

INVESTMENT OPPORTUNITIES

VISIT • LIVE • WORK • INVEST

The vision of my administration is to build a prosperous, highly educated, technology driven, ethnically harmonious, caring and pacesetting State in Nigeria.

The policy thrust of my administration centers around industrialization, so as to create employment opportunities for our children. We hope to establish one industry in each of the 31 local government areas in the state using the private-public-partnership model

His Excellency, Chief Godswill O. Akpabio
Executive Governor, Akwa Ibom State

Brief Profile

History:

Akwa Ibom State was created on September 23, 1987 from the former Cross River State. The creation of the state marked the climax of a long sustained struggle for a separate State by the people of the "Mainland" part of the former Cross River State.

Location:

The State is located 4o 32' and 5o 53' North and Longitude 7o 25' and 8o 25' East.

Area:

It covers an area of 8,412 square kilometres. The Atlantic Coastline stretches 129 kilometers from Oron in the East to Ikot Abasi in the West.

Population:

The population of the State is about four million. The average population density is 463 inhabitants per square kilometres.

Capital City:

The city of Uyo which has witnessed great transformation from a local government headquarters to the status befitting of a modern state capital.

Other Major Cities:

The major cities in the state include: Ikot Ekpene, Eket, Abak, Oron, Ikot Abasi and Etinan.

People:

The state comprises several related sub-ethnic groups. They include: Ibibio, Annang, Oron, Eket, Ibeno, Mbo, Okobo and the Andonis. They share a common ancestry and are reputed to be the first settlers in present day south eastern Nigeria.

Climate :

Tropical climate marked by two distinct seasons: the dry season (November – March) and the rainy wet season (April – October). The wet season is usually interrupted by a short dry spell in August often referred to as "August Break."

Temperature :

The average temperature of the state ranges from 23 C to 31 C.

Vegetation:

The state has three distinct vegetation zone: The saline water swamp forest, the fresh water swamp forest and the rain forest.

Mineral Resources:

The mineral resources in the state include: crude oil, natural gas, limestone, gold, salt, silver nitrate, glass, sand, kaolin.

Governor - Chief Godswill Akpabio, CON

Deputy Governor - Mr. Nsima Ekere

Nigeria's Choice Destination

AKWA IBOM STATE

Since the inauguration of Chief Godwin Akpabio as the third democratically elected Governor of Akwa Ibom State on May 29, 2015, the State has not been the same again. The total transformation of the state has been the focus of his administration. In virtually all the sectors, policies of the state government have impacted positively on the lives of the people of the state.

The pace of infrastructural and socio-economic development witnessed in the last four years of Governor Akpabio's transformational administration has been phenomenal and in fact baffling for even the most ardent critics of the current administration. The achievements of the Akpabio administration in all sectors has earned it the sobriquet of harbinger of uncommon transformation, a feat that has been hailed by international and local observers, including the much dreaded Wikileaks which cited Akwa Ibom under Governor Akpabio as State to watch in terms of infrastructural development.

HIGHLIGHTS

1. Free, compulsory and qualitative education
2. Free health care for children, expectant mothers and the elderly
3. 15 new bridges linking communities
4. Completed phase 1 of Ibadan International Airport, construction of new International terminal building and second runway
5. Over 290 new roads constructed
6. Three new flyovers at Itam Junction
7. A brand new Governor's Lodge
8. Nigeria's first e-library
9. First in Africa underground drainage system
10. Six new general hospitals
11. A brand new specialist hospital and referral center
12. Completed the 191 megawatt Ibadan power plant
13. Gas processing plant with 69km of gas pipeline
14. Comprehensive rural electrification scheme which has
15. linked over 1,400 communities to the national grid,
16. making the State to achieve 85% electricity coverage
17. World class Tropicana Business and Entertainment Resort
18. Improved worker's welfare and payment of N21,000 minimum wage
19. Training and empowerment of over 4000 youths with
20. N500,000 each under the Integrated Farmer's Scheme
21. Effective security coverage and the launching of Operation Thunder and the Quick Response Squad
22. State-of-the art banquet hall at the Government House
23. A brand new Federal prison and correctional centre
24. Over 6000 rural development projects in the 31 LGAs
25. Engagement of 2060 women and youths under the newly launched Green Brigade programme
26. Training and empowerment of 4500 women with the sum of N250,000 each for commercial agriculture under the women in agriculture project (WAEDEP)
27. Construction of 30,000 capacity ultra modern
28. Olympic size stadium in Uyo
29. Construction of the 8-lane third ring road with 3 additional flyovers

We're ready for Investors

Most nations are aspiring to enter the fast lane of global industrial development, founded on a vibrant and prosperous economy. Those who have already achieved this feat are working hard to sustain and consolidate their gains. The need to diversify Nigeria's economy and ensure less dependence on oil have been widely advocated for the survival of the nation.

This position had since found a suitable place in the development agenda of the Akwa Ibom State Government under the leadership of Chief Godswill Akpabio which has invested significantly in the development of requisite infrastructure for the industrialisation of the State.

With the Uncommon Transformation agenda that has brought forth infrastructural renaissance; the Ibom International airport with a Maintenance Repair and Overhaul (MRO) facility; the free and compulsory education, the free health care programme, radical rural development initiative, security, youth and women empowerment, all is set for a holistic industrialization of the State through the establishment of at least one industry in each of the 31 Local Government Areas of the State under the public private partnership (PPP).

