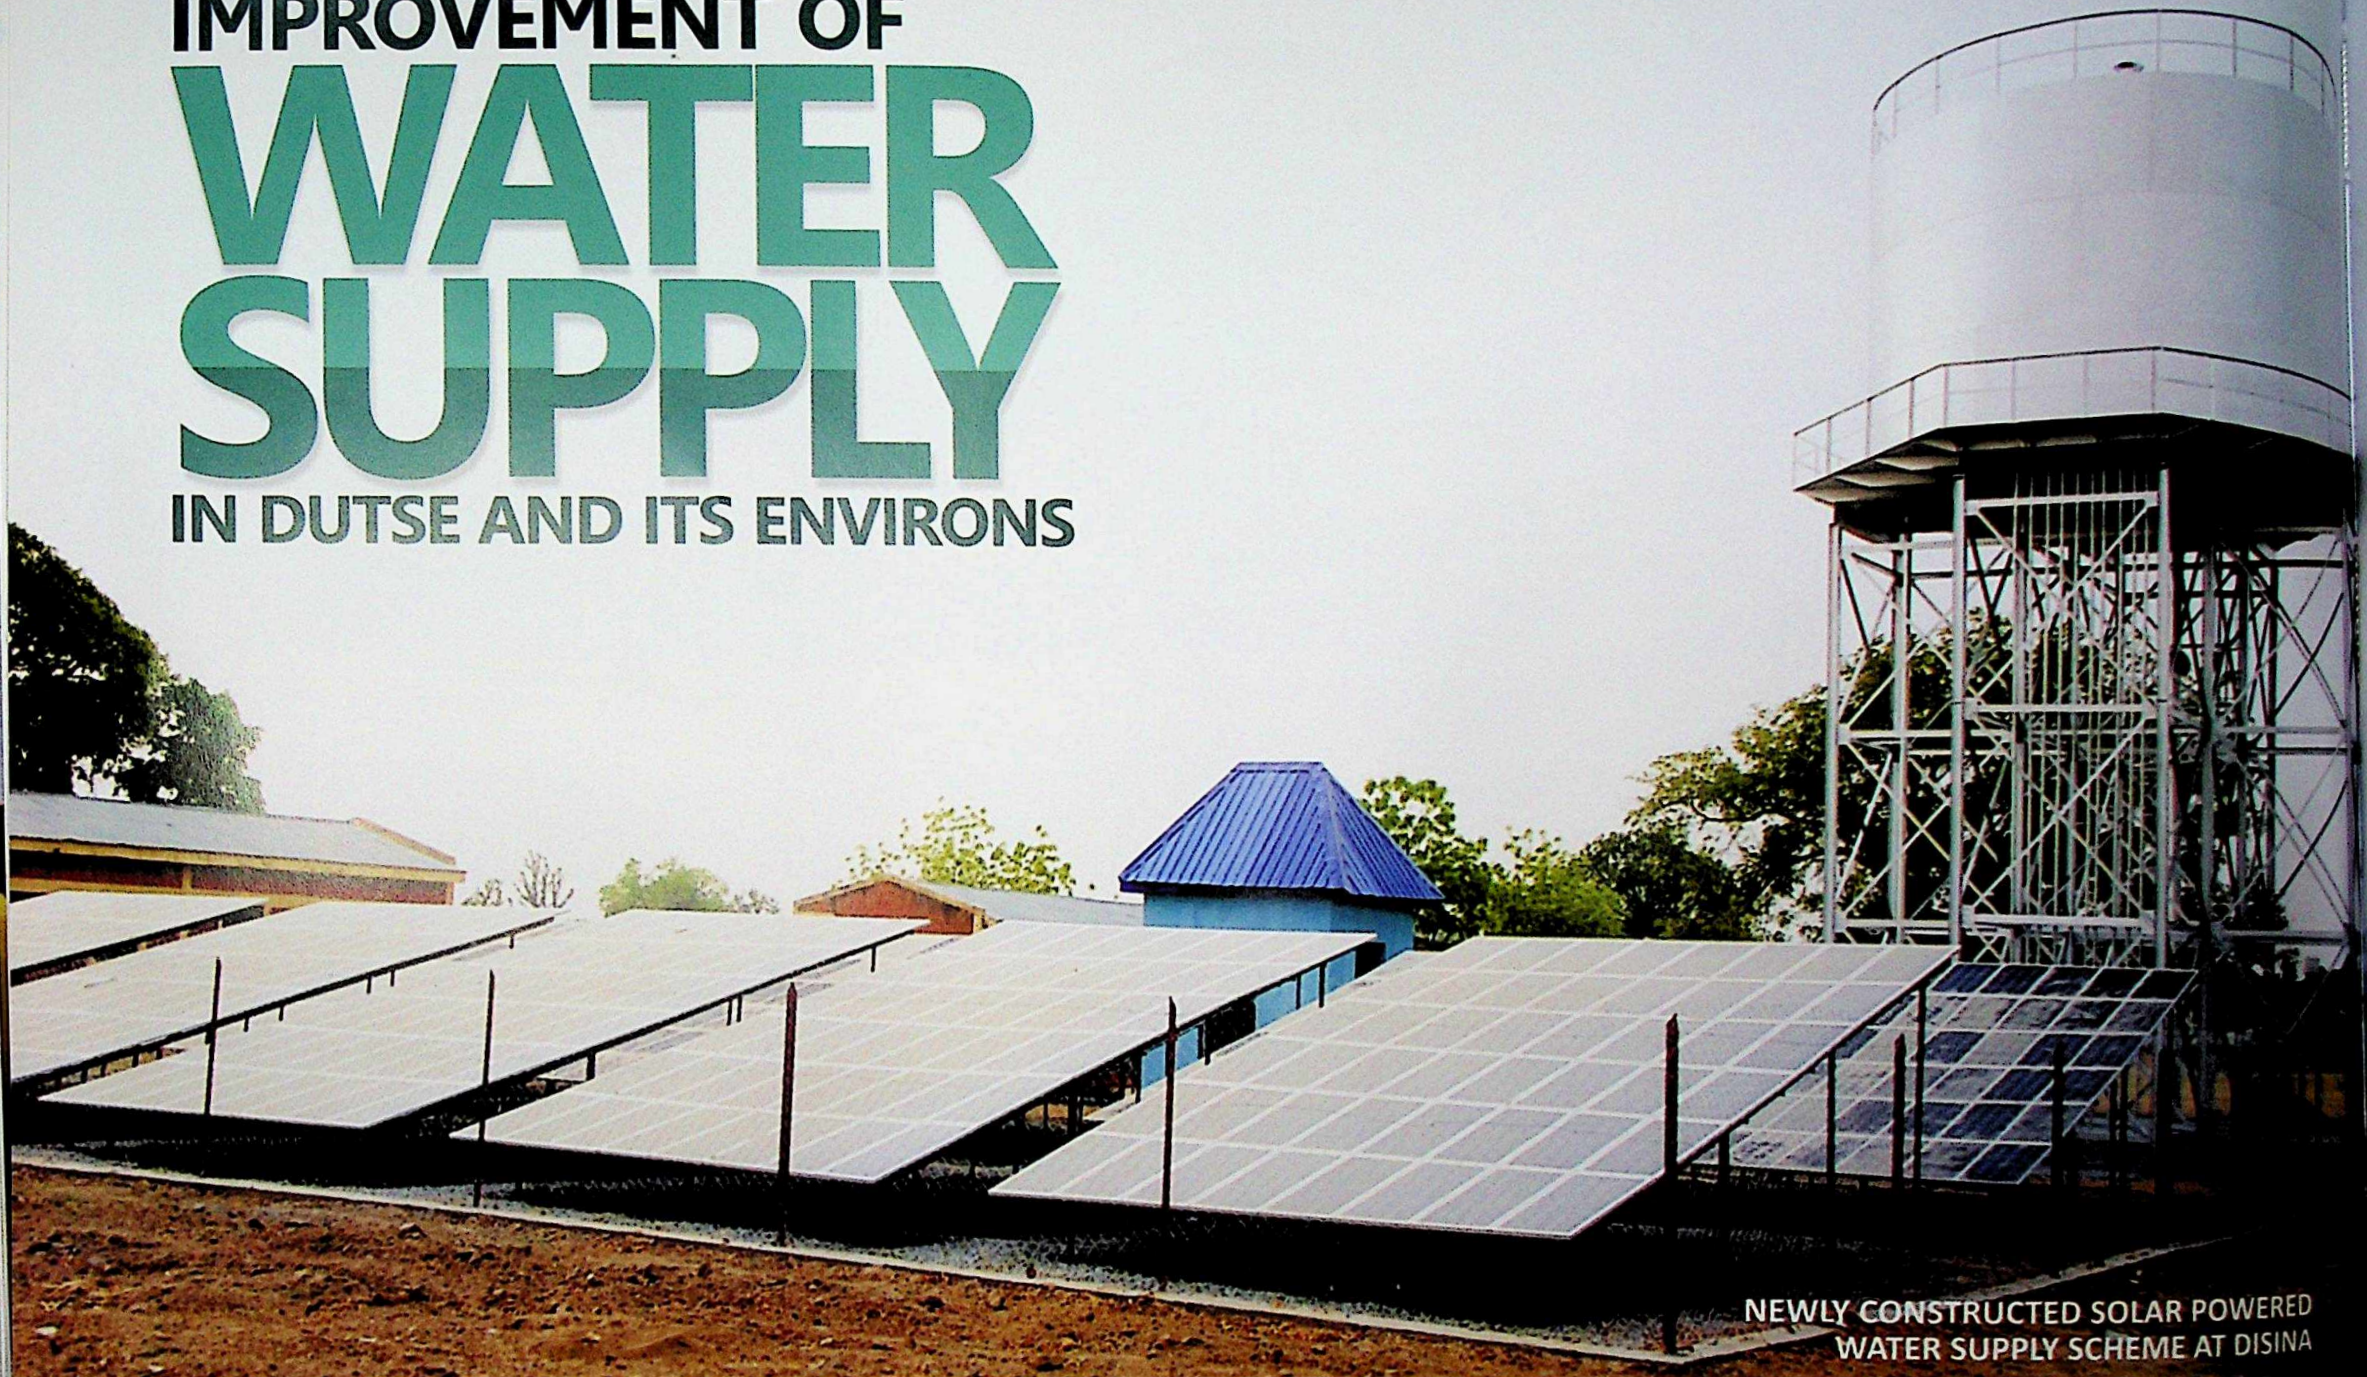

Improved Babura water scheme

Improvement of Gumel water scheme

IMPROVEMENT OF WATER SUPPLY IN DUTSE AND ITS ENVIRONS

NEWLY CONSTRUCTED SOLAR POWERED
WATER SUPPLY SCHEME AT DISINA

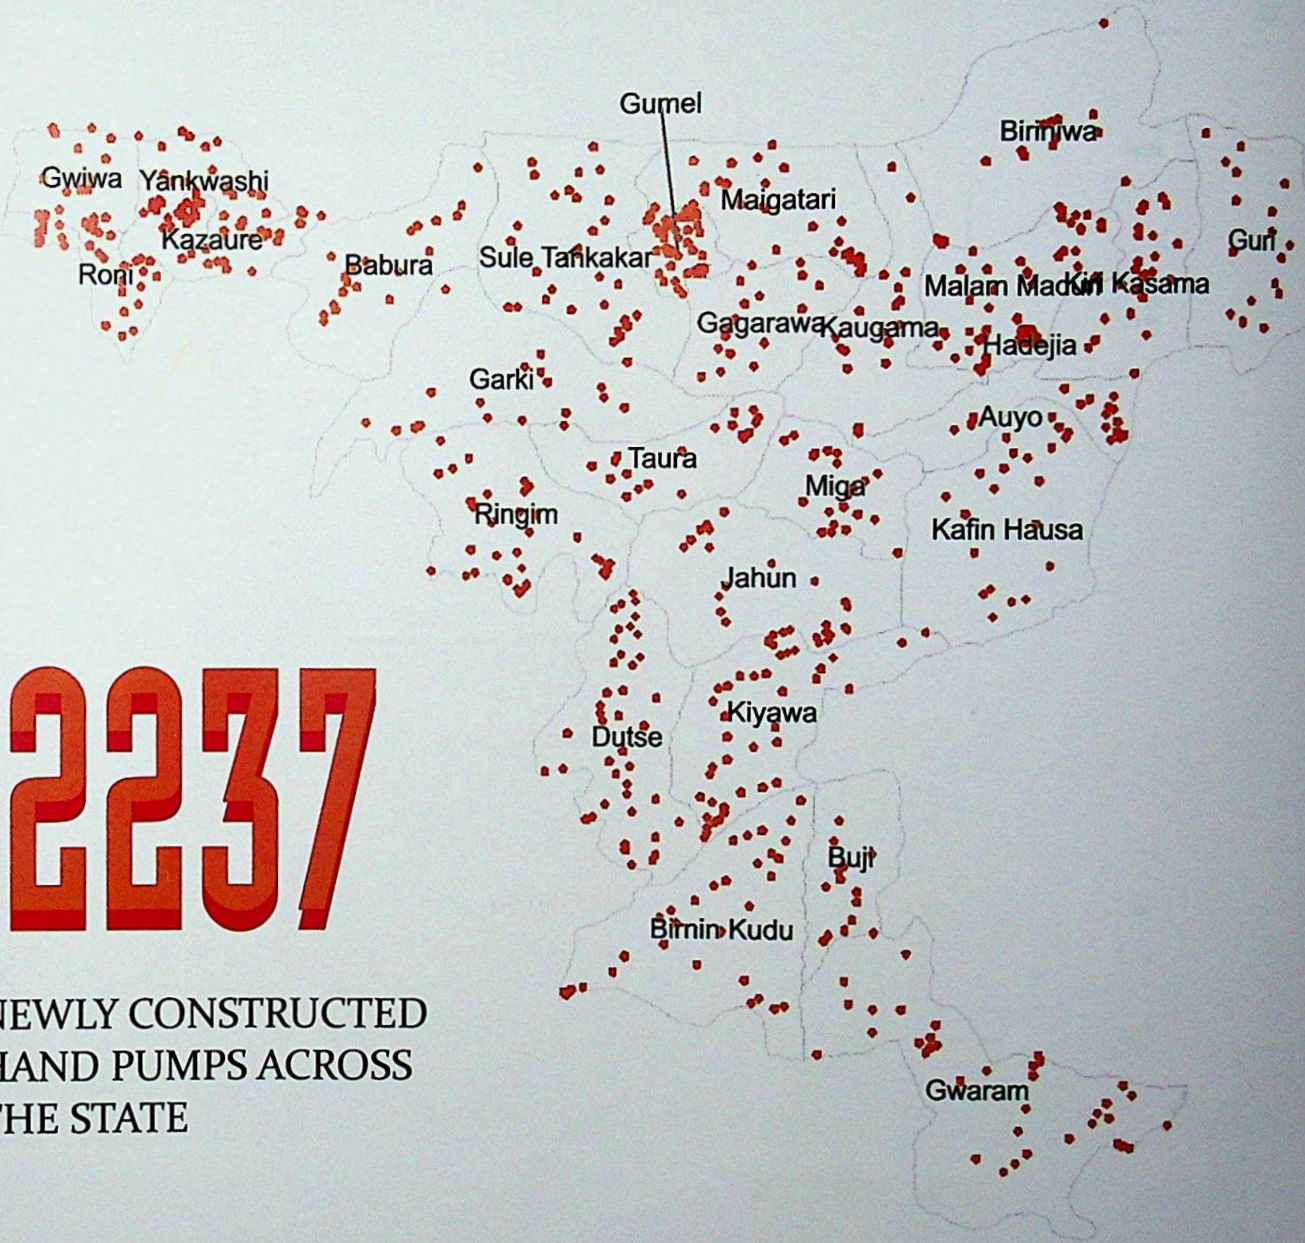

WITH THE NEWLY COMPLETED/REHABILITATED WATER SCHEMES AND STANDALONE WATER PROJECTS,
4.2M LITRES HAS BEEN ADDED TO THE DAILY WATER DISTRIBUTION CAPACITY
OF DUTSE AND ITS ENVIRONS

6. Design Review of Greater Dutse Water Supply Project (GDWSP) for improvement of water supply to Dutse capital and its environs to the tune of 25 million litres in the final design.
7. Conversion of 50 motorized schemes and 2 hand pump boreholes to solar powered in urban, small towns and Rural, at the total cost of N359,944,654.64

RECURRENT EXPENDITURE

Procurement of diesel, lubricant and water treatment chemicals = N2,532,358,706.04

TOTAL SPENDING ON WATER SECTOR

= N11.,808,934,568.68

INFORMATION, YOUTH AND SPORTS

As part of its commitment to the physical, social and emotional well being of its youthful population, the State Government has embarked on a set of programs and interventions for the benefit of the youth of Jigawa. This is in addition