

## **5 (d): Monitoring and Evaluation and Lessons Learning Plan**

This Monitoring and Evaluation and Lessons Learning Plan describes the measurements, analysis, and reporting that would be used to assess the performance of the NGF during the period 2013 – 2015 and beyond and explains the tools that would be used to structure the Forum's M&E and learning processes.

### Purpose and Scope of NGF's M&E System

The principals of the NGF have on several occasions expressed their fears that the forum and its secretariat will not be relevant in the eyes of the people unless both can demonstrate, in an evidenced based way, that the citizens of their respective states are being governed in an accountable and transparent way. This demand for accountability and transparency in governance was eloquently articulated by the Chairman of the Forum when he said:

“...there is a limit to how much governors can preach to the people about what they have accomplished. Sooner or later they must start delivering tangible results otherwise the forum will become irrelevant. The forum must be able to show that it is contributing to good governance in the states and that it is assisting the governors to deliver the dividends of democracy to the people...”.

This demand for good governance, accountability and transparency, greater development effectiveness, and the delivery of tangible results has created a demand for results-based monitoring and evaluation of the strategies, policies, and programmes of the forum. The purpose of is M&E and lessons learning plan is, therefore, to:

- Provide the basis for the NGF's Secretariat to measure and report on the results of its activities.
- Identify and measure an appropriate set of indicators in a common way to enable the Forum, the State Governments, and others to aggregate the impact of the Forum across its range of activities.
- Work towards a shared understanding of acceptable accuracy in the estimation of results so that the Forum's reported results can be seen to be both credible and reliable and to use these results for results-based management of the Forum, particularly to validate the assumptions on which the logic of its operations is based.

The proposed M&E system presents a common framework for monitoring and evaluating the results accruing from the programmes and projects initiated by the NGF during the period 2013 – 2015, focusing on three key levels of M&E: outputs, outcomes, and impact evaluation.

Presently, there is no M&E unit in the Secretariat and very little organized performance management and/or performance measurement of NGF activities<sup>1</sup> have been carried out since its inception.<sup>2</sup> But this does not mean that M&E activities of relevance to the Forum have not taken place. Some M&E does take place at different levels in the different states as well as at the federal government level even though, in most cases, they are very rudimentary.<sup>3</sup> As funding will continue to be a constraint, the Forum will only be able to afford a small but effective M&E outfit whose goal should be to ensure that M&E in the NGF receives the attention it deserves. Even though small, the unit should be able to provide adequate information for the management and assessment of NGF initiatives given the fact that some of the M&E information of interest to the forum could be obtained from existing State M&E systems. This will, however, will require better coordination and collaboration between the proposed NGF M&E Sub-Unit and State M&E systems.

### The Programme Logic of the Forum

The Monitoring and Evaluation (M&E) and Lessons Learning Plan of the NGF's 2013-2015 Strategic Plan is based on the set of goal, strategic objectives, results, and targets presented earlier in this strategic plan. The NGF M&E Logic Model is graphically presented in Figure -- below. It shows the logic behind the NGF with respect to its goal, strategic objectives and expected results and outlines the sequence of outcomes and intended causality. As represented, the overall goal of the NGF is "to be a major player in nation building, enhancing economic transformation and poverty reduction at the sub-national level with its Secretariat serving as a functional administrative organ and policy hub." This is to be accomplished by: sustaining and improving the Forum's ability to play a significant and influential role in dispute resolution at all levels; strengthening the process of peer based learning and sharing of developmental experiences and increasing its potential to improve good governance and socioeconomic development at all levels; enhancing its visibility and its capabilities with its stakeholders; and strengthening its secretariat as an efficient and effective administrative organ that acts as a functional policy hub delivering context specific and relevant policy advice and providing all round capacity strengthening services to States.

---

<sup>1</sup> *Performance management* (management by results) uses performance information to manage organizational capacity and processes and helps attain agreed-upon performance goals, allocate and prioritize resources to meet those goals, and report on the success in meeting those goals. *Performance Measurement* comprises *Monitoring* which focuses on the collection of information about the performance of the NGF to show the extent of progress in the use of allocated funds and other inputs, and *Evaluation* which aims to determine the relevance and fulfilment of Forum's goal and objectives, project effectiveness, development efficiency, and its impact and sustainability.

<sup>2</sup> M&E is presently the remit of the Economic Adviser of the Secretariat. He has, however, not undertaken much M&E activities due to the absence of an M&E framework.

<sup>3</sup> Individual line Ministries in most States are carrying out some M&E activities of some on-going capital projects in the form of field visits and spot-checks on projects and focuses at the activity level but these are not usually linked to a broader results chain.

## The M&E Plan Matrix

Table -- below presents the matrix for identifying the data that would be needed for the performance management of the activities of the NGF during the period 2013 -2015 and for their performance evaluation and impact assessment, the source of the data that would be used, how often the data will be collected, by whom it will be collected, what methods will be used in data collection, and in which reports and audiences the data will be presented.

The aim of the matrix is to identify the M&E roles and responsibilities of the NGF staff and other stakeholders. It builds upon the information already contained in the logical framework. It identifies the pertinent indicators that would be used to assess performance and develops the related assumptions and risks. Finally, it provides a basis for ensuring that the relevant data is collected, analysed and used.

### Administration and Management of the M&E Activities

There will be need for an M&E Sub Unit specifically charged with the responsibility of administering and managing the M&E activities of the Forum. Given the present administrative set-up in the Secretariat of the Forum, the proposed M&E Sub-Unit could be located in either the Research and Publication Unit or in the Knowledge Management Unit.<sup>4</sup> Wherever its location, the M&E Sub-Unit would need to be manned by a competent M&E Coordinator<sup>5</sup> supported by consultants hired on demand and on a need basis.

There would be need to make available adequately skilled M&E personnel to man the proposed M&E Sub-Unit so as to ensure that all the tasks contained in the M&E Plan are successfully completed. In addition to the M&E Coordinator, the M&E Sub-Unit should also include one Technical Assistant and Research Assistants (Youth Coppers) who possess a range of relevant disciplinary backgrounds. These M&E personnel should be supported by a capacity development plan with clear activities including formal training, in-service training, mentorship, and coaching.

There should be an explicit budget for the M&E activities which should include clear entries for the staff of the proposed M&E Sub Unit and the cost for putting in place the necessary conditions for a successful results-based M&E system<sup>6</sup>.

---

<sup>4</sup> The Secretariat presently operates under three major units: Federal Liaison Unit, Policy Analysis Unit and Research and Publication Unit.

<sup>5</sup> Assist in developing systematic and realistic monitoring and evaluation plans that capture quantitative and qualitative data to report on all indicators in the proposed in the M&E Plan; assist with the implementation of baseline surveys, monitoring and evaluation exercises for NGF programmes/projects and conduct impact assessments for all aspects of the NGF agenda during 2013-2015; assist with documentation and reporting of monitoring and evaluation results, lessons learned and best practices for dissemination throughout the different State Governments and to all NGF stakeholders.

<sup>6</sup> These will include costs for: data analyses and report writing; consultants/technical assistance time (Fees, travel expenses, etc.); facilitation of workshops; undertaking of training and capacity building programmes, materials and equipment; publication and documentation; and M&E events (costs for venue, travel and per-diems, materials, etc.)