Already, Government has set aside the sum of N20 Billion in the 2012 budget as Industrial Development Fund to be accessed by entrepreneurs in the State. This government-

private sector arrangement is beginning to yield dividends, and positive responses from the private sector have been received. Recently, the Akwa Ibom Investment and Industrial Corporation kick-started the process with the first Akwa Ibom State Entrepreneurial Forum with the theme "Partnership for Industrial Transformation of Akwa Ibom State". The aim of the forum was to enlighten local entrepreneurs and all relevant stakeholders of the possibilities created by government and investment potentials that abound in the State.

With the rich natural resource endowments spread across the 31 Local Government Areas of Akwa Ibom State, coupled with the resourcefulness of the people and the determination of the Chief Godswill Akpabio administration, Akwa Ibom State, will soon join the league of strong, vibrant and self-reliant economies, founded on industrialization. The State industrialisation drive has been given further impetus with the establishment of Ibom Industrial City project which will accommodate a deep seaport within a free trade zone; Akwa Ibom is undoubtedly ready to host investors across the globe.

This publication highlights the Uncommon Transformation of the State by the Governor Godswill Akpabio administration, as well as the rich investment potentials which make Akwa Ibom State a choice destination for investors and tourists. Welcome to Akwa Ibom State, the emerging economic hub in the Gulf of Guinea.

Aniekan Umanah
Honourable Commissioner
for Information & Communications

Education

Besides other physical evidences of development, perhaps the most enduring legacy Governor Godswill Akpabio has bequeathed to the people of Akwa Ibom State is the free and compulsory educational policy of his administration. Under this policy, Akwa Ibom children of school age go to school free from primary to senior secondary level. In addition to free tuition, the State pays a subvention of N100 per primary school pupil and N300 per secondary school student.

State of the art e-library

Ibom International Airport

The completion of Phase 1 of the Akwa Ibom International airport has been one of the unique achievements of the Akpabio-administration. This has launched the state in the global map as business and tourism activities in the state have been boosted with direct connection of the state with the rest of the world. The airport has become a hub for pilgrims operations to the Holy land.

Features of the Airport include:

- 3.6km international standard runway
- Daily domestic flight operations by Aero Contractors and Arik Airlines (Uyo-Lagos-Abuja routes)
- First class Interim domestic terminal.
- Certified rescue and fire fighting facilities
- A modern Airport Police Station
- World class Maintenance, Repair and Overhaul, MRO, facilities underway.

Models of the New International Airport Terminal Building

Power Sector

The Akpabio-led administration has completed the Ibom Power Plant project to enable the state to reap from the huge investment. The plant will generate 685 megawatts of power and is being implemented in two phases.

Phase 1 has a capacity of 191 MW and is already producing electricity.

The plant is to enhance power generation through the existing national grid and to provide much needed uninterrupted power supply to existing and future industries in the State and in the region. The plant will be the catalyst for industrialization of the State. The project has achieved the following:

- Support Agreement with the Federal Ministry of Power and Steel.

- Negotiations on the Gas Supply Agreement have been concluded and agreements reached.

- Installation of power transmission lines from Ikot Abasi to Eket.

- Village-to-village rural electrification scheme which has linked an additional 1,400 communities to the national grid, thereby making the State to achieve 85 percent electricity coverage, with a target of 100 percent by 2012

Ibom Power Plant

Works, Infrastructure & Transport

Prior to the inauguration of the administration of Governor Godswill Akpabio, various major roads, especially federal roads, were death traps. Such roads included the Afaha Obong- Etim Ekpo-Iwukem road;

Abak – Ikot Ekpene road; Nung Udoe Itak – Use Ikot Amama road, Enin Nsit and several other internal roads across the state which were impassable, thereby cutting off residents of those areas from activities of the rest of the State

In keeping with his campaign promises, upon assumption of office, Governor Akpabio awarded contracts for the construction of the roads. So far over 250 roads covering more than 700km have been constructed.

Reputable companies like Julius Berger, Setraco, Stemo, etc. alongside indigenous companies are handling the construction of these roads. High light achievements in this sector include:

- Over 260 new roads covering over 700km have been constructed across the State including over 200km of Federal roads .
- Re-modeling and renewal of Street/traffic lights in major roads and junctions in the State
- 3 new Flyovers at Itam junction,Uyo
- Construction of over 12 new bridges across major roads in the State.
- Reconstruction of collapsed concrete bridge at Ikot Abiaenyie
- Procurement of a grader each for the 31 LGAs of the State to ensure periodic maintenance of rural roads
- First in Africa underground pipe jack-jacking technology drainage for flood and erosion control in the State capital.
- 400 Hyundai Accent Taxi cabs
- 10 Marcopolo buses
- 250 Ford-Focus Taxi cabs
- 40 Toyota Hiace (18 Seater) buses
- 3rd Ring Road
- Dualisation of Aka-Nung Udoe Road

Ikot Ekpene Road

Idoro Road

Itu Road

- Training and empowerment of over 3000 youths with N500,000.00 each under the Integrated Farmers Scheme (IFS)
- Procurement and distribution of adequate metric tons of assorted fertilizer at 60 per cent subsidy to farmers in the last four years
- Acquisition of 72 farm tractors
- Generated 4,000 jobs for Akwa Ibom people under the commercial agriculture programme and also generated additional 1,500 direct employment opportunities
- Management of central abattoir and the institution of Akwa Ibom Meat Hygiene/ Van Project.
- Partnership with the Federal Government of Nigeria for the on-going Itu irrigation, drainage and flood control project.
- Partnership with the Federal Government for the on-going construction of 25,000 metric ton grain storage silo at Okobo and Ibiono Ibom Local Government Areas.