to its efforts at disseminating valuable and timely information on government policies and programs to the people while also ensuring the participation of the populace in governance.

In this regard, the State Government through the Ministry of Information, Youth and Sports has:

- Repositioned the programming of the state AM Radio towards mass mobilization and participation for all its listeners.
- Initiated the leaders accountability live program (FITILA) on radio thereby giving the citizens the opportunity to engage their elected and appointed public officials
- Ensured improved quality broadcast in all community FM stations through regular monitoring and compilation of reports.

- Gathered citizens input during the budget process thereby ensuring a fully representative budget.

- To curtail the spread of HIV/AIDS in the State, the ministry engaged in a series of sensitization for motor parks workers, youth associations and out of school teenagers. The ministry also facilitated the conduct of free HIV tests across the State.

- Created a more secure and comfortable environment at the NYSC camp in Dutse by installing barbed wire across the perimeter fencing and providing air conditioners at the main hall.

- In its effort to develop talent across the State, the Government has continuously supported and sponsored sporting events and competition.

- In line with the administration's sport development agenda, the State Government is improving sporting facilities across the board. The renovation of the Hadejia Stadium, the completed Dutse stadium and the recent completion of the 3,000 capacity Kazaure stadium are pointers to this fact.

(L) His Excellency, declaring the Kazaure Stadium open for use

INVESTMENT PROMOTION, COMMERCE, INDUSTRIES & COOPERATIVES

COMMERCE, INDUSTRIES AND COOPERATIVES

The policy thrust of the commerce and industrial sector is to facilitate the development of virile Micro, Small, and Medium Enterprises (MSME) capable of substantial contribution to economic growth and poverty reduction, development of solid minerals as an alternative source of economic development and partnering with the private sector to develop tourism to generate income and employment leading to increased economic activities in the State.

In the last two years of this administration, remarkable achievement was recorded in cross-border trade with the Republic of Niger. Indeed the launching and implementation of the Zinder – Daura- Jigawa – Kano Trade corridor has opened a new chapter in the participation of the populace in international trade.

Government has decided re-position the 3 star hotel and in pursuance of

this the sum of N108.7m was released for the pay off of hotel staff and the settlement of outstanding debts incurred during the last regime.

Also, the sum of N22.5m was released to 3-Star Hotel to resolve its perennial liquidity crisis

Some of the other achievements recorded in the sector include:

Registration of 1, 866 cooperatives societies as against 288 registered associations inherited by the administration.

Introduction of standard indigenous measures (Mudus) State-wide

To protect the rights of consumers, board of the Consumer Protection Council was inaugurated and they swung into action immediately, destroying

several tons of adulterated goods in markets across the State

Operationalization of the World-Bank supported Hadejia Modern Fish Market through the provision of water, electricity, 20KVA Generator and allocation of shops/stalls to traders.

Registration of 50 cooperative groups of a maximum of 20 members artisanal miners across the State.