SECURITY

The state Governor, Chief Godswill Akpabio has put in place measures to manage internal security in the state. This is exemplified in the following:

- Setting up of Operation Thunder & The Quick Response Squad for maximum security.
- Donation of gun boats to the Nigerian Navy to check maritime crime
- Investment of over 300 vehicles, Armed Personnel

Carriers, to the Police and other security outfits in the state.

Donation of communication gadgets such as: walkie talkies, VHR radios, CCTV, PABX intercom, scanning equipment and monitoring satellites to security agencies to enhance capabilities.

The state Governor's interest in the security of state is predicated in his brief that:

The enviable position we occupy in the Niger Delta region must be sustained at all cost. This is the only way in which the much needed investors with the multiplier effects of mass job opportunities can be encouraged

YOUTHS & SPORTS

To fast-track youth and sports development in the state, the administration had embarked on the renovation of Uyo sports stadium to provide facilities for adequate preparation of athletes for better outings at national and international competitions. The administration has also concluded plans to construct a 30,000 capacity stadium and a comprehensive sports park. It would be a one stop sports arena with up-to-date sports facilities, outdoor and indoor facilities. We learnt that design and other preliminary work is on and it is expected to be delivered soon.

Model of Ultra Modern Stadium under construction

HOUSING & URBAN RENEWAL

One of the basic necessities of man is shelter and Governor Godswill Akpabio is vigorously tackling the housing needs of the people. As a promise keeper, he has kept to his avowed pledge of providing modern and affordable houses to the people of the State. In line with this, work is ongoing on the construction of 10,000 modern and affordable houses to the Akwa Ibom populace. Other major achievements in this sector include:

- State-of-the-art Governor's Lodge complex within 16 months
- 310 prime-unit mini estates at 10 per local government all the local government areas mainly for local government chieftains. The project is undertaken through the State/Local Government Joint Account Committee.
- First class banquet hall at the Government House
- Housing estates in Eket, Uyo and Ikot Ekpene
- Remodeling of Uyo and Ikot Ekpene Urban city

Health

The health sector in Akwa Ibom has experienced a revolution since the advent of the administration of Chief Godswill Akpabio, including:

- Free health care services to pregnant women, children and the aged in the society.
- Five new cottage hospitals in Essien Udim, Ibeno, Ukanafun, Eastern Obolo and Ika
- 20th Anniversary International Hospital
- N50million to University of Uyo Teaching Hospital, UUTH and building of pediatric block
- First oxygen plant at General Hospital, Iko Ekpene
- Activation and expansion of eight Anti-Retroviral therapy centres, 15 prevention of mother to child transmission, PMTCT centres and 37 HIV counselling and testing centres. All rendering free services.
- State-of- the art ambulances
- New PHCs in the three senatorial districts of the State
- Purchase of brand new utility vehicles for all medical doctors in the state employ

Industrialization

Governor Akpabio's administration is embarking on a holistic industrialization of the State through the establishment of at least one cottage industry in each of the 31 Local Government Areas in the State. Targeted small and medium scale industries are:

- Cassava/Potato starch production
- Edible oil production
- Sea-food
- Raffia Palm processing
- Animal feed production
- Fertilizer production
- Wood waste processing
- Production of sanitary wares
- Egg-bed packaging
- Detergent/Soap production
- Ice-block making

- Bottling of water juice, oil
- UPVC window/doors production
- UPVC pipe fittings production
- Cement concrete block production
- Corrugated paper board production for cartons

Another key project central to the envisaged industrial revolution of the State is the Ibori Industrial city and the Ibadan Integrated Deep Seaport development. Governor Akpabio's administration is pursuing the project with the vigour it requires. With work progressing at the site, it is expected that the project when completed, will be the economic and industrial hub in the Gulf of Guinea. The Ibadan Integrated Seaport project has many components among which are; the Oil & Gas Processing Plant, the Export processing zone, the fertilizer Plant and other Petroleum products processing plants.

Rural Economic Empowerment / Life Enhancement

To complement the establishment of industries in all the 31 Local government Areas in the State, the administration of Chief Godswill Akpabio is promoting Rural Economic Empowerment by aggressively financing and encouraging the creation of micro-small and medium scale enterprises particularly in the agro-allied sectors. This explains why the administration is aggressively putting in place the support infrastructure such as uninterrupted power supply, good roads network and water supply. The rural people have already taken full advantage of this by establishing small scale enterprises such as barbing & hair dressing saloon, welding workshops, viewing centers, electronic appliances repair shops etc. Through the women in agriculture project (WAEDEP), 4500 women have been trained and empowered with N250,000 each for commercial agriculture while over 3000 youth have been trained and empowered with N500,000 each under the integrated farmers scheme.

The Fist in Africa Pipe Jacking Underground
Drainage System

Ibom Tropicana

Ibom Tropicana entertainment centre was created in the image of Sun City of South Africa and the famous Disneyland. The centre which sits on a landmass of 82 hectares is expected to create job opportunities for thousands of unemployed youths of the State. Some of the features of the complex include:

- Cineplex with six screen cinema halls and a seat capacity of 1030 completed and commissioned.
- A standard shopping mall with 59 standard shops, and two banks service corridors etc.
- An ultra-modern convention centre with a multi-floor capacity of 5000
- A 15-storey five star hotel with 250 rooms.
- A Theme Park with Dry and Wet Rides/Attractions covering an area of three hectares.

Ibom Golf Resort

COOPERATIVES

Working through the Akwa Ibom Cooperative Movement and the Akwa Ibom Cooperative Federation, AKCOFED, several cooperatives have been formed with remarkable improvement on the income profile of low income earners through:

- Empowerment of 95 Cooperative societies with funding at negligible interest rate
- Distribution of mini-mills complete with digester, presser, fiber separation, boiler-pot, sterilizer and generator to 95 cooperative societies to boost oil palm production in the State etc.
- Completed 3 oil palm mills in Ibesikpo Asutan, Ukanafun and Essien Udim LGAs
- Built three Ware houses for cooperative societies in the three senatorial districts of the state

Investment Opportunities

Akwa Ibom State is a rich reservoir of human and natural resources. The land is regarded as a safe haven for investment in the Gulf of Guinea and sub-Saharan Africa. The abundant natural resources in the State backed with liberal government economic policies make Akwa Ibom a veritable market for potential investors. In line with the desire of the present government to develop superior infrastructure and processes that will support the exploitation of the State's natural resources for growth and sustainable development, government has put in place developmental policies that will encourage a highly dependable and sophisticated private sector led economy in the State. The Akwa Ibom State main policy thrust on investment is a private sector driven economy leading full industrialization which shall then stimulate the expansion of the state's domestic production capacity, improve efficient production of goods and services, thereby creating employment opportunities and encourage a solid technology base.

Akwa Ibom State is quite conducive for investment growth. It has a very low crime rate. Unlike other States in the Niger- Delta region where youth restiveness and other forms of violence are regular features, Akwa Ibom State is very peaceful.

The people are hospitable and very accommodating. The conducive nature of the State is the source of the cordial relationship existing between corporate organizations operating in the State and the host communities.

Agriculture

Although Akwa Ibom State is rich in other natural endowments, a sizeable percentage of the State's economy is dependent on agriculture. The state overflows with agricultural resources, which makes it a goldmine for investors. The State is blessed with numerous rivers, creeks and streams, enhancing favourable all year season for agricultural activities.

The 31 local government areas in the State are involved in farming. While a large number of the farmers in the State are involved in the cultivation of food crops like cassava, yam, cocoyam, maize, rice, cowpea, melon, plantain, vegetables, banana, pineapples, African peas, etc, cash crops like oil palm, coconut, rubber, raffia palm, gmelina and kolanut are also cultivated by a large percentage of the population.

OIL PALM

One of the major industrial crops in the State is the Oil Palm Tree. The Oil Palm can be found in all the 31 Local Government Areas in the State. Akwa Ibom State is reputed to have the highest number of Oil Palm Trees per capita in Nigeria.

The Oil Palm produce when properly harnessed for economic development will aid the growth of the down stream industries which can extract and refine the oil for the manufacturing industries, who will in turn produce vegetable oil, soaps, margarine, glycerine, candles, detergents, polish, etc.

The Palm produce can also be exported to other parts of the world in large quantities. Other by-products from the Oil Palm industries are used for the production of feeds for livestock, domestic brooms, brushes, foot-mats as well as construction of house.

RUBBER

This is another industrial crop that is readily available in the State. Due to the oil boom of the 60's and the attendant over dependence on crude oil at the expense of agriculture, the cultivation of rubber in commercial quantities in Akwa Ibom State like other parts of the country, suffered a decline. However, some farmers have gone back to the cultivation of the tree for commercial purposes. This is with the support of the State Government. Rubber trees can be found in Itam, Oku, Ndon Ebom, Ifiayong Obot, Use Ikot Amama and some parts of Uyo.

Since global demand for rubber is on the increase, rubber industry will thrive greatly in the State. Rubber will boost the manufacturing industries as the derivatives are used in the production of rubber based products like tyres for automobiles and bicycles, mattresses, mackintosh, boots, shoes, foot mats, vulcanizing solutions etc.

COCOA

Cocoa is available in large quantities in Akwa Ibom State. It is grown in Ibiono Ibom, Ini, Itu and Ikono Local Government Areas of the State. Other Local Government Areas of the state also cultivate the cocoa trees, though not in commercial quantities. It could be processed for export and also used for various beverages, chocolates and other confectioneries.

FOREST RESERVES

Several tree species are found in Akwa Ibom State. They are found in all the Local Government Areas of the State and their products enjoy a very high demand the world over. The State Government is involved in forest preservation and at present, owns three forest reserves while Akwa Ibom State and Cross River State Government jointly own the fourth one. The State's reserves are Stubbs Creek Forest Reserves 310.87 sq. km in Eket and Oro Local Government Areas. 5.18sq. km in Odu Itu while Obot Ndon is 2.59 sq. km. Forest reserves in Ikono Local Government Area. The fourth forest reserve is Uwet Odot and is jointly administered by both Akwa Ibom and Cross River States.