Acquisition of exploration licenses for Copper, Gold, Iron Ore, Bentolite, Lead, and Trona

Conduct of baseline enumeration survey of mining cooperatives in 13 LGAS: Dutse, Roni, Kazaure, Taura, Gwiwa, Birnin Kudu, Babura, Maigatari, Hadejia, Kirikasama, Gagarawa and Mallam Madori

A cross section of participants at the launching of the Zinder-Daura- Jigawa -Kano trade corridor

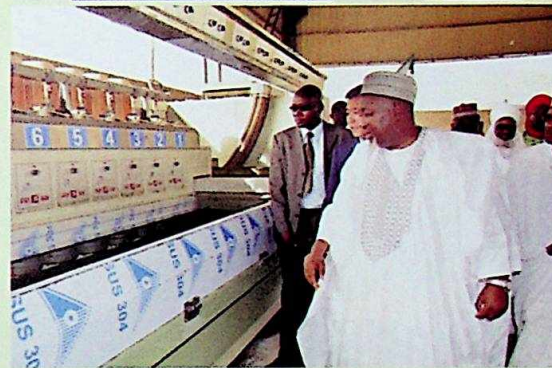

INVESTMENT PROMOTION

A top priority of the Muhammad Badaru administration is the promotion of commerce & industry as a key driver in growing the State's Economy. The Government is committed to providing the necessary enabling environment for continuous improvement in the Business Environment and Investment Climate in order to expand the role of private enterprise. InvestJigawa, A full-fledged agency, was set-up for the sole purpose of mobilizing private sector investments into Jigawa State and acting as a one-stop shop for the potential investors. The agency was formalized by this administration on the 20th of June 2016.

Through a re-invigorated InvestJigawa, investment promotion activities are now being effectively and efficiently coordinated across the Ministries, Departments and Agencies of Government.

The Agency is presently handling approximately 30 "green field" investment projects expected to generate an investment portfolio of over **US\$1billion** generating over **50,000 jobs**. While a number of Investments were actualized courtesy of His Excellency's business acumen and personal knack for investment mobilization, others have remained in the pipeline.

Among those actualized are: Vinylon footwear limited, Granite tiles manufacturing by GCC Vanguard in Dutse, Majestic Farms, ; Danmodi Foods in Kafin Hausa, and Klysat rice mills, Hadejia Jigawa Rice mills, Gujungu, Three-Brothers Rice Mill in Hadejia as well as WACOT- a sesame cleaning plant, Fine Baby Limited (a modern Garment Factory at in Maigatari) and Jifatu Food processing, Dutse

The GCC Vanguard factory in Dutse

Others in progress or at various implementation stages include Gagarawa Sugar Project by the LEE Group; Dangote Rice Project; BUA Rice Mills at Gujungu, Sabrouk granite tiles factory, Birnin Kudu. Mallam Allu Farms, B/kudu and 2 fertilizer blending plants at Gujungu and B/kudu. Also a number of renewable energy investment projects have been processed with land titled and acquired. These include Nova Scotia Power Development Company establishing an 80MW solar power plant in Dutse, Oriental Renewable Energy to develop a 50MW Independent Solar Park, Pan African Solar investing in a 130MW Solar Park in Dutse and Hadejia.