The prominent species of trees in the State is gmelina arborea and pinnes carbaca, which are major sources of raw materials for paper and newsprint production. These species are abundant in Oku Iboku, in Itu local government area. Others are minuscopia warneki, canarium schweumfurthn, chlorophora excels (Ironwood), khaya grandifoliola (Mahogany), terminalia invarensis, superb, nauclea diderrichi (Opepe) uapapa sp, pterocarpus osseus, entadrophragrama cylindricum and lots of others. Nauclea diderrichi and tecfona grandis are used in the production of highly durable electric poles. Ancistrophyllum seandiflorum and calamus descalus are useful for cane making and basket weaving. The Akwa Ibom forest reserve is a sure bet for potential investment in the woodwork industries.

FISH PRODUCTION

Akwa Ibom has a coastline of about 129 kilometers, which is complemented by abundant rivers, tributaries, mangrove swamps, creeks and flood plains. The marine waters are very rich in aquatic animals and fishes, while the continental shelf, creeks and swamps are the natural homes for various species of fishes, crustaceans and shrimps.

The State's water is a very viable investment potential for export trawling for fish and shrimps, canning and fish processing, fish meal production, fish oil and glue industries. To encourage fish production in the state, government both at the State and Federal level have put in place facilities to assist both local fish farmers and large scale investors. Facilities for dry-docking, bunkering, berthing and discharging of fishing trawlers, sorting, processing and packaging of fish for export are all available at the Federal Government established Fishing Terminal at Ebughu in Mbo local government area.

Uruan, Itu, Ibeno, Mbo, Oron, Okobo and Ikot Abasi offer untapped fishing potentials for investors. The main species of fish in Akwa Ibom are bongas, crabs, oysters, sharks, bivalves, periwinkles, prawns and shrimps.

Solid Minerals

Akwa Ibom State is blessed with abundant opportunities for investments in the solid minerals sector. The land has rich deposits of metallic and nonmetallic minerals, which can be commercially exploited. These mineral deposits are distributed across all the local government areas of the state.

Metallic Minerals

The State has deposits of gold and silver nitrate. These metals are used in the production of jewellery and other ornaments.

Non Metallic Minerals

Large quantities of nonmetallic mineral are found in the State. They include the following:

CLAY: Different species of clay can be found distributed in some areas of the State.

Hydrated Alumino-silicate is found in parts of Eket, Etinan, Ikot Abasi, Ikot Ekpene, Ini, Itu, Onna, Oruk Anam and Nsit Atai Local Government Areas.

KAOLINTIC CLAY can be found in Itam in Itu and some parts of Ikot Ekpene local government areas. The hydrated Alumino-silicate can be used in the production of bricks for building houses and in the construction industry.

It can be used in the production of tiles, ceramics and potteries. Kaolintic clay is applied directly in the paint, paper, rubber, plastics and ceramic industries. It can be processed and used in the production of calamine lotion for babies, porcelains and china wares.

To assist investors, the Federal Government through her agency, The Raw Materials Research and Development Council, RMRDC has undertaken a number of studies on the availability of clay in the State.

The results are readily made available to prospective investors.

SILICA SAND

The State beaches, coastal plains, riverbeds and some sandstone units have abundant deposits of silica sand. High grade of silica sand can be found in Eket, Oron, Itu, Uquo Ibeno, Mbo, Abak, Ikot Ekpene and Etinan local government areas of the state. Investors in glass industries will find Akwa Ibom a very viable site for investment.

LIMESTONE

Limestone, a very important mineral deposit, used in the building and construction industry, is found in commercial quantity in Ikono and Ini Local Government Areas of the State.

This impure Calcium Carbonate is used in the manufacture of cement, hydrated lime, Calcium Carbide for welding and plaster-of-Paris used in hospitals

GRAVEL AND ROCKS

Large deposits of these minerals are found in Itu, Ini, Ikono and Oron. They are useful in the building/construction industry. Quarrying is a key investment area that could be exploited. Gravel and Rocks are in high demand, and quarry will be the source of supply of gravels and other construction materials to the construction sector within and outside the state.

SALT: Commercial deposits of salt can be found around the State. Salt can be processed into table salt for flavouring and food preservation, sodium carbonate, sodium hydroxide and industrial chemicals.

COAL : Akwa Ibom State lies within the coal producing area of the country. It has a large commercial deposit of coal, which can support the mining for domestic use and export purposes.

Solid Minerals

Akwa Ibom State is blessed with abundant opportunities for investments in the solid minerals sector. The land has rich deposits of metallic and nonmetallic minerals, which can be commercially exploited. These mineral deposits are distributed across all the local government areas of the state.

COAL : Akwa Ibom State lies within the coal producing area of the country. It has a large commercial deposit of coal, which can support the mining for domestic use and export purposes.

OIL & GAS

Akwa Ibom State due to her strategic location in the oil rich Niger-Delta region of the country is the second largest petroleum producing state in Nigeria.

It has the largest offshore production and per acreage, has yielded more petroleum reserves offshore than any other oil producing state in Nigeria.