Launching of the Dangote Outgrower Scheme

The Vinylon footwear factory is providing jobs for hundreds of locals

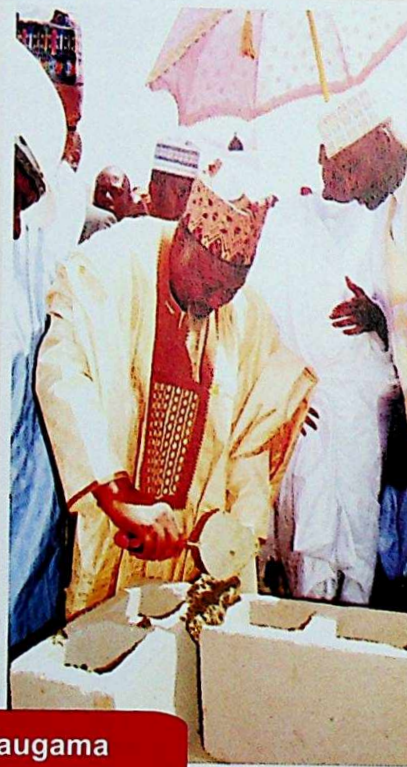

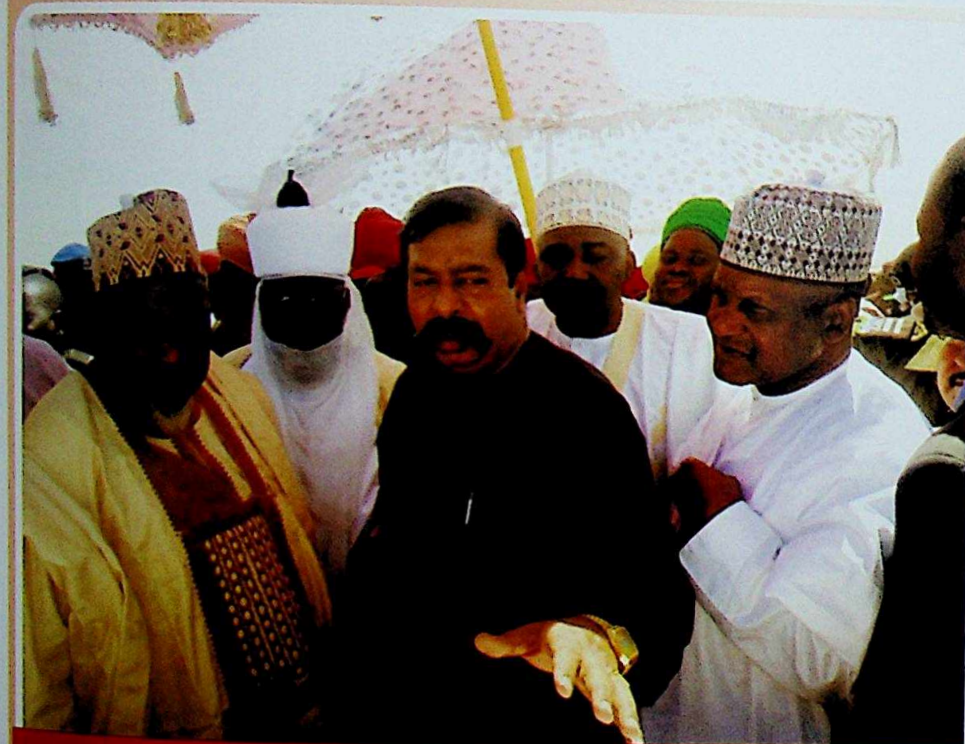

A consortium of international lenders converge in Dutse for NSPDL's 80MW solar project

The 320MPD rice factory, Gujungu

Groundbreaking ceremony of Northern Agri-business sugar factory, gagarawa

Groundbreaking ceremony of 32MTPH Dangote Rice factory in Kaugama

The process of establishing a Federal Government driven 1,000 MW Solar park in Gwiwa Local Government is also in progress with land identified and process of providing title underway.

In its efforts to improve the business climate in the State, a number of policies are being instituted to enhance ease of doing business in the State. It should be noted that Jigawa is the first State in the Country to fully adopt the principles of Responsible Agriculture Investment (RAI). The implementation of RAI has led to the development of the Land Acquisition and Resettlement Framework (LARF). The LARF framework provides guidelines for the acquisition of Land for Large Scale Agriculture, and ensures that rights of all land users are adequately protected and improves investor confidence in the process.

Land Administration

At the inception of this administration, less than 1% of the landed property in the State was titled. Recognising the socio-economic impact of land titling, Government in collaboration with GEMS3 – a DFID program, quickly embarked on improving the Systematic Land Titling Registration by deploying GIS technology to capture land titles and properly document data of land owners using a secured, efficient and effective database platform. The exercise, which is empowering land owners with a timely access to land titles and certificates is also adding value to land ownership in the State, making it easy for land owners to access credit for their businesses and also helping Government with accurate data for development planning.

So far, 24,680 parcels of land have been registered within the State. The success recorded in the exercise has prompted the acceleration of this program S into the zonal offices of Hadejia, Kazaure, Gumel, Ringim and Birnin Kudu slated for later part of this year.

public display of land titles

To protect the rights of land owners and their host community, the Ministry of Land in collaboration with the Jigawa State Investment Promotion agency (InvestJigawa) and GEMS3 produced the Land Acquisition and Resettlement Framework, the first of its kind in Nigeria. The framework which is in compliance with the Responsible Agriculture Investment (RAI) principles has been adopted as a regulatory framework for the allocation of land for large scale agriculture in the State. The framework ensures that the livelihood of Project Affected Persons are sustained during the execution of the project while also protecting the community interests in the project and by extension ensuring that the people and the State derive full benefits from the projects.

In the period under review, the Ministry has allocated land for several projects after undergoing an open and transparent process as follows:

- 6 hectares of land granted to GCC at Kachi, Dutse District, Dutse L.G.A for the construction of tiles and marbles factory.
- 12,000 hectares of land granted to great Northern Agribusiness Ltd for the production of sugar cane plantation at Gagarawa and 1000 hectares for factory.
- 250ha granted to Dangote Rice Limited for the construction of a rice mill.
- 200 hectares of land granted to NOVA SCOTIA for 80MW solar power generation at Dutse.
- 200 hectares of land proposed to be pan African Solar for generating 125MW solar power project at Dutse and Hadejia.
- 100 hectares of land proposed to be granted to Oriental Renewable energy along Limawa War wade road for 50MW solar power project at Dutse.
- 36 hectares of land granted for Hadejia Specialist hospital including the access road surrounding the site at Hadejia town
- 110 hectares of land granted to the Federal University Dutse Cooperative Society Limited at Hammayayi Road Dutse for housing scheme and resettlement layout, e.t.c.