Oil and Gas are available in commercial quantities in Ibeno, Mbo, Etinan, Idu, Enwang, Mkpat Enin and Onna Local Government Areas of the State.

The oil and gas sector is a very viable sector open to both local and international investors who are interested in the down and upstream sectors exploration and exploitation, gas development, conversion and crude oil marketing. Also available are opportunities in seismic data acquisition, processing and geotechnical engineering, oil field service companies, gas-powered industries, marginal fields etc.

Textile, Leather and Wearing Apparels.

Electrical and Electronics.

Domestic and Industrial Plastics Foam and Rubber.

Non-Metallic Materials.

Akwa Ibom Industrialization Agenda

INTRODUCTION

The industrialization of Akwa Ibom State is cardinal to Governor Godswill Akpabio's comprehensive development agenda in the State.

This much has been realised with the establishment of the Akwa Ibom Investment and Industrial and Corporation (AKICORP) to provide the institutional framework and strategy for the coordination and implementation of the industrialization of Akwa Ibom State.

Working in partnership with the Ministry of Economic Development, Ministry of Commerce and Industries, the new Akwa Ibom economy with industrialization as the driving force is gradually emerging.

Already, a comprehensive industrialization roadmap, investment incentives, financing models, opportunities and projects appraisal guidelines have been put in place to ensure that investors take full advantage of the industrial potentials in the State.

Akwa Ibom Industrialisation Roadmap

This Roadmap is intended to articulate Government's industrialization policy objectives and the strategies to guide the orderly implementation of the policy and programmes. The Roadmap recognizes the universal pre-conditions for sustainable industrial take-off, including:

- The existence of a vibrant middle-class of entrepreneurs. The growth of the entrepreneurial class with enough capital to start small businesses and the willingness to take risks;
- A literate workforce, with ability to function in modern factories and installations; with disposition to adopt new techniques and ideas. The human capital component of industrialization implies the availability of the right skills, work ethics, appropriate attitudinal orientation and value system, obtained through formal education, technical and vocational training and apprenticeship;
- Availability of adequate infrastructural development, covering investment in transportation (such as roads, bridges, drainage systems, airports, seaports), information and communications technology, power and utilities, etc., to facilitate economic interaction within the State and Nation;
- Appropriate and enabling institutional environment which is conducive to growth and investment through Public-Private Partnership (PPP), including existence of a vibrant financial services sector and effective Rule of Law which ensures that contracts can be enforced, and

guarantees political stability, security and social order. The State Government has invested substantially in the last five years to meet the above pre-conditions for industrial take-off, and these include massive investment in infrastructure, free and compulsory education, the growth and empowerment of the business class, adoption of the Public Private Partnership (PPP) framework and the restructuring of Akwa Ibom Investment and Industrial Promotion Council (AKIIPOC) into Akwa Ibom Investment Corporation. The Corporation is a Special Purpose Vehicle (SPV) established to facilitate the accelerated industrial development and investment promotion in the State. The Executive Bill on the PPP Council is before the State House of Assembly for consideration.

The responsibility for the establishment of new industries, reactivation of ailing industries and the promotion of Micro, small and Medium Enterprises (MSME) in the State is vested in AKIIPOC, which is being transformed into the Akwa Ibom Investment Corporation. We recognise that, to effectively carry out the responsibility, requires active collaboration with certain Agencies of Government (e.g. Ministries of Finance, Lands, Agriculture, Commerce and Industries; Bureau for Technical Matters, etc). The scope of this assignment requires that Akwa Ibom Investment Corporation:

- Identifies existing industries which are doing relatively well but require to consolidate and expand their operations;

- Identifies industries which are not doing well or have closed down for whatever reasons, and initiate remedial measures in providing technical and management support services;
- Provides technical guidance and advice to industrialists who are willing to take the risk and have the capacity to establish new industries, including feasibility studies;
- Takes necessary action to reactivate ailing industries which may require public advertisement for bids to ensure competitiveness and transparency.

To carry out these functions Akwa Ibom Investment Corporation is focusing on:

- Entrepreneurial capacity building through sensitisation and awareness creation programmes; we recognise that the private sector is relatively weak in Akwa Ibom State, although entrepreneurship in manufacturing and processing is emerging gradually;
- Nurturing new enterprises to maturity;
- Mentoring individual entrepreneurs;
- Provision of technical and management support services

- to Micro, Small, and Medium Enterprises (MSME);
- Promoting industrial culture and achievement orientation among our entrepreneurs;
- Mobilisation of the business class to key into Governor Akpabio's Transformation Agenda with industrialisation as the strategy for ensuring the accelerated socio-economic development of the State.

The stage is set for the effective implementation of the industrialisation policy and programme of Government in the State. The Industrialisation Roadmap covers:

- Policy Objectives;
- Implementation Strategies;
- Investment Opportunities and Incentives;
- Industrialisation Financing Models;
- Summary and Conclusions;
- Annexures:
 - List of Industrial Projects;
 - Project Appraisal Guidelines;
 - Letter to Stakeholders on Partnership for Industrial Transformation of Akwa Ibom State
 - Bank of Industry Checklist of Appraisal Requirements

Investment Incentives in Akwa Ibom State

As part of the efforts of the State Government to provide an enabling environment for the growth of enterprises, encourage inflow of investment as well as protect existing ones to stimulate the expansion of the industrial capacity of the economy, the State has developed a range of investment incentives for investors. This package of incentives, which is exclusive to Akwa Ibom State, is further enhanced by other Federal Government investment incentives, mainly in the areas of taxation and fiscal policies, as well as guarantees:

Land

The Government guarantees prompt allocation of land in respect of industrial, commercial, agricultural and housing projects anywhere in the State. Certificate(s) of Occupancy for such plots will be approved within one month.