In addition to the aforementioned activities of the ministry, it has embarked on the construction of official residences of the Secretary to the State Government (SSG) and the Head of Service at the cost of N55.99M and N57.7M respectively; Both are nearing completion

The ministry also paid the sum of 211,811,080.00 for compensation of structures affected by the construction of township roads (Phase I) in Roni, Sule Tankarkar, Maigatari, Kafin Hausa, Kazaure, Guri nd Kaugama

JUSTICE ADMINISTRATION AND SECURITY

JUSTICE

The Governor Badaru led administration is committed to improving the delivery of justice at all levels, for all, through the coordinated efforts of all formal and informal justice institutions. The Justice ministry has been strengthened for efficient service delivery. This has led to some gains over the last 3 years as captured below:

The Judicial commission has recorded remarkable success in conducting Alternative Dispute Resolution (ADR) in our various community law centres across the State leading to reduction in case hearing time.

More than 3,500 less privileged citizens have benefited from either mediation or free legal representations in various courts.

Out of the 455 criminal cases received from the Nigeria Police Force, the ministry of justice filed charges for 320 out of which 165 have been successfully prosecuted and disposed.

5 protracted and highly sensitive civil suits against the State (some of which have lasted for 15 years) pending in various courts in Nigeria were negotiated and settled out of court

There are 3 rent tribunals established by the rent control law of the state; the rent tribunals have disposed more than 500 cases in the period under review

In the period under review, about 15 bills have been prepared and submitted to the House of Assembly for legislative action.

SECURITY

The safety of lives and property is of paramount importance to the Governor Badaru led administration. This is evident in the level of interventions given by the State Government to support covert and overt operations of security operatives in the State. The State security council and its

committees have been strengthened to handle matters of security efficiently. In specific terms, the following interventions are being implemented by the council:

1. Support to State's Security Joint Task Force (Operations Salama) has

been given priority with prompt disbursement of monthly operational and manpower bills

2. Special operations to curb kidnapping and prevent the incursion of insurgents into the State are being supported on a monthly and quarterly basis. These operations include: operations flush, Operations Haske Bui, and the special COAS operation

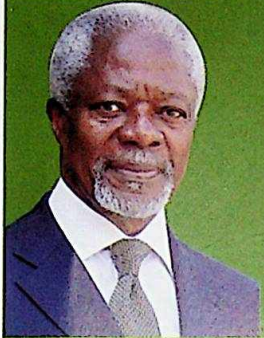

in Dalman and Lamba forests

3. The council also initiated and supported covert intelligence operations to secure the border areas from insurgency and criminal infiltration.

4. A special operation to secure girls boarding schools is in place across the State.

TESTIMONIALS

I was pleased to hear from my team of your commitment to prioritizing agriculture to ensure food and nutrition security in your drive to create jobs and inclusive economic development in Jigawa. I particularly appreciate your support for Dangote's rice out-grower programme and other emerging agribusinesses in your State, which are assisting smallholders to become profitable agro-entrepreneurs

Mr. Kofi Anan,
Former UN Secretary General

Alh. Aliko Dangote
President and GCE,
Dangote Group
1st March, 2018

The visit to Jigawa State is to understudy the Jigawa Cluster model with a view to explore similar initiative for roll-out nationwide

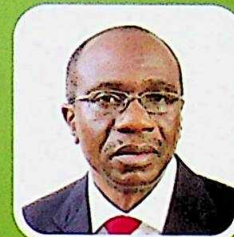

Chief Audu Ogbah,
Hon. Minister of
Agriculture

What we have seen in Jigawa is quite commendable. The State is blessed with wetlands and committed political leadership of Governor Badaru, I believe the sky is the limit.

His Excellency
Alhaji Atiku Bagudu,
Governor Kebbi State

With the committed political leadership, Jigawa will soon reach a rice production level of over ten million tons out of the six hundred million produced every year in the world. I am sure Jigawa is among the States that will give Kebbi state a competition and we are ready for it.

The cluster model of Jigawa State demonstrates how people empowerment at the local level positively impacted on the rural economy.

Mr. Godwin
Emefiele,
Governor,
Central Bank
of Nigeria

“ Jigawa State is an investor friendly state and they deserve all the support we can give them, You have seen that during this ceremony we have already promised to double the capacity of the mill and committed to setting up a tomato processing factory here. If you're looking for investment climate, Jigawa State is one of the best and that's why we are here ”

We congratulate His Excellency and the entire country, this is the first state that commits and implements the one PHC per ward agenda

We are particularly delighted to be associated with the efforts of the State Government and looking forward to further fruitful collaboration

TESTIMONIALS

Jigawa State has been at the forefront, and I must commend his Excellency's efforts at making the state one of the forerunners in social protection in Nigeria. you are the 1st State to approve and adopt the Federal Governments made pragmatic efforts at starting a state owned and driven cash transfer program, and you must be encouraged and celebrated. “

Apera Iorwa,
National Coordinator,
National Social Safety Nets Coordinating Office

I have never seen a very committed and peace loving person than the Governor of Jigawa, Alh. Muhammad Badaru Abubakar, MON, mni in his efforts toward payment of salaries and gratuity as and when due. I am appealing to other Sate Governors to emulate him

Comrade. Ayuba Wabba,
President Nigeria Labour Congress

We go to States to fight for the welfare of workers but we are here in Jigawa to appreciate and say thank you' your Excellency in your efforts in the payment of workers salary, leave bonus as well as pension and gratuity to retirees

Comrade. Micheal Olukoya,
President, Nigeria Union of Teachers

"It is only in Jigawa that pensioners answer their names, Senior Citizens as demonstrated by the pension administration that got the support of His Excellency Muhammad Badaru Abubakar by paying their pension on the 10th of any month which is the best in the Country".