Industrial Estates and Layouts

There is the existence of Industrial Estates/Layouts in Uyo, Eket, Ikot Abasi and IkotEkpene Local Government Areas. There is the plan to expand or establish new ones. The provision of infrastructure like water, access roads, electricity, telephone, etc to reduce cost of doing business, is embarked upon in the estates.

Export Processing Zone

The State Government has obtained approval from the Nigerian Export Processing Zone Authority (NEPZA), for the establishment of an Export Processing Zone status for the proposed export-

oriented refinery at Ikot Abasi, as well as the Ibom Science Park in Uyo. The incentives for an Export Processing Zone facility include:

- Three (3) years tax holiday
- Repatriation of foreign capital on investment in EPZ at any time with accompanying capital appreciation.
- Unrestricted remittance of profits and dividends earned by foreign investor in the EPZ
- No import or export license required.
- Rent free land during construction of factory premises.
- Up to 100% foreign ownership of enterprises in the zone
- Up to 100% sale of products produced outside the country
- No quotas on products from Nigeria exported to EU and USA
- EPZ goods entitled to preferential tariff in the EU.

It is hoped that with time, a full-fledged export free zone, particularly for oil and gas related activities, shall be established to promote export-oriented industries in the State

Provision of critical Infrastructure

The State has developed urban and rural roads motorable throughout the year. Uyo, the State capital has been completely transformed, with interconnected motorable roads. To meet the immediate and future power needs of the State, an independent power plant has been constructed at Ikot Abasi. It is expected to generate at least 685 megawatts of power to the national power system but the first phase of the project is generating about 85 megawatts of power presently.

Industrial Databank

The State has developed an Industrial Data Bank on available raw materials and natural resources to assist prospective investors make the best choices in their areas of interest.

Collection of Permits, Licence and Documentation

It is a policy of the State to facilitate and assist in the collection of all permits, licences, etc and ensure that all documentations needed by prospective investors to the State.

Business Advisory and Promotion Clinic

Akwa Ibom Investment Corporation has a full-fledged Investment Promotion & Appraisal Department as well as MSMEs Advisory Unit, to advise prospective investors as well as facilitate and establish business contacts with new investors.

Investment Incentives Of The Federal Government

The Federal Government investment incentives are designed to promote investments and create employment within the national economy. The incentives cover fiscal measures on taxation, effective promotion of local industries with import tariff, export promotion of made in Nigeria goods and foreign currency facility for international trade. They include:

Companies Income Tax

The Companies Income Tax Act has been amended in order to encourage potential and existing investors and entrepreneurs. The current rate in all sectors, except for petroleum, is 30 percent.

Pioneer Status

Pioneer status is a tax holiday granted to qualified industries anywhere in the Federation and seven-year tax holiday in respect of industries located in economically disadvantaged local government area of the Federation. At the moment, there is a list of 69 approved industries declared pioneer industries, which can benefit from tax holiday.

Tax Relief for Research and Development

Up to 120 percent of expenses on R&D are tax deductible, provided that such R&D activities are carried out in Nigeria and are connected with the business from which income or profits is derived. Also, for the purpose of R&D on Local raw materials, 140 percent of expenses are allowed.

Capital Allowances

The amount of capital allowance to be enjoyed in any year of assessment is restricted in Nigeria to 75 percent of assessable profit in case of manufacturing companies and 66 percent in case of others, except such companies in agro-allied industries that are not affected by this restriction. If leased assets are used in agro-allied ventures, the full (100%) capital allowance claimed will be granted. Moreover, where the leased assets are agricultural plants and equipment, there will be an additional investment allowance of 10 percent on such expenditure.

In-plant training

A two percent tax concession for a period of five years on the cost of facilities provided for training.

Infrastructure

20% of the cost of providing basic infrastructures such as roads, water, electricity, where they do not exist, is tax deductible.

Labour intensive mode of production

15% tax concession for 5 years. Concessions are graduated based on number of persons employed.

Local value added

10% tax concession for five (5) years for engineering industries, where some finished imported products serves as inputs.

Minimum local raw materials utilization

20% concession is granted for five years to industries that attain the following minimum level of local raw materials sourcing and utilization:

Agro-allied	-	70%
Engineering	-	60%
Chemicals	-	60%
Petrochemicals	-	70%

Financing Models

Finance is a critical success factor to any industrial project and, therefore, the lack of it, or inappropriate financing model, can be a cog in the wheel of Government's desire to industrialise the State. It was in recognition of this constraint that the Government made a provision of ₦15 billion for industrialisation in the 2012 Budget, which incidentally is tagged the "Budget of Industrialisation".

A hybrid financing arrangement is required to complement the State Government's effort and a waterproofed methodology for the administration of the Industrial Fund. Accordingly, the following funding models would be used to finance industrialisation programmes in the State:

Industrial Fund for SMEs:

Government is to establish an Industrial Fund to support MSME and to be administered by Akwa Ibom Investment Corporation. The legal framework for the establishment of the Fund is being worked out. The Fund would provide soft loans to entrepreneurs at a single digit interest rate. Akwa Ibom Investment Corporation would collaborate with Bank of Industry (BOI) to take advantage of Federal Government Matching Grant Policy and Commercial Banks for the administration of the Fund. Bank of Industry will match the fund placed with it by 100%, thereby creating a larger pool of funds for onward lending to our entrepreneurs with factories located in Akwa Ibom State. The Bank currently lends at 10%. With interest-free counterpart funds from AKSG, this interest rate will be reduced.

Build, Operate and Privatize:

This model will involve Government building industries, running, them and later putting them up for sale. This model is mostly applicable in situations where the private sector does not have access to the required level of capital to start new businesses or expand old ones. This makes it mandatory for Government to initiate industrial projects on its own. Such projects should be viable and easy to manage with a high percentage of local raw materials.

Public-Private-Partnership:

The private sector can partner with Government to establish strategic industries. PPP finance model has been effective in the development of infrastructure in the country. The same model can be applied in industrial development. The PPP bill is before the State House of Assembly for consideration.

Floating of Bonds:

Bonds can be floated to raise funds for the development of Industrial Estates and Parks. Developed parks and estates reduce entry challenges to industrialists.

Guidelines for Accessing the Industrial Fund

Industries are categorised by the Small and Medium Enterprises Development Agency of Nigeria (SMEDAN) into micro, small, medium and large scale:

- Micro enterprises employ below 10 workers and have assets worth ₦5 million or less, excluding land and buildings.
- Small enterprises employ below 50 workers and have

assets worth N50 million or less excluding land and buildings.

Medium scale enterprises employ below 200 workers and have assets worth N500 million or less excluding land and buildings.

Large scale enterprises employ more than 200 workers and have assets worth more than N500 million excluding land and buildings.

Akwa Ibom Investment Corporation will process applications from all categories of enterprises.

Applicants for the Industrial Fund will be required to:

Present a bankable Business Plan or Feasibility Study;

Demonstrate the ability and willingness to participate in the equity of the project;

Show proof of membership in any of the under-listed

Organised Private Sector (OPS) groups in Akwa Ibom State:

National Association of Small Scale Industrialists (NASSI)

National Association of Small and Medium Scale Enterprises (NASME)

- iii. Manufacturers Association of Nigeria (MAN)
 - iv. Chambers of Commerce: Uyo, Ikot Ekpene and Eket
 - v. Technology Incubation Centre (TIC)
 - vi. Nigerian Association of Women Entrepreneurs (NAWE)
 - vii. YouWin Entrepreneurs
 - viii. Akwa Ibom Manufacturers Forum
 - ix. Association of Nigerian Exporters (ANE)
- Pay into an Escrow Account with the Bank of Industry or any approved commercial bank, the equivalent of 20% of the total project cost, which amount will be used as working capital.
 - Upon payment of 20% of total project cost, recommendation will be made to the Bank of Industry for the financing of the remaining 80% of total project cost. This should equate to the cost of the equipment component of the project.

Project Appraisal Guidelines

To ensure uniformity in the appraisal of projects, the following format should be used:

1. **Project Definition**
 - What is the Project?
 - What is the scope?
 - Where will it be located?
 - What are the economic justifications for the proposed project?
2. **Promoters**
 - Who are the people behind the project?
 - What is the pedigree of the promoters?
 - Do they have the technical & financial capability to execute the project?
 - Do you have core or foreign investors to invest in the project?
3. **Technical Analysis of the Project**
 - Brief technical description of the project
 - Is the project technically feasible?
 - What is the period to fruition and gestation from conceptualization through design, construction and completion?
4. **Investment (Outlay) Requirements**
 - What are the investment requirements?
 - What are the contributions of the promoters?
 - What obligations are required of the State Government?
 - What are the estimated costs of the requirements?
5. **Funding of the Project**
 - How will the estimated cost of the project be funded?
 - What are the proposed equity stakes of each of the partners?
 - How much of the funding will be borrowed?
 - Who are the proposed lenders/fund providers?
 - Any evidence of confirmed commitment from the funds providers?
6. **Marketing Strategy**
 - Is there any market for the products/services of the proposed projects?
 - What is the size of the market? Is the project justifiable?
 - What is the proposed market entry strategy?
 - What is the marketing plan?
 - Assess the competitors' strengths and weaknesses
7. **Strength, Weaknesses, Opportunities & Threats (SWOT) Analysis of the Project**
 - Determine the strengths of the proposed project
 - Determine the weaknesses of the proposed project
 - Assess the opportunities available for the project
 - What threats/risks will the project be exposed to and how will they be mitigated?

8. **Viability Analysis**

- Assess the financial viability of the project
- Are there assumptions used in the financial projections feasible or realizable?
- Determine the viability or profitability indices such as ROI, Pay Back Period, IRR, etc.
- Proffer recommendations on the profitability of the project

9. **Employment Generation**

- What is the estimated manpower requirement for the project?
- What are the skill-sets required?
- Are the skill sets available locally in Akwa Ibom State?
- Have you identified the management team?

10. **Conclusion**

- Make the necessary recommendations on the project.