Chief Abel Afolayan
President, Nigerian Union of Pensioners

TESTIMONIALS VOX POPULI

The fact that my parents don't have to worry about my school fees anymore gives me joy every day. I want to thank the Governor for introducing free education for all Students in the State.

Usman Musa,
Student, GUCS, Dutse

The education sector in the State has witnessed improvement in infrastructure and facilities. My school is now fully equipped with laboratory equipment and teaching aids that is now helping us in the delivery of practical trainings to our students. This Government has also solved the perennial water shortage crisis in my school

Ahmad A Muhammad,
Teacher, GUSS, Maigatari

I am so happy and delighted at the welfare packages given to teachers by the Governor Badaru administration. We are being trained on a regular basis and now have access to car loans. The performance of our students have also improved. Thanks to the Government for introducing the e-mallam platform.

Abubakar Ibrahim,
Teacher, GUCS Dutse

Our Students used to sit on the floor for their lessons. This situation impacted negatively on their learning abilities and became a source of concern to the academic staff. Today, we are happy that this ugly situation has been addressed by the present administration

Director, Mallam Madori Unity School

We used to have serious congestion in this hospital, but now because of the construction of new wards we have enough space for the patients and it has eased our operations. We can only say thank you Governor Badaru. Thank you very much!

Zuwaira Isah
Staff, Ringim General Hospital

The Government has really done well by building us a modern hospital here in Jaudi. This hospital is currently serving hundreds of people from several communities who hitherto had no access to modern healthcare services.

Aminu Shuaibu,
Resident, Jaudi Community

The thresher that was given to me by this Government has become a source of livelihood and sustenance for my Family and I. May the Almighty God bless the Executive Governor of Jigawa.

Abubakar Lawan

I thank the Jigawa State Governor for giving us this Vehicle. With this commercial bus, I pay my children's School Fees and even help others.

Ubale Adamu Shuwrin

TESTIMONIALS VOX POPULI

From the three goats I received from this Government, I now have ten. Whenever I have any problem I sell one and take care of it. I thank the Governor and pray he continues so that more people will benefit from his empowerment initiatives.

Binta Lawal

I was given a mini rice mill by this Government and right from the day I started operating with the mill (that is three weeks ago) we mill around 15 bags a day. I am getting a lot of benefits from this milling machine. In fact, I've bought a Ram for Sallah celebration with the money I got from this machine

Umar Usman

Spraying is now what I do for a living. With the money I am getting from this sprayer I take care of my parents and paid my brother's school fees.

Muhd Abdullahi

I have never been able to buy even a bicycle in my life, but now I own a Motorcycle because of this Harvester that the Governor distributed to us. I have no words to express how thankful I am to His Excellency.

Abba Suleman, Hadejia

My water vending business hit a brick wall when the Governor Badaru improved public water supply to our town. For many months, I was jobless until I benefited from seed funds from the Government to start my toy and books business. Alhamdulillah, I am back on my feet again.

Ibrahim Ali
Babura Resident

I can attest to the fact that water supply in this town has greatly improved. The inconsistencies in supply that characterized the past have been tackled. We thank Governor Badaru for this intervention.

Mal. Audu
Babura Resident

We have never seen crop yield of this magnitude. The Government has done so much for our people through this cluster program. If every government had done the same, I am sure we would be out of poverty by now. Most of the villagers may not have to leave the village during the dry season because they can depend on what is cultivated this year. In fact it is enough for most of us to diversify into other businesses.

Ibrahim Haruna,
Farmer, Gaskolin Babura Groundnut cluster

We got support from Govt, which includes seeds, fertilizer and pesticide in the ten hectares we cultivated. I have been farming for several years and have never seen an intervention as robust as this.

Danlami Rattaye,
Local Farmer

In my farm this year, I have experienced increase in crop yield in triple folds. I can now confidently pay for the medical needs of my children. Thank you Governor Badaru for this intervention.

Kattume Ibrahim,
Farmer, Toni Ku tara sesame cluster

Fellow Citizens, I see a future where...

- every Jigawa indigene will have equal access to opportunities to excel in their chosen fields of endeavour and make a decent living,
- every child will have access to quality education regardless of location and family status,
- there will be top notch healthcare services to cater for all Jigawa residents,
- indigenes will be able to participate freely in governance and decision making,
- the wealth of the State will be fully explored for the greater good of the people leading to less dependence on federal allocation.
- Poverty will be greatly reduced
- every indigene will be proud to call Jigawa their home.

This will only be possible with your support and contributions.

Let us join hands to make Jigawa a better place
